If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline must not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled then
vkCmdSetDepthClampEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-09237
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage, then
  vkCmdSetTessellationDomainOriginEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08650
  If the depthClamp feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then
  vkCmdSetDepthClampEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07621
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled then
  vkCmdSetPolygonModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08651
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then
  vkCmdSetPolygonModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07622
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled then
  vkCmdSetRasterizationSamplesEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08652
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then
  vkCmdSetRasterizationSamplesEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07623
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled then
  vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-08653
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then
  vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiEXT-None-07624
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled then
  vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command
**VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT** dynamic state enabled then **vkCmdSetAlphaToCoverageEnableEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-alphaToCoverageEnable-08919**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT** dynamic state enabled, and **alphaToCoverageEnable** was **VK_TRUE** in the last call to **vkCmdSetAlphaToCoverageEnableEXT**, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- **VUID-vkCmdDrawMultiEXT-None-08654**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, then **vkCmdSetAlphaToCoverageEnableEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-08655**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT** dynamic state enabled then **vkCmdSetAlphaToOneEnableEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-07625**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT** dynamic state enabled then **vkCmdSetLogicOpEnableEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-08656**
  If the **logicOp** feature is enabled, and a shader object is bound to the **VK_SHADER_STAGE_FRAGMENT_BIT** stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, then **vkCmdSetLogicOpEnableEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-07627**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT** dynamic state enabled then **vkCmdSetColorBlendEnableEXT** must have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawMultiEXT-None-08657
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-None-07628
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-None-08658
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment's value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-None-07629
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-None-08659
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-None-07630
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-None-08660
  If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-None-07631
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-None-08661
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set...
rasterizerDiscardEnable to VK_FALSE, then \texttt{vkCmdSetConservativeRasterizationModeEXT} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-07632**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT} dynamic state enabled then \texttt{vkCmdSetExtraPrimitiveOverestimationSizeEXT} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-08662**
  If the \texttt{VK_EXT_conservative_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to VK_FALSE, and the most recent call to \texttt{vkCmdSetConservativeRasterizationModeEXT} in the current command buffer set \texttt{conservativeRasterizationMode} to VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then \texttt{vkCmdSetExtraPrimitiveOverestimationSizeEXT} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-07633**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetDepthClipEnableEXT} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-08663**
  If the \texttt{depthClipEnable} feature is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetDepthClipEnableEXT} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-07634**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetSampleLocationsEnableEXT} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-08664**
  If the \texttt{VK_EXT_sample_locations} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to VK_FALSE, then \texttt{vkCmdSetSampleLocationsEnableEXT} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-07635**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT} dynamic state enabled then \texttt{vkCmdSetColorBlendAdvancedEXT} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-None-07636**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT} dynamic state enabled then \texttt{vkCmdSetProvokingVertexModeEXT} must have been called in the current command buffer prior to this drawing command
buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08665
   If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-07637
   If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08666
   If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08667
   If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08668
   If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-07638
   If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08669
   If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08670
   If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command
If the VK_EXT_line_rasterization extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then...
vkCmdSetCoverageToColorEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08676
If the VK_NV_fragment_coverage_to_color extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoverageToColorEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-07643
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV dynamic state enabled then vkCmdSetCoverageToColorLocationNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08677
If the VK_NV_fragment_coverage_to_color extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetCoverageToColorEnableNV in the current command buffer set coverageToColorEnable to VK_TRUE, then vkCmdSetCoverageToColorLocationNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-07644
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV dynamic state enabled then vkCmdSetCoverageModulationModeNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08678
If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoverageModulationModeNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-07645
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV dynamic state enabled then vkCmdSetCoverageModulationTableEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08679
If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetCoverageModulationModeNV in the current command buffer set coverageModulationMode to any value other than VK_COVERAGE_MODULATION_MODE_NONE_NV, then vkCmdSetCoverageModulationTableEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-07646
If the bound graphics pipeline state was created with the
If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetCoverageModulationTableEnableNV} in the current command buffer set \texttt{coverageModulationTableEnable} to \texttt{VK_TRUE}, then \texttt{vkCmdSetCoverageModulationTableNV} must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetShadingRateImageEnableNV} must have been called in the current command buffer prior to this drawing command.

If the \texttt{VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetRepresentativeFragmentTestEnableNV} must have been called in the current command buffer prior to this drawing command.

If the \texttt{VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageReductionModeNV} must have been called in the current command buffer prior to this drawing command.

If the \texttt{shadingRateImage} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetShadingRateImageEnableNV} must have been called in the current command buffer prior to this drawing command.

If the \texttt{coverageReductionMode} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetCoverageReductionModeNV} must have been called in the current command buffer prior to this drawing command.

If the \texttt{coverageReductionMode} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetCoverageReductionModeNV} must have been called in the current command buffer prior to this drawing command.
graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiEXT-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view’s format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`

- **VUID-vkCmdDrawMultiEXT-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass

- **VUID-vkCmdDrawMultiEXT-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- **VUID-vkCmdDrawMultiEXT-samples-07473**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawMultiEXT-rasterizationSamples-07474**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or depth/stencil attachments

- **VUID-vkCmdDrawMultiEXT-None-09211**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the `rasterizationSamples` member of that structure

- **VUID-vkCmdDrawMultiEXT-firstAttachment-07476**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEnableEXT` calls must specify an enable for all active color attachments in the current subpass.

- **VUID-vkCmdDrawMultiEXT-firstAttachment-07477**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEquationEXT` calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled.

- **VUID-vkCmdDrawMultiEXT-firstAttachment-07478**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorWriteMaskEXT` calls must specify the color write mask for all active color attachments in the current subpass.

- **VUID-vkCmdDrawMultiEXT-firstAttachment-07479**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendAdvancedEXT` calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled.

- **VUID-vkCmdDrawMultiEXT-advancedBlendMaxColorAttachments-07480**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled and the last calls to `vkCmdSetColorBlendEnableEXT` and `vkCmdSetColorBlendAdvancedEXT` have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed `advancedBlendMaxColorAttachments`.

- **VUID-vkCmdDrawMultiEXT-primitivesGeneratedQueryWithNonZeroStreams-07481**
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, and the bound graphics pipeline was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` must have set the `rasterizationStream` to zero.

- **VUID-vkCmdDrawMultiEXT-sampleLocationsPerPixel-07482**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the
sampleLocationsPerPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

• VUID-vkCmdDrawMultiEXT-sampleLocationsPerPerPixel-07483
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, then the sampleLocationsPerPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT

• VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07484
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

• VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07485
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

• VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07486
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

• VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07487
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code must not statically use the extended instruction InterpolateAtSample

• VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the
**VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT** state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is **VK_TRUE** or **VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT** state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07937**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT** state disabled and the **VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT** state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is **VK_TRUE** or **VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT** state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawMultiEXT-sampleLocationsEnable-07938**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT** state disabled and the **VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT** state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is **VK_TRUE** or **VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT** state enabled, then, `sampleLocationsInfo.sampleLocationsPerPixel` must equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawMultiEXT-coverageModulationTableEnable-07488**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV** state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to **VK_TRUE**, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass.

- **VUID-vkCmdDrawMultiEXT-rasterizationSamples-07489**
  If the **VK_NV_framebuffer_mixed_samples** extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

- **VUID-vkCmdDrawMultiEXT-coverageToColorEnable-07490**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV** state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set the `coverageToColorEnable` to **VK_TRUE**, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV` with a `VkFormat` of **VK_FORMAT_R8_UINT**, **VK_FORMAT_R8_SINT**, **VK_FORMAT_R16_UINT**, **VK_FORMAT_R16_SINT**, **VK_FORMAT_R32_UINT**, or **VK_FORMAT_R32_SINT**
If the VK_NV_coverage_reduction_mode extension is enabled, the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, the current coverage reduction mode coverageReductionMode, then the current rasterizationSamples, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportSwizzleNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

If the VK_NV_framebuffer_mixed_samples extension is enabled, and if the current subpass has any color attachments and rasterizationSamples of the last call to vkCmdSetRasterizationSamplesEXT is greater than the number of color samples, then the pipeline sampleShadingEnable must be VK_FALSE.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT, then the stippledRectangularLines feature must be enabled.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT, then the stippledBresenhamLines feature must be enabled.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is
VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT, then the stippledSmoothLines feature must be enabled

• VUID-vkCmdDrawMultiEXT-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT, then the stippledRectangularLines feature must be enabled and VkPhysicalDeviceLimits::strictLines must be VK_TRUE

• VUID-vkCmdDrawMultiEXT-conservativePointAndLineRasterization-07499
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, conservativePointAndLineRasterization is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the conservativeRasterizationMode set by the last call to vkCmdSetConservativeRasterizationModeEXT must be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT

• VUID-vkCmdDrawMultiEXT-stage-07073
  If the currently bound pipeline was created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries must not be active

• VUID-vkCmdDrawMultiEXT-None-08877
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state and vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-07850
  If the dynamic state was inherited from VkCommandBufferInheritanceViewportScissorInfoNV, it must be set in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT

• VUID-vkCmdDrawMultiEXT-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT

• VUID-vkCmdDrawMultiEXT-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT

• VUID-vkCmdDrawMultiEXT-None-08687
If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT

- VUID-vkCmdDrawMultiEXT-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT

- VUID-vkCmdDrawMultiEXT-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT

- VUID-vkCmdDrawMultiEXT-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawMultiEXT-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages must have a valid VkShaderEXT bound, and the other must have no VkShaderEXT bound

- VUID-vkCmdDrawMultiEXT-None-08694
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created without the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, a valid VkShaderEXT must be bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

- VUID-vkCmdDrawMultiEXT-None-08695
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created with the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, there must be no VkShaderEXT bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

- VUID-vkCmdDrawMultiEXT-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there must be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

- VUID-vkCmdDrawMultiEXT-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call must also be bound

- VUID-vkCmdDrawMultiEXT-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call must not have any VkShaderEXT bound
• VUID-vkCmdDrawMultiEXT-None-08878
  All bound graphics shader objects **must** have been created with identical or identically
defined push constant ranges

• VUID-vkCmdDrawMultiEXT-None-08879
  All bound graphics shader objects **must** have been created with identical or identically
defined arrays of descriptor set layouts

• VUID-vkCmdDrawMultiEXT-None-08880
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage and the
`attachmentFeedbackLoopDynamicState` feature is enabled on the device, and the most
recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
`rasterizerDiscardEnable` to `VK_FALSE` `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must**
have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiEXT-pDynamicStates-08715
  If the bound graphics pipeline state includes a fragment shader stage, was created with
`VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` set in `VkPipelineDynamicStateCreateInfo` ::`pDynamicStates`, and the fragment shader declares the `EarlyFragmentTests` execution
mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call
to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

• VUID-vkCmdDrawMultiEXT-pDynamicStates-08716
  If the bound graphics pipeline state includes a fragment shader stage, was created with
`VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` set in `VkPipelineDynamicStateCreateInfo` ::`pDynamicStates`, and the fragment shader declares the `EarlyFragmentTests` execution
mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to
`vkCmdSetStencilWriteMask` **must** be 0

• VUID-vkCmdDrawMultiEXT-None-09116
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline
was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color
attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the
`pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of
`VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, and `VK_COLOR_COMPONENT_B_BIT`, or
none of them

• VUID-vkCmdDrawMultiEXT-maxFragmentDualSrcAttachments-09239
  If `blending` is enabled for any attachment where either the source or destination blend
factors for that attachment use the secondary color input, the maximum value of `Location`
for any output attachment statically used in the Fragment Execution Model executed by this
command **must** be less than `maxFragmentDualSrcAttachments`

• VUID-vkCmdDrawMultiEXT-commandBuffer-02712
  If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported,
any resource written to by the `VkPipeline` object bound to the pipeline bind point used by
this command **must** not be an unprotected resource

• VUID-vkCmdDrawMultiEXT-commandBuffer-02713
  If `commandBuffer` is a protected command buffer and `protectedNoFault` is not supported,
pipeline stages other than the framebuffer-space and compute stages in the `VkPipeline`
object bound to the pipeline bind point used by this command **must** not write to any
resource

• VUID-vkCmdDrawMultiEXT-commandBuffer-04617
  If any of the shader stages of the VkPipeline bound to the pipeline bind point used by this command uses the RayQueryKHR capability, then commandBuffer must not be a protected command buffer.

• VUID-vkCmdDrawMultiEXT-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must have either valid or VK_NULL_HANDLE buffers bound.

• VUID-vkCmdDrawMultiEXT-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must not be VK_NULL_HANDLE.

• VUID-vkCmdDrawMultiEXT-None-02721
  For a given vertex buffer binding, any attribute data fetched must be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description.

• VUID-vkCmdDrawMultiEXT-None-07842
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology must be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state.

• VUID-vkCmdDrawMultiEXT-None-04912
  If the bound graphics pipeline was created with both the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT and VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT dynamic states enabled, then vkCmdSetVertexInputEXT must have been called in the current command buffer prior to this draw command.

• VUID-vkCmdDrawMultiEXT-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT dynamic state enabled, but not the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2EXT must have been called in the current command buffer prior to this draw command, and the pStrides parameter of vkCmdBindVertexBuffers2EXT must not be NULL.

• VUID-vkCmdDrawMultiEXT-None-08881
  If a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, then vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdSetVertexInputEXT` must have been called in the current command buffer prior to this draw command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` must contain a location in `VkVertexInputAttributeDescription2EXT::location`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` must be the same as `VkVertexInputAttributeDescription2EXT::format`.

If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` must be 64-bit.

If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` must have a 64-bit component.

If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` must not use components that are not present in the format.

If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetVertexInputEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled then `vkCmdSetPatchControlPointsEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetPatchControlPointsEXT` must have been called in the current command buffer prior to this drawing command.
• VUID-vkCmdDrawMultiEXT-None-04879
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE` dynamic state enabled then `vkCmdSetPrimitiveRestartEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-rasterizerDiscardEnable-08884
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, `vkCmdSetPrimitiveRestartEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiEXT-stage-06481
  The bound graphics pipeline must not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT`.

• VUID-vkCmdDrawMultiEXT-None-08885
  There must be no shader object bound to either of the `VK_SHADER_STAGE_TASK_BIT_EXT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages.

• VUID-vkCmdDrawMultiEXT-None-04933
  The `multiDraw` feature must be enabled.

• VUID-vkCmdDrawMultiEXT-drawCount-04934
  `drawCount` must be less than `VkPhysicalDeviceMultiDrawPropertiesEXT::maxMultiDrawCount`.

• VUID-vkCmdDrawMultiEXT-drawCount-04935
  If `drawCount` is greater than zero, `pVertexInfo` must be a valid pointer to memory containing one or more valid instances of `VkMultiDrawInfoEXT` structures.

• VUID-vkCmdDrawMultiEXT-stride-04936
  `stride` must be a multiple of 4.

---

**Valid Usage (Implicit)**

• VUID-vkCmdDrawMultiEXT-commandBuffer-parameter
  `commandBuffer` must be a valid `VkCommandBuffer` handle.

• VUID-vkCmdDrawMultiEXT-commandBuffer-recording
  `commandBuffer` must be in the recording state.

• VUID-vkCmdDrawMultiEXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations.

• VUID-vkCmdDrawMultiEXT-renderpass
  This command must only be called inside of a render pass instance.

• VUID-vkCmdDrawMultiEXT-videocoding
  This command must only be called outside of a video coding scope.
Host Synchronization

- Host access to commandBuffer must be externally synchronized.
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized.

Command Properties

<table>
<thead>

<td></td>
<td></td>
</tr>
</tbody>
</table>

To record an ordered sequence of indexed drawing operations which have no state changes between them, call:

```c
// Provided by VK_EXT_multi_draw
define vkCmdDrawMultiIndexedEXT(  
    VkCommandBuffer commandBuffer,  
    uint32_t drawCount,            
    const VkMultiDrawIndexedInfoEXT* pIndexInfo,  
    uint32_t instanceCount,        
    uint32_t firstInstance,        
    uint32_t stride,               
    const int32_t* pVertexOffset);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `drawCount` is the number of draws to execute, and can be zero.
- `pIndexInfo` is a pointer to an array of `VkMultiDrawIndexedInfoEXT` with index information to be drawn.
- `instanceCount` is the number of instances to draw.
- `firstInstance` is the instance ID of the first instance to draw.
- `stride` is the byte stride between consecutive elements of `pIndexInfo`.
- `pVertexOffset` is NULL or a pointer to the value added to the vertex index before indexing into the vertex buffer. When specified, `VkMultiDrawIndexedInfoEXT::offset` is ignored.

`drawCount` indexed draws are executed with parameters taken from `pIndexInfo`. The number of draw commands recorded is `drawCount`, with each command reading, sequentially, a `firstIndex` and an `indexCount` from `pIndexInfo`. If `pVertexOffset` is NULL, a `vertexOffset` is also read from `pIndexInfo`, otherwise the value from dereferencing `pVertexOffset` is used.
Valid Usage

- **VUID-vkCmdDrawMultiIndexedEXT-magFilter-04553**
  If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-mipmapMode-04770**
  If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-06479**
  If a `VkImageView` is sampled with depth comparison, the image view's format features must contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-02691**
  If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-07888**
  If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features must contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-02692**
  If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- **VUID-vkCmdDrawMultiIndexedEXT-filterCubic-02694**
  Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- **VUID-vkCmdDrawMultiIndexedEXT-filterCubicMinmax-02695**
  Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`

- **VUID-vkCmdDrawMultiIndexedEXT-cubicRangeClamp-09212**
If the `cubicRangeClamp` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must not have a `VkSamplerReductionModeCreateInfo` with `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM`.

- **VUID-vkCmdDrawMultiIndexedEXT-reductionMode-09213**
  Any `VkImageView` being sampled with a `VkSamplerReductionModeCreateInfo`::`reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM` as a result of this command must sample with `VK_FILTER_CUBIC_EXT`.

- **VUID-vkCmdDrawMultiIndexedEXT-selectableCubicWeights-09214**
  If the `selectableCubicWeights` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have `VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights` equal to `VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM`.

- **VUID-vkCmdDrawMultiIndexedEXT-flags-02696**
  Any `VkImage` created with a `VkImageCreateInfo`::`flags` containing `VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV` sampled as a result of this command must only be sampled using a `VkSamplerAddressMode` of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`.

- **VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07027**
  For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view’s format features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07028**
  For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view’s format features must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07029**
  For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view’s buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawMultiIndexedEXT-OpTypeImage-07030**
  Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view’s buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08600**
  For each set `n` that is statically used by a bound shader, a descriptor set must have been bound to `n` at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set `n`, with the `VkPipelineLayout` or `VkDescriptorSetLayout` array that was used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08601**
  For each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as
described in Pipeline Layout Compatibility

- VUID-vkCmdDrawMultiIndexedEXT-maintenance4-08602
  If the maintenance4 feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

- VUID-vkCmdDrawMultiIndexedEXT-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, must be valid if they are statically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawMultiIndexedEXT-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline must have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawMultiIndexedEXT-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawMultiIndexedEXT-None-08604
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command

- VUID-vkCmdDrawMultiIndexedEXT-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline must have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawMultiIndexedEXT-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

- VUID-vkCmdDrawMultiIndexedEXT-None-08605
  If a descriptor is dynamically used with a VkShaderEXT created with a VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

- VUID-vkCmdDrawMultiIndexedEXT-None-08606
  If the shaderObject feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command

- VUID-vkCmdDrawMultiIndexedEXT-None-08607
  If the shaderObject is enabled, either a valid pipeline must be bound to the pipeline bind
point used by this command, or a valid combination of valid and `VK_NULL_HANDLE` shader objects **must** be bound to every supported shader stage corresponding to the pipeline bind point used by this command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08608**
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state not specified as dynamic in the `VkPipeline` object bound to the pipeline bind point used by this command, since that pipeline was bound.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08609**
  If the `VkPipeline` object bound to the pipeline bind point used by this command or any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a `VkSampler` object that uses unnormalized coordinates, that sampler **must** not be used to sample from any `VkImage` with a `VkImageView` of the type `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, `VK_IMAGE_VIEW_TYPE_1D_ARRAY`, `VK_IMAGE_VIEW_TYPE_2D_ARRAY`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`, in any shader stage.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08610**
  If the `VkPipeline` object bound to the pipeline bind point used by this command or any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a `VkSampler` object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name, in any shader stage.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08611**
  If the `VkPipeline` object bound to the pipeline bind point used by this command or any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a `VkSampler` object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions that includes a LOD bias or any offset values, in any shader stage.

- **VUID-vkCmdDrawMultiIndexedEXT-uniformBuffers-06935**
  If any stage of the `VkPipeline` object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT` or `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT` for `uniformBuffers`, and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08612**
  If the `robustBufferAccess` feature is not enabled, and any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

- **VUID-vkCmdDrawMultiIndexedEXT-storageBuffers-06936**
  If any stage of the `VkPipeline` object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT` or `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT` for `storageBuffers`,
and the `robustBufferAccess` feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawMultiIndexedEXT-None-08613**
  If the `robustBufferAccess` feature is not enabled, and any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02707**
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by **bound shaders** **must** not be a protected resource

- **VUID-vkCmdDrawMultiIndexedEXT-None-06550**
  If a **bound shader** accesses a `VkSampler` or `VkImageView` object that enables `sampler Y'C aC` conversion, that object **must** only be used with `OpImageSample*` or `OpImageSparseSample*` instructions

- **VUID-vkCmdDrawMultiIndexedEXT-ConstOffset-06551**
  If a **bound shader** accesses a `VkSampler` or `VkImageView` object that enables `sampler Y'C aC` conversion, that object **must** not use the `ConstOffset` and `Offset` operands

- **VUID-vkCmdDrawMultiIndexedEXT-viewType-07752**
  If a `VkImageView` is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Instruction/Sampler/Image View Validation

- **VUID-vkCmdDrawMultiIndexedEXT-format-07753**
  If a `VkImageView` is accessed as a result of this command, then the numeric type of the image view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match

- **VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-08795**
  If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's format

- **VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-08796**
  If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components

- **VUID-vkCmdDrawMultiIndexedEXT-OpImageWrite-04469**
  If a `VkBufferView` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format

- **VUID-vkCmdDrawMultiIndexedEXT-SampledType-04470**
  If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64

- **VUID-vkCmdDrawMultiIndexedEXT-SampledType-04471**
  If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is
accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32

- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 64

- VUID-vkCmdDrawMultiIndexedEXT-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32

- VUID-vkCmdDrawMultiIndexedEXT-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawMultiIndexedEXT-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawMultiIndexedEXT-OpImageWeightedSampleQCOM-06971
  If OpImageWeightedSampleQCOM is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM

- VUID-vkCmdDrawMultiIndexedEXT-OpImageWeightedSampleQCOM-06972
  If OpImageWeightedSampleQCOM uses a VkImageView as a sample weight image as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM

- VUID-vkCmdDrawMultiIndexedEXT-OpImageBoxFilterQCOM-06973
  If OpImageBoxFilterQCOM is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM

- VUID-vkCmdDrawMultiIndexedEXT-OpImageBlockMatchSSDQCOM-06974
  If OpImageBlockMatchSSDQCOM is used to read from an VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

- VUID-vkCmdDrawMultiIndexedEXT-OpImageBlockMatchSADQCOM-06975
  If OpImageBlockMatchSADQCOM is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

- VUID-vkCmdDrawMultiIndexedEXT-OpImageWeightedSampleQCOM-06977
If OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, or OpImageBlockMatchSSDQCOM uses a VkSampler as a result of this command, then the sampler must have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM.

If any command other than OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, OpImageBlockMatchSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler must not have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM.

If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM.

If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view's format must be a single-component format.

If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.

Any shader invocation executed by this command must terminate.

The current render pass must be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS.

The subpass index of the current render pass must be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS.

If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set.

If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it must be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass.

Input attachment views accessed in a subpass must be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is...
compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the currently bound VkFramebuffer as specified by Fragment Input Attachment Compatibility

• VUID-vkCmdDrawMultiIndexedEXT-None-06537
Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command

• VUID-vkCmdDrawMultiIndexedEXT-None-09000
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  ◦ the VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  ◦ the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_COLOR_BIT and
    ▪ there is no currently bound graphics pipeline or
    ▪ the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

• VUID-vkCmdDrawMultiIndexedEXT-None-09001
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  ◦ the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  ◦ the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_DEPTH_BIT and
    ▪ there is no currently bound graphics pipeline or
    ▪ the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

• VUID-vkCmdDrawMultiIndexedEXT-None-09002
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  ◦ the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  ◦ the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_STENCIL_BIT and
    ▪ there is no currently bound graphics pipeline or
    ▪ the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in
any way other than as an attachment by this command

- **VUID-vkCmdDrawMultiIndexedEXT-None-09003**
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- **VUID-vkCmdDrawMultiIndexedEXT-None-06539**
  If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command **must** not write to that image subresource as an attachment

- **VUID-vkCmdDrawMultiIndexedEXT-None-06886**
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, **depth writes must be disabled**

- **VUID-vkCmdDrawMultiIndexedEXT-None-06887**
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back **writeMask** are not zero, and stencil test is enabled, **all stencil ops must be VK_STENCIL_OP_KEEP**

- **VUID-vkCmdDrawMultiIndexedEXT-None-07831**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT** dynamic state enabled then **vkCmdSetViewport** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-07832**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SCISSOR** dynamic state enabled then **vkCmdSetScissor** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-07833**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LINE_WIDTH** dynamic state enabled then **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-08617**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetPolygonModeEXT** in the current command buffer set **polygonMode** to **VK_POLYGON_MODE_LINE**, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-08618**
  If a shader object is bound to the **VK_SHADER_STAGE_VERTEX_BIT** stage, and the most recent call to **vkCmdSetPrimitiveTopology** in the current command buffer set **primitiveTopology** to any line topology, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-08619**
  If a shader object that outputs line primitives is bound to the **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT** or **VK_SHADER_STAGE_GEOMETRY_BIT** stage, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawMultiIndexedEXT-None-07834
   If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS`
   dynamic state enabled then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` **must** have
   been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiIndexedEXT-None-08620
   If a shader object is bound to any graphics stage, and the most recent call to
   `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
   `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to
   `vkCmdSetDepthBiasEnable` in the current command buffer set `depthBiasEnable` to `VK_TRUE`,
   `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` **must** have been called in the current
   command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiIndexedEXT-None-07835
   If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS`
   dynamic state enabled then `vkCmdSetBlendConstants` **must** have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiIndexedEXT-None-08621
   If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent
   call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
   `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to
   `vkCmdSetColorBlendEnableEXT` in the current command buffer set any element of
   `pColorBlendEnables` to `VK_TRUE`, and the most recent call to
   `vkCmdSetColorBlendEquationEXT` in the current command buffer set the same element of
   `pColorBlendEquations` to a `VkColorBlendEquationEXT` structure with any `VkBlendFactor`
   member with a value of `VK_BLEND_FACTOR_CONSTANT_COLOR`,
   `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or
   `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, `vkCmdSetBlendConstants` **must** have been
   called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiIndexedEXT-None-07836
   If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS`
   dynamic state enabled then `vkCmdSetDepthBounds` **must** have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiIndexedEXT-None-08622
   If a shader object is bound to any graphics stage, and the most recent call to
   `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
   `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to
   `vkCmdSetDepthBoundsTestEnable` in the current command buffer set `depthBoundsTestEnable` to `VK_TRUE`, then
   `vkCmdSetDepthBounds` **must** have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiIndexedEXT-None-07837
   If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK`
   dynamic state enabled then `vkCmdSetStencilCompareMask` **must** have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMultiIndexedEXT-None-08623
   If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiIndexedEXT-None-07838
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled then vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiIndexedEXT-None-08624
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiIndexedEXT-None-07839
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled then vkCmdSetStencilReference must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiIndexedEXT-None-08625
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilReference must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiIndexedEXT-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex

• VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

• VUID-vkCmdDrawMultiIndexedEXT-None-06666
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiIndexedEXT-None-08626
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetSampleLocationsEnableEXT in the current command buffer set sampleLocationsEnable to VK_TRUE, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled then `vkCmdSetCullMode` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCullMode` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled then `vkCmdSetFrontFace` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFrontFace` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthTestEnable` in the current command buffer set `depthTestEnable` to `VK_TRUE`, then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the depthBounds feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the depthBounds feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with both the \texttt{VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic states enabled then both \texttt{vkCmdSetViewportWithCount} and \texttt{vkCmdSetScissorWithCount} must have been called in the current command buffer prior to this drawing command, and the \texttt{viewportCount} parameter of \texttt{vkCmdSetViewportWithCount} must match the \texttt{scissorCount} parameter of \texttt{vkCmdSetScissorWithCount}.

If the bound graphics pipeline state was created with both the \texttt{VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic states enabled then both \texttt{vkCmdSetViewportWithCount} and \texttt{vkCmdSetScissorWithCount} must have been called in the current command buffer prior to this drawing command, and the \texttt{viewportCount} parameter of \texttt{vkCmdSetViewportWithCount} must match the \texttt{scissorCount} parameter of \texttt{vkCmdSetScissorWithCount}.

If the bound graphics pipeline state was created with both the \texttt{VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV} dynamic states enabled then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWScalingNV} must be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}.

If the bound graphics pipeline state was created with both the \texttt{VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV} dynamic states enabled then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWScalingNV} must be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}.

If a shader object is bound to any graphics stage, and the \texttt{VK_NV_clip_space_w_scaling} extension is enabled on the device, then \texttt{vkCmdSetViewportWScalingNV} must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the \texttt{VK_NV_clip_space_w_scaling} extension is enabled on the device, then \texttt{vkCmdSetViewportWScalingNV} must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the \texttt{VK_NV_clip_space_w_scaling} extension is enabled on the device, then \texttt{vkCmdSetViewportWScalingNV} must have been called in the current command buffer prior to this drawing command.
extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMultiIndexedEXT-viewportCount-04139**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMultiIndexedEXT-viewportCount-04140**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic states enabled, then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMultiIndexedEXT-shadingRateImage-09233**
  If the `shadingRateImage` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-shadingRateImage-09234**
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetShadingRateImageEnableNV` in the current command buffer set `shadingRateImageEnable` to `VK_TRUE`, then `vkCmdSetViewportShadingRatePaletteNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08637**
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMultiIndexedEXT-VkPipelineViewportCreateInfo-04141**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportSwizzleStateCreateInfoNV` structure chained from `VkPipelineViewportCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMultiIndexedEXT-VkPipelineViewportCreateInfo-04142**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportExclusiveScissorStateCreateInfoNV` structure chained from
VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMultiIndexedEXT-None-07878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV dynamic state enabled then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07879
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV dynamic state enabled then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-exclusiveScissor-09235
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08638
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetExclusiveScissorEnableNV in the current command buffer set any element of pExclusiveScissorEnables to VK_TRUE, then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-04876
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08639
  If a shader object is bound to any graphics stage, then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-04877
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08640
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-logicOp-04878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled then vkCmdSetLogicOpEXT must have been called in the current
command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.

- VUID-vkCmdDrawMultiIndexedEXT-None-08641
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the `logicOp` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.

- VUID-vkCmdDrawMultiIndexedEXT-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

- VUID-vkCmdDrawMultiIndexedEXT-blendEnable-04727
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be `VK_FALSE`.

- VUID-vkCmdDrawMultiIndexedEXT-None-08644
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`.

- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07284
  If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

- VUID-vkCmdDrawMultiIndexedEXT-None-08644
If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, and none of the VK_AMD_mixed_attachment_samples
extension, the VK_NV_framebuffer_mixed_samples extension, or the
multisampledRenderToSingleSampled feature is enabled, then the most recent call to
vkCmdSetRasterizationSamplesEXT in the current command buffer must have set
rasterizationSamples to be the same as the number of samples for the current render pass
color and/or depth/stencil attachments

• VUID-vkCmdDrawMultiIndexedEXT-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance must
  have been begun with vkCmdBeginRendering

• VUID-vkCmdDrawMultiIndexedEXT-imageView-06172
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView
  member of pDepthAttachment is not VK_NULL_HANDLE, and the layout member of
  pDepthAttachment is VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL, this command must
  not write any values to the depth attachment

• VUID-vkCmdDrawMultiIndexedEXT-imageView-06173
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView
  member of pStencilAttachment is not VK_NULL_HANDLE, and the layout member of
  pStencilAttachment is VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL, this command must
  not write any values to the stencil attachment

• VUID-vkCmdDrawMultiIndexedEXT-imageView-06174
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView
  member of pDepthAttachment is not VK_NULL_HANDLE, and the layout member of
  pDepthAttachment is VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL, this
  command must not write any values to the depth attachment

• VUID-vkCmdDrawMultiIndexedEXT-imageView-06175
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView
  member of pStencilAttachment is not VK_NULL_HANDLE, and the layout member of
  pStencilAttachment is VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL, this command must
  not write any values to the stencil attachment

• VUID-vkCmdDrawMultiIndexedEXT-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the currently
  bound graphics pipeline must have been created with a VkPipelineRenderingCreateInfo
  ::viewMask equal to VkRenderingInfo::viewMask
If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachementFormats` used to create the currently bound graphics pipeline.

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics.
pipeline

- VUID-vkCmdDrawMultiIndexedEXT-None-08647
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance.

- VUID-vkCmdDrawMultiIndexedEXT-None-07751
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`.

- VUID-vkCmdDrawMultiIndexedEXT-None-07880
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-rasterizerDiscardEnable-09236
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-08648
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-08649
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with `vkCmdBeginRendering`, the...
dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08914
If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView

• VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08915
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08916
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08917
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMultiIndexedEXT-dynamicRenderingUnusedAttachments-08918
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMultiIndexedEXT-imageView-06183
If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

• VUID-vkCmdDrawMultiIndexedEXT-imageView-06184
If the current render pass instance was begun with vkCmdBeginRendering and
VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT

- VUID-vkCmdDrawMultiIndexedEXT-colorAttachmentCount-06185
  If the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the corresponding element of the pColorAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline

- VUID-vkCmdDrawMultiIndexedEXT-pDepthAttachment-06186
  If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView

- VUID-vkCmdDrawMultiIndexedEXT-pStencilAttachment-06187
  If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView

- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07285
  If the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the value of rasterizationSamples for the currently bound graphics pipeline

- VUID-vkCmdDrawMultiIndexedEXT-multisampledRenderToSingleSampled-07286
  If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline must have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, rasterization discard must not be enabled.

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, non-zero streams must not be enabled.
If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline must not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07619**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07620**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-09237**
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08650**
  If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07621**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07622**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08652**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08653
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07624
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- VUID-vkCmdDrawMultiIndexedEXT-None-08654
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- VUID-vkCmdDrawMultiIndexedEXT-None-07625
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08655
  If the `alphaToOne` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07626
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled then `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer prior to this drawing command
If the `logicOp` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment's value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the `geometryStreams` feature is enabled, and a shader object is bound to the
VK_SHADER_STAGE_GEOMETRY_BIT stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07631**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08661**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07632**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08662**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetConservativeRasterizationModeEXT` in the current command buffer set `conservativeRasterizationMode` to `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07633**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08663**
  If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07634**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08664**
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then
vkCmdSetSampleLocationsEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07635
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07636
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled then vkCmdSetProvokingVertexModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08665
  If the VK_EXT_provoking_vertex extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, then vkCmdSetProvokingVertexModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07637
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled then vkCmdSetLineRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08666
  If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetPolygonModeEXT in the current command buffer set polygonMode to VK_POLYGON_MODE_LINE, then vkCmdSetLineRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08667
  If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to vkCmdSetPrimitiveTopology in the current command buffer set primitiveTopology to any line topology, then vkCmdSetLineRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08668
  If the VK_EXT_line_rasterization extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then vkCmdSetLineRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07638
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled then vkCmdSetLineStippleEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08669
If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPolygonModeEXT} in the current command buffer set \texttt{polygonMode} to \texttt{VK\_POLYGON\_MODE\_LINE}, then \texttt{vkCmdSetLineStippleEnableEXT} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-08670
  If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to \texttt{vkCmdSetPrimitiveTopology} in the current command buffer set \texttt{primitiveTopology} to any line topology, then \texttt{vkCmdSetLineStippleEnableEXT} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-08671
  If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then \texttt{vkCmdSetLineStippleEnableEXT} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-07849
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEXT} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-08672
  If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetLineStippleEnableEXT} in the current command buffer set \texttt{stippledLineEnable} to \texttt{VK\_TRUE}, then \texttt{vkCmdSetLineStippleEXT} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-07639
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_DEPTH\_CLIP\_NEGATIVE\_ONE\_TO\_ONE\_EXT} dynamic state enabled then \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-08673
  If the \texttt{depthClipControl} feature is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-07640
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_W\_SCALING\_ENABLE\_NV} dynamic state enabled then \texttt{vkCmdSetViewportWScalingEnableNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-08674
  If the \texttt{VK\_NV\_clip\_space\_w\_scaling} extension is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetViewportWScalingEnableNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMultiIndexedEXT-None-07641
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08675
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07642
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08676
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07643
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV` dynamic state enabled then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08677
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetCoverageToColorEnableNV` in the current command buffer set `coverageToColorEnable` to `VK_TRUE`, then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07644
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08678
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-07645
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.
command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-08679**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationModeNV` in the current command buffer set `coverageModulationMode` to any value other than `VK_COVERAGE_MODULATION_MODE_NONE_NV`, then `vkCmdSetCoverageModulationTableEnableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-07646**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-08680**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationTableEnable` to `VK_TRUE`, then `vkCmdSetCoverageModulationTableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-07647**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV` dynamic state enabled then `vkCmdSetShadingRateImageEnableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-pipelineFragmentShadingRate-09238**
  If the `pipelineFragmentShadingRate` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFragmentShadingRateKHR` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-08681**
  If the `shadingRateImage` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetShadingRateImageEnableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-07648**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV` dynamic state enabled then `vkCmdSetRepresentativeFragmentTestEnableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-None-08682**
  If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any
graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-07649**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-None-08683**
  If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMultiIndexedEXT-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view’s format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`.

- **VUID-vkCmdDrawMultiIndexedEXT-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass.

- **VUID-vkCmdDrawMultiIndexedEXT-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline.

- **VUID-vkCmdDrawMultiIndexedEXT-samples-07473**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawMultiIndexedEXT-rasterizationSamples-07474**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to...
vkCmdSetRasterizationSamplesEXT must be the same as the current subpass color and/or depth/stencil attachments

- VUID-vkCmdDrawMultiIndexedEXT-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must be the same as the rasterizationSamples member of that structure

- VUID-vkCmdDrawMultiIndexedEXT-firstAttachment-07476
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEnableEXT calls must specify an enable for all active color attachments in the current subpass

- VUID-vkCmdDrawMultiIndexedEXT-firstAttachment-07477
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEquationEXT calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawMultiIndexedEXT-firstAttachment-07478
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorWriteMaskEXT calls must specify the color write mask for all active color attachments in the current subpass

- VUID-vkCmdDrawMultiIndexedEXT-firstAttachment-07479
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawMultiIndexedEXT-advancedBlendMaxColorAttachments-07480
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of
active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments

- **VUID-vkCmdDrawMultiIndexedEXT-primitivesGeneratedQueryWithNonZeroStreams-07481**
  If the *primitivesGeneratedQueryWithNonZeroStreams* feature is not enabled and the *VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT* query is active, and the bound graphics pipeline was created with *VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT* state enabled, the last call to *vkCmdSetRasterizationStreamEXT* must have set the *rasterizationStream* to zero

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsPerPixel-07482**
  If the bound graphics pipeline state was created with the *VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT* state enabled and the *VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT* state disabled, then the *sampleLocationsPerPixel* member of *pSampleLocationsInfo* in the last call to *vkCmdSetSampleLocationsEXT* must equal the *rasterizationSamples* member of the *VkPipelineMultisampleStateCreateInfo* structure the bound graphics pipeline has been created with

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsPerPixel-07483**
  If the bound graphics pipeline state was created with the *VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT* state enabled and the *VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT* state enabled, then the *sampleLocationsPerPixel* member of *pSampleLocationsInfo* in the last call to *vkCmdSetSampleLocationsEXT* must equal the *rasterizationSamples* parameter of the last call to *vkCmdSetRasterizationSamplesEXT*

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07484**
  If the bound graphics pipeline was created with the *VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT* state enabled, and *sampleLocationsEnable* was *VK_TRUE* in the last call to *vkCmdSetSampleLocationsEnableEXT*, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the *VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT* bit set

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07485**
  If the bound graphics pipeline state was created with the *VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT* state enabled and the *VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT* state enabled, and if *sampleLocationsEnable* was *VK_TRUE* in the last call to *vkCmdSetSampleLocationsEnableEXT*, then the *sampleLocationsInfo.sampleLocationGridSize.width* in the last call to *vkCmdSetSampleLocationsEXT* must evenly divide *VkMultisamplePropertiesEXT::sampleLocationGridSize.width* as returned by *vkGetPhysicalDeviceMultisamplePropertiesEXT* with a *samples* parameter equaling *rasterizationSamples*

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07486**
  If the bound graphics pipeline state was created with the *VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT* state enabled and the *VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT* state enabled, and if *sampleLocationsEnable* was *VK_TRUE* in the last call to *vkCmdSetSampleLocationsEnableEXT*, then the *sampleLocationsInfo.sampleLocationGridSize.height* in the last call to *vkCmdSetSampleLocationsEnableEXT*...
vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07487**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code must not statically use the extended instruction InterpolateAtSample

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07936**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.width must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07937**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.height must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- **VUID-vkCmdDrawMultiIndexedEXT-sampleLocationsEnable-07938**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationsPerPixel must equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- **VUID-vkCmdDrawMultiIndexedEXT-coverageModulationTableEnable-07488**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV state enabled and the last call to vkCmdSetCoverageModulationTableEnableNV set coverageModulationTableEnable to VK_TRUE, then the coverageModulationTableCount parameter in the last call to vkCmdSetCoverageModulationTableNV must equal the current rasterizationSamples divided by the number of color samples in the current subpass

- **VUID-vkCmdDrawMultiIndexedEXT-rasterizationSamples-07489**
If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

- **VUID-vkCmdDrawMultiIndexedEXT-coverageToColorEnable-07490**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set the `coverageToColorEnable` to `VK_TRUE`, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV` `coverageToColorLocation`, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.

- **VUID-vkCmdDrawMultiIndexedEXT-coverageReductionMode-07491**
  If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode`, then the current `rasterizationSamples`, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by `vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV`.

- **VUID-vkCmdDrawMultiIndexedEXT-viewportCount-07492**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMultiIndexedEXT-viewportCount-07493**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportSwizzleNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMultiIndexedEXT-rasterizationSamples-07494**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if the current subpass has any color attachments and `rasterizationSamples` of the last call to `vkCmdSetRasterizationSamplesEXT` is greater than the number of color samples, then the pipeline `sampleShadingEnable` must be `VK_FALSE`.

- **VUID-vkCmdDrawMultiIndexedEXT-stippledLineEnable-07495**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT`, then the `stippledRectangularLines` feature must be enabled.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT`, then the `stippledBresenhamLines` feature must be enabled.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT`, then the `stippledSmoothLines` feature must be enabled.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature must be enabled and `VkPhysicalDeviceLimits::strictLines` must be `VK_TRUE`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, conservativePointAndLineRasterization is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to `vkCmdSetConservativeRasterizationModeEXT` must be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`.

If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` must not be active.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.
If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-08685**
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-08686**
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-08687**
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-08688**
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-08689**
  If there is no bound graphics pipeline, and the taskShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-08690**
  If there is no bound graphics pipeline, and the meshShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`

- **VUID-vkCmdDrawMultiIndexedEXT-None-08693**
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages must have a valid VkShaderEXT bound, and the other must have no VkShaderEXT bound

- **VUID-vkCmdDrawMultiIndexedEXT-None-08694**
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that VkShaderEXT was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid VkShaderEXT must be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage

- **VUID-vkCmdDrawMultiIndexedEXT-None-08695**
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that VkShaderEXT was created with the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, there must be no VkShaderEXT bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage

- **VUID-vkCmdDrawMultiIndexedEXT-None-08696**
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there must be no VkShaderEXT bound to either the
VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

- **VUID-vkCmdDrawMultiIndexedEXT-None-08698**
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call must also be bound

- **VUID-vkCmdDrawMultiIndexedEXT-None-08699**
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call must not have any VkShaderEXT bound

- **VUID-vkCmdDrawMultiIndexedEXT-None-08878**
  All bound graphics shader objects must have been created with identical or identically defined push constant ranges

- **VUID-vkCmdDrawMultiIndexedEXT-None-08879**
  All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

- **VUID-vkCmdDrawMultiIndexedEXT-None-08880**
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMultiIndexedEXT-pDynamicStates-08715**
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable must be VK_FALSE

- **VUID-vkCmdDrawMultiIndexedEXT-pDynamicStates-08716**
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_STENCIL_WRITE_MASK set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask must be 0

- **VUID-vkCmdDrawMultiIndexedEXT-None-09116**
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT must either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, and VK_COLOR_COMPONENT_B_BIT, or none of them

- **VUID-vkCmdDrawMultiIndexedEXT-maxFragmentDualSrcAttachments-09239**
  If blending is enabled for any attachment where either the source or destination blend
factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command must be less than maxFragmentDualSrcAttachments

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02712
  If commandBuffer is a protected command buffer and protectedNoFault is not supported, any resource written to by the VkPipeline object bound to the pipeline bind point used by this command must not be an unprotected resource

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-02713
  If commandBuffer is a protected command buffer and protectedNoFault is not supported, pipeline stages other than the framebuffer-space and compute stages in the VkPipeline object bound to the pipeline bind point used by this command must not write to any resource

- VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-04617
  If any of the shader stages of the VkPipeline bound to the pipeline bind point used by this command uses the RayQueryKHR capability, then commandBuffer must not be a protected command buffer

- VUID-vkCmdDrawMultiIndexedEXT-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must have either valid or VK_NULL_HANDLE buffers bound

- VUID-vkCmdDrawMultiIndexedEXT-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must not be VK_NULL_HANDLE

- VUID-vkCmdDrawMultiIndexedEXT-None-02721
  For a given vertex buffer binding, any attribute data fetched must be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawMultiIndexedEXT-None-07842
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology must be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state

- VUID-vkCmdDrawMultiIndexedEXT-None-04912
  If the bound graphics pipeline was created with both the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT and VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT dynamic states enabled, then vkCmdSetVertexInputEXT must have been called in the current command buffer prior to this draw command
• VUID-vkCmdDrawMultiIndexedEXT-pStrides-04913
If the bound graphics pipeline was created with the
VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT dynamic state enabled, but not the
VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then
vkCmdBindVertexBuffers2EXT must have been called in the current command buffer prior to this draw command, and the pStrides parameter of
vkCmdBindVertexBuffers2EXT must not be NULL

• VUID-vkCmdDrawMultiIndexedEXT-None-08881
If a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, then
vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMultiIndexedEXT-None-04914
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then
vkCmdSetVertexInputEXT must have been called in the current command buffer prior to this draw command

• VUID-vkCmdDrawMultiIndexedEXT-None-07939
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then all variables with the
Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint
must contain a location in VkVertexInputAttributeDescription2EXT::location

• VUID-vkCmdDrawMultiIndexedEXT-Input-07939
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then all variables with the
Input storage class decorated with Location in the Vertex Execution Model OpEntryPoint
must be the same as VkVertexInputAttributeDescription2EXT::format

• VUID-vkCmdDrawMultiIndexedEXT-format-08936
If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the
VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and
VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model OpEntryPoint must be 64-bit

• VUID-vkCmdDrawMultiIndexedEXT-format-08937
If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the
VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model OpEntryPoint is 64-bit, then the corresponding
VkVertexInputAttributeDescription2EXT::format must have a 64-bit component

• VUID-vkCmdDrawMultiIndexedEXT-None-09203
If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the
VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, and
VkVertexInputAttributeDescription2EXT::format has a 64-bit component, then all
Input variables at the corresponding Location in the Vertex Execution Model OpEntryPoint
must not use components that are not present in the format

• VUID-vkCmdDrawMultiIndexedEXT-None-08882
If a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, then
vkCmdSetVertexInputEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-04875
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled then vkCmdSetPatchControlPointsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-08883
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage, then vkCmdSetPatchControlPointsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-None-04879
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-rasterizerDiscardEnable-08884
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, vkCmdSetPrimitiveRestartEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMultiIndexedEXT-stage-06481
  The bound graphics pipeline must not have been created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawMultiIndexedEXT-None-08885
  There must be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages

- VUID-vkCmdDrawMultiIndexedEXT-None-07312
  An index buffer must be bound

- VUID-vkCmdDrawMultiIndexedEXT-robustBufferAccess2-07825
  If robustBufferAccess2 is not enabled, (indexSize × (firstIndex + indexCount) + offset) must be less than or equal to the size of the bound index buffer, with indexSize being based on the type specified by indexType, where the index buffer, indexType, and offset are specified via vkCmdBindIndexBuffer

- VUID-vkCmdDrawMultiIndexedEXT-robustBufferAccess2-08798
  If robustBufferAccess2 is not enabled, (indexSize × (firstIndex + indexCount) + offset) must be less than or equal to the size of the bound index buffer, with indexSize being based on the type specified by indexType, where the index buffer, indexType, and offset are specified via vkCmdBindIndexBuffer or vkCmdBindIndexBuffer2KHR. If vkCmdBindIndexBuffer2KHR is used to bind the index buffer, the size of the bound index buffer is vkCmdBindIndexBuffer2KHR::size
The multiDraw feature **must** be enabled.

- **VUID-vkCmdDrawMultiIndexedEXT-None-04937**
  The multiDraw feature **must** be enabled.

- **VUID-vkCmdDrawMultiIndexedEXT-drawCount-04939**
  
  The `drawCount` **must** be less than `VkPhysicalDeviceMultiDrawPropertiesEXT::maxMultiDrawCount`.

- **VUID-vkCmdDrawMultiIndexedEXT-drawCount-04940**
  
  If `drawCount` is greater than zero, `pIndexInfo` **must** be a valid pointer to memory containing one or more valid instances of `VkMultiDrawIndexedInfoEXT` structures.

- **VUID-vkCmdDrawMultiIndexedEXT-stride-04941**
  
  The `stride` **must** be a multiple of 4.

### Valid Usage (Implicit)

- **VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-parameter**
  
  The `commandBuffer` **must** be a valid `VkCommandBuffer` handle.

- **VUID-vkCmdDrawMultiIndexedEXT-pVertexOffset-parameter**
  
  If `pVertexOffset` is not NULL, `pVertexOffset` **must** be a valid pointer to a valid `int32_t` value.

- **VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-recording**
  
  The `commandBuffer` **must** be in the recording state.

- **VUID-vkCmdDrawMultiIndexedEXT-commandBuffer-cmdpool**
  
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support graphics operations.

- **VUID-vkCmdDrawMultiIndexedEXT-renderpass**
  
  This command **must** only be called inside of a render pass instance.

- **VUID-vkCmdDrawMultiIndexedEXT-videocoding**
  
  This command **must** only be called outside of a video coding scope.

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized.

- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized.

### Command Properties

<table>
<thead>

The `VkMultiDrawInfoEXT` structure is defined as:
typedef struct VkMultiDrawInfoEXT {
    uint32_t firstVertex;
    uint32_t vertexCount;
} VkMultiDrawInfoEXT;

- `firstVertex` is the first vertex to draw.
- `vertexCount` is the number of vertices to draw.

The members of `VkMultiDrawInfoEXT` have the same meaning as the `firstVertex` and `vertexCount` parameters in `vkCmdDraw`.

The `VkMultiDrawIndexedInfoEXT` structure is defined as:

typedef struct VkMultiDrawIndexedInfoEXT {
    uint32_t firstIndex;
    uint32_t indexCount;
    int32_t vertexOffset;
} VkMultiDrawIndexedInfoEXT;

- `firstIndex` is the first index to draw.
- `indexCount` is the number of vertices to draw.
- `vertexOffset` is the value added to the vertex index before indexing into the vertex buffer for indexed multidraws.

The `firstIndex`, `indexCount`, and `vertexOffset` members of `VkMultiDrawIndexedInfoEXT` have the same meaning as the `firstIndex`, `indexCount`, and `vertexOffset` parameters, respectively, of `vkCmdDrawIndexed`.

To record a non-indexed indirect drawing command, call:

void vkCmdDrawIndirect(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    uint32_t drawCount,
    uint32_t stride);

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `drawCount` is the number of draws to execute, and can be zero.
• **stride** is the byte stride between successive sets of draw parameters.

`vkCmdDrawIndirect` behaves similarly to `vkCmdDraw` except that the parameters are read by the device from a buffer during execution. *drawCount* draws are executed by the command, with parameters taken from *buffer* starting at *offset* and increasing by *stride* bytes for each successive draw. The parameters of each draw are encoded in an array of `VkDrawIndirectCommand` structures. If *drawCount* is less than or equal to one, *stride* is ignored.

### Valid Usage

- **VUID-vkCmdDrawIndirect-magFilter-04553**
  If a `VkSampler` created with *magFilter* or *minFilter* equal to `VK_FILTER_LINEAR` and *compareEnable* equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- **VUID-vkCmdDrawIndirect-mipmapMode-04770**
  If a `VkSampler` created with *mipmapMode* equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and *compareEnable* equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`

- **VUID-vkCmdDrawIndirect-None-06479**
  If a `VkImageView` is sampled with depth comparison, the image view's format features **must** contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`

- **VUID-vkCmdDrawIndirect-None-02691**
  If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`

- **VUID-vkCmdDrawIndirect-None-07888**
  If a `VkDescriptorType` equal to `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features **must** contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`

- **VUID-vkCmdDrawIndirect-None-02692**
  If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's format features **must** contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`

- **VUID-vkCmdDrawIndirect-None-02693**
  If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`

- **VUID-vkCmdDrawIndirect-filterCubic-02694**
  Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`
Any \texttt{VkImageView} being sampled with \texttt{VK_FILTER_CUBIC_EXT} with a reduction mode of either \texttt{VK_SAMPLER_REDUCTION_MODE_MIN} or \texttt{VK_SAMPLER_REDUCTION_MODE_MAX} as a result of this command \textbf{must} have a \texttt{VkImageViewType} and format that supports cubic filtering together with minmax filtering, as specified by \texttt{VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax} returned by \texttt{vkGetPhysicalDeviceImageFormatProperties2}.

If the \texttt{cubicRangeClamp} feature is not enabled, then any \texttt{VkImageView} being sampled with \texttt{VK_FILTER_CUBIC_EXT} as a result of this command \textbf{must not} have a \texttt{VkSamplerReductionModeCreateInfo} with \texttt{reductionMode} equal to \texttt{VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM}.

Any \texttt{VkImageView} being sampled with \texttt{VK_FILTER_CUBIC_EXT} as a result of this command \textbf{must} have a \texttt{VkSamplerReductionModeCreateInfo} with \texttt{reductionMode} equal to \texttt{VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM} as a result of this command.

If the \texttt{selectableCubicWeights} feature is not enabled, then any \texttt{VkImageView} being sampled with \texttt{VK_FILTER_CUBIC_EXT} as a result of this command \textbf{must} have a \texttt{VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights} equal to \texttt{VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM}.

Any \texttt{VkImage} created with a \texttt{VkImageCreateInfo::flags} containing \texttt{VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV} sampled as a result of this command \textbf{must} only be sampled using a \texttt{VkSamplerAddressMode} of \texttt{VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE}.

For any \texttt{VkImageView} being written as a storage image where the image format field of the \texttt{OpTypeImage} is \texttt{Unknown}, the view's \texttt{format features} \textbf{must} contain \texttt{VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT}.

For any \texttt{VkImageView} being read as a storage image where the image format field of the \texttt{OpTypeImage} is \texttt{Unknown}, the view's \texttt{format features} \textbf{must} contain \texttt{VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT}.

For any \texttt{VkBufferView} being written as a storage texel buffer where the image format field of the \texttt{OpTypeImage} is \texttt{Unknown}, the view's \texttt{buffer features} \textbf{must} contain \texttt{VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT}.

For any \texttt{VkBufferView} being read as a storage texel buffer where the image format field of the \texttt{OpTypeImage} is \texttt{Unknown} then the view's \texttt{buffer features} \textbf{must} contain \texttt{VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT}.

For each set \textit{n} that is statically used by a \textit{bound shader}, a descriptor set \textbf{must} have been...
bound to \( n \) at the same pipeline bind point, with a \texttt{VkPipelineLayout} that is compatible for set \( n \), with the \texttt{VkPipelineLayout} or \texttt{VkDescriptorSetLayout} array that was used to create the current \texttt{VkPipeline} or \texttt{VkShaderEXT}, as described in Pipeline Layout Compatibility

- **VUID-vkCmdDrawIndirect-None-08601**
  For each push constant that is statically used by a bound shader, a push constant value \textbf{must} have been set for the same pipeline bind point, with a \texttt{VkPipelineLayout} that is compatible for push constants, with the \texttt{VkPipelineLayout} or \texttt{VkDescriptorSetLayout} and \texttt{VkPushConstantRange} arrays used to create the current \texttt{VkPipeline} or \texttt{VkShaderEXT}, as described in Pipeline Layout Compatibility

- **VUID-vkCmdDrawIndirect-maintenance4-08602**
  If the \texttt{maintenance4} feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value \textbf{must} have been set for the same pipeline bind point, with a \texttt{VkPipelineLayout} that is compatible for push constants, with the \texttt{VkPipelineLayout} or \texttt{VkDescriptorSetLayout} and \texttt{VkPushConstantRange} arrays used to create the current \texttt{VkPipeline} or \texttt{VkShaderEXT}, as described in Pipeline Layout EXT Compatibility

- **VUID-vkCmdDrawIndirect-None-08114**
  Descriptors in each bound descriptor set, specified via \texttt{vkCmdBindDescriptorSets}, \textbf{must} be valid if they are statically used by the \texttt{VkPipeline} bound to the pipeline bind point used by this command and the bound \texttt{VkPipeline} was not created with \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}

- **VUID-vkCmdDrawIndirect-None-08115**
  If the descriptors used by the \texttt{VkPipeline} bound to the pipeline bind point were specified via \texttt{vkCmdBindDescriptorSets}, the bound \texttt{VkPipeline} \textbf{must} have been created without \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}

- **VUID-vkCmdDrawIndirect-None-08116**
  Descriptors in bound descriptor buffers, specified via \texttt{vkCmdSetDescriptorBufferOffsetsEXT}, \textbf{must} be valid if they are dynamically used by the \texttt{VkPipeline} bound to the pipeline bind point used by this command and the bound \texttt{VkPipeline} was created with \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}

- **VUID-vkCmdDrawIndirect-None-08604**
  Descriptors in bound descriptor buffers, specified via \texttt{vkCmdSetDescriptorBufferOffsetsEXT}, \textbf{must} be valid if they are dynamically used by any \texttt{VkShaderEXT} bound to a stage corresponding to the pipeline bind point used by this command

- **VUID-vkCmdDrawIndirect-None-08117**
  If the descriptors used by the \texttt{VkPipeline} bound to the pipeline bind point were specified via \texttt{vkCmdSetDescriptorBufferOffsetsEXT}, the bound \texttt{VkPipeline} \textbf{must} have been created with \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}

- **VUID-vkCmdDrawIndirect-None-08119**
  If a descriptor is dynamically used with a \texttt{VkPipeline} created with \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}, the descriptor memory \textbf{must} be resident

- **VUID-vkCmdDrawIndirect-None-08605**
  If a descriptor is dynamically used with a \texttt{VkShaderEXT} created with a
VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

- **VUID-vkCmdDrawIndirect-None-08606**
  If the shaderObject feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command

- **VUID-vkCmdDrawIndirect-None-08607**
  If the shaderObject is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and VK_NULL_HANDLE shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command

- **VUID-vkCmdDrawIndirect-None-08608**
  If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound

- **VUID-vkCmdDrawIndirect-None-08609**
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used to sample from any VkImage with a VkImageView of the type VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, VK_IMAGE_VIEW_TYPE_1D_ARRAY, VK_IMAGE_VIEW_TYPE_2D_ARRAY or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY, in any shader stage

- **VUID-vkCmdDrawIndirect-None-08610**
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name, in any shader stage

- **VUID-vkCmdDrawIndirect-None-08611**
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

- **VUID-vkCmdDrawIndirect-uniformBuffers-06935**
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawIndirect-None-08612**
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage
corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawIndirect-storageBuffers-06936**
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT` or `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT` for `storageBuffers`, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawIndirect-None-08613**
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawIndirect-commandBuffer-02707**
  If `commandBuffer` is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders **must** not be a protected resource

- **VUID-vkCmdDrawIndirect-None-06550**
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'C₀C₉R₀ conversion, that object **must** only be used with `OpImageSample*` or `OpImageSparseSample*` instructions

- **VUID-vkCmdDrawIndirect-ConstOffset-06551**
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'C₀C₉R₀ conversion, that object **must** not use the ConstOffset and Offset operands

- **VUID-vkCmdDrawIndirect-viewType-07752**
  If a VkImageView is accessed as a result of this command, then the image view's viewType **must** match the Dim operand of the OpTypeImage as described in Instruction/Sampler/Image View Validation

- **VUID-vkCmdDrawIndirect-format-07753**
  If a VkImageView is accessed as a result of this command, then the numeric type of the image view's format and the Sampled Type operand of the OpTypeImage **must** match

- **VUID-vkCmdDrawIndirect-OpImageWrite-08795**
  If a VkImageView created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view's format

- **VUID-vkCmdDrawIndirect-OpImageWrite-08796**
  If a VkImageView created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have four components

- **VUID-vkCmdDrawIndirect-OpImageWrite-04469**
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as
the buffer view’s format

- VUID-vkCmdDrawIndirect-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 64

- VUID-vkCmdDrawIndirect-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32

- VUID-vkCmdDrawIndirect-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 64

- VUID-vkCmdDrawIndirect-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32

- VUID-vkCmdDrawIndirect-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawIndirect-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawIndirect-OpImageWeightedSampleQCOM-06971
  If OpImageWeightedSampleQCOM is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM

- VUID-vkCmdDrawIndirect-OpImageWeightedSampleQCOM-06972
  If OpImageWeightedSampleQCOM uses a VkImageView as a sample weight image as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM

- VUID-vkCmdDrawIndirect-OpImageBoxFilterQCOM-06973
  If OpImageBoxFilterQCOM is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM

- VUID-vkCmdDrawIndirect-OpImageBlockMatchSSDQCOM-06974
  If OpImageBlockMatchSSDQCOM is used to read from an VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

- VUID-vkCmdDrawIndirect-OpImageBlockMatchSADQCOM-06975
  If OpImageBlockMatchSADQCOM is used to read from an VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM
command, then the image view’s format features must contain
VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

• VUID-vkCmdDrawIndirect-OpImageBlockMatchSADQCOM-06976
  If OpImageBlockMatchSADQCOM or OpImageBlockMatchSSDQCOM is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

• VUID-vkCmdDrawIndirect-OpImageBlockMatchWindow-09215
  If a OpImageBlockMatchWindow*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

• VUID-vkCmdDrawIndirect-OpImageBlockMatchWindow-09216
  If a OpImageBlockMatchWindow*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view’s format must be a single-component format.

• VUID-vkCmdDrawIndirect-OpImageBlockMatchWindow-09217
  If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

• VUID-vkCmdDrawIndirect-None-07288
  Any shader invocation executed by this command must terminate

• VUID-vkCmdDrawIndirect-renderPass-02684
  The current render pass must be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

• VUID-vkCmdDrawIndirect-subpass-02685
  The subpass index of the current render pass must be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

• VUID-vkCmdDrawIndirect-None-07748
  If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set
If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass.

Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments` `{InputAttachmentIndex}` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility.

Memory backing image subresources used as attachments in the current render pass **must not** be written in any way other than as an attachment by this command.

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_COLOR_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command.

If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_DEPTH_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command.

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command.
currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT` and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

- **VUID-vkCmdDrawIndirect-None-09003**
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- **VUID-vkCmdDrawIndirect-None-06539**
  If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command must not write to that image subresource as an attachment

- **VUID-vkCmdDrawIndirect-None-06886**
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes must be disabled

- **VUID-vkCmdDrawIndirect-None-06887**
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back writeMask are not zero, and stencil test is enabled, all stencil ops must be `VK_STENCIL_OP_KEEP`

- **VUID-vkCmdDrawIndirect-None-07831**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07832**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07833**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled then `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08617**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set polygonMode to `VK_POLYGON_MODE_LINE`, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08618**
  If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set primitiveTopology to any line topology, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command
buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08619
  If a shader object that outputs line primitives is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT` stage, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07834
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08620
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBiasEnable` in the current command buffer set `depthBiasEnable` to `VK_TRUE`, `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07835
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled then `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08621
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer set any element of `pColorBlendEnables` to `VK_TRUE`, and the most recent call to `vkCmdSetColorBlendEquationEXT` in the current command buffer set the same element of `pColorBlendEquations` to a `VkColorBlendEquationEXT` structure with any `VkBlendFactor` member with a value of `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07836
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08622
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBoundsTestEnable` in the current command buffer set `depthBoundsTestEnable` to `VK_TRUE`, then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07837
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled then `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-08623
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-07838
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled then `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-08624
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-07839
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled then `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-08625
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

• VUID-vkCmdDrawIndirect-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE` and the current subpass has a depth/stencil attachment, then that attachment must have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

• VUID-vkCmdDrawIndirect-None-06666
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-08626
If a shader object is bound to any graphics stage, and the most recent call to 
\texttt{vkCmdSetSampleLocationsEnableEXT} in the current command buffer set 
\texttt{sampleLocationsEnable} to \texttt{VK_TRUE}, and the most recent call to 
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set 
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetSampleLocationsEXT} \textbf{must} have been 
called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirect-sampleLocationsPerPixel-07934}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT} state enabled, then the \texttt{sampleLocationsPerPixel} member of \texttt{pSampleLocationsInfo} in the last call to \texttt{vkCmdSetSampleLocationsEXT} \textbf{must} 
equal the \texttt{rasterizationSamples} member of the \texttt{VkPipelineMultisampleStateCreateInfo} structure the bound graphics pipeline has been created with

- \textbf{VUID-vkCmdDrawIndirect-None-07840}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_CULL_MODE} dynamic state enabled then \texttt{vkCmdSetCullMode} \textbf{must} have been called in the current 
command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirect-None-08627}
  If a shader object is bound to any graphics stage, and the most recent call to 
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set 
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetCullMode} \textbf{must} have been called in 
the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirect-None-07841}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_FRONT_FACE} dynamic state enabled then \texttt{vkCmdSetFrontFace} \textbf{must} have been called in the current 
command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirect-None-08628}
  If a shader object is bound to any graphics stage, and the most recent call to 
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set 
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetFrontFace} \textbf{must} have been called in 
the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirect-None-07843}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE} dynamic state enabled then 
\texttt{vkCmdSetDepthTestEnable} \textbf{must} have been called in the current command buffer prior to 
this drawing command

- \textbf{VUID-vkCmdDrawIndirect-None-08629}
  If a shader object is bound to any graphics stage, and the most recent call to 
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set 
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDepthTestEnable} \textbf{must} have been 
called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirect-None-07844}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE} dynamic state enabled then 
\texttt{vkCmdSetDepthWriteEnable} \textbf{must} have been called in the current command buffer prior to 
this drawing command
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthTestEnable` in the current command buffer set `depthTestEnable` to `VK_TRUE`, then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.
vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, then vkCmdSetStencilOp must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-viewportCount-03417**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the VkPipelineViewportStateCreateInfo::viewportCount of the pipeline.

- **VUID-vkCmdDrawIndirect-scissorCount-03418**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the scissorCount parameter of vkCmdSetScissorWithCount must match the VkPipelineViewportStateCreateInfo::viewportCount of the pipeline.

- **VUID-vkCmdDrawIndirect-viewportCount-03419**
  If the bound graphics pipeline state was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the scissorCount parameter of vkCmdSetScissorWithCount.

- **VUID-vkCmdDrawIndirect-None-08635**
  If a shader object is bound to any graphics stage, then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the scissorCount parameter of vkCmdSetScissorWithCount.

- **VUID-vkCmdDrawIndirect-viewportCount-04137**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportWScalingStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

- **VUID-vkCmdDrawIndirect-viewportCount-04138**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportWScalingNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

- **VUID-vkCmdDrawIndirect-None-09232**
If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then `vkCmdSetViewportWScalingNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08636**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndirect-viewportCount-04139**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic state enabled, then the bound graphics pipeline **must** have been created with `VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndirect-viewportCount-04140**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndirect-shadingRateImage-09233**
  If the `shadingRateImage` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-shadingRateImage-09234**
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetShadingRateImageEnableNV` in the current command buffer set `shadingRateImageEnable` to `VK_TRUE`, then `vkCmdSetViewportShadingRatePaletteNV` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-None-08637**
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndirect-VkPipelineVieportCreateInfo-04141**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportSwizzleStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline **must** have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or
equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- **VUID-vkCmdDrawIndirect-VkPipelineViewportCreateInfo-04142**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a \texttt{VkPipelineViewportExclusiveScissorStateCreateInfoNV} structure chained from \texttt{VkPipelineViewportStateCreateInfo}, then the bound graphics pipeline must have been created with \texttt{VkPipelineViewportExclusiveScissorStateCreateInfoNV} ::\texttt{exclusiveScissorCount} greater or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- **VUID-vkCmdDrawIndirect-None-07878**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV` dynamic state enabled then \texttt{vkCmdSetExclusiveScissorEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07879**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV` dynamic state enabled then \texttt{vkCmdSetExclusiveScissorNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-exclusiveScissor-09235**
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then \texttt{vkCmdSetExclusiveScissorEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08638**
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetExclusiveScissorEnableNV} in the current command buffer set any element of \texttt{pExclusiveScissorEnables} to \texttt{VK_TRUE}, then \texttt{vkCmdSetExclusiveScissorNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-04876**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled then \texttt{vkCmdSetRasterizerDiscardEnable} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08639**
  If a shader object is bound to any graphics stage, then \texttt{vkCmdSetRasterizerDiscardEnable} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-04877**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled then \texttt{vkCmdSetDepthBiasEnable} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08640**
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-logicOp-04878
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled then vkCmdSetLogicOpEXT must have been called in the current command buffer prior to this drawing command and the logicOp must be a valid VkLogicOp value

- VUID-vkCmdDrawIndirect-None-08641
If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the logicOp feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEXT must have been called in the current command buffer prior to this drawing command and the logicOp must be a valid VkLogicOp value

- VUID-vkCmdDrawIndirect-primitiveFragmentShadingRateWithMultipleViewports-04552
If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must be 1

- VUID-vkCmdDrawIndirect-primitiveFragmentShadingRateWithMultipleViewports-08642
If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, and any shader object bound to a graphics stage writes to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must be 1

- VUID-vkCmdDrawIndirect-blendEnable-04727
If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view’s format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the blendEnable member of the pAttachments member of pColorBlendState must be VK_FALSE

- VUID-vkCmdDrawIndirect-None-08643
If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then for each color attachment in the render pass, if the corresponding image view’s format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding member of pColorBlendEnables in the most recent call to vkCmdSetColorBlendEnableEXT in the current command buffer that affected that attachment index must have been VK_FALSE

- VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07284
If rasterization is not disabled in the bound graphics pipeline, and none of the VK_AMD_mixed_attachment_samples extension, the VK_NV_framebuffer_mixed_samples extension, or the multisampledRenderToSingleSampled feature is enabled, then
**rasterizationSamples** for the currently bound graphics pipeline **must** be the same as the current subpass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawIndirect-None-08644**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer **must** have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawIndirect-None-08876**
  If a shader object is bound to any graphics stage, the current render pass instance **must** have been begun with `vkCmdBeginRendering`.

- **VUID-vkCmdDrawIndirect-imageView-06172**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the depth attachment.

- **VUID-vkCmdDrawIndirect-imageView-06173**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment.

- **VUID-vkCmdDrawIndirect-imageView-06174**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the depth attachment.

- **VUID-vkCmdDrawIndirect-imageView-06175**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment.

- **VUID-vkCmdDrawIndirect-imageView-06176**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_OPTIMAL`, this command **must** not write any values to the depth attachment.

- **VUID-vkCmdDrawIndirect-imageView-06177**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment.
If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo`::`viewMask` equal to `VkRenderingInfo`::`viewMask`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo`::`colorAttachmentCount` equal to `VkRenderingInfo`::`colorAttachmentCount`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound graphics pipeline.

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline.

- VUID-vkCmdDrawIndirect-None-08647
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance.

- VUID-vkCmdDrawIndirect-None-07751
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command for each discard rectangle in ` VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`

- VUID-vkCmdDrawIndirect-None-07880
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirect-rasterizerDiscardEnable-09236
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirect-None-08648
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set.

- VUID-vkCmdDrawIndirect-None-08649
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set.
discardRectangleEnable to VK_TRUE, then vkCmdSetDiscardRectangleModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pNextAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pNextAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to the VkFormat used to create VkRenderingInfo ::pNextAttachment->imageView

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pNextAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pNextAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pNextAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pNextAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pNextAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pNextAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pNextAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawIndirect-dynamicRenderingUnusedAttachments-08919
  If current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not
VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

• VUID-vkCmdDrawIndirect-imageView-06184
If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT

• VUID-vkCmdDrawIndirect-colorAttachmentCount-06185
If the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the corresponding element of the pColorAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline.

• VUID-vkCmdDrawIndirect-pDepthAttachment-06186
If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView.

• VUID-vkCmdDrawIndirect-pStencilAttachment-06187
If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView.

• VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07285
If the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingContext::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingContext::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the value of rasterizationSamples for the currently bound graphics pipeline.

• VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07286
If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingContext::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingContext::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the value of rasterizationSamples for the currently bound graphics pipeline.
feature is not enabled, and \texttt{VkRenderingInfo::pDepthAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline \textbf{must} be equal to the sample count used to create \texttt{VkRenderingInfo::pDepthAttachment->imageView}

- **VUID-vkCmdDrawIndirect-multisampledRenderToSingleSampled-07287**
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline was created without a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and the \texttt{multisampledRenderToSingleSampled} feature is not enabled, and \texttt{VkRenderingInfo::pStencilAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline \textbf{must} be equal to the sample count used to create \texttt{VkRenderingInfo::pStencilAttachment->imageView}

- **VUID-vkCmdDrawIndirect-pNext-07935**
  If this command has been called inside a render pass instance started with \texttt{vkCmdBeginRendering}, and the \texttt{pNext} chain of \texttt{VkRenderingInfo} includes a \texttt{VkMultisampledRenderToSingleSampledInfoEXT} structure with \texttt{multisampledRenderToSingleSampledEnable} equal to \texttt{VK_TRUE}, then the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline \textbf{must} be equal to \texttt{VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples}

- **VUID-vkCmdDrawIndirect-renderPass-06198**
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, and the \texttt{renderPass} \texttt{VkGraphicsPipelineCreateInfo::renderPass} equal to \texttt{VK_NULL_HANDLE}

- **VUID-vkCmdDrawIndirect-pColorAttachments-08963**
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the \texttt{VkRenderingInfo::pColorAttachments->imageView} was not \texttt{VK_NULL_HANDLE}, then the corresponding element of \texttt{VkPipelineRenderingCreateInfo::pColorAttachmentFormats} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

- **VUID-vkCmdDrawIndirect-pDepthAttachment-08964**
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the \texttt{VkRenderingInfo::pDepthAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, then the \texttt{VkPipelineRenderingCreateInfo::depthAttachmentFormat} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

- **VUID-vkCmdDrawIndirect-pStencilAttachment-08965**
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound, stencil test is enabled and the \texttt{VkRenderingInfo::pStencilAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, then the \texttt{VkPipelineRenderingCreateInfo::stencilAttachmentFormat} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

- **VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithRasterizerDiscard-06708**
  If the \texttt{primitivesGeneratedQueryWithRasterizerDiscard} feature is not enabled and the \texttt{VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT} query is active, \texttt{rasterization discard} \textbf{must} not be
enabled

- **VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithNonZeroStreams-06709**
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline must not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`.

- **VUID-vkCmdDrawIndirect-None-07619**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSellation_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-None-07620**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-None-09237**
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-None-08650**
  If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-None-07621**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-None-07622**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirect-None-08652**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have
been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-07623
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-08653
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-07624
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawIndirect-None-08654
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawIndirect-None-07625
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-08655
  If the `alphaToOne` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-None-07626
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled then
\textbf{vkCmdSetLogicOpEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08656
  If the logicOp feature is enabled, and a shader object is bound to the \texttt{VK\_SHADER\_STAGE\_FRAGMENT\_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, then \texttt{vkCmdSetLogicOpEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07627
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_COLOR\_BLEND\_ENABLE\_EXT} dynamic state enabled then \texttt{vkCmdSetColorBlendEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08657
  If a shader object is bound to the \texttt{VK\_SHADER\_STAGE\_FRAGMENT\_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, then \texttt{vkCmdSetColorBlendEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07628
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_COLOR\_BLEND\_EQUATION\_EXT} dynamic state enabled then \texttt{vkCmdSetColorBlendEquationEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08658
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, and the most recent call to \texttt{vkCmdSetColorBlendEnableEXT} for any attachment set that attachment's value in \texttt{pColorBlendEnables} to \texttt{VK\_TRUE}, then \texttt{vkCmdSetColorBlendEquationEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07629
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_COLOR\_WRITE\_MASK\_EXT} dynamic state enabled then \texttt{vkCmdSetColorWriteMaskEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08659
  If a shader object is bound to the \texttt{VK\_SHADER\_STAGE\_FRAGMENT\_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, then \texttt{vkCmdSetColorWriteMaskEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-07630
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_RASTERIZATION\_STREAM\_EXT} dynamic state enabled then \texttt{vkCmdSetRasterizationStreamEXT} must have been called in the current command buffer prior to this drawing command
If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetConservativeRasterizationModeEXT` in the current command buffer set `conservativeRasterizationMode` to `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command.
graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07635**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07636**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08665**
  If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07637**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08666**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08667**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08668**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07638**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command
If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetLineStippleEnableEXT` in the current command buffer set `stippledLineEnable` to `VK_TRUE`, then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetCoverageToColorEnableNV` in the current command buffer set `coverageToColorEnable` to `VK_TRUE`, then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then
vkCmdSetCoverageModulationTableEnableNV must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08679**
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetCoverageModulationModeNV in the current command buffer set coverageModulationMode to any value other than VK_COVERAGE_MODULATION_MODE_NONE_NV, then vkCmdSetCoverageModulationTableEnableNV must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07646**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV dynamic state enabled then vkCmdSetCoverageModulationTableNV must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08680**
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetCoverageModulationTableEnableNV in the current command buffer set coverageModulationTableEnable to VK_TRUE, then vkCmdSetCoverageModulationTableNV must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07647**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV dynamic state enabled then vkCmdSetShadingRateImageEnableNV must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-pipelineFragmentShadingRate-09238**
  If the pipelineFragmentShadingRate feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetFragmentShadingRateKHR must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08681**
  If the shadingRateImage feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetShadingRateImageEnableNV must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07648**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV dynamic state enabled then vkCmdSetRepresentativeFragmentTestEnableNV must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08682**
If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-07649**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-08683**
  If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view's format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`

- **VUID-vkCmdDrawIndirect-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass

- **VUID-vkCmdDrawIndirect-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- **VUID-vkCmdDrawIndirect-samples-07473**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawIndirect-rasterizationSamples-07474**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are
enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or depth/stencil attachments

- **VUID-vkCmdDrawIndirect-None-09211**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the `rasterizationSamples` member of that structure

- **VUID-vkCmdDrawIndirect-firstAttachment-07476**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEnableEXT` calls must specify an enable for all active color attachments in the current subpass

- **VUID-vkCmdDrawIndirect-firstAttachment-07477**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEquationEXT` calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled

- **VUID-vkCmdDrawIndirect-firstAttachment-07478**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorWriteMaskEXT` calls must specify the color write mask for all active color attachments in the current subpass

- **VUID-vkCmdDrawIndirect-firstAttachment-07479**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendAdvancedEXT` calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

- **VUID-vkCmdDrawIndirect-advancedBlendMaxColorAttachments-07480**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled and the last calls to `vkCmdSetColorBlendEnableEXT` and
vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments

- **VUID-vkCmdDrawIndirect-primitivesGeneratedQueryWithNonZeroStreams-07481**
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, and the bound graphics pipeline was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT must have set the rasterizationStream to zero

- **VUID-vkCmdDrawIndirect-sampleLocationsPerPixel-07482**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- **VUID-vkCmdDrawIndirect-sampleLocationsPerPixel-07483**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT

- **VUID-vkCmdDrawIndirect-sampleLocationsEnable-07484**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- **VUID-vkCmdDrawIndirect-sampleLocationsEnable-07485**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- **VUID-vkCmdDrawIndirect-sampleLocationsEnable-07486**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.height in the last call to
vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07487
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code must not statically use the extended instruction InterpolateAtSample

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.width must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.height must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirect-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationsPerPixel must equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirect-coverageModulationTableEnable-07488
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV state enabled and the last call to vkCmdSetCoverageModulationTableEnableNV set coverageModulationTableEnable to VK_TRUE, then the coverageModulationTableCount parameter in the last call to vkCmdSetCoverageModulationTableNV must equal the current rasterizationSamples divided by the number of color samples in the current subpass

- VUID-vkCmdDrawIndirect-rasterizationSamples-07489
If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment

- **VUID-vkCmdDrawIndirect-coverageToColorEnable-07490**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set the `coverageToColorEnable` to `VK_TRUE`, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV` `coverageToColorLocation`, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`

- **VUID-vkCmdDrawIndirect-coverageReductionMode-07491**
  If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode`, then the current `rasterizationSamples`, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by `vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV`

- **VUID-vkCmdDrawIndirect-viewportCount-07492**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV ::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawIndirect-viewportCount-07493**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportSwizzleNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawIndirect-rasterizationSamples-07494**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if the current subpass has any color attachments and `rasterizationSamples` of the last call to `vkCmdSetRasterizationSamplesEXT` is greater than the number of color samples, then the pipeline `sampleShadingEnable` must be `VK_FALSE`

- **VUID-vkCmdDrawIndirect-stippledLineEnable-07495**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT`, then the `stippledRectangularLines` feature must be enabled
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT`, then the `stippledBresenhamLines` feature must be enabled.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT`, then the `stippledSmoothLines` feature must be enabled.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature must be enabled and `VkPhysicalDeviceLimits::strictLines` must be `VK_TRUE`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, `conservativePointAndLineRasterization` is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to `vkCmdSetConservativeRasterizationModeEXT` must be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`.

If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` must not be active.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.
If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`.

- **VUID-vkCmdDrawIndirect-None-08685**
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`.

- **VUID-vkCmdDrawIndirect-None-08686**
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`.

- **VUID-vkCmdDrawIndirect-None-08687**
  If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`.

- **VUID-vkCmdDrawIndirect-None-08688**
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`.

- **VUID-vkCmdDrawIndirect-None-08689**
  If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`.

- **VUID-vkCmdDrawIndirect-None-08690**
  If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`.

- **VUID-vkCmdDrawIndirect-None-08693**
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages must have a valid `VkShaderEXT` bound, and the other must have no `VkShaderEXT` bound.

- **VUID-vkCmdDrawIndirect-None-08694**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid `VkShaderEXT` must be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

- **VUID-vkCmdDrawIndirect-None-08695**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created with the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, there must be no `VkShaderEXT` bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

- **VUID-vkCmdDrawIndirect-None-08696**
  If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there must be no `VkShaderEXT` bound to either the...
VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

- VUID-vkCmdDrawIndirect-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call must also be bound

- VUID-vkCmdDrawIndirect-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call must not have any VkShaderEXT bound

- VUID-vkCmdDrawIndirect-None-08878
  All bound graphics shader objects must have been created with identical or identically defined push constant ranges

- VUID-vkCmdDrawIndirect-None-08879
  All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

- VUID-vkCmdDrawIndirect-None-08880
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-pDynamicStates-08715
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable must be VK_FALSE

- VUID-vkCmdDrawIndirect-pDynamicStates-08716
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_STENCIL_WRITE_MASK set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask must be 0

- VUID-vkCmdDrawIndirect-None-09116
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT must either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, and VK_COLOR_COMPONENT_B_BIT, or none of them

- VUID-vkCmdDrawIndirect-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend...
factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command must be less than maxFragmentDualSrcAttachments

- **VUID-vkCmdDrawIndirect-None-04007**
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must have either valid or VK_NULL_HANDLE buffers bound

- **VUID-vkCmdDrawIndirect-None-04008**
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must not be VK_NULL_HANDLE

- **VUID-vkCmdDrawIndirect-None-02721**
  For a given vertex buffer binding, any attribute data fetched must be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- **VUID-vkCmdDrawIndirect-None-07842**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-dynamicPrimitiveTopologyUnrestricted-07500**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology must be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state

- **VUID-vkCmdDrawIndirect-None-04912**
  If the bound graphics pipeline was created with both the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT and VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT dynamic states enabled, then vkCmdSetVertexInputEXT must have been called in the current command buffer prior to this draw command

- **VUID-vkCmdDrawIndirect-pStrides-04913**
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT dynamic state enabled, but not the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2EXT must have been called in the current command buffer prior to this draw command, and the pStrides parameter of vkCmdBindVertexBuffers2EXT must not be NULL

- **VUID-vkCmdDrawIndirect-None-08881**
  If a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, then vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirect-None-04914**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdSetVertexInputEXT
must have been called in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndirect-Input-07939
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then all variables with the `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint` must contain a location in `VkVertexInputAttributeDescription2EXT::location`

- VUID-vkCmdDrawIndirect-Input-08734
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` must be the same as `VkVertexInputAttributeDescription2EXT::format`

- VUID-vkCmdDrawIndirect-format-08936
  If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` must be 64-bit

- VUID-vkCmdDrawIndirect-format-08937
  If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` must have a 64-bit component

- VUID-vkCmdDrawIndirect-None-09203
  If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` must not use components that are not present in the format

- VUID-vkCmdDrawIndirect-None-08882
  If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetVertexInputEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-04875
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled then `vkCmdSetPatchControlPointsEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-08883
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELATION_EVALUATION_BIT` stage, then `vkCmdSetPatchControlPointsEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirect-None-04879
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then
vkCmdSetPrimitiveRestartEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-rasterizerDiscardEnable-08884
If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, vkCmdSetPrimitiveRestartEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirect-stage-06481
The bound graphics pipeline must not have been created with the
VkPipelineShaderStageCreateInfo::stage member of an element of
VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or
VK_SHADER_STAGE_MESH_BIT_EXT

• VUID-vkCmdDrawIndirect-None-08885
There must be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or
VK_SHADER_STAGE_MESH_BIT_EXT stages

• VUID-vkCmdDrawIndirect-buffer-02708
If buffer is non-sparse then it must be bound completely and contiguously to a single
VkDeviceMemory object

• VUID-vkCmdDrawIndirect-buffer-02709
buffer must have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set

• VUID-vkCmdDrawIndirect-offset-02710
offset must be a multiple of 4

• VUID-vkCmdDrawIndirect-commandBuffer-02711
commandBuffer must not be a protected command buffer

• VUID-vkCmdDrawIndirect-drawCount-02718
If the multiDrawIndirect feature is not enabled, drawCount must be 0 or 1

• VUID-vkCmdDrawIndirect-drawCount-02719
drawCount must be less than or equal to VkPhysicalDeviceLimits::maxDrawIndirectCount

• VUID-vkCmdDrawIndirect-drawCount-00476
If drawCount is greater than 1, stride must be a multiple of 4 and must be greater than or equal to sizeof(VkDrawIndirectCommand)

• VUID-vkCmdDrawIndirect-drawCount-00487
If drawCount is equal to 1, (offset + sizeof(VkDrawIndirectCommand)) must be less than or equal to the size of buffer

• VUID-vkCmdDrawIndirect-drawCount-00488
If drawCount is greater than 1, (stride × (drawCount - 1) + offset + sizeof(VkDrawIndirectCommand)) must be less than or equal to the size of buffer
Valid Usage (Implicit)

- VUID-vkCmdDrawIndirect-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle
- VUID-vkCmdDrawIndirect-buffer-parameter
  buffer must be a valid VkBuffer handle
- VUID-vkCmdDrawIndirect-commandBuffer-recording
  commandBuffer must be in the recording state
- VUID-vkCmdDrawIndirect-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations
- VUID-vkCmdDrawIndirect-renderpass
  This command must only be called inside of a render pass instance
- VUID-vkCmdDrawIndirect-videocoding
  This command must only be called outside of a video coding scope
- VUID-vkCmdDrawIndirect-commonparent
  Both of buffer, and commandBuffer must have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

The VkDrawIndirectCommand structure is defined as:

```c
// Provided by VK_VERSION_1_0
typedef struct VkDrawIndirectCommand {
    uint32_t vertexCount;
    uint32_t instanceCount;
    uint32_t firstVertex;
    uint32_t firstInstance;
} VkDrawIndirectCommand;
```
• **vertexCount** is the number of vertices to draw.
• **instanceCount** is the number of instances to draw.
• **firstVertex** is the index of the first vertex to draw.
• **firstInstance** is the instance ID of the first instance to draw.

The members of `VkDrawIndirectCommand` have the same meaning as the similarly named parameters of `vkCmdDraw`.

### Valid Usage

- **VUID-VkDrawIndirectCommand-None-00500**
  For a given vertex buffer binding, any attribute data fetched **must** be entirely contained within the corresponding vertex buffer binding, as described in [Vertex Input Description](#).

- **VUID-VkDrawIndirectCommand-firstInstance-00501**
  If the `drawIndirectFirstInstance` feature is not enabled, `firstInstance` **must** be 0

To record a non-indexed draw call with a draw call count sourced from a buffer, call:

```c
// Provided by VK_VERSION_1_2
void vkCmdDrawIndirectCount(VkCommandBuffer commandBuffer,
                             VkBuffer buffer,
                             VkDeviceSize offset,
                             VkBuffer countBuffer,
                             VkDeviceSize countBufferOffset,
                             uint32_t maxDrawCount,
                             uint32_t stride);
```

or the equivalent command

```c
// Provided by VK_KHR_draw_indirect_count
void vkCmdDrawIndirectCountKHR(VkCommandBuffer commandBuffer,
                                VkBuffer buffer,
                                VkDeviceSize offset,
                                VkBuffer countBuffer,
                                VkDeviceSize countBufferOffset,
                                uint32_t maxDrawCount,
                                uint32_t stride);
```
void vkCmdDrawIndirectCountAMD(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    VkBuffer countBuffer,
    VkDeviceSize countBufferOffset,
    uint32_t maxDrawCount,
    uint32_t stride);

• \textit{commandBuffer} is the command buffer into which the command is recorded.
• \textit{buffer} is the buffer containing draw parameters.
• \textit{offset} is the byte offset into \textit{buffer} where parameters begin.
• \textit{countBuffer} is the buffer containing the draw count.
• \textit{countBufferOffset} is the byte offset into \textit{countBuffer} where the draw count begins.
• \textit{maxDrawCount} specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in \textit{countBuffer} and \textit{maxDrawCount}.
• \textit{stride} is the byte stride between successive sets of draw parameters.

\textit{vkCmdDrawIndirectCount} behaves similarly to \textit{vkCmdDrawIndirect} except that the draw count is read by the device from a buffer during execution. The command will read an unsigned 32-bit integer from \textit{countBuffer} located at \textit{countBufferOffset} and use this as the draw count.

\textbf{Valid Usage}

• VUID-vkCmdDrawIndirectCount-magFilter-04553
  If a \textit{VkSampler} created with \textit{magFilter} or \textit{minFilter} equal to \texttt{VK\_FILTER\_LINEAR} and \textit{compareEnable} equal to \texttt{VK\_FALSE} is used to sample a \textit{VkImageView} as a result of this command, then the image view’s \textit{format features} \textbf{must} contain \texttt{VK\_FORMAT\_FEATURE\_SAMPLED\_IMAGE\_FILTER\_LINEAR\_BIT}

• VUID-vkCmdDrawIndirectCount-mipmapMode-04770
  If a \textit{VkSampler} created with \textit{mipmapMode} equal to \texttt{VK\_SAMPLER\_MIPMAP\_MODE\_LINEAR} and \textit{compareEnable} equal to \texttt{VK\_FALSE} is used to sample a \textit{VkImageView} as a result of this command, then the image view’s \textit{format features} \textbf{must} contain \texttt{VK\_FORMAT\_FEATURE\_SAMPLED\_IMAGE\_FILTER\_LINEAR\_BIT}

• VUID-vkCmdDrawIndirectCount-None-06479
  If a \textit{VkImageView} is sampled with \textit{depth comparison}, the image view’s \textit{format features} \textbf{must} contain \texttt{VK\_FORMAT\_FEATURE\_2\_SAMPLED\_IMAGE\_DEPTH\_COMPARISON\_BIT}

• VUID-vkCmdDrawIndirectCount-None-02691
  If a \textit{VkImageView} is accessed using atomic operations as a result of this command, then the image view’s \textit{format features} \textbf{must} contain \texttt{VK\_FORMAT\_FEATURE\_STORAGE\_IMAGE\_ATOMIC\_BIT}

• VUID-vkCmdDrawIndirectCount-None-07888
If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features must contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT.

VUID-vkCmdDrawIndirectCount-None-02692
If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT.

VUID-vkCmdDrawIndirectCount-None-02693
If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it must not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY.

VUID-vkCmdDrawIndirectCount-filterCubic-02694
Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2.

VUID-vkCmdDrawIndirectCount-filterCubicMinmax-02695
Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command must have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2.

VUID-vkCmdDrawIndirectCount-cubicRangeClamp-09212
If the cubicRangeClamp feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must not have a VkSamplerReductionModeCreateInfo::reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM.

VUID-vkCmdDrawIndirectCount-reductionMode-09213
Any VkImageView being sampled with a VkSamplerReductionModeCreateInfo::reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM as a result of this command must sample with VK_FILTER_CUBIC_EXT.

VUID-vkCmdDrawIndirectCount-selectableCubicWeights-09214
If the selectableCubicWeights feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must have VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights equal to VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM.

VUID-vkCmdDrawIndirectCount-flags-02696
Any VkImage created with a VkImageCreateInfo::flags containing VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV sampled as a result of this command must only be sampled using a VkSamplerAddressMode of VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE.

VUID-vkCmdDrawIndirectCount-OpTypeImage-07027
For any VkImageView being written as a storage image where the image format field of
the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- **VUID-vkCmdDrawIndirectCount-OpTypeImage-07028**
  For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- **VUID-vkCmdDrawIndirectCount-OpTypeImage-07029**
  For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

- **VUID-vkCmdDrawIndirectCount-OpTypeImage-07030**
  Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

- **VUID-vkCmdDrawIndirectCount-None-08600**
  For each set \( n \) that is statically used by a bound shader, a descriptor set **must** have been bound to \( n \) at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set \( n \), with the `VkPipelineLayout` or `VkDescriptorSetLayout` array that was used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility

- **VUID-vkCmdDrawIndirectCount-None-08601**
  For each push constant that is statically used by a bound shader, a push constant value **must** have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility

- **VUID-vkCmdDrawIndirectCount-maintenance4-08602**
  If the `maintenance4` feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value **must** have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility

- **VUID-vkCmdDrawIndirectCount-None-08114**
  Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, **must** be valid if they are statically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- **VUID-vkCmdDrawIndirectCount-None-08115**
  If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` **must** have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- **VUID-vkCmdDrawIndirectCount-None-08116**
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, **must** be valid if they are dynamically used by the
VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawIndirectCount-None-08604
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command

- VUID-vkCmdDrawIndirectCount-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline must have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- VUID-vkCmdDrawIndirectCount-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

- VUID-vkCmdDrawIndirectCount-None-08605
  If a descriptor is dynamically used with a VkShaderEXT created with a VkDescriptorsetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

- VUID-vkCmdDrawIndirectCount-None-08606
  If the shaderObject feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command

- VUID-vkCmdDrawIndirectCount-None-08607
  If the shaderObject is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and VK_NULL_HANDLE shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command

- VUID-vkCmdDrawIndirectCount-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawIndirectCount-None-08609
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used to sample from any VkImage with a VkImageView of the type VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, VK_IMAGE_VIEW_TYPE_1D_ARRAY, VK_IMAGE_VIEW_TYPE_2D_ARRAY or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY, in any shader stage

- VUID-vkCmdDrawIndirectCount-None-08610
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample*
instructions with ImplicitLod, Dref or Proj in their name, in any shader stage

• VUID-vkCmdDrawIndirectCount-None-08611
If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

• VUID-vkCmdDrawIndirectCount-uniformBuffers-06935
If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndirectCount-None-08612
If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndirectCount-storageBuffers-06936
If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for storageBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndirectCount-None-08613
If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndirectCount-commandBuffer-02707
If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders must not be a protected resource

• VUID-vkCmdDrawIndirectCount-None-06550
If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y’C aCk conversion, that object must only be used with OpImageSample* or OpImageSparseSample* instructions

• VUID-vkCmdDrawIndirectCount-ConstOffset-06551
If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y’C aCk conversion, that object must not use the ConstOffset and Offset operands

• VUID-vkCmdDrawIndirectCount-viewType-07752
If a `VkImageView` is accessed as a result of this command, then the image view’s `viewType` must match the `Dim` operand of the `OpTypeImage` as described in Instruction/Sampler/Image View Validation

- **VUID-vkCmdDrawIndirectCount-format-07753**
  If a `VkImageView` is accessed as a result of this command, then the numeric type of the image view’s `format` and the `Sampled Type` operand of the `OpTypeImage` must match.

- **VUID-vkCmdDrawIndirectCount-OpImageWrite-08795**
  If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction must have at least as many components as the image view’s format.

- **VUID-vkCmdDrawIndirectCount-OpImageWrite-08796**
  If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction must have four components.

- **VUID-vkCmdDrawIndirectCount-OpImageWrite-04469**
  If a `VkBufferView` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction must have at least as many components as the buffer view’s format.

- **VUID-vkCmdDrawIndirectCount-SampledType-04470**
  If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 64.

- **VUID-vkCmdDrawIndirectCount-SampledType-04471**
  If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 32.

- **VUID-vkCmdDrawIndirectCount-SampledType-04472**
  If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 64.

- **VUID-vkCmdDrawIndirectCount-SampledType-04473**
  If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 32.

- **VUID-vkCmdDrawIndirectCount-sparseImageInt64Atomics-04474**
  If the `sparseImageInt64Atomics` feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag must not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command.

- **VUID-vkCmdDrawIndirectCount-sparseImageInt64Atomics-04475**
  If the `sparseImageInt64Atomics` feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag must not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command.

- **VUID-vkCmdDrawIndirectCount-OpImageWeightedSampleQCOM-06971**
If `OpImageWeightedSampleQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM`.

- **VUID-vkCmdDrawIndirectCount-OpImageWeightedSampleQCOM-06972**
  If `OpImageWeightedSampleQCOM` uses a `VkImageView` as a sample weight image as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM`.

- **VUID-vkCmdDrawIndirectCount-OpImageBoxFilterQCOM-06973**
  If `OpImageBoxFilterQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM`.

- **VUID-vkCmdDrawIndirectCount-OpImageBlockMatchSSDQCOM-06974**
  If `OpImageBlockMatchSSDQCOM` is used to read from an `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM`.

- **VUID-vkCmdDrawIndirectCount-OpImageBlockMatchSADQCOM-06975**
  If `OpImageBlockMatchSADQCOM` is used to read from an `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM`.

- **VUID-vkCmdDrawIndirectCount-OpImageBlockMatchSSDQCOM-06976**
  If `OpImageBlockMatchSSDQCOM` or `OpImageBlockMatchSADQCOM` is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.

- **VUID-vkCmdDrawIndirectCount-OpImageWeightedSampleQCOM-06977**
  If any command other than `OpImageWeightedSampleQCOM`, `OpImageBoxFilterQCOM`, `OpImageBlockMatchWindowSSDQCOM`, `OpImageBlockMatchWindowSADQCOM`, `OpImageBlockMatchGatherSSDQCOM`, `OpImageBlockMatchGatherSADQCOM`, `OpImageBlockMatchSSDQCOM`, or `OpImageBlockMatchSADQCOM` uses a `VkSampler` as a result of this command, then the sampler must have been created with `VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM`.

- **VUID-vkCmdDrawIndirectCount-OpImageWeightedSampleQCOM-06978**
  If any command other than `OpImageWeightedSampleQCOM`, `OpImageBoxFilterQCOM`, `OpImageBlockMatchWindowSSDQCOM`, `OpImageBlockMatchWindowSADQCOM`, `OpImageBlockMatchGatherSSDQCOM`, `OpImageBlockMatchGatherSADQCOM`, `OpImageBlockMatchSSDQCOM`, or `OpImageBlockMatchSADQCOM` uses a `VkSampler` as a result of this command, then the sampler must not have been created with `VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM`.

- **VUID-vkCmdDrawIndirectCount-OpImageBlockMatchWindow-09215**
  If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from an `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM`.

- **VUID-vkCmdDrawIndirectCount-OpImageBlockMatchWindow-09216**
  If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from an `VkImageView` as a result of this command, then the image view's format must be a single-component format.
If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.

Any shader invocation executed by this command must terminate.

The current render pass must be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`.

The subpass index of the current render pass must be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`.

If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set.

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it must be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass.

Input attachment views accessed in a subpass must be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass’ `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility.

Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command.

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_COLOR_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command.

If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set.

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it must be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass.

Input attachment views accessed in a subpass must be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass’ `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility.

Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command.

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_COLOR_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command.

If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set.

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it must be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass.

Input attachment views accessed in a subpass must be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass’ `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility.

Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command.

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_COLOR_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command.

If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set.

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it must be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass.

Input attachment views accessed in a subpass must be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass’ `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility.

Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command.

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_COLOR_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command.
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_DEPTH_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

**VUID-vkCmdDrawIndirectCount-None-09002**

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

- the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

**VUID-vkCmdDrawIndirectCount-None-09003**

If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

**VUID-vkCmdDrawIndirectCount-None-06539**

If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, storage image, or sampled image by this command this command must not write to that image subresource as an attachment

**VUID-vkCmdDrawIndirectCount-None-06886**

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes must be disabled

**VUID-vkCmdDrawIndirectCount-None-06887**

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops must be `VK_STENCIL_OP_KEEP`

**VUID-vkCmdDrawIndirectCount-None-07831**

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled then `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command.

If a shader object that outputs line primitives is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT` stage, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBiasEnable` in the current command buffer set `depthBiasEnable` to `VK_TRUE`, `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled then `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer set any element of `pColorBlendEnables` to `VK_TRUE`, and the most recent call to `vkCmdSetColorBlendEquationEXT` in the current command buffer set the same element of...
pColorBlendEquations to a VkColorBlendEquationEXT structure with any VkBlendFactor member with a value of VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, vkCmdSetBlendConstants must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07836
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled then vkCmdSetDepthBounds must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08622
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDepthBoundsTestEnable in the current command buffer set depthBoundsTestEnable to VK_TRUE, then vkCmdSetDepthBounds must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07837
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled then vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08623
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07838
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled then vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08624
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07839
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled then vkCmdSetStencilReference must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08625
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilReference must have been called in the current command buffer.
prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-maxMultiviewInstanceIndex-02688**
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- **VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-02689**
  If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE` and the current subpass has a depth/stencil attachment, then that attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLES_COMPATIBLE_DEPTH_BIT_EXT` bit set

- **VUID-vkCmdDrawIndirectCount-None-06666**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEXT` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08626**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetSampleLocationsEnableEXT` in the current command buffer set `sampleLocationsEnable` to `VK_TRUE`, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEXT` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-sampleLocationsPerPixel-07934**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- **VUID-vkCmdDrawIndirectCount-None-07840**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled then `vkCmdSetCullMode` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08627**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07841**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled then `vkCmdSetFrontFace` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08628**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07843
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled then vkCmdSetDepthTestEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08629
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthTestEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07844
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled then vkCmdSetDepthWriteEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08630
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthWriteEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07845
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled then vkCmdSetDepthCompareOp must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08631
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDepthTestEnable in the current command buffer set depthTestEnable to VK_TRUE, then vkCmdSetDepthCompareOp must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07846
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled then vkCmdSetDepthBoundsTestEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08632
  If a shader object is bound to any graphics stage, and the depthBounds feature is enabled, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then the vkCmdSetDepthBoundsTestEnable must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of `vkCmdSetViewportWithCount` must match the `VkPipelineViewportStateCreateInfo::scissorCount` of the pipeline.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the scissorCount parameter of `vkCmdSetScissorWithCount` must match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline.

If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of `vkCmdSetViewportWithCount` must match the scissorCount parameter of `vkCmdSetScissorWithCount`.

If a shader object is bound to any graphics stage, then both `vkCmdSetViewportWithCount`
and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

- **VUID-vkCmdDrawIndirectCount-viewportCount-04137**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportWScalingStateCreateInfoNV` `::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndirectCount-viewportCount-04138**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndirectCount-None-09232**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then `vkCmdSetViewportWScalingNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-08636**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndirectCount-viewportCount-04139**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportShadingRateImageStateCreateInfoNV` `::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV`.

- **VUID-vkCmdDrawIndirectCount-viewportCount-04140**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndirectCount-shadingRateImage-09233**
  If the shadingRateImage feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command.
If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, and the most recent call to `vkCmdSetShadingRateImageEnableNV` in the current command buffer set shadingRateImageEnable to `VK_TRUE`, then `vkCmdSetViewportShadingRatePaletteNV` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, then the viewportCount parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportSwizzleStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV` dynamic state enabled then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV` dynamic state enabled then `vkCmdSetExclusiveScissorNV` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetExclusiveScissorEnableNV` in the current command buffer set any element of `pExclusiveScissorEnables` to `VK_TRUE`, then `vkCmdSetExclusiveScissorNV` must have been called in the current command buffer if that feature is enabled.
called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-04876**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled then `vkCmdSetRasterizerDiscardEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-08639**
  If a shader object is bound to any graphics stage, then `vkCmdSetRasterizerDiscardEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-04877**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-08640**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-logicOp-04878**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.

- **VUID-vkCmdDrawIndirectCount-logicOp-08641**
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the `logicOp` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.

- **VUID-vkCmdDrawIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-04552**
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

- **VUID-vkCmdDrawIndirectCount-primitiveFragmentShadingRateWithMultipleViewports-08642**
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of
vkCmdSetViewportWithCount must be 1

• VUID-vkCmdDrawIndirectCount-blendEnable-04727
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view’s format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the blendEnable member of the pAttachments member of pColorBlendState must be VK_FALSE

• VUID-vkCmdDrawIndirectCount-None-08643
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then for each color attachment in the render pass, if the corresponding image view’s format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding member of pColorBlendEnables in the most recent call to vkCmdSetColorBlendEnableEXT in the current command buffer that affected that attachment index must have been VK_FALSE

• VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07284
  If rasterization is not disabled in the bound graphics pipeline, and none of the VK_AMD_mixed_attachment_samples extension, the VK_NV_framebuffer_mixed_samples extension, or the multisampledRenderToSingleSampled feature is enabled, then rasterizationSamples for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments

• VUID-vkCmdDrawIndirectCount-None-08644
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and none of the VK_AMD_mixed_attachment_samples extension, the VK_NV_framebuffer_mixed_samples extension, or the multisampledRenderToSingleSampled feature is enabled, then the most recent call to vkCmdSetRasterizationSamplesEXT in the current command buffer must have set rasterizationSamples to be the same as the number of samples for the current render pass color and/or depth/stencil attachments

• VUID-vkCmdDrawIndirectCount-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with vkCmdBeginRendering

• VUID-vkCmdDrawIndirectCount-imageView-06172
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView member of pDepthAttachment is not VK_NULL_HANDLE, and the layout member of pDepthAttachment is VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL, this command must not write any values to the depth attachment

• VUID-vkCmdDrawIndirectCount-imageView-06173
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView member of pStencelAttachment is not VK_NULL_HANDLE, and the layout member of pStencelAttachment is VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL, this command must not write any values to the stencil attachment

• VUID-vkCmdDrawIndirectCount-imageView-06174
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView
member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment

- VUID-vkCmdDrawIndirectCount-imageView-06175
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment

- VUID-vkCmdDrawIndirectCount-imageView-06176
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment

- VUID-vkCmdDrawIndirectCount-imageView-06177
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment

- VUID-vkCmdDrawIndirectCount-viewMask-06178
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo`::`viewMask` equal to `VkRenderingInfo`::`viewMask`

- VUID-vkCmdDrawIndirectCount-colorAttachmentCount-06179
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo`::`colorAttachmentCount` equal to `VkRenderingInfo`::`colorAttachmentCount`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08910
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound graphics pipeline

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08911
  If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08912
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.

- **VUID-vkCmdDrawIndirectCount-None-07749**
  
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-08646**
  
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-attachmentCount-07750**
  
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline.

- **VUID-vkCmdDrawIndirectCount-attachmentCount-08647**
  
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance.

- **VUID-vkCmdDrawIndirectCount-attachmentCount-07751**
  
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command for each discard rectangle in ` VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`.

- **VUID-vkCmdDrawIndirectCount-attachmentCount-07880**
  
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-rasterizerDiscardEnable-09236**
  
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then
vkCmdSetDiscardRectangleEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08648
  If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07881
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled then vkCmdSetDiscardRectangleModeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08649
  If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDiscardRectangleEnableEXT in the current command buffer set discardRectangleEnable to VK_TRUE, then vkCmdSetDiscardRectangleModeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED.

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08914
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView.

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08915
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED.

- VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently
bound graphics pipeline **must** be equal to **VK_FORMAT_UNDEFINED**

- **VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08917**
  If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not **VK_NULL_HANDLE**, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- **VUID-vkCmdDrawIndirectCount-dynamicRenderingUnusedAttachments-08918**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not **VK_NULL_HANDLE**, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be **VK_FORMAT_UNDEFINED**

- **VUID-vkCmdDrawIndirectCount-imageView-06183**
  If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not **VK_NULL_HANDLE**, the currently bound graphics pipeline **must** have been created with **VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR**

- **VUID-vkCmdDrawIndirectCount-imageView-06184**
  If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not **VK_NULL_HANDLE**, the currently bound graphics pipeline **must** have been created with **VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT**

- **VUID-vkCmdDrawIndirectCount-colorAttachmentCount-06185**
  If the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to **VK_NULL_HANDLE** **must** have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline

- **VUID-vkCmdDrawIndirectCount-pDepthAttachment-06186**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pDepthAttachment->imageView` was not **VK_NULL_HANDLE**, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`

- **VUID-vkCmdDrawIndirectCount-pStencilAttachment-06187**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pDepthAttachment->imageView` was not **VK_NULL_HANDLE**, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`
If the currently bound graphics pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the multisampledRenderToSingleSampled feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::pColorAttachments` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of `rasterizationSamples` for the currently bound graphics pipeline.

• **VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07285**
If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

• **VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07286**
If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `imageView` was not `VK_NULL_HANDLE`, the value of the `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

• **VUID-vkCmdDrawIndirectCount-multisampledRenderToSingleSampled-07287**
If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `imageView` was not `VK_NULL_HANDLE`, the value of the `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

• **VUID-vkCmdDrawIndirectCount-pNext-07935**
If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`.

• **VUID-vkCmdDrawIndirectCount-renderPass-06198**
If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline must have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`.

• **VUID-vkCmdDrawIndirectCount-pColorAttachments-08963**
If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the
corresponding element of the \texttt{VkRenderingInfo::pColorAttachments->imageView} was not \texttt{VK_NULL_HANDLE}, then the corresponding element of \texttt{VkPipelineRenderingCreateInfo::pColorAttachmentFormats} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

- \textbf{VUID-vkCmdDrawIndirectCount-pDepthAttachment-08964}
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound, depth test is enabled, and the \texttt{VkRenderingInfo::pDepthAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, then the \texttt{VkPipelineRenderingCreateInfo::depthAttachmentFormat} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

- \textbf{VUID-vkCmdDrawIndirectCount-pStencilAttachment-08965}
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound, stencil test is enabled and the \texttt{VkRenderingInfo::pStencilAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, then the \texttt{VkPipelineRenderingCreateInfo::stencilAttachmentFormat} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

- \textbf{VUID-vkCmdDrawIndirectCount-primitivesGeneratedQueryWithRasterizerDiscard-06708}
  If the \texttt{primitivesGeneratedQueryWithRasterizerDiscard} feature is not enabled and the \texttt{VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT} query is active, \texttt{rasterization discard} \textbf{must} not be enabled

- \textbf{VUID-vkCmdDrawIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-06709}
  If the \texttt{primitivesGeneratedQueryWithNonZeroStreams} feature is not enabled and the \texttt{VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT} query is active, the bound graphics pipeline \textbf{must} not have been created with a non-zero value in \texttt{VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream}

- \textbf{VUID-vkCmdDrawIndirectCount-None-07619}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT} dynamic state enabled then \texttt{vkCmdSetTessellationDomainOriginEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirectCount-None-07620}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetDepthClampEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirectCount-None-09237}
  If a shader object is bound to the \texttt{VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT} stage, then \texttt{vkCmdSetTessellationDomainOriginEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirectCount-None-08650}
  If the \texttt{depthClamp} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDepthClampEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawIndirectCount-None-07621}
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07622**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08652**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07623**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08653**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07624**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- **VUID-vkCmdDrawIndirectCount-alphaToCoverageEnable-08919**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- **VUID-vkCmdDrawIndirectCount-None-08654**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawIndirectCount-alphaToCoverageEnable-08920
If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set
alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface must contain a
variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawIndirectCount-None-07625
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled then
vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer
prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08655
If the alphaToOne feature is enabled, and a shader object is bound to any graphics stage,
and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command
buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToOneEnableEXT
must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07626
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled then
vkCmdSetLogicOpEnableEXT must have been called in the current command buffer
prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08656
If the logicOp feature is enabled, and a shader object is bound to the
VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to
vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEnableEXT must have
been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07627
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then
vkCmdSetColorBlendEnableEXT must have been called in the current command buffer
prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08657
If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent
call to vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorBlendEnableEXT must have
been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07628
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then
vkCmdSetColorBlendEquationEXT must have been called in the current command buffer
prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08658
If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, and the most recent call to
vkCmdSetColorBlendEnableEXT for any attachment set that attachment’s value in pColorBlendEnables to VK_TRUE, then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07629
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08659
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07630
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08660
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage, then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07631
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08661
  If the geometryStreams feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-07632
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled then vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectCount-None-08662
  If the VK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetConservativeRasterizationModeEXT in the current command buffer set conservativeRasterizationMode to VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT,
then \texttt{vkCmdSetExtraPrimitiveOverestimationSizeEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07633**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetDepthClipEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08663**
  If the \texttt{depthClipEnable} feature is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetDepthClipEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07634**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetSampleLocationsEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08664**
  If the \texttt{VK_EXT_sample_locations} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetSampleLocationsEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07635**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT} dynamic state enabled then \texttt{vkCmdSetColorBlendAdvancedEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07636**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT} dynamic state enabled then \texttt{vkCmdSetProvokingVertexModeEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08665**
  If the \texttt{VK_EXT_provoking_vertex} extension is enabled, and a shader object is bound to the \texttt{VK_SHADER_STAGE_VERTEX_BIT} stage, then \texttt{vkCmdSetProvokingVertexModeEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07637**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT} dynamic state enabled then \texttt{vkCmdSetLineRasterizationModeEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08666**
  If the \texttt{VK_EXT_line_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPolygonModeEXT} in the current
command buffer set polygonMode to VK_POLYGON_MODE_LINE, then
vkCmdSetLineRasterizationModeEXT must have been called in the current command
buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08667
  If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to the
  vertex stage, and the most recent call to vkCmdSetPrimitiveTopology in the current
  command buffer set primitiveTopology to any line topology, then
  vkCmdSetLineRasterizationModeEXT must have been called in the current command
  buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08668
  If the VK_EXT_line_rasterization extension is enabled, and a shader object that outputs
  line primitives is bound to the tessellation evaluation or geometry stage, then
  vkCmdSetLineRasterizationModeEXT must have been called in the current command
  buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07638
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled then
  vkCmdSetLineStippleEnableEXT must have been called in the current command buffer
  prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08669
  If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to any
  graphics stage, and the most recent call to vkCmdSetPolygonModeEXT in the current
  command buffer set polygonMode to VK_POLYGON_MODE_LINE, then
  vkCmdSetLineStippleEnableEXT must have been called in the current command buffer
  prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08670
  If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to the
  vertex stage, and the most recent call to vkCmdSetPrimitiveTopology in the current
  command buffer set primitiveTopology to any line topology, then
  vkCmdSetLineStippleEnableEXT must have been called in the current command buffer
  prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08671
  If the VK_EXT_line_rasterization extension is enabled, and a shader object that outputs
  line primitives is bound to the tessellation evaluation or geometry stage, then
  vkCmdSetLineStippleEnableEXT must have been called in the current command buffer
  prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-07849
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_LINE_STIPPLE_EXT dynamic state enabled then vkCmdSetLineStippleEXT
  must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-None-08672
  If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to any
  graphics stage, and the most recent call to vkCmdSetLineStippleEnableEXT in the current
  command buffer set stippledLineEnable to VK_TRUE, then vkCmdSetLineStippleEXT must
  have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV` dynamic state enabled then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.
If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetCoverageToColorEnableNV` in the current command buffer set `coverageToColorEnable` to `VK_TRUE`, then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-07644**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-08678**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-07645**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-08679**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationModeNV` in the current command buffer set `coverageModulationMode` to any value other than `VK_COVERAGE_MODULATION_MODE_NONE_NV`, then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-07646**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-08680**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationTableEnable` to `VK_TRUE`, then `vkCmdSetCoverageModulationTableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectCount-None-07647**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV` dynamic state enabled then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command
buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-pipelineFragmentShadingRate-09238
  If the `pipelineFragmentShadingRate` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFragmentShadingRateKHR` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-08681
  If the `shadingRateImage` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07648
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV` dynamic state enabled then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-08682
  If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-07649
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-None-08683
  If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectCount-pColorBlendEnables-07470
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view’s format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`

- VUID-vkCmdDrawIndirectCount-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the
last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass

- **VUID-vkCmdDrawIndirectCount-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- **VUID-vkCmdDrawIndirectCount-samples-07473**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawIndirectCount-rasterizationSamples-07474**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or depth/stencil attachments

- **VUID-vkCmdDrawIndirectCount-None-09211**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the `rasterizationSamples` member of that structure

- **VUID-vkCmdDrawIndirectCount-firstAttachment-07476**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEnableEXT` calls must specify an enable for all active color attachments in the current subpass

- **VUID-vkCmdDrawIndirectCount-firstAttachment-07477**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEquationEXT` calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then
vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorWriteMaskEXT calls must specify the color write mask for all active color attachments in the current subpass.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then
vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments.

If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, and the bound graphics pipeline was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT must have set the rasterizationStream to zero.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT.

If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable
was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, and the current subpass has a depth/stencil attachment, then that attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- **VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07485**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- **VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07486**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- **VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07487**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code **must** not statically use the extended instruction `InterpolateAtSample`

- **VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07936**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` **must** evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07937**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` **must** evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by
vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- **VUID-vkCmdDrawIndirectCount-sampleLocationsEnable-07938**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationsPerPixel must equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- **VUID-vkCmdDrawIndirectCount-coverageModulationTableEnable-07488**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV state enabled and the last call to vkCmdSetCoverageModulationTableEnableNV set coverageModulationTableEnable to VK_TRUE, then the coverageModulationTableCount parameter in the last call to vkCmdSetCoverageModulationTableNV must equal the current rasterizationSamples divided by the number of color samples in the current subpass

- **VUID-vkCmdDrawIndirectCount-rasterizationSamples-07489**
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current rasterizationSamples must be the same as the sample count of the depth/stencil attachment

- **VUID-vkCmdDrawIndirectCount-coverageToColorEnable-07490**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV state enabled and the last call to vkCmdSetCoverageToColorEnableNV set the coverageToColorEnable to VK_TRUE, then the current subpass must have a color attachment at the location selected by the last call to vkCmdSetCoverageToColorLocationNV coverageToColorLocation, with a VkFormat of VK_FORMAT_R8_UINT, VK_FORMAT_R8_SINT, VK_FORMAT_R16_UINT, VK_FORMAT_R16_SINT, VK_FORMAT_R32_UINT, or VK_FORMAT_R32_SINT

- **VUID-vkCmdDrawIndirectCount-coverageReductionMode-07491**
  If this VK_NV_coverage_reduction_mode extension is enabled, the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, the current coverage reduction mode coverageReductionMode, then the current rasterizationSamples, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV

- **VUID-vkCmdDrawIndirectCount-viewportCount-07492**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount
• VUID-vkCmdDrawIndirectCount-viewportCount-07493
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportSwizzleNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

• VUID-vkCmdDrawIndirectCount-rasterizationSamples-07494
If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if the current subpass has any color attachments and `rasterizationSamples` of the last call to `vkCmdSetRasterizationSamplesEXT` is greater than the number of color samples, then the pipeline `sampleShadingEnable` must be `VK_FALSE`.

• VUID-vkCmdDrawIndirectCount-stippledLineEnable-07495
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT`, then the `stippledRectangularLines` feature must be enabled.

• VUID-vkCmdDrawIndirectCount-stippledLineEnable-07496
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT`, then the `stippledBresenhamLines` feature must be enabled.

• VUID-vkCmdDrawIndirectCount-stippledLineEnable-07497
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT`, then the `stippledSmoothLines` feature must be enabled.

• VUID-vkCmdDrawIndirectCount-stippledLineEnable-07498
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature must be enabled and `VkPhysicalDeviceLimits::strictLines` must be `VK_TRUE`.

• VUID-vkCmdDrawIndirectCount-conservativePointAndLineRasterization-07499
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, conservativePointAndLineRasterization is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to...
**vkCmdSetConservativeRasterizationModeEXT** must be **VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT**

- **VUID-vkCmdDrawIndirectCount-stage-07073**
  If the currently bound pipeline was created with the *VkPipelineShaderStageCreateInfo*::*stage* member of an element of *VkGraphicsPipelineCreateInfo::*pStages* set to **VK_SHADER_STAGE_VERTEX_BIT**, **VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT**, **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT** or **VK_SHADER_STAGE_GEOMETRY_BIT**, then Mesh Shader Queries must not be active

- **VUID-vkCmdDrawIndirectCount-None-08877**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT** dynamic state *vkCmdSetAttachmentFeedbackLoopEnableEXT* must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-07850**
  If dynamic state was inherited from *VkCommandBufferInheritanceViewportScissorInfoNV*, it must be set in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08684**
  If there is no bound graphics pipeline, *vkCmdBindShadersEXT* must have been called in the current command buffer with *pStages* with an element of **VK_SHADER_STAGE_VERTEX_BIT**

- **VUID-vkCmdDrawIndirectCount-None-08685**
  If there is no bound graphics pipeline, and the *tessellationShader* feature is enabled, *vkCmdBindShadersEXT* must have been called in the current command buffer with *pStages* with an element of **VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT**

- **VUID-vkCmdDrawIndirectCount-None-08686**
  If there is no bound graphics pipeline, and the *tessellationShader* feature is enabled, *vkCmdBindShadersEXT* must have been called in the current command buffer with *pStages* with an element of **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT**

- **VUID-vkCmdDrawIndirectCount-None-08687**
  If there is no bound graphics pipeline, and the *geometryShader* feature is enabled, *vkCmdBindShadersEXT* must have been called in the current command buffer with *pStages* with an element of **VK_SHADER_STAGE_GEOMETRY_BIT**

- **VUID-vkCmdDrawIndirectCount-None-08688**
  If there is no bound graphics pipeline, *vkCmdBindShadersEXT* must have been called in the current command buffer with *pStages* with an element of **VK_SHADER_STAGE_FRAGMENT_BIT**

- **VUID-vkCmdDrawIndirectCount-None-08689**
  If there is no bound graphics pipeline, and the *taskShader* feature is enabled, *vkCmdBindShadersEXT* must have been called in the current command buffer with *pStages* with an element of **VK_SHADER_STAGE_TASK_BIT_EXT**

- **VUID-vkCmdDrawIndirectCount-None-08690**
  If there is no bound graphics pipeline, and the *meshShader* feature is enabled, *vkCmdBindShadersEXT* must have been called in the current command buffer with *pStages* with an element of **VK_SHADER_STAGE_MESH_BIT_EXT**
If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages must have a valid VkShaderEXT bound, and the other must have no VkShaderEXT bound.

If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created without the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, a valid VkShaderEXT must be bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage.

If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created with the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, there must be no VkShaderEXT bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage.

If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there must be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage.

If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call must also be bound.

If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call must not have any VkShaderEXT bound.

All bound graphics shader objects must have been created with identical or identically defined push constant ranges.

All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts.

If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state includes a fragment shader stage, was created with
VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable must be VK_FALSE

• VUID-vkCmdDrawIndirectCount-pDynamicStates-08716
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_STENCIL_WRITE_MASK set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask must be 0

• VUID-vkCmdDrawIndirectCount-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command must be less than maxFragmentDualSrcAttachments

• VUID-vkCmdDrawIndirectCount-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface must have either valid or VK_NULL_HANDLE buffers bound

• VUID-vkCmdDrawIndirectCount-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface must not be VK_NULL_HANDLE

• VUID-vkCmdDrawIndirectCount-None-02721
  For a given vertex buffer binding, any attribute data fetched must be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

• VUID-vkCmdDrawIndirectCount-None-07842
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectCount-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology must be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state
• VUID-vkCmdDrawIndirectCount-None-04912
If the bound graphics pipeline was created with both the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` and `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT` dynamic states enabled, then `vkCmdSetVertexInputEXT` must have been called in the current command buffer prior to this draw command.

• VUID-vkCmdDrawIndirectCount-pStrides-04913
If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdBindVertexBuffer2EXT` must have been called in the current command buffer prior to this draw command, and the `pStrides` parameter of `vkCmdBindVertexBuffer2EXT` must not be NULL.

• VUID-vkCmdDrawIndirectCount-None-08881
If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetPrimitiveTopology` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawIndirectCount-None-04914
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then `vkCmdSetVertexInputEXT` must have been called in the current command buffer prior to this draw command.

• VUID-vkCmdDrawIndirectCount-Input-07939
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then all variables with the `Input` storage class decorated with `Location` in the `Vertex` Execution Model `OpEntryPoint` must contain a location in `VkVertexInputAttributeDescription2EXT`::`location`.

• VUID-vkCmdDrawIndirectCount-Input-08734
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then the numeric type associated with all `Input` variables of the corresponding `Location` in the `Vertex` Execution Model `OpEntryPoint` must be the same as `VkVertexInputAttributeDescription2EXT`::`format`.

• VUID-vkCmdDrawIndirectCount-format-08936
If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `VkVertexInputAttributeDescription2EXT`::`format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the `Vertex` Execution Model `OpEntryPoint` must be 64-bit.

• VUID-vkCmdDrawIndirectCount-format-08937
If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and the scalar width associated with a `Location` decorated `Input` variable in the `Vertex` Execution Model `OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT`::`format` must have a 64-bit component.

• VUID-vkCmdDrawIndirectCount-None-09203
If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled,
and \texttt{VkVertexInputAttributeDescription2EXT::format} has a 64-bit component, then all \texttt{Input} variables at the corresponding \texttt{Location} in the \texttt{Vertex Execution Model OpEntryPoint} \textbf{must} not use components that are not present in the format

- **VUID-vkCmdDrawIndirectCount-None-08882**
  If a shader object is bound to the \texttt{VK_SHADER_STAGE_VERTEX_BIT} stage, then \texttt{vkCmdSetVertexInputEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-04875**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT} dynamic state enabled then \texttt{vkCmdSetPatchControlPointsEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-08883**
  If a shader object is bound to the \texttt{VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT} stage, then \texttt{vkCmdSetPatchControlPointsEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-None-04879**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE} dynamic state enabled then \texttt{vkCmdSetPrimitiveRestartEnable} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-rasterizerDiscardEnable-08884**
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, \texttt{vkCmdSetPrimitiveRestartEnable} \textbf{must} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectCount-stage-06481**
  The bound graphics pipeline \textbf{must} not have been created with the \texttt{VkPipelineShaderStageCreateInfo::stage} member of an element of \texttt{VkGraphicsPipelineCreateInfo::pStages} set to \texttt{VK_SHADER_STAGE_TASK_BIT_EXT} or \texttt{VK_SHADER_STAGE_MESH_BIT_EXT}

- **VUID-vkCmdDrawIndirectCount-None-08885**
  There \textbf{must} be no shader object bound to either of the \texttt{VK_SHADER_STAGE_TASK_BIT_EXT} or \texttt{VK_SHADER_STAGE_MESH_BIT_EXT} stages

- **VUID-vkCmdDrawIndirectCount-buffer-02708**
  If \texttt{buffer} is non-sparse then it \textbf{must} be bound completely and contiguously to a single \texttt{VkDeviceMemory} object

- **VUID-vkCmdDrawIndirectCount-buffer-02709**
  \texttt{buffer} \textbf{must} have been created with the \texttt{VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT} bit set

- **VUID-vkCmdDrawIndirectCount-offset-02710**
  \texttt{offset} \textbf{must} be a multiple of 4

- **VUID-vkCmdDrawIndirectCount-commandBuffer-02711**
  \texttt{commandBuffer} \textbf{must} not be a protected command buffer
• VUID-vkCmdDrawIndirectCount-countBuffer-02714
  If countBuffer is non-sparse then it must be bound completely and contiguously to a single VkDeviceMemory object

• VUID-vkCmdDrawIndirectCount-countBuffer-02715
  countBuffer must have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set

• VUID-vkCmdDrawIndirectCount-countBufferOffset-02716
  countBufferOffset must be a multiple of 4

• VUID-vkCmdDrawIndirectCount-countBuffer-02717
  The count stored in countBuffer must be less than or equal to VkPhysicalDeviceLimits::maxDrawIndirectCount

• VUID-vkCmdDrawIndirectCount-countBufferOffset-04129
  (countBufferOffset + sizeof(uint32_t)) must be less than or equal to the size of countBuffer

• VUID-vkCmdDrawIndirectCount-None-04445
  If drawIndirectCount is not enabled this function must not be used

• VUID-vkCmdDrawIndirectCount-stride-03110
  stride must be a multiple of 4 and must be greater than or equal to sizeof(VkDrawIndirectCommand)

• VUID-vkCmdDrawIndirectCount-maxDrawCount-03111
  If maxDrawCount is greater than or equal to 1, (stride × (maxDrawCount - 1) + offset + sizeof(VkDrawIndirectCommand)) must be less than or equal to the size of buffer

• VUID-vkCmdDrawIndirectCount-countBuffer-03121
  If the count stored in countBuffer is equal to 1, (offset + sizeof(VkDrawIndirectCommand)) must be less than or equal to the size of buffer

• VUID-vkCmdDrawIndirectCount-countBuffer-03122
  If the count stored in countBuffer is greater than 1, (stride × (drawCount - 1) + offset + sizeof(VkDrawIndirectCommand)) must be less than or equal to the size of buffer

**Valid Usage (Implicit)**

• VUID-vkCmdDrawIndirectCount-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle

• VUID-vkCmdDrawIndirectCount-buffer-parameter
  buffer must be a valid VkBuffer handle

• VUID-vkCmdDrawIndirectCount-countBuffer-parameter
  countBuffer must be a valid VkBuffer handle

• VUID-vkCmdDrawIndirectCount-commandBuffer-recording
  commandBuffer must be in the recording state

• VUID-vkCmdDrawIndirectCount-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations

• VUID-vkCmdDrawIndirectCount-renderpass
This command **must** only be called inside of a render pass instance

- VUID-vkCmdDrawIndirectCount-videocoding
  This command **must** only be called outside of a video coding scope

- VUID-vkCmdDrawIndirectCount-commonparent
  Each of `buffer`, `commandBuffer`, and `countBuffer` **must** have been created, allocated, or retrieved from the same `VkDevice`

### Host Synchronization

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

### Command Properties

To record an indexed indirect drawing command, call:

```c
// Provided by VK_VERSION_1_0
void vkCmdDrawIndexedIndirect(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    uint32_t drawCount,
    uint32_t stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `drawCount` is the number of draws to execute, and can be zero.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawIndexedIndirect` behaves similarly to `vkCmdDrawIndexed` except that the parameters are read by the device from a buffer during execution. `drawCount` draws are executed by the command, with parameters taken from `buffer` starting at `offset` and increasing by `stride` bytes for each successive draw. The parameters of each draw are encoded in an array of `VkDrawIndexedIndirectCommand` structures. If `drawCount` is less than or equal to one, `stride` is
Valid Usage

- VUID-vkCmdDrawIndexedIndirect-magFilter-04553
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawIndexedIndirect-mipmapMode-04770
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawIndexedIndirect-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features must contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT

- VUID-vkCmdDrawIndexedIndirect-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT

- VUID-vkCmdDrawIndexedIndirect-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features must contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT

- VUID-vkCmdDrawIndexedIndirect-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT

- VUID-vkCmdDrawIndexedIndirect-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it must not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY

- VUID-vkCmdDrawIndexedIndirect-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawIndexedIndirect-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command must have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by
If the `cubicRangeClamp` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must not have a `VkSamplerReductionModeCreateInfo` `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM`.

Any `VkImageView` being sampled with a `VkSamplerReductionModeCreateInfo` `::reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM` as a result of this command must sample with `VK_FILTER_CUBIC_EXT`.

If the `selectableCubicWeights` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have `VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights` equal to `VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM`.

Any `VkImage` created with a `VkImageCreateInfo` `::flags` containing `VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV` sampled as a result of this command must only be sampled using a `VkSamplerAddressMode` of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`.

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view’s format features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view’s buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

Any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view’s buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view’s buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

For each set $n$ that is statically used by a bound shader, a descriptor set must have been bound to $n$ at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set $n$, with the `VkPipelineLayout` or `VkDescriptorSetLayout` array that was used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

For each push constant that is statically used by a bound shader, a push constant value...
must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

• VUID-vkCmdDrawIndexedIndirect-maintenance4-08602
  If the maintenance4 feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

• VUID-vkCmdDrawIndexedIndirect-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, must be valid if they are statically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

• VUID-vkCmdDrawIndexedIndirect-None-08115
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline must have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

• VUID-vkCmdDrawIndexedIndirect-None-08116
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

• VUID-vkCmdDrawIndexedIndirect-None-08604
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command

• VUID-vkCmdDrawIndexedIndirect-None-08117
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline must have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

• VUID-vkCmdDrawIndexedIndirect-None-08119
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

• VUID-vkCmdDrawIndexedIndirect-None-08605
  If a descriptor is dynamically used with a VkShaderEXT created with a VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

• VUID-vkCmdDrawIndexedIndirect-None-08606
  If the shaderObject feature is not enabled, a valid pipeline must be bound to the pipeline
• **VUID-vkCmdDrawIndexedIndirect-None-08607**
  If the *shaderObject* is enabled, either a valid pipeline **must** be bound to the pipeline bind point used by this command, or a valid combination of valid and *VK_NULL_HANDLE* shader objects **must** be bound to every supported shader stage corresponding to the pipeline bind point used by this command.

• **VUID-vkCmdDrawIndexedIndirect-None-08608**
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state not specified as dynamic in the *VkPipeline* object bound to the pipeline bind point used by this command, since that pipeline was bound.

• **VUID-vkCmdDrawIndexedIndirect-None-08609**
  If the *VkPipeline* object bound to the pipeline bind point used by this command or any *VkShaderEXT* bound to a stage corresponding to the pipeline bind point used by this command accesses a *VkSampler* object that uses unnormalized coordinates, that sampler **must** not be used to sample from any *VkImage* with a *VkImageView* of the type *VK_IMAGE_VIEW_TYPE_3D*, *VK_IMAGE_VIEW_TYPE_CUBE*, *VK_IMAGE_VIEW_TYPE_1D_ARRAY*, *VK_IMAGE_VIEW_TYPE_2D_ARRAY* or *VK_IMAGE_VIEW_TYPE_CUBE_ARRAY*, in any shader stage.

• **VUID-vkCmdDrawIndexedIndirect-None-08610**
  If any stage of the *VkPipeline* object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either *VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT* or *VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT* for *uniformBuffers*, and the *robustBufferAccess* feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

• **VUID-vkCmdDrawIndexedIndirect-uniformBuffers-06935**
  If any stage of the *VkPipeline* object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either *VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT* or *VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT* for *uniformBuffers*, and the *robustBufferAccess* feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

• **VUID-vkCmdDrawIndexedIndirect-None-08612**
  If the *robustBufferAccess* feature is not enabled, and any *VkShaderEXT* bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

• **VUID-vkCmdDrawIndexedIndirect-storageBuffers-06936**
  If any stage of the *VkPipeline* object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either *VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT* or *VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT* for *storageBuffers*, and the *robustBufferAccess* feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

If any stage of the *VkPipeline* object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either *VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT* or *VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT* for *storageBuffers*, and the *robustBufferAccess* feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.
command accesses a storage buffer, and that stage was created without enabling either
VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT
or
VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT
for storageBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndexedIndirect-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndexedIndirect-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders must not be a protected resource

• VUID-vkCmdDrawIndexedIndirect-ConstOffset-06550
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler YC aC conversion, that object must only be used with OpImageSample* or OpImageSparseSample* instructions

• VUID-vkCmdDrawIndexedIndirect-ConstOffset-06551
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler YC aC conversion, that object must not use the ConstOffset and Offset operands

• VUID-vkCmdDrawIndexedIndirect-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType must match the Dim operand of the OpTypeImage as described in Instruction/Sampler/Image View Validation

• VUID-vkCmdDrawIndexedIndirect-format-07753
  If a VkImageView is accessed as a result of this command, then the numeric type of the image view's format and the Sampled Type operand of the OpTypeImage must match

• VUID-vkCmdDrawIndexedIndirect-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM_KHR is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have at least as many components as the image view's format

• VUID-vkCmdDrawIndexedIndirect-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM_KHR is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have four components

• VUID-vkCmdDrawIndexedIndirect-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have at least as many components as the buffer view's format

• VUID-vkCmdDrawIndexedIndirect-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 64
If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32.

If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64.

If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32.

If the `sparseImageInt64Atomics` feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command.

If the `sparseImageInt64Atomics` feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command.

If `OpImageWeightedSampleQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM`.

If `OpImageWeightedSampleQCOM` uses a `VkImageView` as a sample weight image as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM`.

If `OpImageBoxFilterQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` **must** contain `VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM`.

If `OpImageBlockMatchSSDQCOM` is used to read from an `VkImageView` as a result of this command, then the specified reference coordinates **must** not fail integer texel coordinate validation.
If \texttt{OpImageWeightedSampleQCOM}, \texttt{OpImageBoxFilterQCOM}, \texttt{OpImageBlockMatchWindowSSDQCOM}, \texttt{OpImageBlockMatchWindowSADQCOM}, \texttt{OpImageBlockMatchGatherSSDQCOM}, \texttt{OpImageBlockMatchGatherSADQCOM}, \texttt{OpImageBlockMatchSSDQCOM}, or \texttt{OpImageBlockMatchSADQCOM}\ uses a \texttt{VkSampler} as a result of this command, then the sampler \textbf{must} have been created with \texttt{VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM}.

If any command other than \texttt{OpImageWeightedSampleQCOM}, \texttt{OpImageBoxFilterQCOM}, \texttt{OpImageBlockMatchWindowSSDQCOM}, \texttt{OpImageBlockMatchWindowSADQCOM}, \texttt{OpImageBlockMatchGatherSSDQCOM}, \texttt{OpImageBlockMatchGatherSADQCOM}, \texttt{OpImageBlockMatchSSDQCOM}, or \texttt{OpImageBlockMatchSADQCOM}\ uses a \texttt{VkSampler} as a result of this command, then the sampler \textbf{must not} have been created with \texttt{VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM}.

If a \texttt{OpImageBlockMatchWindow*QCOM} or \texttt{OpImageBlockMatchGather*QCOM} instruction is used to read from an \texttt{VkImageView} as a result of this command, then the image view's \texttt{format features} \textbf{must contain} \texttt{VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM}.

If a \texttt{OpImageBlockMatchWindow*QCOM} or \texttt{OpImageBlockMatchGather*QCOM} instruction is used to read from an \texttt{VkImageView} as a result of this command, then the image view's \texttt{format} \textbf{must} be a single-component format.

If a \texttt{OpImageBlockMatchWindow*QCOM} or \texttt{OpImageBlockMatchGather*QCOM} read from a reference image as result of this command, then the specified reference coordinates \textbf{must not} fail \texttt{integer texel coordinate validation}.

Any shader invocation executed by this command \textbf{must terminate}.

The current render pass \textbf{must be compatible} with the \texttt{renderPass} member of the \texttt{VkGraphicsPipelineCreateInfo} structure specified when creating the \texttt{VkPipeline} bound to \texttt{VK_PIPELINE_BIND_POINT_GRAPHICS}.

The subpass index of the current render pass \textbf{must be equal} to the \texttt{subpass} member of the \texttt{VkGraphicsPipelineCreateInfo} structure specified when creating the \texttt{VkPipeline} bound to \texttt{VK_PIPELINE_BIND_POINT_GRAPHICS}.

If any shader statically accesses an input attachment, a valid descriptor \textbf{must} be bound to the pipeline via a descriptor set.

If any shader executed by this pipeline accesses an \texttt{OpTypeImage} variable with a \texttt{Dim} operand of \texttt{SubpassData}, it \textbf{must} be decorated with an \texttt{InputAttachmentIndex} that corresponds to a valid input attachment in the current subpass.

Input attachment views accessed in a subpass \textbf{must} be created with the same \texttt{VkFormat}.
as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility.

- **VUID-vkCmdDrawIndexedIndirect-None-06537**
  
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command.

- **VUID-vkCmdDrawIndexedIndirect-None-09000**
  
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  
  - the `VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_COLOR_BIT` and
    
    - there is no currently bound graphics pipeline or
    
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command.

- **VUID-vkCmdDrawIndexedIndirect-None-09001**
  
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_DEPTH_BIT` and
    
    - there is no currently bound graphics pipeline or
    
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command.

- **VUID-vkCmdDrawIndexedIndirect-None-09002**
  
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT` and
    
    - there is no currently bound graphics pipeline or
    
    - the currently bound graphics pipeline was created with
VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

• VUID-vkCmdDrawIndexedIndirectNone-09003
   If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

• VUID-vkCmdDrawIndexedIndirectNone-06539
   If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command must not write to that image subresource as an attachment

• VUID-vkCmdDrawIndexedIndirectNone-06886
   If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes must be disabled

• VUID-vkCmdDrawIndexedIndirectNone-06887
   If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back writeMask are not zero, and stencil test is enabled, all stencil ops must be VK_STENCIL_OP_KEEP

• VUID-vkCmdDrawIndexedIndirectNone-07831
   If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectNone-07832
   If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectNone-07833
   If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled then vkCmdSetLineWidth must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectNone-08617
   If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetPolygonModeEXT in the current command buffer set polygonMode to VK_POLYGON_MODE_LINE, vkCmdSetLineWidth must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectNone-08618
   If a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, and the most recent call to vkCmdSetPrimitiveTopology in the current command buffer set primitiveTopology to any line topology, vkCmdSetLineWidth must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectNone-08619
   If a shader object that outputs line primitives is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT stage, vkCmdSetLineWidth must have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawIndexedIndirect-None-07834
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawIndexedIndirect-None-08620
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBiasEnable` in the current command buffer set `depthBiasEnable` to `VK_TRUE`, `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawIndexedIndirect-None-07835
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled then `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawIndexedIndirect-None-08621
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer set any element of `pColorBlendEnables` to `VK_TRUE`, and the most recent call to `vkCmdSetColorBlendEquationEXT` in the current command buffer set the same element of `pColorBlendEquations` to a `VkColorBlendEquationEXT` structure with any `VkBlendFactor` member with a value of `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawIndexedIndirect-None-07836
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawIndexedIndirect-None-08622
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBoundsTestEnable` in the current command buffer set `depthBoundsTestEnable` to `VK_TRUE`, then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawIndexedIndirect-None-07837
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled then `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawIndexedIndirect-None-08623
If a shader object is bound to any graphics stage, and the most recent call to...
vkCmdSetStencilTestEnable in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilCompareMask` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07838**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled then `vkCmdSetStencilWriteMask` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08624**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilWriteMask` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07839**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled then `vkCmdSetStencilReference` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08625**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilReference` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-maxMultiviewInstanceIndex-02688**
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`.

- **VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-02689**
  If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE` and the current subpass has a depth/stencil attachment, then that attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set.

- **VUID-vkCmdDrawIndexedIndirect-None-06666**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEXT` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08626**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetSampleLocationsEnableEXT` in the current command buffer set `sampleLocationsEnable` to `VK_TRUE`, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEXT` **must** have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled then vkCmdSetDepthTestEnable must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthTestEnable must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled then vkCmdSetDepthWriteEnable must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthWriteEnable must have been called in the current command buffer prior to this drawing command.
• **VUID-vkCmdDrawIndexedIndirect-None-07845**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawIndexedIndirect-None-08631**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthTestEnable` in the current command buffer set `depthTestEnable` to `VK_TRUE`, then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawIndexedIndirect-None-07846**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawIndexedIndirect-None-08632**
  If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawIndexedIndirect-None-07847**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawIndexedIndirect-None-08633**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawIndexedIndirect-None-07848**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawIndexedIndirect-None-08634**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawIndexedIndirect-viewportCount-03417**
  If the bound graphics pipeline state was created with the

1947
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline.

- **VUID-vkCmdDrawIndexedIndirect-scissorCount-03418**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline.

- **VUID-vkCmdDrawIndexedIndirect-viewportCount-03419**
  If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

- **VUID-vkCmdDrawIndexedIndirect-viewportCount-04137**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportWScalingStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndexedIndirect-viewportCount-04138**
  If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndexedIndirect-None-08635**
  If a shader object is bound to any graphics stage, then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

- **VUID-vkCmdDrawIndexedIndirect-None-08636**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then `vkCmdSetViewportWScalingNV` must have been called in the current command buffer prior to this drawing command.
extension is enabled on the device, then the viewportCount parameter in the last call to
vkCmdSetViewportWScalingNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirect-viewportCount-04139
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirect-viewportCount-04140
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirect-shadingRateImage-09233
If the shadingRateImage feature is enabled, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoarseSampleOrderNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-shadingRateImage-09234
If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetShadingRateImageEnableNV in the current command buffer set shadingRateImageEnable to VK_TRUE, then vkCmdSetViewportShadingRatePaletteNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-08637
If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, then the viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirect-VkPipelineViewportCreateInfo-04141
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportSwizzleStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirect-VkPipelineViewportCreateInfo-04142
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and aVkPipelineViewportExclusiveScissorStateCreateInfoNV structure chained from
VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirect-None-07878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV dynamic state enabled then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-07879
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV dynamic state enabled then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-exclusiveScissor-09235
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-08638
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetExclusiveScissorEnableNV in the current command buffer set any element of pExclusiveScissorEnables to VK_TRUE, then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-04876
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-08639
  If a shader object is bound to any graphics stage, then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-04877
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-08640
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-logicOp-04878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled then vkCmdSetLogicOpEXT must have been called in the current
command buffer prior to this drawing command and the logicOp must be a valid VkLogicOp value

- VUID-vkCmdDrawIndexedIndirect-None-08641
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the logicOp feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEXT must have been called in the current command buffer prior to this drawing command and the logicOp must be a valid VkLogicOp value

- VUID-vkCmdDrawIndexedIndirect-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must be 1

- VUID-vkCmdDrawIndexedIndirect-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, and any shader object bound to a graphics stage writes to the PrimitiveShadingRateKHR built-in, then vkCmdSetViewportWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must be 1

- VUID-vkCmdDrawIndexedIndirect-blendEnable-04727
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the blendEnable member of the corresponding element of the pAttachments member of pColorBlendState must be VK_FALSE

- VUID-vkCmdDrawIndexedIndirect-None-08643
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then for each color attachment in the render pass, if the corresponding image view's format features do not contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT, then the corresponding member of pColorBlendEnables in the most recent call to vkCmdSetColorBlendEnableEXT in the current command buffer that affected that attachment index must have been VK_FALSE

- VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07284
  If rasterization is not disabled in the bound graphics pipeline, and none of the VK_AMD_mixed_attachment_samples extension, the VK_NV_framebuffer_mixed_samples extension, or the multisampledRenderToSingleSampled feature is enabled, then rasterizationSamples for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments

- VUID-vkCmdDrawIndexedIndirect-None-08644
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments

- **VUID-vkCmdDrawIndexedIndirect-None-08876**
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`

- **VUID-vkCmdDrawIndexedIndirect-imageView-06172**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the layout member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment

- **VUID-vkCmdDrawIndexedIndirect-imageView-06173**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the layout member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment

- **VUID-vkCmdDrawIndexedIndirect-imageView-06174**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the layout member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment

- **VUID-vkCmdDrawIndexedIndirect-imageView-06175**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the layout member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment

- **VUID-vkCmdDrawIndexedIndirect-viewMask-06178**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`
If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline.

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` **must** be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline.

If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` **must** have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorWriteEnableEXT` **must** have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` **must** be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline.
pipeline

- VUID-vkCmdDrawIndexedIndirect-None-08647
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance.

- VUID-vkCmdDrawIndexedIndirect-None-07751
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`.

- VUID-vkCmdDrawIndexedIndirect-None-07880
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirect-rasterizerDiscardEnable-09236
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirect-None-08648
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with `vkCmdBeginRendering`, the
dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08914
If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView

• VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08915
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08916
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08917
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirect-dynamicRenderingUnusedAttachments-08918
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirect-imageView-06183
If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

• VUID-vkCmdDrawIndexedIndirect-imageView-06184
If the current render pass instance was begun with vkCmdBeginRendering and
VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT

• VUID-vkCmdDrawIndexedIndirect-colorAttachmentCount-06185
If the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the corresponding element of the pColorAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline

• VUID-vkCmdDrawIndexedIndirect-pDepthAttachment-06186
If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView

• VUID-vkCmdDrawIndexedIndirect-pStencilAttachment-06187
If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView

• VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07285
If the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the value of rasterizationSamples for the currently bound graphics pipeline

• VUID-vkCmdDrawIndexedIndirect-multisampledRenderToSingleSampled-07286
If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of rasterizationSamples for the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView
If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo ::pStencilAttachment->imageView`.

If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline must have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, rasterization discard must not be enabled.

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, enable.
If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline must not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`.

- **VUID-vkCmdDrawIndexedIndirect-None-07619**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07620**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-09237**
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08650**
  If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07621**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07622**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08652**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07623**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-None-08653**: If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-None-07624**: If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-alphaToCoverageEnable-08919**: If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- **VUID-vkCmdDrawIndexedIndirect-None-08654**: If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-alphaToCoverageEnable-08920**: If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- **VUID-vkCmdDrawIndexedIndirect-None-07625**: If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-None-08655**: If the `alphaToOne` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-None-07626**: If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled then `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer prior to this drawing command
If the `logicOp` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment’s value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the `geometryStreams` feature is enabled, and a shader object is bound to the

---

1960
VK_SHADER_STAGE_GEOMETRY_BIT stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07631**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08661**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07632**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08662**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetConservativeRasterizationModeEXT` in the current command buffer set `conservativeRasterizationMode` to `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07633**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08663**
  If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07634**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08664**
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then
vkCmdSetSampleLocationsEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07635
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07636
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled then vkCmdSetProvokingVertexModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08665
  If the VK_EXT_provoking_vertex extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, then vkCmdSetProvokingVertexModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08666
  If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetPolygonModeEXT in the current command buffer set polygonMode to VK_POLYGON_MODE_LINE, then vkCmdSetLineRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08667
  If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to vkCmdSetPrimitiveTopology in the current command buffer set primitiveTopology to any line topology, then vkCmdSetLineRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08668
  If the VK_EXT_line_rasterization extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then vkCmdSetLineRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07638
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT dynamic state enabled then vkCmdSetLineStippleEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08669
If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08670**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08671**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07849**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08672**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetLineStippleEnableEXT` in the current command buffer set `stippledLineEnable` to `VK_TRUE`, then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07639**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08673**
  If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07640**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08674**
  If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07641**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08675
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07642
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08676
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07643
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV` dynamic state enabled then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08677
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07644
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-08678
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-07645
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command
command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-08679
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationModeNV` in the current command buffer set `coverageModulationMode` to any value other than `VK_COVERAGE_MODULATION_MODE_NONE_NV`, then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-07646
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-08680
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationTableEnable` to `VK_TRUE`, then `vkCmdSetCoverageModulationTableNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-07647
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SHADING_RATE_IMAGEEnable_NV` dynamic state enabled then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-pipelineFragmentShadingRate-09238
  If the `pipelineFragmentShadingRate` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFragmentShadingRateKHR` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-08681
  If the `shadingRateImage` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-07648
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV` dynamic state enabled then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirect-None-08682
  If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any
graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-07649**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-None-08683**
  If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirect-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view's format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`.

- **VUID-vkCmdDrawIndexedIndirect-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass.

- **VUID-vkCmdDrawIndexedIndirect-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline.

- **VUID-vkCmdDrawIndexedIndirect-samples-07473**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawIndexedIndirect-rasterizationSamples-07474**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to
vkCmdSetRasterizationSamplesEXT must be the same as the current subpass color and/or depth/stencil attachments

- VUID-vkCmdDrawIndexedIndirect-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must be the same as the rasterizationSamples member of that structure

- VUID-vkCmdDrawIndexedIndirect-firstAttachment-07476
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEnableEXT calls must specify an enable for all active color attachments in the current subpass

- VUID-vkCmdDrawIndexedIndirect-firstAttachment-07477
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEquationEXT calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawIndexedIndirect-firstAttachment-07478
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorWriteMaskEXT calls must specify the color write mask for all active color attachments in the current subpass

- VUID-vkCmdDrawIndexedIndirect-firstAttachment-07479
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawIndexedIndirect-advancedBlendMaxColorAttachments-07480
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of
active color attachments in the current subpass **must** not exceed

- VUID-vkCmdDrawIndexedIndirect-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, and the bound graphics pipeline was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` **must** have set the `rasterizationStream` to zero.

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with.

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsPerPixel-07483
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`.

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07484
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, and the current subpass has a depth/stencil attachment, then that attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set.

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07485
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07486
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` **must** evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`. 
vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07487
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code must not statically use the extended instruction InterpolateAtSample

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.width must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.height must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndexedIndirect-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationsPerPixel must equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndexedIndirect-coverageModulationTableEnable-07488
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV state enabled and the last call to vkCmdSetCoverageModulationTableEnableNV set coverageModulationTableEnable to VK_TRUE, then the coverageModulationTableCount parameter in the last call to vkCmdSetCoverageModulationTableNV must equal the current rasterizationSamples divided by the number of color samples in the current subpass

- VUID-vkCmdDrawIndexedIndirect-rasterizationSamples-07489
If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

- **VUID-vkCmdDrawIndexedIndirect-coverageToColorEnable-07490**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set the `coverageToColorEnable` to `VK_TRUE`, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV` `coverageToColorLocation`, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.

- **VUID-vkCmdDrawIndexedIndirect-coverageReductionMode-07491**
  If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode`, then the current `rasterizationSamples`, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by `vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV`.

- **VUID-vkCmdDrawIndexedIndirect-viewportCount-07492**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV` `viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndexedIndirect-viewportCount-07493**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportSwizzleNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawIndexedIndirect-rasterizationSamples-07494**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if the current subpass has any color attachments and `rasterizationSamples` of the last call to `vkCmdSetRasterizationSamplesEXT` is greater than the number of color samples, then the pipeline `sampleShadingEnable` must be `VK_FALSE`.

- **VUID-vkCmdDrawIndexedIndirect-stippledLineEnable-07495**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT`, then the `stippledRectangularLines` feature must be enabled.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT`, then the `stippledBresenhamLines` feature must be enabled.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT`, then the `stippledSmoothLines` feature must be enabled.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature must be enabled and `VkPhysicalDeviceLimits::strictLines` must be `VK_TRUE`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, `conservativePointAndLineRasterization` is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to `vkCmdSetConservativeRasterizationModeEXT` must be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`.

If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries must not be active.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.
If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- **VUID-vkCmdDrawIndexedIndirect-None-08685**
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`

- **VUID-vkCmdDrawIndexedIndirect-None-08686**
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`

- **VUID-vkCmdDrawIndexedIndirect-None-08687**
  If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`

- **VUID-vkCmdDrawIndexedIndirect-None-08688**
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`

- **VUID-vkCmdDrawIndexedIndirect-None-08689**
  If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`

- **VUID-vkCmdDrawIndexedIndirect-None-08690**
  If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`

- **VUID-vkCmdDrawIndexedIndirect-None-08693**
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages must have a valid VkShaderEXT bound, and the other must have no VkShaderEXT bound

- **VUID-vkCmdDrawIndexedIndirect-None-08694**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid VkShaderEXT is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that VkShaderEXT was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid VkShaderEXT must be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage

- **VUID-vkCmdDrawIndexedIndirect-None-08695**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid VkShaderEXT is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that VkShaderEXT was created with the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, there must be no VkShaderEXT bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage

- **VUID-vkCmdDrawIndexedIndirect-None-08696**
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there must be no VkShaderEXT bound to either the
VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

- VUID-vkCmdDrawIndexedIndirect-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call must also be bound

- VUID-vkCmdDrawIndexedIndirect-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call must not have any VkShaderEXT bound

- VUID-vkCmdDrawIndexedIndirect-None-08878
  All bound graphics shader objects must have been created with identical or identically defined push constant ranges

- VUID-vkCmdDrawIndexedIndirect-None-08879
  All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

- VUID-vkCmdDrawIndexedIndirect-None-08880
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-pDynamicStates-08715
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable must be VK_FALSE

- VUID-vkCmdDrawIndexedIndirect-pDynamicStates-08716
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_STENCIL_WRITE_MASK set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask must be 0

- VUID-vkCmdDrawIndexedIndirect-None-09116
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT must either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, and VK_COLOR_COMPONENT_B_BIT, or none of them

- VUID-vkCmdDrawIndexedIndirect-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend...
factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command must be less than maxFragmentDualSrcAttachments

- VUID-vkCmdDrawIndexedIndirect-None-04007
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must have either valid or VK_NULL_HANDLE buffers bound

- VUID-vkCmdDrawIndexedIndirect-None-04008
  If the nullDescriptor feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must not be VK_NULL_HANDLE

- VUID-vkCmdDrawIndexedIndirect-None-02721
  For a given vertex buffer binding, any attribute data fetched must be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-vkCmdDrawIndexedIndirect-None-07842
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled then vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY dynamic state enabled and the dynamicPrimitiveTopologyUnrestricted is VK_FALSE, then the primitiveTopology parameter of vkCmdSetPrimitiveTopology must be of the same topology class as the pipeline VkPipelineInputAssemblyStateCreateInfo::topology state

- VUID-vkCmdDrawIndexedIndirect-None-04912
  If the bound graphics pipeline was created with both the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT and VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT dynamic states enabled, then vkCmdSetVertexInputEXT must have been called in the current command buffer prior to this draw command

- VUID-vkCmdDrawIndexedIndirect-pStrides-04913
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT dynamic state enabled, but not the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdBindVertexBuffers2EXT must have been called in the current command buffer prior to this draw command, and the pStrides parameter of vkCmdBindVertexBuffers2EXT must not be NULL

- VUID-vkCmdDrawIndexedIndirect-None-08881
  If a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, then vkCmdSetPrimitiveTopology must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-None-04914
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then vkCmdSetVertexInputEXT
must have been called in the current command buffer prior to this draw command

- **VUID-vkCmdDrawIndexedIndirect-Input-07939**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then all variables with the `Input` storage class decorated with `Location` in the Vertex Execution Model `OpEntryPoint` must contain a location in `VkVertexInputAttributeDescription2EXT::location`

- **VUID-vkCmdDrawIndexedIndirect-Input-08734**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then the numeric type associated with all `Input` variables of the corresponding `Location` in the Vertex Execution Model `OpEntryPoint` must be the same as `VkVertexInputAttributeDescription2EXT::format`

- **VUID-vkCmdDrawIndexedIndirect-format-08936**
  If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all `Input` variables of the corresponding `Location` in the Vertex Execution Model `OpEntryPoint` must be 64-bit

- **VUID-vkCmdDrawIndexedIndirect-format-08937**
  If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and the scalar width associated with a `Location` decorated `Input` variable in the Vertex Execution Model `OpEntryPoint` is 64-bit, then the corresponding `VkVertexInputAttributeDescription2EXT::format` must have a 64-bit component

- **VUID-vkCmdDrawIndexedIndirect-None-09203**
  If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all `Input` variables at the corresponding `Location` in the Vertex Execution Model `OpEntryPoint` must not use components that are not present in the format

- **VUID-vkCmdDrawIndexedIndirect-None-08882**
  If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetVertexInputEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-None-04875**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT` dynamic state enabled then `vkCmdSetPatchControlPointsEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-None-08883**
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetPatchControlPointsEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirect-None-04879**
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE  dynamic state enabled then
vkCmdSetPrimitiveRestartEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-rasterizerDiscardEnable-08884
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set
  rasterizerDiscardEnable to VK_FALSE, vkCmdSetPrimitiveRestartEnable must have been
called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirect-stage-06481
  The bound graphics pipeline must not have been created with the
  VkPipelineShaderStageCreateInfo::stage member of an element of
  VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or
  VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndexedIndirect-None-08885
  There must be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or
  VK_SHADER_STAGE_MESH_BIT_EXT stages

- VUID-vkCmdDrawIndexedIndirect-buffer-02708
  If buffer is non-sparse then it must be bound completely and contiguously to a single
  VkDeviceMemory object

- VUID-vkCmdDrawIndexedIndirect-buffer-02709
  buffer must have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set

- VUID-vkCmdDrawIndexedIndirect-offset-02710
  offset must be a multiple of 4

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-02711
  commandBuffer must not be a protected command buffer

- VUID-vkCmdDrawIndexedIndirect-drawCount-02718
  If the multiDrawIndirect feature is not enabled, drawCount must be 0 or 1

- VUID-vkCmdDrawIndexedIndirect-drawCount-02719
  drawCount must be less than or equal to VkPhysicalDeviceLimits::maxDrawIndirectCount

- VUID-vkCmdDrawIndexedIndirect-None-07312
  An index buffer must be bound

- VUID-vkCmdDrawIndexedIndirect-robustBufferAccess2-07825
  If robustBufferAccess2 is not enabled, (indexSize × (firstIndex + indexCount) + offset) must
  be less than or equal to the size of the bound index buffer, with indexSize being based on
  the type specified by indexType, where the index buffer, indexType, and offset are
  specified via vkCmdBindIndexBuffer

- VUID-vkCmdDrawIndexedIndirect-drawCount-00528
  If drawCount is greater than 1, stride must be a multiple of 4 and must be greater than or
equal to sizeof(VkDrawIndexedIndirectCommand)

- VUID-vkCmdDrawIndexedIndirect-drawCount-00539
  If drawCount is equal to 1, (offset + sizeof(VkDrawIndexedIndirectCommand)) must be less
than or equal to the size of buffer

- VUID-vkCmdDrawIndexedIndirect-drawCount-00540
  If drawCount is greater than 1, \((\text{stride} \times (\text{drawCount} - 1) + \text{offset} + \text{sizeof} (\text{VkDrawIndexedIndirectCommand}))\) must be less than or equal to the size of buffer

### Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle

- VUID-vkCmdDrawIndexedIndirect-buffer-parameter
  buffer must be a valid VkBuffer handle

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-recording
  commandBuffer must be in the recording state

- VUID-vkCmdDrawIndexedIndirect-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations

- VUID-vkCmdDrawIndexedIndirect-renderpass
  This command must only be called inside of a render pass instance

- VUID-vkCmdDrawIndexedIndirect-videocoding
  This command must only be called outside of a video coding scope

- VUID-vkCmdDrawIndexedIndirect-commonparent
  Both of buffer, and commandBuffer must have been created, allocated, or retrieved from the same VkDevice

### Host Synchronization

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

### Command Properties

The VkDrawIndexedIndirectCommand structure is defined as:

```c
// Provided by VK_VERSION_1_0
```
typedef struct VkDrawIndexedIndirectCommand {
    uint32_t indexCount;
    uint32_t instanceCount;
    uint32_t firstIndex;
    int32_t vertexOffset;
    uint32_t firstInstance;
} VkDrawIndexedIndirectCommand;

- indexCount is the number of vertices to draw.
- instanceCount is the number of instances to draw.
- firstIndex is the base index within the index buffer.
- vertexOffset is the value added to the vertex index before indexing into the vertex buffer.
- firstInstance is the instance ID of the first instance to draw.

The members of VkDrawIndexedIndirectCommand have the same meaning as the similarly named parameters of vkCmdDrawIndexed.

Valid Usage

- VUID-VkDrawIndexedIndirectCommand-robustBufferAccess2-08798
  If robustBufferAccess2 is not enabled, \((\text{indexSize} \times (\text{firstIndex} + \text{indexCount}) + \text{offset})\) must be less than or equal to the size of the bound index buffer, with indexSize being based on the type specified by indexType, where the index buffer, indexType, and offset are specified via vkCmdBindIndexBuffer or vkCmdBindIndexBuffer2KHR. If vkCmdBindIndexBuffer2KHR is used to bind the index buffer, the size of the bound index buffer is vkCmdBindIndexBuffer2KHR::size

- VUID-VkDrawIndexedIndirectCommand-None-00552
  For a given vertex buffer binding, any attribute data fetched must be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- VUID-VkDrawIndexedIndirectCommand-firstInstance-00554
  If the drawIndirectFirstInstance feature is not enabled, firstInstance must be 0

To record an indexed draw call with a draw call count sourced from a buffer, call:

```c
// Provided by VK_VERSION_1_2
void vkCmdDrawIndexedIndirectCount(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    VkBuffer countBuffer,
    VkDeviceSize countBufferOffset,
    uint32_t maxDrawCount,
    uint32_t stride);
```
or the equivalent command

```c
// Provided by VK_KHR_draw_indirect_count
void vkCmdDrawIndexedIndirectCountKHR(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    VkBuffer countBuffer,
    VkDeviceSize countBufferOffset,
    uint32_t maxDrawCount,
    uint32_t stride);
```

or the equivalent command

```c
// Provided by VK_AMD_draw_indirect_count
void vkCmdDrawIndexedIndirectCountAMD(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    VkBuffer countBuffer,
    VkDeviceSize countBufferOffset,
    uint32_t maxDrawCount,
    uint32_t stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `countBuffer` is the buffer containing the draw count.
- `countBufferOffset` is the byte offset into `countBuffer` where the draw count begins.
- `maxDrawCount` specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in `countBuffer` and `maxDrawCount`.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawIndexedIndirectCount` behaves similarly to `vkCmdDrawIndexedIndirect` except that the draw count is read by the device from a buffer during execution. The command will read an unsigned 32-bit integer from `countBuffer` located at `countBufferOffset` and use this as the draw count.

### Valid Usage

- VUID-vkCmdDrawIndexedIndirectCount-magFilter-04553
  If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`
If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

If a `VkImageView` is sampled with depth comparison, the image view's format features must contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`.

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`.

If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features must contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`.

If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`.

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it must not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`.

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

If the `cubicRangeClamp` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must not have a `VkSamplerReductionModeCreateInfo` `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM`.

Any `VkImageView` being sampled with a `VkSamplerReductionModeCreateInfo` as a result of this command.
::reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM as a result of this command must sample with VK_FILTER_CUBIC_EXT

- VUID-vkCmdDrawIndexedIndirectCount-selectableCubicWeights-09214
  If the selectableCubicWeights feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must have VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights equal to VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM

- VUID-vkCmdDrawIndexedIndirectCount-flags-02696
  Any VkImage created with a VkImageCreateInfo::flags containing VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV sampled as a result of this command must only be sampled using a VkSamplerAddressMode of VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE

- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features must contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features must contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the OpTypeImage is Unknown, the view's buffer features must contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the OpTypeImage is Unknown then the view's buffer features must contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawIndexedIndirectCount-None-08600
  For each set n that is statically used by a bound shader, a descriptor set must have been bound to n at the same pipeline bind point, with a VkPipelineLayout that is compatible for set n, with the VkPipelineLayout or VkDescriptorSetLayout array that was used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

- VUID-vkCmdDrawIndexedIndirectCount-None-08601
  For each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

- VUID-vkCmdDrawIndexedIndirectCount-maintenance4-08602
  If the maintenance4 feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility
Compatibility

- VUID-vkCmdDrawIndexedIndirectCount-None-08114
  Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, must be valid if they are statically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount-None-08115
  If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` must have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount-None-08116
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount-None-08604
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-08117
  If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` must have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

- VUID-vkCmdDrawIndexedIndirectCount-None-08119
  If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory must be resident

- VUID-vkCmdDrawIndexedIndirectCount-None-08605
  If a descriptor is dynamically used with a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory must be resident

- VUID-vkCmdDrawIndexedIndirectCount-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-08607
  If the `shaderObject` is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and `VK_NULL_HANDLE` shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command

- VUID-vkCmdDrawIndexedIndirectCount-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the `VkPipeline` object bound to the pipeline bind point used by this command,
since that pipeline was bound

- **VUID-vkCmdDrawIndexedIndirectCount-None-08609**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler must not be used to sample from any **VkImage** with a **VkImageView** of the type **VK_IMAGE_VIEW_TYPE_3D**, **VK_IMAGE_VIEW_TYPE_CUBE**, **VK_IMAGE_VIEW_TYPE_1D_ARRAY**, **VK_IMAGE_VIEW_TYPE_2D_ARRAY** or **VK_IMAGE_VIEW_TYPE_CUBE_ARRAY**, in any shader stage

- **VUID-vkCmdDrawIndexedIndirectCount-None-08610**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V **OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name, in any shader stage

- **VUID-vkCmdDrawIndexedIndirectCount-None-08611**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V **OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

- **VUID-vkCmdDrawIndexedIndirectCount-uniformBuffers-06935**
  If any stage of the **VkPipeline** object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT** or **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT** for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawIndexedIndirectCount-None-08612**
  If the robustBufferAccess feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawIndexedIndirectCount-storageBuffers-06936**
  If any stage of the **VkPipeline** object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT** or **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT** for storageBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawIndexedIndirectCount-None-08613**
  If the robustBufferAccess feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it must not access values outside of the range of the buffer as specified in the descriptor
set bound to the same pipeline bind point

- **VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-02707**
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders **must** not be a protected resource

- **VUID-vkCmdDrawIndexedIndirectCount-None-06550**
  If a bound shader accesses a `VkSampler` or `VkImageView` object that enables sampler Y’CbCr conversion, that object **must** only be used with `OpImageSample*` or `OpImageSparseSample*` instructions

- **VUID-vkCmdDrawIndexedIndirectCount-ConstOffset-06551**
  If a bound shader accesses a `VkSampler` or `VkImageView` object that enables sampler Y’CbCr conversion, that object **must** not use the `ConstOffset` and `Offset` operands

- **VUID-vkCmdDrawIndexedIndirectCount-viewType-07752**
  If a `VkImageView` is accessed as a result of this command, then the image view’s `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Instruction/Sampler/Image View Validation

- **VUID-vkCmdDrawIndexedIndirectCount-format-07753**
  If a `VkImageView` is accessed as a result of this command, then the numeric type of the image view’s `format` and the Sampled Type operand of the `OpTypeImage` **must** match

- **VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-08795**
  If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the image view’s format

- **VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-08796**
  If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the Type of the Texel operand of that instruction **must** have four components

- **VUID-vkCmdDrawIndexedIndirectCount-OpImageWrite-04469**
  If a `VkBufferView` is accessed using `OpImageWrite` as a result of this command, then the Type of the Texel operand of that instruction **must** have at least as many components as the buffer view’s format

- **VUID-vkCmdDrawIndexedIndirectCount-SampledType-04470**
  If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the SampledType of the `OpTypeImage` operand of that instruction **must** have a Width of 64

- **VUID-vkCmdDrawIndexedIndirectCount-SampledType-04471**
  If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the `OpTypeImage` operand of that instruction **must** have a Width of 32

- **VUID-vkCmdDrawIndexedIndirectCount-SampledType-04472**
  If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the SampledType of the `OpTypeImage` operand of that instruction **must** have a Width of 64

- **VUID-vkCmdDrawIndexedIndirectCount-SampledType-04473**
If a \texttt{VkBufferView} with a \texttt{VkFormat} that has a component width less than 64-bit is accessed as a result of this command, the \texttt{SampledType} of the \texttt{OpTypeImage} operand of that instruction \textbf{must} have a \texttt{Width} of 32.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-sparseImageInt64Atomics-04474}
  If the \texttt{sparseImageInt64Atomics} feature is not enabled, \texttt{VkImage} objects created with the \texttt{VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT} flag \textbf{must} not be accessed by atomic instructions through an \texttt{OpTypeImage} with a \texttt{SampledType} with a \texttt{Width} of 64 by this command.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-sparseImageInt64Atomics-04475}
  If the \texttt{sparseImageInt64Atomics} feature is not enabled, \texttt{VkBuffer} objects created with the \texttt{VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT} flag \textbf{must} not be accessed by atomic instructions through an \texttt{OpTypeImage} with a \texttt{SampledType} with a \texttt{Width} of 64 by this command.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-OpImageWeightedSampleQCOM-06971}
  If \texttt{OpImageWeightedSampleQCOM} is used to sample a \texttt{VkImageView} as a result of this command, then the image view's \texttt{format features} \textbf{must} contain \texttt{VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM}.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-OpImageWeightedSampleQCOM-06972}
  If \texttt{OpImageWeightedSampleQCOM} uses a \texttt{VkImageView} as a sample weight image as a result of this command, then the image view's \texttt{format features} \textbf{must} contain \texttt{VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM}.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-OpImageBoxFilterQCOM-06973}
  If \texttt{OpImageBoxFilterQCOM} is used to sample a \texttt{VkImageView} as a result of this command, then the image view's \texttt{format features} \textbf{must} contain \texttt{VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM}.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-OpImageBlockMatchSSDQCOM-06974}
  If \texttt{OpImageBlockMatchSSDQCOM} is used to read from an \texttt{VkImage} as a result of this command, then the image view's \texttt{format features} \textbf{must} contain \texttt{VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM}.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-OpImageBlockMatchSSDQCOM-06975}
  If \texttt{OpImageBlockMatchSSDQCOM} or \texttt{OpImageBlockMatchSADQCOM} is used to read from a reference image as result of this command, then the specified reference coordinates \textbf{must} not fail integer texel coordinate validation.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-OpImageWeightedSampleQCOM-06976}
  If any command other than \texttt{OpImageWeightedSampleQCOM}, \texttt{OpImageBoxFilterQCOM}, \texttt{OpImageBlockMatchWindowSSDQCOM}, \texttt{OpImageBlockMatchWindowSADQCOM}, \texttt{OpImageBlockMatchGatherSSDQCOM}, \texttt{OpImageBlockMatchGatherSADQCOM}, \texttt{OpImageBlockMatchSSDQCOM}, or \texttt{OpImageBlockMatchSADQCOM} uses a \texttt{VkSampler} as a result of this command, then the sampler \textbf{must} have been created with \texttt{VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM}.

- \texttt{VUID-vkCmdDrawIndexedIndirectCount-OpImageWeightedSampleQCOM-06977}
  If any command other than \texttt{OpImageWeightedSampleQCOM}, \texttt{OpImageBoxFilterQCOM}, \texttt{OpImageBlockMatchWindowSSDQCOM}, \texttt{OpImageBlockMatchWindowSADQCOM}, \texttt{OpImageBlockMatchGatherSSDQCOM}, \texttt{OpImageBlockMatchGatherSADQCOM}, \texttt{OpImageBlockMatchSSDQCOM}, or \texttt{OpImageBlockMatchSADQCOM} uses a \texttt{VkSampler} as a result of this command, then the sampler \textbf{must} have been created with \texttt{VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM}.

1985
OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, OpImageBlockMatchSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler **must** not have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

- **VUID-vkCmdDrawIndexedIndirectCount-OpImageBlockMatchWindow-09215**
  If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view’s format features **must** contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

- **VUID-vkCmdDrawIndexedIndirectCount-OpImageBlockMatchWindow-09216**
  If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view’s format **must** be a single-component format.

- **VUID-vkCmdDrawIndexedIndirectCount-OpImageBlockMatchWindow-09217**
  If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from a reference image as result of this command, then the specified reference coordinates **must** not fail integer texel coordinate validation

- **VUID-vkCmdDrawIndexedIndirectCount-None-07288**
  Any shader invocation executed by this command **must** terminate

- **VUID-vkCmdDrawIndexedIndirectCount-renderPass-02684**
  The current render pass **must** be compatible with the renderPass member of theVkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- **VUID-vkCmdDrawIndexedIndirectCount-subpass-02685**
  The subpass index of the current render pass **must** be equal to the subpass member of theVkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- **VUID-vkCmdDrawIndexedIndirectCount-None-07748**
  If any shader statically accesses an input attachment, a valid descriptor **must** be bound to the pipeline via a descriptor set

- **VUID-vkCmdDrawIndexedIndirectCount-OpTypeImage-07468**
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it **must** be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass

- **VUID-vkCmdDrawIndexedIndirectCount-None-07469**
  Input attachment views accessed in a subpass **must** be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass’ inputAttachments [InputAttachmentIndex] in the currently bound VkFramebuffer as specified by Fragment Input Attachment Compatibility

- **VUID-vkCmdDrawIndexedIndirectCount-None-06537**
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- **VUID-vkCmdDrawIndexedIndirectCount-None-09000**
  Any shader invocation executed by this command **must** terminate

- **VUID-vkCmdDrawIndexedIndirectCount-None-06537**
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command
If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:

- the VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
- the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_COLOR_BIT and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it **must** not be accessed in any way other than as an attachment by this command

**VUID-vkCmdDrawIndexedIndirectCount-None-09001**

If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:

- the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
- the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_DEPTH_BIT and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it **must** not be accessed in any way other than as an attachment by this command

**VUID-vkCmdDrawIndexedIndirectCount-None-09002**

If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:

- the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
- the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_STENCIL_BIT and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it **must** not be accessed in any way other than as an attachment by this command

**VUID-vkCmdDrawIndexedIndirectCount-None-09003**

If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

**VUID-vkCmdDrawIndexedIndirectCount-None-06539**

If any previously recorded command in the current subpass accessed an image
subresource used as an attachment in this subpass in any way other than as an attachment, this command **must** not write to that image subresource as an attachment

- **VUID-vkCmdDrawIndexedIndirectCount-None-06886**
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, **depth writes must** be disabled

- **VUID-vkCmdDrawIndexedIndirectCount-None-06887**
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, **all stencil ops must** be **VK_STENCIL_OP_KEEP**

- **VUID-vkCmdDrawIndexedIndirectCount-None-07831**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT** dynamic state enabled then **vkCmdSetViewport** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07832**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SCISSOR** dynamic state enabled then **vkCmdSetScissor** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07833**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LINE_WIDTH** dynamic state enabled then **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08617**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetPolygonModeEXT** in the current command buffer set `polygonMode` to **VK_POLYGON_MODE_LINE**, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08618**
  If a shader object is bound to the **VK_SHADER_STAGE_VERTEX_BIT** stage, and the most recent call to **vkCmdSetPrimitiveTopology** in the current command buffer set `primitiveTopology` to any line topology, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08619**
  If a shader object that outputs line primitives is bound to the **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT** or **VK_SHADER_STAGE_GEOMETRY_BIT** stage, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07834**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_BIAS** dynamic state enabled then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08620**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set `rasterizerDiscardEnable` to **VK_FALSE**, and the most recent call to
vkCmdSetDepthBiasEnable in the current command buffer set depthBiasEnable to VK_TRUE, vkCmdSetDepthBias or vkCmdSetDepthBias2EXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07835
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled then vkCmdSetBlendConstants must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08621
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetColorBlendEnableEXT in the current command buffer set any element of pColorBlendEnables to VK_TRUE, and the most recent call to vkCmdSetColorBlendEquationEXT in the current command buffer set the same element of pColorBlendEquations to a VkColorBlendEquationEXT structure with any VkBlendFactor member with a value of VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, vkCmdSetBlendConstants must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07836
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled then vkCmdSetDepthBounds must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08622
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDepthBoundsTestEnable in the current command buffer set depthBoundsTestEnable to VK_TRUE, then vkCmdSetDepthBounds must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07837
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled then vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08623
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07838
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled then vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled then `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command.

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`.

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE` and the current subpass has a depth/stencil attachment, then that attachment must have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetSampleLocationsEnableEXT` in the current command buffer set `sampleLocationsEnable` to `VK_TRUE`, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled then `vkCmdSetCullMode` must have been called in the current command buffer prior to this drawing command.
command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08627**
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCullMode` must have been called in
  the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07841**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_FRONT_FACE`
  dynamic state enabled then `vkCmdSetFrontFace` must have been called in the current
  command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08628**
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFrontFace` must have been called in
  the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07843**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE`
  dynamic state enabled then `vkCmdSetDepthTestEnable` must have been called in the current
  command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08629**
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthTestEnable` must have been
  called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07844**
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled then
  `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior
  to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08630**
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been
  called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07845**
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then
  `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior
  to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08631**
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to
vkCmdSetDepthTestEnable in the current command buffer set depthTestEnable to VK_TRUE, then vkCmdSetDepthCompareOp must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount(None-07846)**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount(None-08632)**
  If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount(None-07847)**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount(None-08633)**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount(None-07848)**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount(None-08634)**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to VK_TRUE, then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-viewportCount-03417**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `VkPipelineViewportStateCreateInfo`::scissorCount of the pipeline.

- **VUID-vkCmdDrawIndexedIndirectCount-scissorCount-03418**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, but not the
VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then
vkCmdSetScissorWithCount must have been called in the current command buffer prior
to this drawing command, and the scissorCount parameter of vkCmdSetScissorWithCount
must match the VkPipelineViewportStateCreateInfo::viewportCount of the pipeline

• VUID-vkCmdDrawIndexedIndirectCount-viewportCount-03419
If the bound graphics pipeline state was created with both the
VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic
states enabled then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount
must have been called in the current command buffer prior to this drawing command,
and the viewportCount parameter of vkCmdSetViewportWithCount must match the
scissorCount parameter of vkCmdSetScissorWithCount

• VUID-vkCmdDrawIndexedIndirectCount-None-08635
If a shader object is bound to any graphics stage, then both vkCmdSetViewportWithCount
and vkCmdSetScissorWithCount must have been called in the current command buffer
prior to this drawing command, and the viewportCount parameter of
vkCmdSetViewportWithCount must match the scissorCount parameter of
vkCmdSetScissorWithCount

• VUID-vkCmdDrawIndexedIndirectCount-viewportCount-04137
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the
VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic state enabled, then the bound graphics
pipeline must have been created with VkPipelineViewportWScalingStateCreateInfoNV
::viewportCount greater or equal to the viewportCount parameter in the last call to
vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirectCount-viewportCount-04138
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV
dynamic states enabled then the viewportCount parameter in the last call to
vkCmdSetViewportWScalingNV must be greater than or equal to the
viewportCount parameter in the last call to
vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirectCount-None-09232
If a shader object is bound to any graphics stage, and the
VK_NV_clip_space_w_scaling extension is enabled on the device, then vkCmdSetViewportWScalingNV must have been
called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectCount-None-08636
If a shader object is bound to any graphics stage, and the
VK_NV_clip_space_w_scaling extension is enabled on the device, then the
viewportCount parameter in the last call to
vkCmdSetViewportWScalingNV must be greater than or equal to the
viewportCount parameter in the last call to
vkCmdSetViewportWithCount

• VUID-vkCmdDrawIndexedIndirectCount-viewportCount-04139
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the
VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic state enabled, then the
bound graphics pipeline must have been created with
VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount greater or equal
to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawIndexedIndirectCount-viewportCount-04140**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawIndexedIndirectCount-shadingRateImage-09233**
  If the `shadingRateImage` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-shadingRateImage-09234**
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetShadingRateImageEnableNV` in the current command buffer set `shadingRateImageEnable` to `VK_TRUE`, then `vkCmdSetViewportShadingRatePaletteNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08637**
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawIndexedIndirectCount-VkPipelineViewportCreateInfo-04141**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportSwizzleStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawIndexedIndirectCount-VkPipelineViewportCreateInfo-04142**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportExclusiveScissorStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawIndexedIndirectCount-None-07878**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV` dynamic state enabled then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV` dynamic state enabled then `vkCmdSetExclusiveScissorNV` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the `exclusiveScissor` feature is enabled, then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetExclusiveScissorEnableNV` in the current command buffer set any element of `pExclusiveScissorEnables` to `VK_TRUE`, then `vkCmdSetExclusiveScissorNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled then `vkCmdSetRasterizerDiscardEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, then `vkCmdSetRasterizerDiscardEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the `logicOp` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.
If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

If rasterization is not disabled in the bound graphics pipeline, for each color attachment in the subpass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be `VK_FALSE`.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`.

If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments.
If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`.

- **VUID-vkCmdDrawIndexedIndirectCount-imageView-06172**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the layout member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

- **VUID-vkCmdDrawIndexedIndirectCount-imageView-06173**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the layout member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

- **VUID-vkCmdDrawIndexedIndirectCount-imageView-06174**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the layout member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment.

- **VUID-vkCmdDrawIndexedIndirectCount-imageView-06175**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the layout member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

- **VUID-vkCmdDrawIndexedIndirectCount-viewMask-06178**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`.

- **VUID-vkCmdDrawIndexedIndirectCount-colorAttachmentCount-06179**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`.

- **VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08910**
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::colorAttachmentCount`
::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the currently bound graphics pipeline.

- **VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08911**
  If the dynamicRenderingUnusedAttachments feature is enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a VkFormat equal to the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the currently bound graphics pipeline, or the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats, if it exists, must be VK_FORMAT_UNDEFINED.

- **VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08912**
  If the dynamicRenderingUnusedAttachments feature is not enabled, and the current render pass instance was begun with vkCmdBeginRendering and VkRenderingInfo ::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo ::pColorAttachments array with a imageView equal to VK_NULL_HANDLE must have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the currently bound pipeline equal to VK_FORMAT_UNDEFINED.

- **VUID-vkCmdDrawIndexedIndirectCount-attachmentCount-07749**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled then vkCmdSetColorWriteEnableEXT must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-attachmentCount-07750**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled then the attachmentCount parameter of vkCmdSetColorWriteEnableEXT must be greater than or equal to the VkPipelineColorBlendStateCreateInfo::attachmentCount of the currently bound graphics pipeline.

- **VUID-vkCmdDrawIndexedIndirectCount-attachmentCount-08646**
  If the colorWriteEnable feature is enabled on the device, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorWriteEnableEXT must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-attachmentCount-08647**
  If the colorWriteEnable feature is enabled on the device, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of...
VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView

• VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08915
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08916
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08917
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirectCount-dynamicRenderingUnusedAttachments-08918
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirectCount-imageView-06183
If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

• VUID-vkCmdDrawIndexedIndirectCount-imageView-06184
If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT

• VUID-vkCmdDrawIndexedIndirectCount-colorAttachmentCount-06185
If the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments
array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline.

- **VUID-vkCmdDrawIndexedIndirectCount-pDepthAttachment-06186**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pDepthAttachment->imageView was not `VK_NULL_HANDLE`, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView.

- **VUID-vkCmdDrawIndexedIndirectCount-pStencilAttachment-06187**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pStencilAttachment->imageView was not `VK_NULL_HANDLE`, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView.

- **VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07285**
  If the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of rasterizationSamples for the currently bound graphics pipeline.

- **VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07286**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not `VK_NULL_HANDLE`, the value of rasterizationSamples for the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pDepthAttachment->imageView.

- **VUID-vkCmdDrawIndexedIndirectCount-multisampledRenderToSingleSampled-07287**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the multisampledRenderToSingleSampled feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not `VK_NULL_HANDLE`, the value of rasterizationSamples for the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView.
• VUID-vkCmdDrawIndexedIndirectCount-pNext-07935
If this command has been called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the currently bound graphics pipeline must be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples

• VUID-vkCmdDrawIndexedIndirectCount-renderPass-06198
If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline must have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE

• VUID-vkCmdDrawIndexedIndirectCount-pColorAttachments-08963
If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline must not be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirectCount-pDepthAttachment-08964
If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline must not be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirectCount-pStencilAttachment-08965
If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline must not be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawIndexedIndirectCount-primitivesGeneratedQueryWithRasterizerDiscard-06708
If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard must not be enabled

• VUID-vkCmdDrawIndexedIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-06709
If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline must not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream

• VUID-vkCmdDrawIndexedIndirectCount-None-07619
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled then vkCmdSetTessellationDomainOriginEXT must have been called in the current command
buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07620
  If the bound graphics pipeline state was created with the 
  `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then 
  `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-09237
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then 
  `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08650
  If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, 
  and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07621
  If the bound graphics pipeline state was created with the 
  `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then 
  `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08651
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07622
  If the bound graphics pipeline state was created with the 
  `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then 
  `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08652
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07623
  If the bound graphics pipeline state was created with the 
  `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08653
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `alphaToOne` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled then `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `logicOp` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then
vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08657
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07628
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08658
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetColorBlendEnableEXT for any attachment set that attachment’s value in pColorBlendEnables to VK_TRUE, then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07629
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08659
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetColorWriteMaskEXT for any attachment set that attachment’s value in pColorBlendEnables to VK_TRUE, then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07630
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08660
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage, then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-07631
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndexedIndirectCount-None-08661
  If geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage, then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command
If the VK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirectCount-None-07632
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled then vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirectCount-None-08662
  If the VK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetConservativeRasterizationModeEXT in the current command buffer set conservativeRasterizationMode to VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirectCount-None-07633
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state enabled then vkCmdSetDepthClipEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirectCount-None-08663
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage, then vkCmdSetDepthClipEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirectCount-None-07634
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled then vkCmdSetSampleLocationsEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirectCount-None-08664
  If the VK_EXT_sample_locations extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleLocationsEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirectCount-None-07635
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndexedIndirectCount-None-08665
  If the colorBlendEnable feature is enabled, and a shader object is bound to any graphics stage, then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08665**
  If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07637**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08666**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08667**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08668**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-07638**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08669**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08670**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then
The **vkCmdSetLineStippleEnableEXT** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-08671**
  If the **VK_EXT_line_rasterization** extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then **vkCmdSetLineStippleEnableEXT** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-07849**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LINE_STIPPLE_EXT** dynamic state enabled then **vkCmdSetLineStippleEXT** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-08672**
  If the **VK_EXT_line_rasterization** extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetLineStippleEnableEXT** in the current command buffer set **stippledLineEnable** to **VK_TRUE**, then **vkCmdSetLineStippleEXT** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-07639**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT** dynamic state enabled then **vkCmdSetDepthClipNegativeOneToOneEXT** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-08673**
  If the **depthClipControl** feature is enabled, and a shader object is bound to any graphics stage, then **vkCmdSetDepthClipNegativeOneToOneEXT** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-07640**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV** dynamic state enabled then **vkCmdSetViewportWScalingEnableNV** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-08674**
  If the **VK_NV_clip_space_w_scaling** extension is enabled, and a shader object is bound to any graphics stage, then **vkCmdSetViewportWScalingEnableNV** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-07641**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV** dynamic state enabled then **vkCmdSetViewportSwizzleNV** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-08675**
  If the **VK_NV_viewport_swizzle** extension is enabled, and a shader object is bound to any graphics stage, then **vkCmdSetViewportSwizzleNV** must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawIndexedIndirectCount-None-07642**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-None-08676**
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-None-07643**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV` dynamic state enabled then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-None-08677**
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetCoverageToColorEnableNV` in the current command buffer set `coverageToColorEnable` to `VK_TRUE`, then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-None-07644**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-None-08678**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-None-07645**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndexedIndirectCount-None-08679**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationMode` to any value other than `VK_COVERAGE_MODULATION_MODE_NONE_NV`, then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableNV must` have been called in the current command buffer prior to this drawing command.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationTableEnable` to `VK_TRUE`, then `vkCmdSetCoverageModulationTableNV must` have been called in the current command buffer prior to this drawing command.

If the `pipelineFragmentShadingRate` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFragmentShadingRateKHR must` have been called in the current command buffer prior to this drawing command.

If the `shadingRateImage` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetShadingRateImageEnableNV must` have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV` dynamic state enabled then `vkCmdSetRepresentativeFragmentTestEnableNV must` have been called in the current command buffer prior to this drawing command.

If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV must` have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV must` have been called in the current command buffer prior to this drawing command.
If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view's `format features` must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or depth/stencil attachments.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the
• VUID-vkCmdDrawIndexedIndirectCount-firstAttachment-07476
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEnableEXT` calls must specify an enable for all active color attachments in the current subpass.

• VUID-vkCmdDrawIndexedIndirectCount-firstAttachment-07477
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEquationEXT` calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled.

• VUID-vkCmdDrawIndexedIndirectCount-firstAttachment-07478
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorWriteMaskEXT` calls must specify the color write mask for all active color attachments in the current subpass.

• VUID-vkCmdDrawIndexedIndirectCount-firstAttachment-07479
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendAdvancedEXT` calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled.

• VUID-vkCmdDrawIndexedIndirectCount-advancedBlendMaxColorAttachments-07480
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled and the last calls to `vkCmdSetColorBlendEnableEXT` and `vkCmdSetColorBlendAdvancedEXT` have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed `advancedBlendMaxColorAttachments`.

• VUID-vkCmdDrawIndexedIndirectCount-primitivesGeneratedQueryWithNonZeroStreams-07481
If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, and the bound graphics pipeline was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` must have set the `rasterizationStream` to zero.

• VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsPerPixel-07482
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- **VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsPerPixel-07483**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- **VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07484**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- **VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07485**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- **VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07486**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- **VUID-vkCmdDrawIndexedIndirectCount-sampleLocationsEnable-07487**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code must not statically use the extended instruction `InterpolateAtSample`
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.width must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT.

If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.height must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT.

If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationsPerPixel must equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT.

If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV state enabled and the last call to vkCmdSetCoverageModulationTableEnableNV set coverageModulationTableEnable to VK_TRUE, then the coverageModulationTableCount parameter in the last call to vkCmdSetCoverageModulationTableNV must equal the current rasterizationSamples divided by the number of color samples in the current subpass.

If the VK_NV_framebuffer_mixed_samples extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current rasterizationSamples must be the same as the sample count of the depth/stencil attachment.

If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV state enabled and the last call to vkCmdSetCoverageToColorEnableNV set the coverageToColorEnable to VK_TRUE, then the current subpass must have a color attachment at the location selected by the last call to vkCmdSetCoverageToColorLocationNV coverageToColorLocation, with a VkFormat of
VK_FORMAT_R8_UINT, VK_FORMAT_R8_SINT, VK_FORMAT_R16_UINT, VK_FORMAT_R16_SINT, VK_FORMAT_R32_UINT, or VK_FORMAT_R32_SINT

• VUID-vkCmdDrawIndexedIndirectCount-coverageReductionMode-07491
  If this VK_NV_coverage_reduction_mode extension is enabled, the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, the current coverage reduction mode coverageReductionMode_EXT, then the current rasterizationSamples, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV.

• VUID-vkCmdDrawIndexedIndirectCount-viewportCount-07492
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

• VUID-vkCmdDrawIndexedIndirectCount-viewportCount-07493
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportSwizzleNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

• VUID-vkCmdDrawIndexedIndirectCount-rasterizationSamples-07494
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if the current subpass has any color attachments and rasterizationSamples of the last call to vkCmdSetRasterizationSamplesEXT is greater than the number of color samples, then the pipeline sampleShadingEnable must be VK_FALSE.

• VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT, then the stippledRectangularLines feature must be enabled.

• VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT, then the stippledBresenhamLines feature must be enabled.

• VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or
VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and if the current
stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is
VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT, then the stippledSmoothLines feature must be enabled

• VUID-vkCmdDrawIndexedIndirectCount-stippledLineEnable-07498
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or
VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic state enabled, and if the current
stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is
VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT, then the stippledRectangularLines feature must be enabled and VkPhysicalDeviceLimits::strictLines must be VK_TRUE

• VUID-vkCmdDrawIndexedIndirectCount-conservativePointAndLineRasterization-07499
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled,
conservativePointAndLineRasterization is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the conservativeRasterizationMode set by the last call to vkCmdSetConservativeRasterizationModeEXT must be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT

• VUID-vkCmdDrawIndexedIndirectCount-stage-07073
If the currently bound pipeline was created with the VkPipelineShaderStageCreateInfo ::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to
VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries must not be active

• VUID-vkCmdDrawIndexedIndirectCount-None-08877
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state
vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectCount-None-07850
If dynamic state was inherited from VkCommandBufferInheritanceViewportScissorInfoNV, it must be set in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectCount-None-08684
If there is no bound graphics pipeline, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT

• VUID-vkCmdDrawIndexedIndirectCount-None-08685
If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT

• VUID-vkCmdDrawIndexedIndirectCount-None-08686
If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT
If there is no bound graphics pipeline, and the geometryShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`.

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`.

If there is no bound graphics pipeline, and the taskShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`.

If there is no bound graphics pipeline, and the meshShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`.

If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages must have a valid `VkShaderEXT` bound, and the other must have no `VkShaderEXT` bound.

If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid `VkShaderEXT` must be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid ` VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created with the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, there must be no `VkShaderEXT` bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call must also be bound.

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of...
the same `vkCreateShadersEXT` call must not have any `VkShaderEXT` bound

- **VUID-vkCmdDrawIndexedIndirectCount-None-08878**
  All bound graphics shader objects must have been created with identical or identically defined push constant ranges

- **VUID-vkCmdDrawIndexedIndirectCount-None-08879**
  All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

- **VUID-vkCmdDrawIndexedIndirectCount-None-08880**
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage and the `attachmentFeedbackLoopDynamicState` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE` `vkCmdSetAttachmentFeedbackLoopEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-pDynamicStates-08715**
  If the bound graphics pipeline state includes a fragment shader stage, was created with `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` set in `VkPipelineDynamicStateCreateInfo ::pDynamicStates`, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` must be `VK_FALSE`

- **VUID-vkCmdDrawIndexedIndirectCount-pDynamicStates-08716**
  If the bound graphics pipeline state includes a fragment shader stage, was created with `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` set in `VkPipelineDynamicStateCreateInfo ::pDynamicStates`, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` must be 0

- **VUID-vkCmdDrawIndexedIndirectCount-None-09116**
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` must either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, and `VK_COLOR_COMPONENT_B_BIT`, or none of them

- **VUID-vkCmdDrawIndexedIndirectCount-maxFragmentDualSrcAttachments-09239**
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of `Location` for any output attachment statically used in the Fragment Execution Model executed by this command must be less than `maxFragmentDualSrcAttachments`

- **VUID-vkCmdDrawIndexedIndirectCount-None-04007**
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must have either valid or `VK_NULL_HANDLE` buffers bound

- **VUID-vkCmdDrawIndexedIndirectCount-None-04008**
  If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point’s interface must not be
• VUID-vkCmdDrawIndexedIndirectCount-None-02721
  For a given vertex buffer binding, any attribute data fetched must be entirely contained within the corresponding vertex buffer binding, as described in **Vertex Input Description**

• VUID-vkCmdDrawIndexedIndirectCount-None-07842
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then **vkCmdSetPrimitiveTopology** must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectCount-dynamicPrimitiveTopologyUnrestricted-07500
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of **vkCmdSetPrimitiveTopology** must be of the same topology class as the pipeline `VkPipelineInputAssemblyStateCreateInfo`::`topology` state

• VUID-vkCmdDrawIndexedIndirectCount-None-04912
  If the bound graphics pipeline was created with both the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` and `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT` dynamic states enabled, then **vkCmdSetVertexInputEXT** must have been called in the current command buffer prior to this draw command

• VUID-vkCmdDrawIndexedIndirectCount-pStrides-04913
  If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then **vkCmdBindVertexBuffers2EXT** must have been called in the current command buffer prior to this draw command, and the `pStrides` parameter of **vkCmdBindVertexBuffers2EXT** must not be **NULL**

• VUID-vkCmdDrawIndexedIndirectCount-None-08881
  If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then **vkCmdSetPrimitiveTopology** must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndexedIndirectCount-None-04914
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then **vkCmdSetVertexInputEXT** must have been called in the current command buffer prior to this draw command

• VUID-vkCmdDrawIndexedIndirectCount-Input-07939
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then all variables with the Input storage class decorated with **Location** in the **Vertex Execution Model OpEntryPoint** must contain a location in `VkVertexInputAttributeDescription2EXT`::`location`

• VUID-vkCmdDrawIndexedIndirectCount-Input-08734
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then the numeric type associated with all Input variables of the corresponding **Location** in the **Vertex Execution Model OpEntryPoint** must contain a location in `VkVertexInputAttributeDescription2EXT`::`location`
Model **OpEntryPoint** must be the same as **VkVertexInputAttributeDescription2EXT:**::format

- **VUID-vkCmdDrawIndexedIndirectCount-format-08936**
  If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the **VK_DYNAMIC_STATE_VERTEX_INPUT_EXT** dynamic state enabled, and **VkVertexInputAttributeDescription2EXT:**::format has a 64-bit component, then the scalar width associated with all Input variables of the corresponding Location in the Vertex Execution Model **OpEntryPoint** must be 64-bit

- **VUID-vkCmdDrawIndexedIndirectCount-format-08937**
  If there is a shader object bound to a graphics stage or the currently bound graphics pipeline was created with the **VK_DYNAMIC_STATE_VERTEX_INPUT_EXT** dynamic state enabled, and the scalar width associated with a Location decorated Input variable in the Vertex Execution Model **OpEntryPoint** is 64-bit, then the corresponding **VkVertexInputAttributeDescription2EXT:**::format must have a 64-bit component

- **VUID-vkCmdDrawIndexedIndirectCount-None-09203**
  If a shader object is bound to the **VK_SHADER_STAGE_VERTEX_BIT** stage, then **vkCmdSetVertexInputEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-04875**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT** dynamic state enabled then **vkCmdSetPatchControlPointsEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-08883**
  If a shader object is bound to the **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT** stage, then **vkCmdSetPatchControlPointsEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-None-04879**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE** dynamic state enabled then **vkCmdSetPrimitiveRestartEnable** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-rasterizerDiscardEnable-08884**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, **vkCmdSetPrimitiveRestartEnable** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndexedIndirectCount-stage-06481**
  The bound graphics pipeline must not have been created with the
 VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndexedIndirectCount-None-08885
  There must be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages

- VUID-vkCmdDrawIndexedIndirectCount-buffer-02708
  If buffer is non-sparse then it must be bound completely and contiguously to a single VkDeviceMemory object

- VUID-vkCmdDrawIndexedIndirectCount-buffer-02709
  buffer must have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set

- VUID-vkCmdDrawIndexedIndirectCount-offset-02710
  offset must be a multiple of 4

- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-02711
  commandBuffer must not be a protected command buffer

- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02714
  If countBuffer is non-sparse then it must be bound completely and contiguously to a single VkDeviceMemory object

- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02715
  countBuffer must have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set

- VUID-vkCmdDrawIndexedIndirectCount-countBufferOffset-02716
  countBufferOffset must be a multiple of 4

- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-02717
  The count stored in countBuffer must be less than or equal to VkPhysicalDeviceLimits::maxDrawIndirectCount

- VUID-vkCmdDrawIndexedIndirectCount-countBufferOffset-04129
  (countBufferOffset + sizeof(uint32_t)) must be less than or equal to the size of countBuffer

- VUID-vkCmdDrawIndexedIndirectCount-robustBufferAccess2-07825
  If robustBufferAccess2 is not enabled, (indexSize × (firstIndex + indexCount) + offset) must be less than or equal to the size of the bound index buffer, with indexSize being based on the type specified by indexType, where the index buffer, indexType, and offset are specified via vkCmdBindIndexBuffer

- VUID-vkCmdDrawIndexedIndirectCount-stride-03142
  stride must be a multiple of 4 and must be greater than or equal to sizeof(VkDrawIndexedIndirectCommand)

- VUID-vkCmdDrawIndexedIndirectCount-maxDrawCount-03143
  If maxDrawCount is greater than or equal to 1, (stride × (maxDrawCount - 1) + offset +
sizeof(VkDrawIndexedIndirectCommand) must be less than or equal to the size of buffer

- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-03153
  If count stored in countBuffer is equal to 1, (offset + sizeof(VkDrawIndexedIndirectCommand)) must be less than or equal to the size of buffer

- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-03154
  If count stored in countBuffer is greater than 1, (stride × (drawCount - 1) + offset + sizeof(VkDrawIndexedIndirectCommand)) must be less than or equal to the size of buffer

Valid Usage (Implicit)

- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle

- VUID-vkCmdDrawIndexedIndirectCount-buffer-parameter
  buffer must be a valid VkBuffer handle

- VUID-vkCmdDrawIndexedIndirectCount-countBuffer-parameter
  countBuffer must be a valid VkBuffer handle

- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-recording
  commandBuffer must be in the recording state

- VUID-vkCmdDrawIndexedIndirectCount-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations

- VUID-vkCmdDrawIndexedIndirectCount-renderpass
  This command must only be called inside of a render pass instance

- VUID-vkCmdDrawIndexedIndirectCount-videocoding
  This command must only be called outside of a video coding scope

- VUID-vkCmdDrawIndexedIndirectCount-commonparent
  Each of buffer, commandBuffer, and countBuffer must have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to commandBuffer must be externally synchronized

- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized
21.3.1. Drawing Transform Feedback

It is possible to draw vertex data that was previously captured during active transform feedback by binding one or more of the transform feedback buffers as vertex buffers. A pipeline barrier is required between using the buffers as transform feedback buffers and vertex buffers to ensure all writes to the transform feedback buffers are visible when the data is read as vertex attributes. The source access is `VK_ACCESS_TRANSFORM_FEEDBACK_WRITE_BIT_EXT` and the destination access is `VK_ACCESS_VERTEX_ATTRIBUTE_READ_BIT` for the pipeline stages `VK_PIPELINE_STAGE_TRANSFORM_FEEDBACK_BIT_EXT` and `VK_PIPELINE_STAGE_VERTEX_INPUT_BIT` respectively. The value written to the counter buffer by `vkCmdEndTransformFeedbackEXT` can be used to determine the vertex count for the draw. A pipeline barrier is required between using the counter buffer for `vkCmdEndTransformFeedbackEXT` and `vkCmdDrawIndirectByteCountEXT` where the source access is `VK_ACCESS_TRANSFORM_FEEDBACK_COUNTER_WRITE_BIT_EXT` and the destination access is `VK_ACCESS_INDIRECT_COMMAND_READ_BIT` for the pipeline stages `VK_PIPELINE_STAGE_TRANSFORM_FEEDBACK_BIT_EXT` and `VK_PIPELINE_STAGE_DRAW_INDIRECT_BIT` respectively.

To record a non-indexed draw call, where the vertex count is based on a byte count read from a buffer and the passed in vertex stride parameter, call:

```c
// Provided by VK_EXT_transform_feedback
void vkCmdDrawIndirectByteCountEXT(
    VkCommandBuffer commandBuffer,
    uint32_t instanceCount,
    uint32_t firstInstance,
    VkBuffer counterBuffer,
    VkDeviceSize counterBufferOffset,
    uint32_t counterOffset,
    uint32_t vertexStride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `instanceCount` is the number of instances to draw.
- `firstInstance` is the instance ID of the first instance to draw.
- `counterBuffer` is the buffer handle from where the byte count is read.
- `counterBufferOffset` is the offset into the buffer used to read the byte count, which is used to calculate the vertex count for this draw call.
- `counterOffset` is subtracted from the byte count read from the `counterBuffer` at the
counterBufferOffset

- vertexStride is the stride in bytes between each element of the vertex data that is used to calculate the vertex count from the counter value. This value is typically the same value that was used in the graphics pipeline state when the transform feedback was captured as the XfbStride.

When the command is executed, primitives are assembled in the same way as done with vkCmdDraw except the vertexCount is calculated based on the byte count read from counterBuffer at offset counterBufferOffset. The assembled primitives execute the bound graphics pipeline.

The effective vertexCount is calculated as follows:

```c
const uint32_t * counterBufferPtr = (const uint8_t *)counterBuffer.address + counterBufferOffset;
vertexCount = floor(max(0, (*counterBufferPtr - counterOffset)) / vertexStride);
```

The effective firstVertex is zero.

**Valid Usage**

- VUID-vkCmdDrawIndirectByteCountEXT-magFilter-04553
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawIndirectByteCountEXT-mipmapMode-04770
  If a VkSampler created with.mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawIndirectByteCountEXT-None-06479
  If a VkImageView is sampled with depth comparison, the image view's format features must contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT

- VUID-vkCmdDrawIndirectByteCountEXT-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT

- VUID-vkCmdDrawIndirectByteCountEXT-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features must contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT

- VUID-vkCmdDrawIndirectByteCountEXT-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT
If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it **must** not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`.

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

If the `cubicRangeClamp` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must not** have a `VkSamplerReductionModeCreateInfo`.

Any `VkImage` created with a `VkImageCreateInfo` containing `VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV` sampled as a result of this command **must** only be sampled using a `VkSamplerAddressMode` of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`.

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

If the `selectableCubicWeights` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have `VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights` equal to `VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM`.

Any `VkImage` created with a `VkImageCreateInfo` containing `VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV` sampled as a result of this command **must** only be sampled using a `VkSamplerAddressMode` of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`.

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.
For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view’s `buffer features` must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

• VUID-vkCmdDrawIndirectByteCountEXT-OpTypeImage-07030
  Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view’s `buffer features` must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

• VUID-vkCmdDrawIndirectByteCountEXT-None-08600
  For each set `n` that is statically used by a bound shader, a descriptor set must have been bound to `n` at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set `n`, with the `VkPipelineLayout` or `VkDescriptorSetLayout` array that was used to create the current `VkPipeline` or `VkShader`, as described in Pipeline Layout Compatibility

• VUID-vkCmdDrawIndirectByteCountEXT-None-08601
  For each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShader`, as described in Pipeline Layout Compatibility

• VUID-vkCmdDrawIndirectByteCountEXT-maintenance4-08602
  If the maintenance4 feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShader`, as described in Pipeline Layout Compatibility

• VUID-vkCmdDrawIndirectByteCountEXT-None-08114
  Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, must be valid if they are statically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

• VUID-vkCmdDrawIndirectByteCountEXT-None-08115
  If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` must have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

• VUID-vkCmdDrawIndirectByteCountEXT-None-08116
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

• VUID-vkCmdDrawIndirectByteCountEXT-None-08604
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by any `VkShader` bound to a stage corresponding to the pipeline bind point used by this command
If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline must have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT.

If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident.

If a descriptor is dynamically used with a VkShaderEXT created with a VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident.

If the shaderObject feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command.

If the shaderObject is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and VK_NULL_HANDLE shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command.

If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound.

If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used to sample from any VkImage with a VkImageView of the type VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, VK_IMAGE_VIEW_TYPE_1D_ARRAY, VK_IMAGE_VIEW_TYPE_2D_ARRAY or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY, in any shader stage.

If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name, in any shader stage.

If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage.
• VUID-vkCmdDrawIndirectByteCountEXT-uniformBuffers-06935

If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndirectByteCountEXT-None-08612

If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndirectByteCountEXT-storageBuffers-06936

If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for storageBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndirectByteCountEXT-None-08613

If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

• VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-02707

If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders must not be a protected resource

• VUID-vkCmdDrawIndirectByteCountEXT-ConstOffset-06550

If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'CbCr conversion, that object must only be used with OpImageSample* or OpImageSparseSample* instructions

• VUID-vkCmdDrawIndirectByteCountEXT-ConstOffset-06551

If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'CbCr conversion, that object must not use the ConstOffset and Offset operands

• VUID-vkCmdDrawIndirectByteCountEXT-viewType-07752

If a VkImageView is accessed as a result of this command, then the image view's viewType must match the Dim operand of the OpTypeImage as described in Instruction/Sampler/Image View Validation

• VUID-vkCmdDrawIndirectByteCountEXT-format-07753

If a VkImageView is accessed as a result of this command, then the numeric type of the image view's format and the Sampled Type operand of the OpTypeImage must match

• VUID-vkCmdDrawIndirectByteCountEXT-OpImageWrite-08795
If a |VkImageView| created with a format other than |VK_FORMAT_A8_UNORM_KHR| is accessed using |OpImageWrite| as a result of this command, then the **Type** of the |Texel| operand of that instruction **must** have at least as many components as the image view's format

- **VUID-vkCmdDrawIndirectByteCountEXT-OpImageWrite-08796**
  If a |VkImageView| created with the format |VK_FORMAT_A8_UNORM_KHR| is accessed using |OpImageWrite| as a result of this command, then the **Type** of the |Texel| operand of that instruction **must** have four components

- **VUID-vkCmdDrawIndirectByteCountEXT-OpImageWrite-04469**
  If a |VkBufferView| is accessed using |OpImageWrite| as a result of this command, then the **Type** of the |Texel| operand of that instruction **must** have at least as many components as the buffer view's format

- **VUID-vkCmdDrawIndirectByteCountEXT-SampledType-04470**
  If a |VkImageView| with a |VkFormat| that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the |OpTypeImage| operand of that instruction **must** have a **Width** of 64

- **VUID-vkCmdDrawIndirectByteCountEXT-SampledType-04471**
  If a |VkImageView| with a |VkFormat| that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the |OpTypeImage| operand of that instruction **must** have a **Width** of 32

- **VUID-vkCmdDrawIndirectByteCountEXT-SampledType-04472**
  If a |VkBufferView| with a |VkFormat| that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the |OpTypeImage| operand of that instruction **must** have a **Width** of 64

- **VUID-vkCmdDrawIndirectByteCountEXT-SampledType-04473**
  If a |VkBufferView| with a |VkFormat| that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the |OpTypeImage| operand of that instruction **must** have a **Width** of 32

- **VUID-vkCmdDrawIndirectByteCountEXT-sparseImageInt64Atomics-04474**
  If the |sparseImageInt64Atomics| feature is not enabled, |VkImage| objects created with the |VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT| flag **must** not be accessed by atomic instructions through an |OpTypeImage| with a **SampledType** with a **Width** of 64 by this command

- **VUID-vkCmdDrawIndirectByteCountEXT-sparseImageInt64Atomics-04475**
  If the |sparseImageInt64Atomics| feature is not enabled, |VkBuffer| objects created with the |VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT| flag **must** not be accessed by atomic instructions through an |OpTypeImage| with a **SampledType** with a **Width** of 64 by this command

- **VUID-vkCmdDrawIndirectByteCountEXT-OpImageWeightedSampleQCOM-06971**
  If |OpImageWeightedSampleQCOM| is used to sample a |VkImageView| as a result of this command, then the image view's **format features** **must** contain |VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM|

- **VUID-vkCmdDrawIndirectByteCountEXT-OpImageWeightedSampleQCOM-06972**
  If |OpImageWeightedSampleQCOM| uses a |VkImageView| as a sample weight image as a result of this command, then the image view's **format features** **must** contain |VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM|
• VUID-vkCmdDrawIndirectByteCountEXT-OpImageBoxFilterQCOM-06973
  If `OpImageBoxFilterQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM`.

• VUID-vkCmdDrawIndirectByteCountEXT-OpImageBlockMatchSSDQCOM-06974
  If `OpImageBlockMatchSSDQCOM` is used to read from an `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM`.

• VUID-vkCmdDrawIndirectByteCountEXT-OpImageBlockMatchSADQCOM-06975
  If `OpImageBlockMatchSADQCOM` is used to read from an `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM`.

• VUID-vkCmdDrawIndirectByteCountEXT-OpImageBlockMatchWindowSSDQCOM-06976
  If `OpImageBlockMatchWindowSSDQCOM` or `OpImageBlockMatchWindowSADQCOM` is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.

• VUID-vkCmdDrawIndirectByteCountEXT-OpImageBlockMatchWindow-09215
  If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from an `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM`.

• VUID-vkCmdDrawIndirectByteCountEXT-OpImageBlockMatchWindow-09216
  If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from an `VkImageView` as a result of this command, then the image view's format must be a single-component format.

• VUID-vkCmdDrawIndirectByteCountEXT-OpImageBlockMatchWindow-09217
  If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.

• VUID-vkCmdDrawIndirectByteCountEXT-None-07288
  Any shader invocation executed by this command must terminate.
The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`.

- **VUID-vkCmdDrawIndirectByteCountEXT-subpass-02685**
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07748**
  If any shader statically accesses an input attachment, a valid descriptor **must** be bound to the pipeline via a descriptor set.

- **VUID-vkCmdDrawIndirectByteCountEXT-OpTypeImage-07468**
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07469**
  Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-06537**
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-09000**
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

  - the `VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_COLOR_BIT` and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-09001**
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_DEPTH_BIT` and
- there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with 
    `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndirectByteCountEXT-None-09002
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the 
  `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included
    `VK_IMAGE_ASPECT_STENCIL_BIT`

  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with 
    `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawIndirectByteCountEXT-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it **must** not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawIndirectByteCountEXT-None-06539
  If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command **must** not write to that image subresource as an attachment

- VUID-vkCmdDrawIndirectByteCountEXT-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, **depth writes must be disabled**

- VUID-vkCmdDrawIndirectByteCountEXT-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back writeMask are not zero, and stencil test is enabled, **all stencil ops must be VK_STENCIL_OP_KEEP**

- VUID-vkCmdDrawIndirectByteCountEXT-None-07831
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07832
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07833
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled then `vkCmdSetLineWidth` **must** have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawIndirectByteCountEXT-None-08617
If a shader object is bound to any graphics stage, and the most recent call to 
vkCmdSetPolygonModeEXT in the current command buffer set polygonMode to
VK_POLYGON_MODE_LINE, vkCmdSetLineWidth must have been called in the current
command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08618
If a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, and the most recent
call to vkCmdSetPrimitiveTopology in the current command buffer set primitiveTopology
to any line topology, vkCmdSetLineWidth must have been called in the current command
buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08619
If a shader object that outputs line primitives is bound to the
VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT stage,
vkCmdSetLineWidth must have been called in the current command buffer prior to this
drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-07834
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BIAS
dynamic state enabled then vkCmdSetDepthBias or vkCmdSetDepthBias2EXT must have
been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08620
If a shader object is bound to any graphics stage, and the most recent call to 
vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, and the most recent call to
vkCmdSetDepthBiasEnable in the current command buffer set depthBiasEnable to VK_TRUE,
vkCmdSetDepthBias or vkCmdSetDepthBias2EXT must have been called in the current
command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-07835
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS
dynamic state enabled then vkCmdSetBlendConstants must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08621
If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent
call to vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, and the most recent call to
vkCmdSetColorBlendEnableEXT in the current command buffer set any element of
pColorBlendEnables to VK_FALSE, and the most recent call to
vkCmdSetColorBlendEquationEXT in the current command buffer set the same element of
pColorBlendEquations to a VkColorBlendEquationEXT structure with any VkBlendFactor
member with a value of VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or
VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, vkCmdSetBlendConstants must have been
called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-07836
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS
dynamic state enabled then vkCmdSetDepthBounds must have been called in the current
command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08622**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBoundsTestEnable` in the current command buffer set `depthBoundsTestEnable` to `VK_TRUE`, then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07837**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled then `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08623**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07838**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled then `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08624**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08625**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-maxMultiviewInstanceIndex-02688**
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- **VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-02689**
  If the bound graphics pipeline was created with
VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawIndirectByteCountEXT-None-06666
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08626
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetSampleLocationsEnableEXT in the current command buffer set sampleLocationsEnable to VK_TRUE, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsPerPixel-07934
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndirectByteCountEXT-None-07840
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08627
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07841
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08628
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07843
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled then vkCmdSetDepthTestEnable must have been called in the current command buffer prior to this drawing command
If a shader object is bound to any graphics stage, and the most recent call to
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDepthTestEnable} must have been
called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the
\texttt{VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE} dynamic state enabled then
\texttt{vkCmdSetDepthWriteEnable} must have been called in the current command buffer prior
to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDepthWriteEnable} must have been
called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the
\texttt{VK_DYNAMIC_STATE_DEPTH_COMPARE_OP} dynamic state enabled then
\texttt{vkCmdSetDepthCompareOp} must have been called in the current command buffer prior
to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to
\texttt{vkCmdSetDepthTestEnable} in the current command buffer set \texttt{depthTestEnable} to \texttt{VK_TRUE},
then \texttt{vkCmdSetDepthCompareOp} must have been called in the current command buffer prior
to this drawing command.

If the bound graphics pipeline state was created with the
\texttt{VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE} dynamic state enabled then
\texttt{vkCmdSetDepthBoundsTestEnable} must have been called in the current command buffer prior
to this drawing command.

If a shader object is bound to any graphics stage, and the \texttt{depthBounds} feature is enabled,
and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command
buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then the \texttt{vkCmdSetDepthBoundsTestEnable} must have been called in the current command buffer prior
to this drawing command.

If the bound graphics pipeline state was created with the
\texttt{VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE} dynamic state enabled then
\texttt{vkCmdSetStencilTestEnable} must have been called in the current command buffer prior
to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to
\texttt{vkCmdSetDepthTestEnable} in the current command buffer set \texttt{depthTestEnable} to \texttt{VK_TRUE},
then \texttt{vkCmdSetStencilTestEnable} must have been called in the current command buffer prior
to this drawing command.
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetStencilTestEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-07848
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled then vkCmdSetStencilOp must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08634
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, then vkCmdSetStencilOp must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-03417
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the VkPipelineViewportStateCreateInfo::viewportCount of the pipeline

• VUID-vkCmdDrawIndirectByteCountEXT-scissorCount-03418
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the scissorCount parameter of vkCmdSetScissorWithCount must match the VkPipelineViewportStateCreateInfo::viewportCount of the pipeline

• VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-03419
  If the bound graphics pipeline state was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the scissorCount parameter of vkCmdSetScissorWithCount

• VUID-vkCmdDrawIndirectByteCountEXT-None-08635
  If a shader object is bound to any graphics stage, then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the scissorCount parameter of vkCmdSetScissorWithCount

• VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-04137
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic state enabled, then the bound graphics
pipeline **must** have been created with \texttt{VkPipelineViewportWScalingStateCreateInfoNV} ::\texttt{viewportCount} greater or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- **VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-04138**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV} dynamic states enabled then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWScalingNV} **must** be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- **VUID-vkCmdDrawIndirectByteCountEXT-None-09232**
  If a shader object is bound to any graphics stage, and the \texttt{VK_NV_clip_space_w_scaling} extension is enabled on the device, then \texttt{vkCmdSetViewportWScalingNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08636**
  If a shader object is bound to any graphics stage, and the \texttt{VK_NV_clip_space_w_scaling} extension is enabled on the device, then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWScalingNV} **must** be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- **VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-04139**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic state enabled, but not the \texttt{VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV} dynamic state enabled, then the bound graphics pipeline **must** have been created with \texttt{VkPipelineViewportShadingRateImageStateCreateInfoNV} ::\texttt{viewportCount} greater or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- **VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-04140**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV} dynamic states enabled then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportShadingRatePaletteNV} **must** be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- **VUID-vkCmdDrawIndirectByteCountEXT-shadingRateImage-09233**
  If the \texttt{shadingRateImage} feature is enabled, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set rasterizerDiscardEnable to \texttt{VK_FALSE}, then \texttt{vkCmdSetCoarseSampleOrderNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-shadingRateImage-09234**
  If a shader object is bound to any graphics stage, and the \texttt{shadingRateImage} feature is enabled on the device, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set rasterizerDiscardEnable to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetShadingRateImageEnableNV} in the current command buffer set shadingRateImageEnable to \texttt{VK_TRUE}, then \texttt{vkCmdSetViewportShadingRatePaletteNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08637**
If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, then the viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

- **VUID-vkCmdDrawIndirectByteCountEXT-VkPipelineViewportCreateInfo-04141**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportSwizzleStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

- **VUID-vkCmdDrawIndirectByteCountEXT-VkPipelineViewportCreateInfo-04142**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportExclusiveScissorStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07878**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV dynamic state enabled then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07879**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV dynamic state enabled then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectByteCountEXT-exclusiveScissor-09235**
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08639**
  If a shader object is bound to any graphics stage, then the most recent call to vkCmdSetExclusiveScissorEnableNV in the current command buffer set any element of pExclusiveScissorEnables to VK_TRUE, then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08638**
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetExclusiveScissorEnableNV in the current command buffer set any element of pExclusiveScissorEnables to VK_TRUE, then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-04876**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08639**
  If a shader object is bound to any graphics stage, then vkCmdSetRasterizerDiscardEnable.
must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-04877
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08640
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-logicOp-04878
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value

- VUID-vkCmdDrawIndirectByteCountEXT-None-08641
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the `logicOp` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value

- VUID-vkCmdDrawIndirectByteCountEXT-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1

- VUID-vkCmdDrawIndirectByteCountEXT-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1

- VUID-vkCmdDrawIndirectByteCountEXT-blendEnable-04727
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view s format features do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the pAttachments member of pColorBlendState must be `VK_FALSE`

- VUID-vkCmdDrawIndirectByteCountEXT-None-08643
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view's format features do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`.

- **VUID-vkCmdDrawIndirectByteCountEXT-multisampledRenderToSingleSampled-07284**
  If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08644**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08876**
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`.

- **VUID-vkCmdDrawIndirectByteCountEXT-imageView-06172**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

- **VUID-vkCmdDrawIndirectByteCountEXT-imageView-06173**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

- **VUID-vkCmdDrawIndirectByteCountEXT-imageView-06174**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

- **VUID-vkCmdDrawIndirectByteCountEXT-imageView-06175**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.
If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_OPTIMAL`, this command **must** not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo`::`viewMask` equal to `VkRenderingInfo`::`viewMask`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo`::`colorAttachmentCount` equal to `VkRenderingInfo`::`colorAttachmentCount`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound graphics pipeline.

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats`, if it exists, **must** be `VK_FORMAT_UNDEFINED`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` **must** have the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.

If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled then
\texttt{vkCmdSetColorWriteEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08646
  If the colorWriteEnable feature is enabled on the device, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetColorWriteEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-attachmentCount-07750
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT} dynamic state enabled then the attachmentCount parameter of \texttt{vkCmdSetColorWriteEnableEXT} must be greater than or equal to the \texttt{VkPipelineColorBlendStateCreateInfo::attachmentCount} of the currently bound graphics pipeline

- VUID-vkCmdDrawIndirectByteCountEXT-None-08647
  If the colorWriteEnable feature is enabled on the device, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then the attachmentCount parameter of most recent call to \texttt{vkCmdSetColorWriteEnableEXT} in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance

- VUID-vkCmdDrawIndirectByteCountEXT-None-07751
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT} dynamic state enabled then \texttt{vkCmdSetDiscardRectangleEXT} must have been called in the current command buffer prior to this drawing command for each discard rectangle in \texttt{VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount}

- VUID-vkCmdDrawIndirectByteCountEXT-None-07880
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetDiscardRectangleEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-rasterizerDiscardEnable-09236
  If the \texttt{VK_EXT_discard_rectangles} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDiscardRectangleEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08648
  If the \texttt{VK_EXT_discard_rectangles} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDiscardRectangleEnableEXT} must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`.

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline must be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`. 
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`.

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`.

If the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and
the `multisampledRenderToSingleSampled` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of `rasterizationSamples` for the currently bound graphics pipeline.

- **VUID-vkCmdDrawIndirectByteCountEXT-multisampledRenderToSingleSampled-07286**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawIndirectByteCountEXT-multisampledRenderToSingleSampled-07287**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

- **VUID-vkCmdDrawIndirectByteCountEXT-pNext-07935**
  If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`.

- **VUID-vkCmdDrawIndirectByteCountEXT-renderPass-06198**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline must have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`.

- **VUID-vkCmdDrawIndirectByteCountEXT-pColorAttachments-08963**
  If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

- **VUID-vkCmdDrawIndirectByteCountEXT-pDepthAttachment-08964**
  If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.
If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo`::`pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo`::`stencilAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, rasterization discard must not be enabled.

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline must not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT`::`rasterizationStream`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetPolygonModeEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectByteCountEXT-None-07622
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled then vkCmdSetRasterizationSamplesEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectByteCountEXT-None-07623
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled then vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectByteCountEXT-None-07624
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectByteCountEXT-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0.

- VUID-vkCmdDrawIndirectByteCountEXT-None-08654
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawIndirectByteCountEXT-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0.

- VUID-vkCmdDrawIndirectByteCountEXT-None-07625
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled then
vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer
prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08655
If the alphaToOne feature is enabled, and a shader object is bound to any graphics stage,
and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command
buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToOneEnableEXT
must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-07626
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled then
vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior
to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08656
If the logicOp feature is enabled, and a shader object is bound to the
VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to
vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEnableEXT must have been
called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-07627
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then
vkCmdSetColorBlendEnableEXT must have been called in the current command buffer
prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08657
If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent
call to vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorBlendEnableEXT must have
been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08658
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then
vkCmdSetColorBlendEquationEXT must have been called in the current command buffer
prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08659
If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetRasterizerDiscardEnable in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, and the most recent call to
vkCmdSetColorBlendEnableEXT for any attachment set that attachment’s value in
pColorBlendEnables to VK_TRUE, then vkCmdSetColorBlendEquationEXT must have been
called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-07629
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then
vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08659
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07630
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08660
  If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage, then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07631
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08661
  If the VK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07632
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled then vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08662
  If the VK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetConservativeRasterizationModeEXT in the current command buffer set conservativeRasterizationMode to VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07633
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state enabled then vkCmdSetDepthClipEnableEXT must have been called in the current command buffer
prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08663
  If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07634
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08664
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08665
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-07635
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08666
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08667
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08668
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command
command buffer set \textit{primitiveTopology} to any line topology, then \texttt{vkCmdSetLineRasterizationModeEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

\begin{itemize}
  \item VUID-vkCmdDrawIndirectByteCountEXT-None-08668
  If the \textit{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then \texttt{vkCmdSetLineRasterizationModeEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \begin{itemize}
    \item If the \textit{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then \texttt{vkCmdSetLineRasterizationModeEXT} \textbf{must} have been called in the current command buffer prior to this drawing command
  \end{itemize}

  \item VUID-vkCmdDrawIndirectByteCountEXT-None-07638
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \begin{itemize}
    \item If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command
  \end{itemize}

  \item VUID-vkCmdDrawIndirectByteCountEXT-None-08669
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \begin{itemize}
    \item If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command
  \end{itemize}

  \item VUID-vkCmdDrawIndirectByteCountEXT-None-08670
  If the \textit{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPolygonModeEXT} in the current command buffer set \textit{polygonMode} to \textit{VK\_POLYGON\_MODE\_LINE}, then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \begin{itemize}
    \item If the \textit{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPolygonModeEXT} in the current command buffer set \textit{polygonMode} to \textit{VK\_POLYGON\_MODE\_LINE}, then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command
  \end{itemize}

  \item VUID-vkCmdDrawIndirectByteCountEXT-None-08671
  If the \textit{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPolygonModeEXT} in the current command buffer set \textit{polygonMode} to \textit{VK\_POLYGON\_MODE\_LINE}, then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \begin{itemize}
    \item If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEXT} \textbf{must} have been called in the current command buffer prior to this drawing command
  \end{itemize}

  \item VUID-vkCmdDrawIndirectByteCountEXT-None-08672
  If the \textit{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetLineStippleEnableEXT} in the current command buffer set \textit{stippledLineEnable} to \textit{VK\_TRUE}, then \texttt{vkCmdSetLineStippleEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \begin{itemize}
    \item If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEXT} \textbf{must} have been called in the current command buffer prior to this drawing command
  \end{itemize}

  \item VUID-vkCmdDrawIndirectByteCountEXT-None-07849
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \begin{itemize}
    \item If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEXT} \textbf{must} have been called in the current command buffer prior to this drawing command
  \end{itemize}

  \item VUID-vkCmdDrawIndirectByteCountEXT-None-07639
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_DEPTH\_CLIP\_NEGATIVE\_ONE\_TO\_ONE\_EXT} dynamic state enabled then \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \begin{itemize}
    \item If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_DEPTH\_CLIP\_NEGATIVE\_ONE\_TO\_ONE\_EXT} dynamic state enabled then \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} \textbf{must} have been called in the current command buffer prior to this drawing command
  \end{itemize}
\end{itemize}
If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV` dynamic state enabled then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetCoverageToColorEnableNV` in the current command buffer set `coverageToColorEnable` to `VK_TRUE`, then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationModeNV` in the current command buffer set `coverageModulationMode` to any value other than `VK_COVERAGE_MODULATION_MODE_NONE_NV`, then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationTableEnable` to `VK_TRUE`, then `vkCmdSetCoverageModulationTableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV` dynamic state enabled then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `pipelineFragmentShadingRate` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
rasterizerDiscardEnable to \texttt{VK FALSE}, then \texttt{vkCmdSetFragmentShadingRateKHR} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08681**
  If the \texttt{shadingRateImage} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK FALSE}, then \texttt{vkCmdSetShadingRateImageEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07648**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetRepresentativeFragmentTestEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08682**
  If the \texttt{representativeFragmentTest} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK FALSE}, then \texttt{vkCmdSetRepresentativeFragmentTestEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07649**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageReductionModeNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-None-08683**
  If the \texttt{coverageReductionMode} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK FALSE}, then \texttt{vkCmdSetCoverageReductionModeNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT} state enabled and the last call to \texttt{vkCmdSetColorBlendEnableEXT} set \texttt{pColorBlendEnables} for any attachment to \texttt{VK TRUE}, then for those attachments in the subpass the corresponding image view’s \texttt{format features} must contain \texttt{VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT}

- **VUID-vkCmdDrawIndirectByteCountEXT-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT} state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the \texttt{rasterizationSamples} in the last call to \texttt{vkCmdSetRasterizationSamplesEXT} must follow the rules for a zero-attachment subpass

- **VUID-vkCmdDrawIndirectByteCountEXT-samples-07472**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SAMPLE_MASK_EXT} state enabled and the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT must be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline

- VUID-vkCmdDrawIndirectByteCountEXT-samples-07473
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT must be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirectByteCountEXT-rasterizationSamples-07474
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and neither the VK_AMD_mixed_attachment_samples nor the VK_NV_framebuffer_mixed_samples extensions are enabled, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must be the same as the current subpass color and/or depth/stencil attachments

- VUID-vkCmdDrawIndirectByteCountEXT-None-09211
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must be the same as the rasterizationSamples member of that structure

- VUID-vkCmdDrawIndirectByteCountEXT-firstAttachment-07476
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEnableEXT calls must specify an enable for all active color attachments in the current subpass

- VUID-vkCmdDrawIndirectByteCountEXT-firstAttachment-07477
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEquationEXT calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawIndirectByteCountEXT-firstAttachment-07478
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and
attachmentCount parameters of \texttt{vkCmdSetColorWriteMaskEXT} calls \textbf{must} specify the color write mask for all active color attachments in the current subpass

- VUID-vkCmdDrawIndirectByteCountEXT-firstAttachment-07479
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT} dynamic state enabled then \texttt{vkCmdSetColorBlendAdvancedEXT} \textbf{must} have been called in the current command buffer prior to this drawing command, and the attachments specified by the \texttt{firstAttachment} and \texttt{attachmentCount} parameters of \texttt{vkCmdSetColorBlendAdvancedEXT} calls \textbf{must} specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawIndirectByteCountEXT-advancedBlendMaxColorAttachments-07480
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT} and \texttt{VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT} dynamic states enabled and the last calls to \texttt{vkCmdSetColorBlendEnableEXT} and \texttt{vkCmdSetColorBlendAdvancedEXT} have enabled advanced blending, then the number of active color attachments in the current subpass \textbf{must} not exceed \texttt{advancedBlendMaxColorAttachments}

- VUID-vkCmdDrawIndirectByteCountEXT-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the \texttt{primitivesGeneratedQueryWithNonZeroStreams} feature is not enabled and the \texttt{VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT} query is active, and the bound graphics pipeline was created with \texttt{VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT} state enabled, the last call to \texttt{vkCmdSetRasterizationStreamEXT} \textbf{must} have set the \texttt{rasterizationStream} to zero

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT} state enabled and the \texttt{VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT} state disabled, then the \texttt{sampleLocationsPerPixel} member of \texttt{pSampleLocationsInfo} in the last call to \texttt{vkCmdSetSampleLocationsEXT} \textbf{must} equal the \texttt{rasterizationSamples} member of the \texttt{VkPipelineMultisampleStateCreateInfo} structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07483
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT} state enabled and the \texttt{VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT} state enabled, then the \texttt{sampleLocationsPerPixel} member of \texttt{pSampleLocationsInfo} in the last call to \texttt{vkCmdSetSampleLocationsEXT} \textbf{must} equal the \texttt{rasterizationSamples} parameter of the last call to \texttt{vkCmdSetRasterizationSamplesEXT}

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07484
  If the bound graphics pipeline was created with the \texttt{VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT} state enabled, and \texttt{sampleLocationsEnable} was \texttt{VK_TRUE} in the last call to \texttt{vkCmdSetSampleLocationsEnableEXT}, and the current subpass has a depth/stencil attachment, then that attachment \textbf{must} have been created with the \texttt{VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT} bit set

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07485
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07486
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07487
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code must not statically use the extended instruction `InterpolateAtSample`.

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- VUID-vkCmdDrawIndirectByteCountEXT-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationsPerPixel must equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawIndirectByteCountEXT-coverageModulationTableEnable-07488
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV state enabled and the last call to vkCmdSetCoverageModulationTableEnableNV set coverageModulationTableEnable to VK_TRUE, then the coverageModulationTableCount parameter in the last call to vkCmdSetCoverageModulationTableNV must equal the current rasterizationSamples divided by the number of color samples in the current subpass

- VUID-vkCmdDrawIndirectByteCountEXT-rasterizationSamples-07489
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current rasterizationSamples must be the same as the sample count of the depth/stencil attachment

- VUID-vkCmdDrawIndirectByteCountEXT-coverageToColorEnable-07490
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV state enabled and the last call to vkCmdSetCoverageToColorEnableNV set the coverageToColorEnable to VK_TRUE, then the current subpass must have a color attachment at the location selected by the last call to vkCmdSetCoverageToColorLocationNV coverageToColorLocation, with a VkFormat of VK_FORMAT_R8_UINT, VK_FORMAT_R8_SINT, VK_FORMAT_R16_UINT, VK_FORMAT_R16_SINT, VK_FORMAT_R32_UINT, or VK_FORMAT_R32_SINT

- VUID-vkCmdDrawIndirectByteCountEXT-coverageReductionMode-07491
  If this VK_NV_coverage_reduction_mode extension is enabled, the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, the current coverage reduction mode coverageReductionMode, then the current rasterizationSamples, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV

- VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-07492
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawIndirectByteCountEXT-viewportCount-07493
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic states enabled then the viewportCount parameter in the last call to
vkCmdSetViewportSwizzleNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- **VUID-vkCmdDrawIndirectByteCountEXT-rasterizationSamples-07494**
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if the current subpass has any color attachments and rasterizationSamples of the last call to vkCmdSetRasterizationSamplesEXT is greater than the number of color samples, then the pipeline sampleShadingEnable must be VK_FALSE

- **VUID-vkCmdDrawIndirectByteCountEXT-stippledLineEnable-07495**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT, then the stippledRectangularLines feature must be enabled

- **VUID-vkCmdDrawIndirectByteCountEXT-stippledLineEnable-07496**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT, then the stippledBresenhamLines feature must be enabled

- **VUID-vkCmdDrawIndirectByteCountEXT-stippledLineEnable-07497**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT, then the stippledSmoothLines feature must be enabled

- **VUID-vkCmdDrawIndirectByteCountEXT-stippledLineEnable-07498**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT, then the stippledRectangularLines feature must be enabled and VkPhysicalDeviceLimits::strictLines must be VK_TRUE

- **VUID-vkCmdDrawIndirectByteCountEXT-conservativePointAndLineRasterization-07499**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, conservativePointAndLineRasterization is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the conservativeRasterizationMode set by the last call to vkCmdSetConservativeRasterizationModeEXT must be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT

- **VUID-vkCmdDrawIndirectByteCountEXT-stage-07073**
  If the currently bound pipeline was created with the VkPipelineShaderStageCreateInfo
::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to
VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSellation_CONTROL_BIT,
VK_SHADER_STAGE_TESSellation_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh
Shader Queries must not be active

• VUID-vkCmdDrawIndirectByteCountEXT-None-08877
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current
  command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-07850
  If dynamic state was inherited from VkCommandBufferInheritanceViewportScissorInfoNV, it must be set in the current
  command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT must have been called in the current
  command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT

• VUID-vkCmdDrawIndirectByteCountEXT-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSellation_CONTROL_BIT

• VUID-vkCmdDrawIndirectByteCountEXT-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSellation_EVALUATION_BIT

• VUID-vkCmdDrawIndirectByteCountEXT-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT

• VUID-vkCmdDrawIndirectByteCountEXT-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_FRAGMENT_BIT

• VUID-vkCmdDrawIndirectByteCountEXT-None-08689
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT

• VUID-vkCmdDrawIndirectByteCountEXT-None-08690
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT

• VUID-vkCmdDrawIndirectByteCountEXT-None-08693
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages must have a valid VkShaderEXT bound, and the other must have no VkShaderEXT bound
• VUID-vkCmdDrawIndirectByteCountEXT-None-08694
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created without the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, a valid VkShaderEXT must be bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

• VUID-vkCmdDrawIndirectByteCountEXT-None-08695
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created with the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, there must be no VkShaderEXT bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

• VUID-vkCmdDrawIndirectByteCountEXT-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there must be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

• VUID-vkCmdDrawIndirectByteCountEXT-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call must also be bound

• VUID-vkCmdDrawIndirectByteCountEXT-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call must not have any VkShaderEXT bound

• VUID-vkCmdDrawIndirectByteCountEXT-None-08878
  All bound graphics shader objects must have been created with identical or identically defined push constant ranges

• VUID-vkCmdDrawIndirectByteCountEXT-None-08879
  All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

• VUID-vkCmdDrawIndirectByteCountEXT-None-08880
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-pDynamicStates-08715
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable must be VK_FALSE

• VUID-vkCmdDrawIndirectByteCountEXT-pDynamicStates-08716
If the bound graphics pipeline state includes a fragment shader stage, was created with `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` set in `VkPipelineDynamicStateCreateInfo::pDynamicStates`, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` must be 0

- **VUID-vkCmdDrawIndirectByteCountEXT-None-09116**
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` must either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, and `VK_COLOR_COMPONENT_B_BIT`, or none of them

- **VUID-vkCmdDrawIndirectByteCountEXT-maxFragmentDualSrcAttachments-09239**
  If `blending` is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of `Location` for any output attachment statically used in the Fragment Execution Model executed by this command must be less than `maxFragmentDualSrcAttachments`

- **VUID-vkCmdDrawIndirectByteCountEXT-None-04007**
  All vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface must have either valid or `VK_NULL_HANDLE` buffers bound

- **VUID-vkCmdDrawIndirectByteCountEXT-None-04008**
  If the `nullDescriptor` feature is not enabled, all vertex input bindings accessed via vertex input variables declared in the vertex shader entry point's interface must not be `VK_NULL_HANDLE`

- **VUID-vkCmdDrawIndirectByteCountEXT-None-02721**
  For a given vertex buffer binding, any attribute data fetched must be entirely contained within the corresponding vertex buffer binding, as described in Vertex Input Description

- **VUID-vkCmdDrawIndirectByteCountEXT-None-07842**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled then `vkCmdSetPrimitiveTopology` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawIndirectByteCountEXT-dynamicPrimitiveTopologyUnrestricted-07500**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PRIMITIVE_TOPOLOGY` dynamic state enabled and the `dynamicPrimitiveTopologyUnrestricted` is `VK_FALSE`, then the `primitiveTopology` parameter of `vkCmdSetPrimitiveTopology` must be of the same topology class as the pipeline `VkPipelineInputAssemblyStateCreateInfo::topology` state

- **VUID-vkCmdDrawIndirectByteCountEXT-None-04912**
  If the bound graphics pipeline was created with both the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` and `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT` dynamic states enabled, then `vkCmdSetVertexInputEXT` must have been called in the current command buffer prior to this draw command
• VUID-vkCmdDrawIndirectByteCountEXT-pStrides-04913
  If the bound graphics pipeline was created with the
  `VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT` dynamic state enabled, but not the
  `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then
  `vkCmdBindVertexBuffers2EXT` must have been called in the current command buffer
  prior to this draw command, and the `pStrides` parameter of
  `vkCmdBindVertexBuffers2EXT` must not be `NULL`

• VUID-vkCmdDrawIndirectByteCountEXT-None-08881
  If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then
  `vkCmdSetPrimitiveTopology` must have been called in the current command buffer prior
  to this drawing command

• VUID-vkCmdDrawIndirectByteCountEXT-None-04914
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then
  `vkCmdSetVertexInputEXT` must have been called in the current command buffer prior to this draw command

• VUID-vkCmdDrawIndirectByteCountEXT-Input-07939
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then all variables with the
  `Input` storage class decorated with `Location` in the `Vertex Execution Model OpEntryPoint`
  must contain a location in `VkVertexInputAttributeDescription2EXT::location`

• VUID-vkCmdDrawIndirectByteCountEXT-Input-08734
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, then the numeric type
  associated with all `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` must
  be the same as `VkVertexInputAttributeDescription2EXT::format`

• VUID-vkCmdDrawIndirectByteCountEXT-format-08936
  If there is a shader object bound to a graphics stage or the currently bound graphics
  pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and
  `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then the scalar width associated with all
  `Input` variables of the corresponding `Location` in the `Vertex Execution Model OpEntryPoint` must
  be 64-bit

• VUID-vkCmdDrawIndirectByteCountEXT-format-08937
  If there is a shader object bound to a graphics stage or the currently bound graphics
  pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and the scalar width associated with a
  `Location` decorated `Input` variable in the `Vertex Execution Model OpEntryPoint` is 64-bit, then the corresponding
  `VkVertexInputAttributeDescription2EXT::format` must have a 64-bit component

• VUID-vkCmdDrawIndirectByteCountEXT-None-09203
  If there is a shader object bound to a graphics stage or the currently bound graphics
  pipeline was created with the `VK_DYNAMIC_STATE_VERTEX_INPUT_EXT` dynamic state enabled, and
  `VkVertexInputAttributeDescription2EXT::format` has a 64-bit component, then all
  `Input` variables at the corresponding `Location` in the `Vertex Execution Model OpEntryPoint`
  must not use components that are not present in the format

• VUID-vkCmdDrawIndirectByteCountEXT-None-08882
  If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then
vkCmdSetVertexInputEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-04875
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PATCH_CONTROL_POINTS_EXT dynamic state enabled then vkCmdSetPatchControlPointsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-08883
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage, then vkCmdSetPatchControlPointsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-None-04879
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PRIMITIVE_RESTART_ENABLE dynamic state enabled then vkCmdSetPrimitiveRestartEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-rasterizerDiscardEnable-08884
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, vkCmdSetPrimitiveRestartEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawIndirectByteCountEXT-stage-06481
  The bound graphics pipeline must not have been created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawIndirectByteCountEXT-None-08885
  There must be no shader object bound to either of the VK_SHADER_STAGE_TASK_BIT_EXT or VK_SHADER_STAGE_MESH_BIT_EXT stages

- VUID-vkCmdDrawIndirectByteCountEXT-transformFeedback-02287
  VkPhysicalDeviceTransformFeedbackFeaturesEXT::transformFeedback must be enabled

- VUID-vkCmdDrawIndirectByteCountEXT-transformFeedbackDraw-02288
  The implementation must support VkPhysicalDeviceTransformFeedbackPropertiesEXT::transformFeedbackDraw

- VUID-vkCmdDrawIndirectByteCountEXT-vertexStride-02289
  vertexStride must be greater than 0 and less than or equal to VkPhysicalDeviceTransformFeedbackPropertiesEXT::maxTransformFeedbackBufferDataStride

- VUID-vkCmdDrawIndirectByteCountEXT-counterBuffer-04567
  If counterBuffer is non-sparse then it must be bound completely and contiguously to a single VkDeviceMemory object

- VUID-vkCmdDrawIndirectByteCountEXT-counterBuffer-02290
  counterBuffer must have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set
• VUID-vkCmdDrawIndirectByteCountEXT-counterBufferOffset-04568
counterBufferOffset must be a multiple of 4
• VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-02646
commandBuffer must not be a protected command buffer

Valid Usage (Implicit)

• VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-parameter
commandBuffer must be a valid VkCommandBuffer handle
• VUID-vkCmdDrawIndirectByteCountEXT-counterBuffer-parameter
counterBuffer must be a valid VkBuffer handle
• VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-recording
commandBuffer must be in the recording state
• VUID-vkCmdDrawIndirectByteCountEXT-commandBuffer-cmdpool
The VkCommandPool that commandBuffer was allocated from must support graphics operations
• VUID-vkCmdDrawIndirectByteCountEXT-renderpass
This command must only be called inside of a render pass instance
• VUID-vkCmdDrawIndirectByteCountEXT-vidcoding
This command must only be called outside of a video coding scope
• VUID-vkCmdDrawIndirectByteCountEXT-commonparent
Both of commandBuffer, and counterBuffer must have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

• Host access to commandBuffer must be externally synchronized
• Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

21.4. Conditional Rendering

Certain rendering commands can be executed conditionally based on a value in buffer memory. These rendering commands are limited to drawing commands, dispatching commands, and clearing attachments with `vkCmdClearAttachments` within a conditional rendering block which is defined by commands `vkCmdBeginConditionalRenderingEXT` and `vkCmdEndConditionalRenderingEXT`. Other rendering commands remain unaffected by conditional rendering.

After beginning conditional rendering, it is considered active within the command buffer it was called until it is ended with `vkCmdEndConditionalRenderingEXT`.

Conditional rendering must begin and end in the same command buffer. When conditional rendering is active, a primary command buffer can execute secondary command buffers if the inheritedConditionalRendering feature is enabled. For a secondary command buffer to be executed while conditional rendering is active in the primary command buffer, it must set the conditionalRenderingEnable flag of `VkCommandBufferInheritanceConditionalRenderingInfoEXT`, as described in the Command Buffer Recording section.

Conditional rendering must also either begin and end inside the same subpass of a render pass instance, or must both begin and end outside of a render pass instance (i.e. contain entire render pass instances).

To begin conditional rendering, call:

```c
// Provided by VK_EXT_conditional_rendering
void vkCmdBeginConditionalRenderingEXT(
    VkCommandBuffer commandBuffer,
    const VkConditionalRenderingBeginInfoEXT* pConditionalRenderingBegin);
```

- `commandBuffer` is the command buffer into which this command will be recorded.
- `pConditionalRenderingBegin` is a pointer to a `VkConditionalRenderingBeginInfoEXT` structure specifying parameters of conditional rendering.

### Valid Usage

- VUID-vkCmdBeginConditionalRenderingEXT-None-01980
  Conditional rendering must not already be active

### Valid Usage (Implicit)

- VUID-vkCmdBeginConditionalRenderingEXT-commandBuffer-parameter
  `commandBuffer` must be a valid `VkCommandBuffer` handle
- VUID-vkCmdBeginConditionalRenderingEXT-pConditionalRenderingBegin-parameter
  `pConditionalRenderingBegin` must be a valid pointer to a valid
**VkConditionalRenderingBeginInfoEXT** structure

- **VUID-vkCmdBeginConditionalRenderingEXT-commandBuffer-recording**
  The `commandBuffer` must be in the **recording state**

- **VUID-vkCmdBeginConditionalRenderingEXT-commandBuffer-cmdpool**
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics, or compute operations

- **VUID-vkCmdBeginConditionalRenderingEXT-videocoding**
  This command must only be called outside of a video coding scope

**Host Synchronization**

- Host access to `commandBuffer` must be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized

**Command Properties**

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render PassScope</th>
<th>Video CodingScope</th>
<th>SupportedQueue Types</th>
<th>Command Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary</td>
<td>Both</td>
<td>Outside</td>
<td>Graphics</td>
<td>Action</td>
</tr>
<tr>
<td>Secondary</td>
<td></td>
<td></td>
<td>Compute</td>
<td>State</td>
</tr>
</tbody>
</table>

The `VkConditionalRenderingBeginInfoEXT` structure is defined as:

```c
// Provided by VK_EXT_conditional_rendering
typedef struct VkConditionalRenderingBeginInfoEXT {
    VkStructureType sType;
    const void* pNext;
    VkBuffer buffer;
    VkDeviceSize offset;
    VkConditionalRenderingFlagsEXT flags;
} VkConditionalRenderingBeginInfoEXT;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `buffer` is a buffer containing the predicate for conditional rendering.
- `offset` is the byte offset into `buffer` where the predicate is located.
- `flags` is a bitmask of `VkConditionalRenderingFlagsEXT` specifying the behavior of conditional rendering.

If the 32-bit value at `offset` in `buffer` memory is zero, then the rendering commands are discarded,
otherwise they are executed as normal. If the value of the predicate in buffer memory changes while conditional rendering is active, the rendering commands may be discarded in an implementation-dependent way. Some implementations may latch the value of the predicate upon beginning conditional rendering while others may read it before every rendering command.

### Valid Usage

- **VUID-VkConditionalRenderingBeginInfoEXT-buffer-01981**
  - If `buffer` is non-sparse then it must be bound completely and contiguously to a single `VkDeviceMemory` object.

- **VUID-VkConditionalRenderingBeginInfoEXT-buffer-01982**
  - `buffer` must have been created with the `VK_BUFFER_USAGE_CONDITIONAL_RENDERING_BIT_EXT` bit set.

- **VUID-VkConditionalRenderingBeginInfoEXT-offset-01983**
  - `offset` must be less than the size of `buffer` by at least 32 bits.

- **VUID-VkConditionalRenderingBeginInfoEXT-offset-01984**
  - `offset` must be a multiple of 4.

### Valid Usage (Implicit)

- **VUID-VkConditionalRenderingBeginInfoEXT-sType-sType**
  - `sType` must be `VK_STRUCTURE_TYPE_CONDITIONAL_RENDERING_BEGIN_INFO_EXT`.

- **VUID-VkConditionalRenderingBeginInfoEXT-pNext-pNext**
  - `pNext` must be `NULL`.

- **VUID-VkConditionalRenderingBeginInfoEXT-buffer-parameter**
  - `buffer` must be a valid `VkBuffer` handle.

- **VUID-VkConditionalRenderingBeginInfoEXT-flags-parameter**
  - `flags` must be a valid combination of `VkConditionalRenderingFlagBitsEXT` values.

Bits which can be set in `vkCmdBeginConditionalRenderingEXT::flags`, specifying the behavior of conditional rendering, are:

```c
// Provided by VK_EXT_conditional_rendering
typedef enum VkConditionalRenderingFlagBitsEXT {
    VK_CONDITIONAL_RENDERING_INVERTED_BIT_EXT = 0x00000001,
} VkConditionalRenderingFlagBitsEXT;
```

- **VK_CONDITIONAL_RENDERING_INVERTED_BIT_EXT** specifies the condition used to determine whether to discard rendering commands or not. That is, if the 32-bit predicate read from `buffer` memory at `offset` is zero, the rendering commands are not discarded, and if non zero, then they are discarded.
typedef VkFlags VkConditionalRenderingFlagsEXT;

VkConditionalRenderingFlagsEXT is a bitmask type for setting a mask of zero or more VkConditionalRenderingFlagBitsEXT.

To end conditional rendering, call:

```c
void vkCmdEndConditionalRenderingEXT(
    VkCommandBuffer commandBuffer);
```

- `commandBuffer` is the command buffer into which this command will be recorded.

Once ended, conditional rendering becomes inactive.

### Valid Usage

- VUID-vkCmdEndConditionalRenderingEXT-None-01985
  Conditional rendering must be active

- VUID-vkCmdEndConditionalRenderingEXT-None-01986
  If conditional rendering was made active outside of a render pass instance, it must not be ended inside a render pass instance

- VUID-vkCmdEndConditionalRenderingEXT-None-01987
  If conditional rendering was made active within a subpass it must be ended in the same subpass

### Valid Usage (Implicit)

- VUID-vkCmdEndConditionalRenderingEXT-commandBuffer-parameter
  `commandBuffer` must be a valid VkCommandBuffer handle

- VUID-vkCmdEndConditionalRenderingEXT-commandBuffer-recording
  `commandBuffer` must be in the recording state

- VUID-vkCmdEndConditionalRenderingEXT-commandBuffer-cmdpool
  The VkCommandPool that `commandBuffer` was allocated from must support graphics, or compute operations

- VUID-vkCmdEndConditionalRenderingEXT-videocoding
  This command must only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` must be externally synchronized
• Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

### Command Properties

</table>

#### 21.5. Programmable Mesh Shading

In this drawing approach, primitives are assembled by the mesh shader stage. Mesh shading operates similarly to dispatching compute as the shaders make use of workgroups.

To record a mesh tasks drawing command, call:

```c
// Provided by VK_NV_mesh_shader
void vkCmdDrawMeshTasksNV(
    VkCommandBuffer commandBuffer,
    uint32_t taskCount,
    uint32_t firstTask);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `taskCount` is the number of local workgroups to dispatch in the X dimension. Y and Z dimension are implicitly set to one.
- `firstTask` is the X component of the first workgroup ID.

When the command is executed, a global workgroup consisting of taskCount local workgroups is assembled.

#### Valid Usage

- **VUID-vkCmdDrawMeshTasksNV-magFilter-04553**
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- **VUID-vkCmdDrawMeshTasksNV-mipmapMode-04770**
  If a VkSampler created with mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT
• VUID-vkCmdDrawMeshTasksNV-None-06479

If a VkImageView is sampled with depth comparison, the image view’s format features must contain \texttt{VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT}.

• VUID-vkCmdDrawMeshTasksNV-None-02691

If a VkImageView is accessed using atomic operations as a result of this command, then the image view’s format features must contain \texttt{VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT}.

• VUID-vkCmdDrawMeshTasksNV-None-07888

If a \texttt{VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER} descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer’s format features must contain \texttt{VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT}.

• VUID-vkCmdDrawMeshTasksNV-None-02692

If a VkImageView is sampled with \texttt{VK_FILTER_CUBIC_EXT} as a result of this command, then the image view’s format features must contain \texttt{VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT}.

• VUID-vkCmdDrawMeshTasksNV-None-02693

If the \texttt{VK_EXT_filter_cubic} extension is not enabled and any VkImageView is sampled with \texttt{VK_FILTER_CUBIC_EXT} as a result of this command, it must not have a VkImageViewType of \texttt{VK_IMAGE_VIEW_TYPE_3D}, \texttt{VK_IMAGE_VIEW_TYPE_CUBE}, or \texttt{VK_IMAGE_VIEW_TYPE_CUBE_ARRAY}.

• VUID-vkCmdDrawMeshTasksNV-filterCubic-02694

Any VkImageView being sampled with \texttt{VK_FILTER_CUBIC_EXT} as a result of this command must have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2.

• VUID-vkCmdDrawMeshTasksNV-filterCubicMinmax-02695

Any VkImageView being sampled with \texttt{VK_FILTER_CUBIC_EXT} with a reduction mode of either \texttt{VK_SAMPLER_REDUCTION_MODE_MIN} or \texttt{VK_SAMPLER_REDUCTION_MODE_MAX} as a result of this command must have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2.

• VUID-vkCmdDrawMeshTasksNV-cubicRangeClamp-09212

If the cubicRangeClamp feature is not enabled, then any VkImageView being sampled with \texttt{VK_FILTER_CUBIC_EXT} as a result of this command must not have a VkSamplerReductionModeCreateInfo::reductionMode equal to \texttt{VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGE_CLAMP_QCOM}.

• VUID-vkCmdDrawMeshTasksNV-reductionMode-09213

Any VkImageView being sampled with a VkSamplerReductionModeCreateInfo::reductionMode equal to \texttt{VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGE_CLAMP_QCOM} as a result of this command must sample with \texttt{VK_FILTER_CUBIC_EXT}.

• VUID-vkCmdDrawMeshTasksNV-selectableCubicWeights-09214

If the selectableCubicWeights feature is not enabled, then any VkImageView being sampled with \texttt{VK_FILTER_CUBIC_EXT} as a result of this command must have
VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights equal to VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM

- VUID-vkCmdDrawMeshTasksNV-flags-02696
  Any VkImage created with a VkImageCreateInfo::flags containing VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV sampled as a result of this command must only be sampled using a VkSamplerAddressMode of VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE

- VUID-vkCmdDrawMeshTasksNV-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features must contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawMeshTasksNV-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features must contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawMeshTasksNV-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the OpTypeImage is Unknown, the view's buffer features must contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawMeshTasksNV-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the OpTypeImage is Unknown then the view's buffer features must contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT

- VUID-vkCmdDrawMeshTasksNV-None-08600
  For each set n that is statically used by a bound shader, a descriptor set must have been bound to n at the same pipeline bind point, with a VkPipelineLayout that is compatible for set n, with the VkPipelineLayout or VkDescriptorSetLayout array that was used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

- VUID-vkCmdDrawMeshTasksNV-None-08601
  For each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

- VUID-vkCmdDrawMeshTasksNV-maintenance4-08602
  If the maintenance4 feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

- VUID-vkCmdDrawMeshTasksNV-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, must be valid if they are statically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with
If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` must have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command.

If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` must have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory must be resident.

If a descriptor is dynamically used with a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory must be resident.

If the `shaderObject` feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command.

If the `shaderObject` is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and `VK_NULL_HANDLE` shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command.

If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the `VkPipeline` object bound to the pipeline bind point used by this command, since that pipeline was bound.

If the `VkPipeline` object bound to the pipeline bind point used by this command or any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a `VkSampler` object that uses unnormalized coordinates, that sampler...
must not be used to sample from any VkImage with a VkImageView of the type VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, VK_IMAGE_VIEW_TYPE_1D_ARRAY, VK_IMAGE_VIEW_TYPE_2D_ARRAY or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY, in any shader stage

- VUID-vkCmdDrawMeshTasksNV-None-08610
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name, in any shader stage

- VUID-vkCmdDrawMeshTasksNV-None-08611
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

- VUID-vkCmdDrawMeshTasksNV-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksNV-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksNV-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for storageBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksNV-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksNV-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders must not be a protected resource
If a bound shader accesses a VkSampler or VkImageView object that enables sampler YC conversion, that object must only be used with OpImageSample* or OpImageSparseSample* instructions.

- VUID-vkCmdDrawMeshTasksNV-ConstOffset-06551
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler YC conversion, that object must not use the ConstOffset and Offset operands.

- VUID-vkCmdDrawMeshTasksNV-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType must match the Dim operand of the OpTypeImage as described in Instruction/Sampler/Image View Validation.

- VUID-vkCmdDrawMeshTasksNV-format-07753
  If a VkImageView is accessed as a result of this command, then the numeric type of the image view's format and the Sampled Type operand of the OpTypeImage must match.

- VUID-vkCmdDrawMeshTasksNV-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM_KHR is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have at least as many components as the image view's format.

- VUID-vkCmdDrawMeshTasksNV-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM_KHR is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have four components.

- VUID-vkCmdDrawMeshTasksNV-OpImageWrite-04469
  If a VkBufferView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have at least as many components as the buffer view's format.

- VUID-vkCmdDrawMeshTasksNV-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 64.

- VUID-vkCmdDrawMeshTasksNV-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32.

- VUID-vkCmdDrawMeshTasksNV-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 64.

- VUID-vkCmdDrawMeshTasksNV-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32.

- VUID-vkCmdDrawMeshTasksNV-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the
VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawMeshTasksNV-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawMeshTasksNV-OpImageWeightedSampleQCOM-06971
  If OpImageWeightedSampleQCOM is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM

- VUID-vkCmdDrawMeshTasksNV-OpImageWeightedSampleQCOM-06972
  If OpImageWeightedSampleQCOM uses a VkImageView as a sample weight image as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM

- VUID-vkCmdDrawMeshTasksNV-OpImageBoxFilterQCOM-06973
  If OpImageBoxFilterQCOM is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM

- VUID-vkCmdDrawMeshTasksNV-OpImageBlockMatchSSDQCOM-06974
  If OpImageBlockMatchSSDQCOM is used to read from an VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

- VUID-vkCmdDrawMeshTasksNV-OpImageBlockMatchSADQCOM-06975
  If OpImageBlockMatchSADQCOM is used to read from an VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

- VUID-vkCmdDrawMeshTasksNV-OpImageBlockMatchWindowSSDQCOM-06976
  If OpImageBlockMatchWindowSSDQCOM or OpImageBlockMatchSSDQCOM is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

- VUID-vkCmdDrawMeshTasksNV-OpImageWeightedSampleQCOM-06977
  If OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, OpImageBlockMatchSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler must have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

- VUID-vkCmdDrawMeshTasksNV-OpImageWeightedSampleQCOM-06978
  If any command other than OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, OpImageBlockMatchSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler must not have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

- VUID-vkCmdDrawMeshTasksNV-OpImageBlockMatchWindow-09215
If a `OpImageBlockMatchWindow*`QCOM or `OpImageBlockMatchGather*`QCOM instruction is used to read from a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM`

- **VUID-vkCmdDrawMeshTasksNV-OpImageBlockMatchWindow-09216**
  If a `OpImageBlockMatchWindow*`QCOM or `OpImageBlockMatchGather*`QCOM instruction is used to read from a `VkImageView` as a result of this command, then the image view's format must be a single-component format.

- **VUID-vkCmdDrawMeshTasksNV-OpImageBlockMatchWindow-09217**
  If a `OpImageBlockMatchWindow*`QCOM or `OpImageBlockMatchGather*`QCOM read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

- **VUID-vkCmdDrawMeshTasksNV-None-07288**
  Any shader invocation executed by this command must terminate

- **VUID-vkCmdDrawMeshTasksNV-renderPass-02684**
  The current render pass must be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- **VUID-vkCmdDrawMeshTasksNV-subpass-02685**
  The subpass index of the current render pass must be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- **VUID-vkCmdDrawMeshTasksNV-None-07748**
  If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set

- **VUID-vkCmdDrawMeshTasksNV-OpTypeImage-07468**
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it must be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- **VUID-vkCmdDrawMeshTasksNV-None-07469**
  Input attachment views accessed in a subpass must be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility

- **VUID-vkCmdDrawMeshTasksNV-None-06537**
  Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command

- **VUID-vkCmdDrawMeshTasksNV-None-09000**
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
    - the `VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_COLOR_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

VUID-vkCmdDrawMeshTasksNV-None-09001
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_DEPTH_BIT` and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

VUID-vkCmdDrawMeshTasksNV-None-09002
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT` and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

VUID-vkCmdDrawMeshTasksNV-None-09003
If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

VUID-vkCmdDrawMeshTasksNV-None-06539
If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, storage image, or sampled image by this command

VUID-vkCmdDrawMeshTasksNV-None-06886
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes must be disabled
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back writeMask are not zero, and stencil test is enabled, **all stencil ops must be VK_STENCIL_OP_KEEP**

If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT** dynamic state enabled then **vkCmdSetViewport** must have been called in the current command buffer prior to this drawing command

If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SCISSOR** dynamic state enabled then **vkCmdSetScissor** must have been called in the current command buffer prior to this drawing command

If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LINE_WIDTH** dynamic state enabled then **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_BIAS** dynamic state enabled then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** must have been called in the current command buffer prior to this drawing command

If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetPolygonModeEXT** in the current command buffer set **polygonMode** to **VK_POLYGON_MODE_LINE**, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

If a shader object is bound to the **VK_SHADER_STAGE_VERTEX_BIT** stage, and the most recent call to **vkCmdSetPrimitiveTopology** in the current command buffer set **primitiveTopology** to any line topology, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

If a shader object that outputs line primitives is bound to the **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT** or **VK_SHADER_STAGE_GEOMETRY_BIT** stage, **vkCmdSetLineWidth** must have been called in the current command buffer prior to this drawing command

If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_BIAS** dynamic state enabled then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** must have been called in the current command buffer prior to this drawing command

If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, and the most recent call to **vkCmdSetDepthBiasEnable** in the current command buffer set **depthBiasEnable** to **VK_TRUE**, **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** must have been called in the current command buffer prior to this drawing command

If the bound graphics pipeline state was created with the
**VK_DYNAMIC_STATE_BLEND_CONSTANTS** dynamic state enabled then **vkCmdSetBlendConstants** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08621**
  If a shader object is bound to the **VK_SHADER_STAGE_FRAGMENT_BIT** stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, and the most recent call to **vkCmdSetColorBlendEnableEXT** in the current command buffer set any element of **pColorBlendEnables** to **VK_TRUE**, and the most recent call to **vkCmdSetColorBlendEquationEXT** in the current command buffer set the same element of **pColorBlendEquations** to a **VkColorBlendEquationEXT** structure with any **VkBlendFactor** member with a value of **VK_BLEND_FACTOR_CONSTANT_COLOR**, **VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR**, **VK_BLEND_FACTOR_CONSTANT_ALPHA**, or **VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA**, **vkCmdSetBlendConstants** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07836**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_BOUNDS** dynamic state enabled then **vkCmdSetDepthBounds** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08622**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, and the most recent call to **vkCmdSetDepthBoundsTestEnable** in the current command buffer set **depthBoundsTestEnable** to **VK_TRUE**, then **vkCmdSetDepthBounds** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07837**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK** dynamic state enabled then **vkCmdSetStencilCompareMask** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08623**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetStencilTestEnable** in the current command buffer set **stencilTestEnable** to **VK_TRUE**, **vkCmdSetStencilCompareMask** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07838**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_STENCIL_WRITE_MASK** dynamic state enabled then **vkCmdSetStencilWriteMask** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08624**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetStencilTestEnable** in the current command buffer set **stencilTestEnable** to **VK_TRUE**, **vkCmdSetStencilWriteMask** must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled then `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command.

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`.

If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE` and the current subpass has a depth/stencil attachment, then that attachment must have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetSampleLocationsEnableEXT` in the current command buffer set `sampleLocationsEnable` to `VK_TRUE`, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled then `vkCmdSetCullMode` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCullMode` must have been called in
the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07841
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled then \texttt{vkCmdSetFrontFace} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08628
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then \texttt{vkCmdSetFrontFace} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07843
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled then \texttt{vkCmdSetDepthTestEnable} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08629
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then \texttt{vkCmdSetDepthTestEnable} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07844
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled then \texttt{vkCmdSetDepthWriteEnable} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08630
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then \texttt{vkCmdSetDepthWriteEnable} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07845
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled then \texttt{vkCmdSetDepthCompareOp} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08631
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to \texttt{vkCmdSetDepthTestEnable} in the current command buffer set depthTestEnable to VK_TRUE, then \texttt{vkCmdSetDepthCompareOp} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07846
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE dynamic state enabled then vkCmdSetDepthBoundsTestEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08632
  If a shader object is bound to any graphics stage, and the depthBounds feature is enabled, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then the vkCmdSetDepthBoundsTestEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07847
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE dynamic state enabled then vkCmdSetStencilTestEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08633
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetStencilTestEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07848
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled then vkCmdSetStencilOp must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08634
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, then vkCmdSetStencilOp must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-viewportCount-03417
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of VkPipelineViewportStateCreateInfo::scissorCount of the pipeline

- VUID-vkCmdDrawMeshTasksNV-scissorCount-03418
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the scissorCount parameter of vkCmdSetScissorWithCount must match the VkPipelineViewportStateCreateInfo::viewportCount of the pipeline

- VUID-vkCmdDrawMeshTasksNV-viewportCount-03419
If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-None-08635**
  If a shader object is bound to any graphics stage, then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-viewportCount-04137**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportWScalingStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-viewportCount-04138**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-None-09232**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then `vkCmdSetViewportWScalingNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08636**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-viewportCount-04139**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-viewportCount-04140**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic states enabled then the
viewportCount parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-shadingRateImage-09233**
  If the shadingRateImage feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-shadingRateImage-09234**
  If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, and the most recent call to `vkCmdSetShadingRateImageEnableNV` in the current command buffer set shadingRateImageEnable to `VK_TRUE`, then `vkCmdSetViewportShadingRatePaletteNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08637**
  If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, then the viewportCount parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-VkPipelineVieportCreateInfo-04141**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportSwizzleStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-VkPipelineVieportCreateInfo-04142**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportExclusiveScissorStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount` greater or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksNV-None-07878**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV` dynamic state enabled then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07879**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV` dynamic state enabled then `vkCmdSetExclusiveScissorNV` must have been called in the current command buffer prior to this drawing command.
• VUID-vkCmdDrawMeshTasksNV-exclusiveScissor-09235
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksNV-None-08638
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetExclusiveScissorEnableNV` in the current command buffer set any element of `pExclusiveScissorEnables` to `VK_TRUE`, then `vkCmdSetExclusiveScissorNV` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksNV-None-04876
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` dynamic state enabled then `vkCmdSetRasterizerDiscardEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksNV-None-08639
  If a shader object is bound to any graphics stage, then `vkCmdSetRasterizerDiscardEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksNV-None-04877
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksNV-None-08640
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksNV-logicOp-04878
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.

• VUID-vkCmdDrawMeshTasksNV-None-08641
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the `logicOp` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.

• VUID-vkCmdDrawMeshTasksNV-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have
been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1

- **VUID-vkCmdDrawMeshTasksNV-primitiveFragmentShadingRateWithMultipleViewports-08642**
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1

- **VUID-vkCmdDrawMeshTasksNV-blendEnable-04727**
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be `VK_FALSE`

- **VUID-vkCmdDrawMeshTasksNV-None-08643**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`

- **VUID-vkCmdDrawMeshTasksNV-multisampledRenderToSingleSampled-07284**
  If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments

- **VUID-vkCmdDrawMeshTasksNV-None-08644**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments

- **VUID-vkCmdDrawMeshTasksNV-None-08876**
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`

- **VUID-vkCmdDrawMeshTasksNV-imageView-06172**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must
not write any values to the depth attachment

- **VUID-vkCmdDrawMeshTasksNV-imageView-06173**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment

- **VUID-vkCmdDrawMeshTasksNV-imageView-06174**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command **must** not write any values to the depth attachment

- **VUID-vkCmdDrawMeshTasksNV-imageView-06175**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment

- **VUID-vkCmdDrawMeshTasksNV-imageView-06176**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_OPTIMAL`, this command **must** not write any values to the depth attachment

- **VUID-vkCmdDrawMeshTasksNV-imageView-06177**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment

- **VUID-vkCmdDrawMeshTasksNV-viewMask-06178**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo` ::`viewMask` equal to `VkRenderingInfo` ::`viewMask`

- **VUID-vkCmdDrawMeshTasksNV-colorAttachmentCount-06179**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo` ::`colorAttachmentCount` equal to `VkRenderingInfo` ::`colorAttachmentCount`

- **VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08910**
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo` ::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo` ::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo` ::`pColorAttachmentFormats` used to create the currently bound graphics pipeline

- **VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08911**
  If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass
instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`.  

- **VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08912**  
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.  

- **VUID-vkCmdDrawMeshTasksNV-None-07749**  
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.  

- **VUID-vkCmdDrawMeshTasksNV-None-08646**  
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.  

- **VUID-vkCmdDrawMeshTasksNV-attachmentCount-07750**  
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline.  

- **VUID-vkCmdDrawMeshTasksNV-None-08647**  
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance.  

- **VUID-vkCmdDrawMeshTasksNV-None-07751**  
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command for each discard rectangle in `VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount`
• **VUID-vkCmdDrawMeshTasksNV-None-07880**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksNV-rasterizerDiscardEnable-09236**
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksNV-None-08648**
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksNV-None-07881**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksNV-None-08649**
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08913**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

• **VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08914**
  If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`.

• **VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08915**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`.
::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pDepthAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo ::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->imageView

- VUID-vkCmdDrawMeshTasksNV-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo ::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo ::pStencilAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksNV-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

- VUID-vkCmdDrawMeshTasksNV-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT

- VUID-vkCmdDrawMeshTasksNV-colorAttachmentCount-06185
  If the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the corresponding element of the pColorAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline

- VUID-vkCmdDrawMeshTasksNV-pDepthAttachment-06186
  If the current render pass instance was begun with vkCmdBeginRendering, the currently
bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksNV-pStencilAttachment-06187**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksNV-multisampledRenderToSingleSampled-07285**
  If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of `rasterizationSamples` for the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksNV-multisampledRenderToSingleSampled-07286**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksNV-multisampledRenderToSingleSampled-07287**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksNV-pNext-07935**
  If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`. 

2093
If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline must have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, rasterization discard must not be enabled.

If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline must not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`.

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.
buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08650
  If the depthClamp feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthClampEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07621
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled then vkCmdSetPolygonModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08651
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetPolygonModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07622
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled then vkCmdSetRasterizationSamplesEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08652
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetRasterizationSamplesEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07623
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled then vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08653
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07624
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to
vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- VUID-vkCmdDrawMeshTasksNV-None-08654
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- VUID-vkCmdDrawMeshTasksNV-None-07625
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08655
  If the alphaToOne feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07626
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled then vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08656
  If the logicOp feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07627
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-08657
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksNV-None-07628
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08658**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment's value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07629**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08659**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorWriteMaskEXT` for any attachment set that attachment's value in `pColorWriteEnables` to `VK_TRUE`, then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08660**
  If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07630**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08661**
  If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07631**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08662**
  If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07632**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.
command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08662**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetConservativeRasterizationMode_EXT` in the current command buffer set `conservativeRasterizationMode` to `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSize_EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07633**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClipEnable_EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08663**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnable_EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07634**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvanced_EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08664**
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEnable_EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07635**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexMode_EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07636**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexMode_EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08665**
  If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexMode_EXT` must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STENCIL_ENABLE_EXT` dynamic state enabled, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_EXT` dynamic state enabled then \texttt{vkCmdSetLineStippleEXT} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08672**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetLineStippleEnableEXT} in the current command buffer set \texttt{stippledLineEnable} to \texttt{VK_TRUE}, then \texttt{vkCmdSetLineStippleEXT} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07639**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08673**
  If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07640**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then \texttt{vkCmdSetViewportWScalingEnableNV} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08674**
  If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetViewportWScalingEnableNV} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07641**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then \texttt{vkCmdSetViewportSwizzleNV} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08675**
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetViewportSwizzleNV} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-07642**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then \texttt{vkCmdSetCoverageToColorEnableNV} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksNV-None-08676**
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then \texttt{vkCmdSetCoverageToColorEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07643**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV} dynamic state enabled then \texttt{vkCmdSetCoverageToColorLocationNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08677**
  If the \texttt{VK_NV_fragment_coverage_to_color} extension is enabled, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetCoverageToColorEnableNV} in the current command buffer set \texttt{coverageToColorEnable} to VK_TRUE, then \texttt{vkCmdSetCoverageToColorLocationNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07644**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationModeNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08678**
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to VK_FALSE, then \texttt{vkCmdSetCoverageModulationModeNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07645**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationTableEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08679**
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to VK_FALSE, and the most recent call to \texttt{vkCmdSetCoverageModulationModeNV} in the current command buffer set \texttt{coverageModulationMode} to any value other than \texttt{VK_COVERAGE_MODULATION_MODE_NONE_NV}, then \texttt{vkCmdSetCoverageModulationTableEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07646**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationTableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08680**
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the
current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetCoverageModulationTableEnableNV} in the current command buffer set \texttt{coverageModulationTableEnable} to \texttt{VK_TRUE}, then \texttt{vkCmdSetCoverageModulationTableNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-None-07647
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetShadingRateImageEnableNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-pipelineFragmentShadingRate-09238
  If the \texttt{pipelineFragmentShadingRate} feature is enabled, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetFragmentShadingRateKHR} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-None-08681
  If the \texttt{shadingRateImage} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetShadingRateImageEnableNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-None-07648
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetRepresentativeFragmentTestEnableNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-None-08682
  If the \texttt{representativeFragmentTest} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetRepresentativeFragmentTestEnableNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-None-07649
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageReductionModeNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-None-08683
  If the \texttt{coverageReductionMode} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetCoverageReductionModeNV} must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-pColorBlendEnables-07470
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT state enabled and the last call to vkCmdSetColorBlendEnableEXT set pColorBlendEnables for any attachment to VK_TRUE, then for those attachments in the subpass the corresponding image view’s format features must contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT

• VUID-vkCmdDrawMeshTasksNV-rasterizationSamples-07471
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must follow the rules for a zero-attachment subpass

• VUID-vkCmdDrawMeshTasksNV-samples-07472
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT must be greater or equal to the VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create the bound graphics pipeline

• VUID-vkCmdDrawMeshTasksNV-samples-07473
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT must be greater or equal to the rasterizationSamples parameter in the last call to vkCmdSetRasterizationSamplesEXT

• VUID-vkCmdDrawMeshTasksNV-rasterizationSamples-07474
If the bound graphics pipeline state was created with the VK_AMD_mixed_attachment_samples nor the VK_NV_framebuffer_mixed_samples extensions are enabled, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must be the same as the current subpass color and/or depth/stencil attachments

• VUID-vkCmdDrawMeshTasksNV-None-09211
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must be the same as the rasterizationSamples member of that structure

• VUID-vkCmdDrawMeshTasksNV-firstAttachment-07476
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEnableEXT calls must specify an enable for all active color attachments in the current subpass
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEquationEXT` calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorWriteMaskEXT` calls must specify the color write mask for all active color attachments in the current subpass.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendAdvancedEXT` calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled and the last calls to `vkCmdSetColorBlendEnableEXT` and `vkCmdSetColorBlendAdvancedEXT` have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed `advancedBlendMaxColorAttachments`.

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, and the bound graphics pipeline was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` must have set the `rasterizationStream` to zero.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with.

If the bound graphics pipeline state was created with the
If the bound graphics pipeline was created with the 
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if 
sampleLocationsEnable was VK_TRUE in the last call to 
vkCmdSetSampleLocationsEnableEXT, then, the 
sampleLocationsInfo.sampleLocationGridSize.width in the last call to 
vkCmdSetSampleLocationsEXT must evenly divide 
VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by 
vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling 
rasterizationSamples.

If the bound graphics pipeline state was created with the 
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if 
sampleLocationsEnable was VK_TRUE in the last call to 
vkCmdSetSampleLocationsEnableEXT, then, the 
sampleLocationsInfo.sampleLocationGridSize.height in the last call to 
vkCmdSetSampleLocationsEXT must evenly divide 
VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by 
vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling 
rasterizationSamples.

If the bound graphics pipeline state was created with the 
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if 
sampleLocationsEnable was VK_TRUE in the last call to 
vkCmdSetSampleLocationsEnableEXT, the fragment shader code must not statically use the extended instruction InterpolateAtSample.

If the bound graphics pipeline state was created with the 
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if 
sampleLocationsEnable was VK_TRUE in the last call to 
vkCmdSetSampleLocationsEnableEXT, the fragment shader code must not statically use the extended instruction InterpolateAtSample.

If the bound graphics pipeline state was created with the 
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if 
sampleLocationsEnable was VK_TRUE in the last call to 
vkCmdSetSampleLocationsEnableEXT, then, the fragment shader code must not statically use the extended instruction InterpolateAtSample.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationsPerPixel` must equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to `VK_TRUE`, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode` set by `vkCmdSetCoverageToColorLocationNV` coverageToColorLocation, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.

If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode` set by `vkCmdSetCoverageToColorLocationNV` coverageToColorLocation, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.
If the bound graphics pipeline state was created with the
\texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT} dynamic state enabled, but not the
\texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_SWIZZLE\_NV} dynamic state enabled, then the bound graphics pipeline must have been created with \texttt{VkPipelineViewportSwizzleStateCreateInfoNV} ::\texttt{viewportCount} greater or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT} and \texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_SWIZZLE\_NV} dynamic states enabled then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportSwizzleNV} must be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

If the \texttt{VK\_NV\_framebuffer\_mixed\_samples} extension is enabled, and if the current subpass has any color attachments and \texttt{rasterizationSamples} of the last call to \texttt{vkCmdSetRasterizationSamplesEXT} is greater than the number of color samples, then the pipeline \texttt{sampleShadingEnable} must be \texttt{VK\_FALSE}

If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} or \texttt{VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT} dynamic states enabled, and if the current \texttt{stippledLineEnable} state is \texttt{VK\_TRUE} and the current \texttt{lineRasterizationMode} state is \texttt{VK\_LINE\_RASTERIZATION\_MODE\_RECTANGULAR\_EXT}, then the \texttt{stippledRectangularLines} feature must be enabled

If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} or \texttt{VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT} dynamic states enabled, and if the current \texttt{stippledLineEnable} state is \texttt{VK\_TRUE} and the current \texttt{lineRasterizationMode} state is \texttt{VK\_LINE\_RASTERIZATION\_MODE\_BRESENHAM\_EXT}, then the \texttt{stippledBresenhamLines} feature must be enabled

If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} or \texttt{VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT} dynamic states enabled, and if the current \texttt{stippledLineEnable} state is \texttt{VK\_TRUE} and the current \texttt{lineRasterizationMode} state is \texttt{VK\_LINE\_RASTERIZATION\_MODE\_RECTANGULAR\_SMOOTH\_EXT}, then the \texttt{stippledSmoothLines} feature must be enabled

If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} or \texttt{VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT} dynamic states enabled, and if the current \texttt{stippledLineEnable} state is \texttt{VK\_TRUE} and the current \texttt{lineRasterizationMode} state is \texttt{VK\_LINE\_RASTERIZATION\_MODE\_DEFAULT\_EXT}, then the \texttt{stippledRectangularLines} feature must
be enabled and \texttt{VkPhysicalDeviceLimits::strictLines must be VK_TRUE}

- **VUID-vkCmdDrawMeshTasksNV-conservativePointAndLineRasterization-07499**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT} dynamic state enabled, \texttt{conservativePointAndLineRasterization} is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the \texttt{conservativeRasterizationMode} set by the last call to \texttt{vkCmdSetConservativeRasterizationModeEXT} must be \texttt{VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT}

- **VUID-vkCmdDrawMeshTasksNV-stage-07073**
  If the currently bound pipeline was created with the \texttt{VkPipelineShaderStageCreateInfo ::stage} member of an element of \texttt{VkGraphicsPipelineCreateInfo::pStages} set to \texttt{VK_SHADER_STAGE_VERTEX_BIT}, \texttt{VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT}, \texttt{VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT} or \texttt{VK_SHADER_STAGE_GEOMETRY_BIT}, then Mesh Shader Queries must not be active

- **VUID-vkCmdDrawMeshTasksNV-None-08877**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT} dynamic state \texttt{vkCmdSetAttachmentFeedbackLoopEnableEXT} have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-07850**
  If dynamic state was inherited from \texttt{VkCommandBufferInheritanceViewportScissorInfoNV}, it must be set in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksNV-None-08684**
  If there is no bound graphics pipeline, \texttt{vkCmdBindShadersEXT} must have been called in the current command buffer with \texttt{pStages} with an element of \texttt{VK_SHADER_STAGE_VERTEX_BIT}

- **VUID-vkCmdDrawMeshTasksNV-None-08685**
  If there is no bound graphics pipeline, and the \texttt{tessellationShader} feature is enabled, \texttt{vkCmdBindShadersEXT} must have been called in the current command buffer with \texttt{pStages} with an element of \texttt{VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT}

- **VUID-vkCmdDrawMeshTasksNV-None-08686**
  If there is no bound graphics pipeline, and the \texttt{tessellationShader} feature is enabled, \texttt{vkCmdBindShadersEXT} must have been called in the current command buffer with \texttt{pStages} with an element of \texttt{VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT}

- **VUID-vkCmdDrawMeshTasksNV-None-08687**
  If there is no bound graphics pipeline, and the \texttt{geometryShader} feature is enabled, \texttt{vkCmdBindShadersEXT} must have been called in the current command buffer with \texttt{pStages} with an element of \texttt{VK_SHADER_STAGE_GEOMETRY_BIT}

- **VUID-vkCmdDrawMeshTasksNV-None-08688**
  If there is no bound graphics pipeline, \texttt{vkCmdBindShadersEXT} must have been called in the current command buffer with \texttt{pStages} with an element of \texttt{VK_SHADER_STAGE_FRAGMENT_BIT}

- **VUID-vkCmdDrawMeshTasksNV-None-08689**
  If there is no bound graphics pipeline, and the \texttt{taskShader} feature is enabled,
vkCmdBindShadersEXT **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`.

- **VUID-vkCmdDrawMeshTasksNV-None-08690**
  If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`.

- **VUID-vkCmdDrawMeshTasksNV-None-08693**
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound.

- **VUID-vkCmdDrawMeshTasksNV-None-08694**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid ` VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid `VkShaderEXT` **must** be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

- **VUID-vkCmdDrawMeshTasksNV-None-08695**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created with the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, there **must** be no `VkShaderEXT` bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

- **VUID-vkCmdDrawMeshTasksNV-None-08696**
  If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage.

- **VUID-vkCmdDrawMeshTasksNV-None-08698**
  If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound.

- **VUID-vkCmdDrawMeshTasksNV-None-08699**
  If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound.

- **VUID-vkCmdDrawMeshTasksNV-None-08878**
  All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges.

- **VUID-vkCmdDrawMeshTasksNV-None-08879**
  All bound graphics shader objects **must** have been created with identical or identically defined arrays of descriptor set layouts.

- **VUID-vkCmdDrawMeshTasksNV-None-08880**
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage and the
The attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksNV-pDynamicStates-08715
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable must be VK_FALSE.

- VUID-vkCmdDrawMeshTasksNV-pDynamicStates-08716
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_STENCIL_WRITE_MASK set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask must be 0.

- VUID-vkCmdDrawMeshTasksNV-None-09116
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT must either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, and VK_COLOR_COMPONENT_B_BIT, or none of them.

- VUID-vkCmdDrawMeshTasksNV-maxFragmentDualSrcAttachments-09239
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command must be less than maxFragmentDualSrcAttachments.

- VUID-vkCmdDrawMeshTasksNV-stage-06480
  The bound graphics pipeline must not have been created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT.

- VUID-vkCmdDrawMeshTasksNV-None-07074
  Transform Feedback Queries must not be active.

- VUID-vkCmdDrawMeshTasksNV-None-07075
  Primitives Generated Queries must not be active.

- VUID-vkCmdDrawMeshTasksNV-pipelineStatistics-07076
  The pipelineStatistics member used to create any active Pipeline Statistics Query must not contain VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_VERTICES_BIT, VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_PRIMITIVES_BIT, VK_QUERY_PIPELINE_STATISTIC_VERTEX_SHADER_INVOCATIONS_BIT, VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_INVOCATIONS_BIT.
**VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_PRIMITIVES_BIT**,  
**VK_QUERY_PIPELINE_STATISTIC_CLIPPING_INVOCATIONS_BIT**,  
**VK_QUERY_PIPELINE_STATISTIC_CLIPPING_PRIMITIVES_BIT**,  
**VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_CONTROL_SHADER_PATCHES_BIT**,  
or  
**VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT**

- VUID-vkCmdDrawMeshTasksNV-taskCount-02119  
  taskCount must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesNV::maxDrawMeshTasksCount

- VUID-vkCmdDrawMeshTasksNV-MeshNV-07080  
The current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS must contain a shader stage using the MeshNV Execution Model

**Valid Usage (Implicit)**

- VUID-vkCmdDrawMeshTasksNV-commandBuffer-parameter  
  commandBuffer must be a valid VkCommandBuffer handle

- VUID-vkCmdDrawMeshTasksNV-commandBuffer-recording  
  commandBuffer must be in the recording state

- VUID-vkCmdDrawMeshTasksNV-commandBuffer-cmdpool  
The VkCommandPool that commandBuffer was allocated from must support graphics operations

- VUID-vkCmdDrawMeshTasksNV-renderpass  
  This command must only be called inside of a render pass instance

- VUID-vkCmdDrawMeshTasksNV-videncoding  
  This command must only be called outside of a video coding scope

**Host Synchronization**

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

**Command Properties**

To record an indirect mesh tasks drawing command, call:
// Provided by VK_NV_mesh_shader

void vkCmdDrawMeshTasksIndirectNV(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    uint32_t drawCount,
    uint32_t stride);

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `drawCount` is the number of draws to execute, and can be zero.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawMeshTasksIndirectNV` behaves similarly to `vkCmdDrawMeshTasksNV` except that the parameters are read by the device from a buffer during execution. `drawCount` draws are executed by the command, with parameters taken from `buffer` starting at `offset` and increasing by `stride` bytes for each successive draw. The parameters of each draw are encoded in an array of `VkDrawMeshTasksIndirectCommandNV` structures. If `drawCount` is less than or equal to one, `stride` is ignored.

**Valid Usage**

- VUID-vkCmdDrawMeshTasksIndirectNV-magFilter-04553
  If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectNV-mipmapMode-04770
  If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectNV-None-06479
  If a `VkImageView` is sampled with depth comparison, the image view’s format features must contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectNV-None-02691
  If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07888
  If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer’s format features must contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`.
If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`.

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it must not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`.

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

If the `cubicRangeClamp` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must not have a `VkSamplerReductionModeCreateInfo`::reductionMode equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM`.

Any `VkImageView` being sampled with a `VkSamplerReductionModeCreateInfo`::reductionMode equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM` as a result of this command must sample with `VK_FILTER_CUBIC_EXT`.

If the `selectableCubicWeights` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have `VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights` equal to `VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM`.

Any `VkImage` created with a `VkImageCreateInfo`::flags containing `VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV` sampled as a result of this command must only be sampled using a `VkSamplerAddressMode` of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`.

For any `VkImage` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view’s format features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.
For any **VkImageView** being read as a storage image where the image format field of the **OpTypeImage** is **Unknown**, the view's **format features** must contain **VK_FORMAT_FEATURE_2_STORAGE_READ WITHOUT_FORMAT_BIT**

- **VUID-vkCmdDrawMeshTasksIndirectNV-OpTypeImage-07029**
  For any **VkBufferView** being written as a storage texel buffer where the image format field of the **OpTypeImage** is **Unknown**, the view's **buffer features** must contain **VK_FORMAT_FEATURE_2_STORAGE_WRITE WITHOUT_FORMAT_BIT**

- **VUID-vkCmdDrawMeshTasksIndirectNV-OpTypeImage-07030**
  Any **VkBufferView** being read as a storage texel buffer where the image format field of the **OpTypeImage** is **Unknown** then the view's **buffer features** must contain **VK_FORMAT_FEATURE_2_STORAGE_READ WITHOUT_FORMAT_BIT**

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08600**
  For each set $n$ that is statically used by a **bound shader**, a descriptor set must have been bound to $n$ at the same pipeline bind point, with a **VkPipelineLayout** that is compatible for set $n$, with the **VkPipelineLayout** or **VkDescriptorSetLayout** array that was used to create the current **VkPipeline** or **VkShaderEXT**, as described in **Pipeline Layout Compatibility**

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08601**
  For each push constant that is statically used by a **bound shader**, a push constant value must have been set for the same pipeline bind point, with a **VkPipelineLayout** that is compatible for push constants, with the **VkPipelineLayout** or **VkDescriptorSetLayout** and **VkPushConstantRange** arrays used to create the current **VkPipeline** or **VkShaderEXT**, as described in **Pipeline Layout Compatibility**

- **VUID-vkCmdDrawMeshTasksIndirectNV-maintenance4-08602**
  If the **maintenance4** feature is not enabled, then for each push constant that is statically used by a **bound shader**, a push constant value must have been set for the same pipeline bind point, with a **VkPipelineLayout** that is compatible for push constants, with the **VkPipelineLayout** or **VkDescriptorSetLayout** and **VkPushConstantRange** arrays used to create the current **VkPipeline** or **VkShaderEXT**, as described in **Pipeline Layout Compatibility**

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08114**
  Descriptors in each bound descriptor set, specified via **vkCmdBindDescriptorSets**, must be valid if they are statically used by the **VkPipeline** bound to the pipeline bind point used by this command and the bound **VkPipeline** was not created with **VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT**

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08115**
  If the descriptors used by the **VkPipeline** bound to the pipeline bind point were specified via **vkCmdBindDescriptorSets**, the bound **VkPipeline** must have been created without **VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT**

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08116**
  Descriptors in bound descriptor buffers, specified via **vkCmdSetDescriptorBufferOffsetsEXT**, must be valid if they are dynamically used by the **VkPipeline** bound to the pipeline bind point used by this command and the bound **VkPipeline** was created with **VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT**

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08604**
Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08117
  If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` must have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08119
  If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory must be resident

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08605
  If a descriptor is dynamically used with a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory must be resident

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08606
  If the `shaderObject` feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08607
  If the `shaderObject` is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and `VK_NULL_HANDLE` shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08608
  If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the `VkPipeline` object bound to the pipeline bind point used by this command, since that pipeline was bound

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08609
  If the `VkPipeline` object bound to the pipeline bind point used by this command or any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a `VkSampler` object that uses unnormalized coordinates, that sampler must not be used to sample from any `VkImage` with a `VkImageView` of the type `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, `VK_IMAGE_VIEW_TYPE_1D_ARRAY`, `VK_IMAGE_VIEW_TYPE_2D_ARRAY` or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`, in any shader stage

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08610
  If the `VkPipeline` object bound to the pipeline bind point used by this command or any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command accesses a `VkSampler` object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V `OpImageSample*` or `OpImageSparseSample*` instructions with `ImplicitLod`, `Dref` or `Proj` in their name, in any shader stage

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08611
  If the `VkPipeline` object bound to the pipeline bind point used by this command or any
VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

- VUID-vkCmdDrawMeshTasksIndirectNV-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksIndirectNV-None-06550
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y′C′R conversion, that object must only be used with OpImageSample* or OpImageSparseSample* instructions

- VUID-vkCmdDrawMeshTasksIndirectNV-viewType-07752
  If a VkImageView is accessed as a result of this command, then the image view's viewType must match the Dim operand of the OpTypeImage as described in Instruction/Sampler/Image View Validation
If a `VkImageView` is accessed as a result of this command, then the numeric type of the image view’s format and the Sampled Type operand of the `OpTypeImage` must match.

If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the Type of the Texel operand of that instruction must have at least as many components as the image view’s format.

If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the Type of the Texel operand of that instruction must have four components.

If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the SampledType of the `OpTypeImage` operand of that instruction must have a Width of 64.

If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the `OpTypeImage` operand of that instruction must have a Width of 32.

If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the SampledType of the `OpTypeImage` operand of that instruction must have a Width of 64.

If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the `OpTypeImage` operand of that instruction must have a Width of 32.

If the `sparseImageInt64Atomics` feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag must not be accessed by atomic instructions through an `OpTypeImage` with a SampledType with a Width of 64 by this command.

If the `sparseImageInt64Atomics` feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag must not be accessed by atomic instructions through an `OpTypeImage` with a SampledType with a Width of 64 by this command.

If `OpImageWeightedSampleQCOM` is used to sample a `VkImageView` as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM`. 

VK-2117
• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageWeightedSampleQCOM-06972
  If OpImageWeightedSampleQCOM uses a VkImageView as a sample weight image as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageBoxFilterQCOM-06973
  If OpImageBoxFilterQCOM is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageBlockMatchSSDQCOM-06974
  If OpImageBlockMatchSSDQCOM is used to read from a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageBlockMatchSADQCOM-06975
  If OpImageBlockMatchSADQCOM is used to read from a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageBlockMatchWindowSSDQCOM-06976
  If OpImageBlockMatchWindowSSDQCOM or OpImageBlockMatchWindowSADQCOM is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageWeightedSampleQCOM-06977
  If any command other than OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, or OpImageBlockMatchSSDQCOM uses a VkSampler as a result of this command, then the sampler must have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageBlockMatchWindow-09215
  If an OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from a VkImageView as a result of this command, then the image view’s format must be a single-component format.

• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageBlockMatchWindow-09216
  If an OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from a VkImageView as a result of this command, then the image view’s format must be a single-component format.

• VUID-vkCmdDrawMeshTasksIndirectNV-OpImageBlockMatchWindow-09217
  If an OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.
integer texel coordinate validation

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07288
  Any shader invocation executed by this command must terminate

- VUID-vkCmdDrawMeshTasksIndirectNV-renderPass-02684
  The current render pass must be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawMeshTasksIndirectNV-subpass-02685
  The subpass index of the current render pass must be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07748
  If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set

- VUID-vkCmdDrawMeshTasksIndirectNV-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it must be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07469
  Input attachment views accessed in a subpass must be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the currently bound VkFramebuffer as specified by Fragment Input Attachment Compatibility

- VUID-vkCmdDrawMeshTasksIndirectNV-None-06537
  Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-09000
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  - the VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  - the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_COLOR_BIT and
    • there is no currently bound graphics pipeline or
    • the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-09001
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP Optimal_EXT image layout, and either:
- the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
- the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_DEPTH_BIT` and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-09002
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT` and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-06539
  If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command must not write to that image subresource as an attachment

- VUID-vkCmdDrawMeshTasksIndirectNV-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes must be disabled

- VUID-vkCmdDrawMeshTasksIndirectNV-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back `writeMask` are not zero, and stencil test is enabled, all stencil ops must be `VK_STENCIL_OP_KEEP`

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07831
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07832
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` must have been called in the current
• VUID-vkCmdDrawMeshTasksIndirectNV-None-07833
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_WIDTH} dynamic state enabled then \texttt{vkCmdSetLineWidth} must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08617
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPolygonModeEXT} in the current command buffer set \texttt{polygonMode} to \texttt{VK\_POLYGON\_MODE\_LINE}, \texttt{vkCmdSetLineWidth} must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08618
  If a shader object is bound to the \texttt{VK\_SHADER\_STAGE\_VERTEX\_BIT} stage, and the most recent call to \texttt{vkCmdSetPrimitiveTopology} in the current command buffer set \texttt{primitiveTopology} to any line topology, \texttt{vkCmdSetLineWidth} must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08619
  If a shader object that outputs line primitives is bound to the \texttt{VK\_SHADER\_STAGE\_TESSELLATION\_EVALUATION\_BIT} or \texttt{VK\_SHADER\_STAGE\_GEOMETRY\_BIT} stage, \texttt{vkCmdSetLineWidth} must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectNV-None-07834
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_DEPTH\_BIAS} dynamic state enabled then \texttt{vkCmdSetDepthBias} or \texttt{vkCmdSetDepthBias2EXT} must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08620
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, and the most recent call to \texttt{vkCmdSetDepthBiasEnable} in the current command buffer set \texttt{depthBiasEnable} to \texttt{VK\_TRUE}, \texttt{vkCmdSetDepthBias} or \texttt{vkCmdSetDepthBias2EXT} must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectNV-None-07835
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_BLEND\_CONSTANTS} dynamic state enabled then \texttt{vkCmdSetBlendConstants} must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08621
  If a shader object is bound to the \texttt{VK\_SHADER\_STAGE\_FRAGMENT\_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, and the most recent call to \texttt{vkCmdSetColorBlendEnableEXT} in the current command buffer set any element of \texttt{pColorBlendEnables} to \texttt{VK\_FALSE}, and the most recent call to \texttt{vkCmdSetColorBlendEquationEXT} in the current command buffer set the same element of \texttt{pColorBlendEquations} to a \texttt{VkColorBlendEquationEXT} structure with any \texttt{VkBlendFactor} member with a value of \texttt{VK\_BLEND\_FACTOR\_CONSTANT\_COLOR}, \texttt{VK\_BLEND\_FACTOR\_ONE\_MINUS\_CONSTANT\_COLOR}, \texttt{VK\_BLEND\_FACTOR\_CONSTANT\_ALPHA}, or
VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, vkCmdSetBlendConstants must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07836
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled then vkCmdSetDepthBounds must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08622
If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDepthBoundsTestEnable in the current command buffer set depthBoundsTestEnable to VK_TRUE, then vkCmdSetDepthBounds must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07837
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled then vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08623
If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07838
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled then vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08624
If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07839
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled then vkCmdSetStencilReference must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08625
If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilReference must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-maxMultiviewInstanceIndex-02688
If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex

- VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawMeshTasksIndirectNV-None-06666
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08626
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetSampleLocationsEnableEXT in the current command buffer set sampleLocationsEnable to VK_TRUE, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsPerPixel-07934
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07840
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08627
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07841
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08628
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthTestEnable` in the current command buffer set `depthTestEnable` to `VK_TRUE`, then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.
vkCmdSetStencilTestEnable **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08633**
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then **vkCmdSetStencilTestEnable** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07848**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_STENCIL_OP** dynamic state enabled then **vkCmdSetStencilOp** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08634**
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, then **vkCmdSetStencilOp** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-viewportCount-03417**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT** dynamic state enabled, but not the **VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT** dynamic state enabled, then **vkCmdSetViewportWithCount** must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of **vkCmdSetViewportWithCount** must match the **VkPipelineViewportStateCreateInfo::scissorCount** of the pipeline

- **VUID-vkCmdDrawMeshTasksIndirectNV-scissorCount-03418**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT** dynamic state enabled, but not the **VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT** dynamic state enabled, then **vkCmdSetScissorWithCount** must have been called in the current command buffer prior to this drawing command, and the scissorCount parameter of **vkCmdSetScissorWithCount** must match the **VkPipelineViewportStateCreateInfo::viewportCount** of the pipeline

- **VUID-vkCmdDrawMeshTasksIndirectNV-viewportCount-03419**
  If the bound graphics pipeline state was created with both the **VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT** and **VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT** dynamic states enabled then both **vkCmdSetViewportWithCount** and **vkCmdSetScissorWithCount** must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of **vkCmdSetViewportWithCount** must match the scissorCount parameter of **vkCmdSetScissorWithCount**

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08635**
  If a shader object is bound to any graphics stage, then both **vkCmdSetViewportWithCount** and **vkCmdSetScissorWithCount** must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of **vkCmdSetViewportWithCount** must match the scissorCount parameter of
vkCmdSetScissorWithCount

- VUID-vkCmdDrawMeshTasksIndirectNV-viewportCount-04137
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the bound graphics pipeline **must** have been created with `VkPipelineViewportWScalingStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- VUID-vkCmdDrawMeshTasksIndirectNV-viewportCount-04138
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- VUID-vkCmdDrawMeshTasksIndirectNV-viewportCount-04139
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic state enabled, then the bound graphics pipeline **must** have been created with `VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- VUID-vkCmdDrawMeshTasksIndirectNV-viewportCount-04140
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- VUID-vkCmdDrawMeshTasksIndirectNV-shadingRateImage-09233
  If the `shadingRateImage` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-shadingRateImage-09234
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command
the current command buffer set rasterizerDiscardEnable to \texttt{VK\_FALSE}, and the most recent call to \texttt{vkCmdSetShadingRateImageEnableNV} in the current command buffer set shadingRateImageEnable to \texttt{VK\_TRUE}, then \texttt{vkCmdSetViewportShadingRatePaletteNV} must have been called in the current command buffer prior to this drawing command

- \texttt{VUID-vkCmdDrawMeshTasksIndirectNV-None-08637}
  If a shader object is bound to any graphics stage, and the \texttt{shadingRateImage} feature is enabled on the device, then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportShadingRatePaletteNV} must be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- \texttt{VUID-vkCmdDrawMeshTasksIndirectNV-VkPipelineViewportCreateInfo-04141}
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT} dynamic state enabled and a \texttt{VkPipelineViewportSwizzleStateCreateInfoNV} structure chained from \texttt{VkPipelineViewportStateCreateInfo}, then the bound graphics pipeline must have been created with \texttt{VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount} greater or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- \texttt{VUID-vkCmdDrawMeshTasksIndirectNV-VkPipelineViewportCreateInfo-04142}
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT} dynamic state enabled and a \texttt{VkPipelineViewportExclusiveScissorStateCreateInfoNV} structure chained from \texttt{VkPipelineViewportStateCreateInfo}, then the bound graphics pipeline must have been created with \texttt{VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount} greater or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}

- \texttt{VUID-vkCmdDrawMeshTasksIndirectNV-None-07878}
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_EXCLUSIVE\_SCISSOR\_ENABLE\_NV} dynamic state enabled then \texttt{vkCmdSetExclusiveScissorEnableNV} must have been called in the current command buffer prior to this drawing command

- \texttt{VUID-vkCmdDrawMeshTasksIndirectNV-None-07879}
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_EXCLUSIVE\_SCISSOR\_NV} dynamic state enabled then \texttt{vkCmdSetExclusiveScissorNV} must have been called in the current command buffer prior to this drawing command

- \texttt{VUID-vkCmdDrawMeshTasksIndirectNV-exclusiveScissor-09235}
  If a shader object is bound to any graphics stage, and the \texttt{exclusiveScissor} feature is enabled, then \texttt{vkCmdSetExclusiveScissorEnableNV} must have been called in the current command buffer prior to this drawing command

- \texttt{VUID-vkCmdDrawMeshTasksIndirectNV-None-08638}
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetExclusiveScissorEnableNV} in the current command buffer set any element of \texttt{pExclusiveScissorEnables} to \texttt{VK\_TRUE}, then \texttt{vkCmdSetExclusiveScissorNV} must have been called in the current command buffer prior to this drawing command

- \texttt{VUID-vkCmdDrawMeshTasksIndirectNV-None-04876}
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE  dynamic state enabled then `vkCmdSetRasterizerDiscardEnable` **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08639
  If a shader object is bound to any graphics stage, then `vkCmdSetRasterizerDiscardEnable` **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-04877
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled then `vkCmdSetDepthBiasEnable` **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08640
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, then `vkCmdSetDepthBiasEnable` **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-logicOp-04878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled then `vkCmdSetLogicOpEXT` **must** have been called in the current command buffer prior to this drawing command and the `logicOp` **must** be a valid `VkLogicOp` value

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08641
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the `logicOp` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, then `vkCmdSetLogicOpEXT` **must** have been called in the current command buffer prior to this drawing command and the `logicOp` **must** be a valid `VkLogicOp` value

- VUID-vkCmdDrawMeshTasksIndirectNV-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawMeshTasksIndirectNV-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` **must** have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** be 1

- VUID-vkCmdDrawMeshTasksIndirectNV-blendEnable-04727
  If rasterization is not disabled in the bound graphics pipeline, then for each color...
attachment in the subpass, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be `VK_FALSE`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08643**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-multisampledRenderToSingleSampled-07284**
  If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08876**
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-imageView-06172**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

- **VUID-vkCmdDrawMeshTasksIndirectNV-imageView-06173**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

- **VUID-vkCmdDrawMeshTasksIndirectNV-imageView-06174**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment.
If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline.

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`.

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering`, each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`. 

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline.
::pColorAttachments array with a imageView equal to VK_NULL_HANDLE must have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the currently bound pipeline equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07749
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled then vkCmdSetColorWriteEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08646
  If the colorWriteEnable feature is enabled on the device, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorWriteEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksIndirectNV-attachmentCount-07750
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled then the attachmentCount parameter of vkCmdSetColorWriteEnableEXT must be greater than or equal to the VkPipelineColorBlendStateCreateInfo::attachmentCount of the currently bound graphics pipeline.

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08647
  If the colorWriteEnable feature is enabled on the device, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable rasterizerDiscardEnable to VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance.

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07751
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled then vkCmdSetDiscardRectangleEXT must have been called in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount.

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07880
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled then vkCmdSetDiscardRectangleEnableEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksIndirectNV-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDiscardRectangleEXT must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08648
If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07881**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08649**
  If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-dynamicRenderingUnusedAttachments-08913**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-dynamicRenderingUnusedAttachments-08914**
  If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-dynamicRenderingUnusedAttachments-08915**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-dynamicRenderingUnusedAttachments-08916**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-dynamicRenderingUnusedAttachments-08917**
  If current render pass instance was begun with `vkCmdBeginRendering`, the
If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-imageView-06184**
  If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-colorAttachmentCount-06185**
  If the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksIndirectNV-pDepthAttachment-06186**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksIndirectNV-pStencilAttachment-06187**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.
used to create the currently bound graphics pipeline must be equal to the sample count used to create \texttt{VkRenderingInfo::pStencilAttachment->imageView}.

- VUID-vkCmdDrawMeshTasksIndirectNV-multisampledRenderToSingleSampled-07285
  If the currently bound pipeline was created without a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and the \texttt{multisampledRenderToSingleSampled} feature is not enabled, and the current render pass instance was begun with \texttt{vkCmdBeginRendering} with a \texttt{VkRenderingInfo::colorAttachmentCount} parameter greater than 0, then each element of the \texttt{VkRenderingInfo::pColorAttachments} array with a \texttt{imageView} not equal to \texttt{VK_NULL_HANDLE} must have been created with a sample count equal to the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline.

- VUID-vkCmdDrawMeshTasksIndirectNV-multisampledRenderToSingleSampled-07286
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline was created without a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and the \texttt{multisampledRenderToSingleSampled} feature is not enabled, and \texttt{VkRenderingInfo::pDepthAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline must be equal to the sample count used to create \texttt{VkRenderingInfo::pDepthAttachment->imageView}.

- VUID-vkCmdDrawMeshTasksIndirectNV-multisampledRenderToSingleSampled-07287
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline was created without a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and the \texttt{multisampledRenderToSingleSampled} feature is not enabled, and \texttt{VkRenderingInfo::pStencilAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline must be equal to the sample count used to create \texttt{VkRenderingInfo::pStencilAttachment->imageView}.

- VUID-vkCmdDrawMeshTasksIndirectNV-pNext-07935
  If this command has been called inside a render pass instance started with \texttt{vkCmdBeginRendering}, and the \texttt{pNext} chain of \texttt{VkRenderingInfo} includes a \texttt{VkMultisampledRenderToSingleSampledInfoEXT} structure with \texttt{multisampledRenderToSingleSampledEnable} equal to \texttt{VK_TRUE}, then the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline must be equal to \texttt{VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples}.

- VUID-vkCmdDrawMeshTasksIndirectNV-renderPass-06198
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline must have been created with a \texttt{VkGraphicsPipelineCreateInfo::renderPass} equal to \texttt{VK_NULL_HANDLE}.

- VUID-vkCmdDrawMeshTasksIndirectNV-pColorAttachments-08963
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the \texttt{VkRenderingInfo::pColorAttachments->imageView} was not \texttt{VK_NULL_HANDLE}, then the corresponding element of \texttt{VkPipelineRenderingCreateInfo::pColorAttachmentFormats} used to create the pipeline must not be \texttt{VK_FORMAT_UNDEFINED}. 

2134
If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, rasterization discard must not be enabled.

If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline must not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then...
\texttt{vkCmdSetPolygonMode}\texttt{EXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-None-08651}
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetPolygonMode}\texttt{EXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-None-07622}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT} dynamic state enabled then \texttt{vkCmdSetRasterizationSamples}\texttt{EXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-None-08652}
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetRasterizationSamples}\texttt{EXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-None-07623}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SAMPLE_MASK_EXT} dynamic state enabled then \texttt{vkCmdSetSampleMask}\texttt{EXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-None-08653}
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetSampleMask}\texttt{EXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-None-07624}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetAlphaToCoverageEnable}\texttt{EXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-alphaToCoverageEnable-08919}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT} dynamic state enabled, and \texttt{alphaToCoverageEnable} was \texttt{VK_TRUE} in the last call to \texttt{vkCmdSetAlphaToCoverageEnable}\texttt{EXT}, then the Fragment Output Interface \textbf{must} contain a variable for the alpha Component word in Location 0 at Index 0

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-None-08654}
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetAlphaToCoverageEnable}\texttt{EXT} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectNV-alphaToCoverageEnable-08920}
  If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07625**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08655**
  If the `alphaToOne` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07626**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled then `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08656**
  If the `logicOp` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07627**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08657**
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment's value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.
called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07629**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08659**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07630**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08660**
  If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07631**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08661**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07632**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08662**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetConservativeRasterizationModeEXT` in the current command buffer set `conservativeRasterizationMode` to `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command
• **VUID-vkCmdDrawMeshTasksIndirectNV-None-07633**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksIndirectNV-None-08663**
  If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksIndirectNV-None-07634**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksIndirectNV-None-08664**
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksIndirectNV-None-07635**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksIndirectNV-None-07636**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksIndirectNV-None-08665**
  If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksIndirectNV-None-07637**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksIndirectNV-None-08666**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.
If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetLineStippleEnableEXT` in the current command buffer set `stippledLineEnable` to `VK_TRUE`, then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then
vkCmdSetDepthClipNegativeOneToOneEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08673
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage, then vkCmdSetDepthClipNegativeOneToOneEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07640
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV dynamic state enabled then vkCmdSetViewportWScalingEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08674
  If the bound graphics pipeline state was created with the VK_NV_clip_space_w_scaling extension is enabled, and a shader object is bound to any graphics stage, then vkCmdSetViewportWScalingEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07641
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled then vkCmdSetViewportSwizzleNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08675
  If the VK_NV_viewport_swizzle extension is enabled, and a shader object is bound to any graphics stage, then vkCmdSetViewportSwizzleNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07642
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV dynamic state enabled then vkCmdSetCoverageToColorEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08676
  If the VK_NV_fragment_coverage_to_color extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoverageToColorEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-07643
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV dynamic state enabled then vkCmdSetCoverageToColorLocationNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectNV-None-08677
  If the VK_NV_fragment_coverage_to_color extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetCoverageToColorEnableNV in the current command buffer set
coverageToColorEnable to VK_TRUE, then \texttt{vkCmdSetCoverageToColorLocationNV} \textbf{must} have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07644**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationModeNV} \textbf{must} have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08678**
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to VK_FALSE, then \texttt{vkCmdSetCoverageModulationModeNV} \textbf{must} have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07645**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationTableEnableNV} \textbf{must} have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08679**
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to VK_FALSE, and the most recent call to \texttt{vkCmdSetCoverageModulationModeNV} in the current command buffer set \texttt{coverageModulationMode} to any value other than \texttt{VK_COVERAGE_MODULATION_MODE_NONE_NV}, then \texttt{vkCmdSetCoverageModulationTableEnableNV} \textbf{must} have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07646**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetShadingRateImageEnableNV} \textbf{must} have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-08680**
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to VK_FALSE, and the most recent call to \texttt{vkCmdSetCoverageModulationTableEnableNV} in the current command buffer set \texttt{coverageModulationTableEnable} to VK_TRUE, then \texttt{vkCmdSetCoverageModulationTableNV} \textbf{must} have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07647**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetShadingRateImageEnableNV} \textbf{must} have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectNV-pipelineFragmentShadingRate-09238**
  If the \texttt{pipelineFragmentShadingRate} feature is enabled, and a shader object is bound to the
VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetFragmentShadingRateKHR must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08681
  If the shadingRateImage feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetShadingRateImageEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectNV-None-07648
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV dynamic state enabled then vkCmdSetRepresentativeFragmentTestEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08682
  If the representativeFragmentTest feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetRepresentativeFragmentTestEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectNV-None-07649
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV dynamic state enabled then vkCmdSetCoverageReductionModeNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08683
  If the coverageReductionMode feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoverageReductionModeNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectNV-pColorBlendEnables-07470
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT state enabled and the last call to vkCmdSetColorBlendEnableEXT set pColorBlendEnables for any attachment to VK_TRUE, then for those attachments in the subpass the corresponding image view’s format features must contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT

• VUID-vkCmdDrawMeshTasksIndirectNV-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must follow the rules for a zero-attachment subpass

• VUID-vkCmdDrawMeshTasksIndirectNV-samples-07472
If the bound graphics pipeline state was created with the
`VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the
`VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in
the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the
`VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create
the bound graphics pipeline

• VUID-vkCmdDrawMeshTasksIndirectNV-samples-07473
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT`
  states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT`
  must be greater or equal to the `rasterizationSamples` parameter in the last call to
  `vkCmdSetRasterizationSamplesEXT`

• VUID-vkCmdDrawMeshTasksIndirectNV-rasterizationSamples-07474
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the
  `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are
  enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or
  depth/stencil attachments

• VUID-vkCmdDrawMeshTasksIndirectNV-None-09211
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to
  any graphics stage, and the current render pass instance includes a
  `VkMultisampledRenderToSingleSampledInfoEXT` structure with
  `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples`
  in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the
  `rasterizationSamples` member of that structure

• VUID-vkCmdDrawMeshTasksIndirectNV-firstAttachment-07476
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then
  `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer
  prior to this drawing command, and the attachments specified by the `firstAttachment`
  and `attachmentCount` parameters of `vkCmdSetColorBlendEnableEXT` calls must specify an enable
  for all active color attachments in the current subpass

• VUID-vkCmdDrawMeshTasksIndirectNV-firstAttachment-07477
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then
  `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer
  prior to this drawing command, and the attachments specified by the `firstAttachment`
  and `attachmentCount` parameters of `vkCmdSetColorBlendEquationEXT` calls must specify the blend
  equations for all active color attachments in the current subpass where blending is
  enabled

• VUID-vkCmdDrawMeshTasksIndirectNV-firstAttachment-07478
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then
vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorWriteMaskEXT calls must specify the color write mask for all active color attachments in the current subpass

- VUID-vkCmdDrawMeshTasksIndirectNV-firstAttachment-07479
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawMeshTasksIndirectNV-advancedBlendMaxColorAttachments-07480
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments

- VUID-vkCmdDrawMeshTasksIndirectNV-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, and the bound graphics pipeline was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT must have set the rasterizationStream to zero

- VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsPerPixel-07483
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsEnable-07484
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, and the current subpass has a depth/stencil attachment, then that attachment must have been created
with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- **VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsEnable-07485**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- **VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsEnable-07486**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`

- **VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsEnable-07487**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawMeshTasksIndirectNV-sampleLocationsEnable-07936**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationsPerPixel` must equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to `VK_TRUE`, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set the `coverageToColorEnable` to `VK_TRUE`, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV coverageToColorLocation`, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.

If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode` is different, then the current `rasterizationSamples`, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by `vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

If the bound graphics pipeline state was created with the...
VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportSwizzleNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount.

- VUID-vkCmdDrawMeshTasksIndirectNV-rasterizationSamples-07494
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if the current subpass has any color attachments and rasterizationSamples of the last call to vkCmdSetRasterizationSamplesEXT is greater than the number of color samples, then the pipeline sampleShadingEnable must be VK_FALSE.

- VUID-vkCmdDrawMeshTasksIndirectNV-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT, then the stippledRectangularLines feature must be enabled.

- VUID-vkCmdDrawMeshTasksIndirectNV-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT, then the stippledBresenhamLines feature must be enabled.

- VUID-vkCmdDrawMeshTasksIndirectNV-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT, then the stippledSmoothLines feature must be enabled.

- VUID-vkCmdDrawMeshTasksIndirectNV-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT, then the stippledRectangularLines feature must be enabled and VkPhysicalDeviceLimits::strictLines must be VK_TRUE.

- VUID-vkCmdDrawMeshTasksIndirectNV-conservativePointAndLineRasterization-07499
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, conservativePointAndLineRasterization is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the conservativeRasterizationMode set by the last call to vkCmdSetConservativeRasterizationModeEXT must be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT.
If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries must not be active.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state `vkCmdSetAttachmentFeedbackLoopEnableEXT` must have been called in the current command buffer prior to this drawing command.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`.

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`.

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`.

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`.

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`.

If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`.

If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`.

If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or
VK_SHADER_STAGE_MESH_BIT_EXT stages must have a valid VkShaderEXT bound, and the other must have no VkShaderEXT bound

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08694
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created without the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, a valid VkShaderEXT must be bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08695
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created with the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, there must be no VkShaderEXT bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there must be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08698
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same vkCreateShadersEXT call must also be bound

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08699
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same vkCreateShadersEXT call must not have any VkShaderEXT bound

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08878
  All bound graphics shader objects must have been created with identical or identically defined push constant ranges

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08879
  All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

• VUID-vkCmdDrawMeshTasksIndirectNV-None-08880
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectNV-pDynamicStates-08715
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call

2150
to *vkCmdSetDepthWriteEnable* must be *VK_FALSE*

- **VUID-vkCmdDrawMeshTasksIndirectNV-pDynamicStates-08716**
  If the bound graphics pipeline state includes a fragment shader stage, was created with *VK_DYNAMIC_STATE_STENCIL_WRITE_MASK* set in *VkPipelineDynamicStateCreateInfo::pDynamicStates*, and the fragment shader declares the *EarlyFragmentTests* execution mode and uses *OpStencilAttachmentReadEXT*, the *writeMask* parameter in the last call to *vkCmdSetStencilWriteMask* must be 0

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-09116**
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with *VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT*, and the format of any color attachment is *VK_FORMAT_E5B9G9R9_UFLOAT_PACK32*, the corresponding element of the *pColorWriteMasks* parameter of *vkCmdSetColorWriteMaskEXT* must either include all of *VK_COLOR_COMPONENT_R_BIT*, *VK_COLOR_COMPONENT_G_BIT*, and *VK_COLOR_COMPONENT_B_BIT*, or none of them

- **VUID-vkCmdDrawMeshTasksIndirectNV-maxFragmentDualSrcAttachments-09239**
  If *blending* is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of *Location* for any output attachment statically used in the *Fragment Execution Model* executed by this command must be less than *maxFragmentDualSrcAttachments*

- **VUID-vkCmdDrawMeshTasksIndirectNV-stage-06480**
  The bound graphics pipeline must not have been created with the *VkPipelineShaderStageCreateInfo::stage* member of an element of *VkGraphicsPipelineCreateInfo::pStages* set to *VK_SHADER_STAGE_VERTEX_BIT*, *VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT*, *VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT* or *VK_SHADER_STAGE_GEOMETRY_BIT*

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07074**
  *Transform Feedback Queries* must not be active

- **VUID-vkCmdDrawMeshTasksIndirectNV-None-07075**
  *Primitives Generated Queries* must not be active

- **VUID-vkCmdDrawMeshTasksIndirectNV-pipelineStatistics-07076**
  The *pipelineStatistics* member used to create any active *Pipeline Statistics Query* must not contain *VK_QUERY_PIPELINE_STATISTIC_INPUT.AssemblyVERTICES_BIT*, *VK_QUERY_PIPELINE_STATISTIC_INPUT.AssemblyPRIMITIVES_BIT*, *VK_QUERY_PIPELINE_STATISTIC_VERTEX_SHADER_INVOCATIONS_BIT*, *VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_INVOCATIONS_BIT*, *VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_PRIMITIVES_BIT*, *VK_QUERY_PIPELINE_STATISTIC_CLIPPING_INVOCATIONS_BIT*, *VK_QUERY_PIPELINE_STATISTIC_CLIPPING_PRIMITIVES_BIT*, *VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_CONTROL_SHADER_PATCHES_BIT*, *VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT*, or *VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT*

- **VUID-vkCmdDrawMeshTasksIndirectNV-buffer-02708**
  If *buffer* is non-sparse then it must be bound completely and contiguously to a single *VkDeviceMemory* object
buffer must have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set

offset must be a multiple of 4

commandBuffer must not be a protected command buffer

If the multiDrawIndirect feature is not enabled, drawCount must be 0 or 1

drawCount must be less than or equal to VkPhysicalDeviceLimits::maxDrawIndirectCount

If drawCount is greater than 1, stride must be a multiple of 4 and must be greater than or equal to sizeof(VkDrawMeshTasksIndirectCommandNV)

If drawCount is equal to 1, (offset + sizeof(VkDrawMeshTasksIndirectCommandNV)) must be less than or equal to the size of buffer

If drawCount is greater than 1, (stride × (drawCount - 1) + offset + sizeof (VkDrawMeshTasksIndirectCommandNV)) must be less than or equal to the size of buffer

The current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS must contain a shader stage using the MeshNV Execution Model

Valid Usage (Implicit)

commandBuffer must be a valid VkCommandBuffer handle

buffer must be a valid VkBuffer handle

commandBuffer must be in the recording state

The VkCommandPool that commandBuffer was allocated from must support graphics operations

This command must only be called inside of a render pass instance

This command must only be called outside of a video coding scope

Both of buffer, and commandBuffer must have been created, allocated, or retrieved from the same VkDevice
Host Synchronization

- Host access to `commandBuffer` must be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized

Command Properties

<table>

The `VkDrawMeshTasksIndirectCommandNV` structure is defined as:

```c
// Provided by VK_NV_mesh_shader
typedef struct VkDrawMeshTasksIndirectCommandNV {
    uint32_t taskCount;
    uint32_t firstTask;
} VkDrawMeshTasksIndirectCommandNV;
```

- `taskCount` is the number of local workgroups to dispatch in the X dimension. Y and Z dimension are implicitly set to one.
- `firstTask` is the X component of the first workgroup ID.

The members of `VkDrawMeshTasksIndirectCommandNV` have the same meaning as the similarly named parameters of `vkCmdDrawMeshTasksNV`.

Valid Usage

- `VUID-VkDrawMeshTasksIndirectCommandNV-taskCount-02175`
  
  `taskCount` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesNV::maxDrawMeshTasksCount`

To record an indirect mesh tasks drawing command with the draw count sourced from a buffer, call:

```c
// Provided by VK_NV_mesh_shader
void vkCmdDrawMeshTasksIndirectCountNV(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    VkBuffer countBuffer,
```
VkDeviceSize countBufferOffset,
uint32_t maxDrawCount,
uint32_t stride);

- **commandBuffer** is the command buffer into which the command is recorded.
- **buffer** is the buffer containing draw parameters.
- **offset** is the byte offset into **buffer** where parameters begin.
- **countBuffer** is the buffer containing the draw count.
- **countBufferOffset** is the byte offset into **countBuffer** where the draw count begins.
- **maxDrawCount** specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in **countBuffer** and **maxDrawCount**.
- **stride** is the byte stride between successive sets of draw parameters.

`vkCmdDrawMeshTasksIndirectCountNV` behaves similarly to `vkCmdDrawMeshTasksIndirectNV` except that the draw count is read by the device from a buffer during execution. The command will read an unsigned 32-bit integer from **countBuffer** located at **countBufferOffset** and use this as the draw count.

**Valid Usage**

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-magFilter-04553**
  If a **VkSampler** created with **magFilter** or **minFilter** equal to **VK_FILTER_LINEAR** and **compareEnable** equal to **VK_FALSE** is used to sample a **VkImageView** as a result of this command, then the image view's format features must contain **VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT**

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-mipmapMode-04770**
  If a **VkSampler** created with **mipmapMode** equal to **VK_SAMPLER_MIPMAP_MODE_LINEAR** and **compareEnable** equal to **VK_FALSE** is used to sample a **VkImageView** as a result of this command, then the image view's format features must contain **VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT**

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-06479**
  If a **VkImageView** is sampled with depth comparison, the image view's format features must contain **VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT**

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-02691**
  If a **VkImageView** is accessed using atomic operations as a result of this command, then the image view's format features must contain **VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT**

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07888**
  If a **VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER** descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features must contain **VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT**

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-02692**
  If a **VkImageView** is sampled with **VK_FILTER_CUBIC_EXT** as a result of this command, then
VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it must not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command must have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-cubicRangeClamp-09212
  If the cubicRangeClamp feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must not have a VkSamplerReductionModeCreateInfo reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-reductionMode-09213
  Any VkImageView being sampled with a VkSamplerReductionModeCreateInfo::reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM as a result of this command must sample with VK_FILTER_CUBIC_EXT.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-selectableCubicWeights-09214
  If the selectableCubicWeights feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must have VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights equal to VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-flags-02696
  Any VkImage created with a VkImageCreateInfo::flags containing VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV sampled as a result of this command must only be sampled using a VkSamplerAddressMode of VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view’s format features must contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view’s format features must contain...
For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

For each set \( n \) that is statically used by a bound shader, a descriptor set must have been bound to \( n \) at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set \( n \), with the `VkPipelineLayout` or `VkDescriptorSetLayout` array that was used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

For each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

If the `maintenance4` feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, must be valid if they are statically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` must have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by any
**VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08117**
  If the descriptors used by the **VkPipeline** bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound **VkPipeline** **must** have been created with **VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT**

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08119**
  If a descriptor is dynamically used with a **VkPipeline** created with **VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT**, the descriptor memory **must** be resident

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08605**
  If a descriptor is dynamically used with a **VkPipeline** created with a **VkDescriptorSetLayout** that was created with **VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT**, the descriptor memory **must** be resident

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08606**
  If the **shaderObject** feature is not enabled, a valid pipeline **must** be bound to the pipeline bind point used by this command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08607**
  If the **shaderObject** is enabled, either a valid pipeline **must** be bound to the pipeline bind point used by this command, or a valid combination of valid and **VK_NULL_HANDLE** shader objects **must** be bound to every supported shader stage corresponding to the pipeline bind point used by this command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08608**
  If a pipeline is bound to the pipeline bind point used by this command, there **must** not have been any calls to dynamic state setting commands for any state not specified as dynamic in the **VkPipeline** object bound to the pipeline bind point used by this command, since that pipeline was bound

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08609**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler **must** not be used to sample from any **VkImage** with a **VkImageView** of the type **VK_IMAGE_VIEW_TYPE_3D**, **VK_IMAGE_VIEW_TYPE_CUBE**, **VK_IMAGE_VIEW_TYPE_1D_ARRAY**, **VK_IMAGE_VIEW_TYPE_2D_ARRAY** or **VK_IMAGE_VIEW_TYPE_CUBE_ARRAY**, in any shader stage

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08610**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V **OpImageSample** or **OpImageSparseSample** instructions with **ImplicitLod**, **Dref** or **Proj** in their name, in any shader stage

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08611**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler
must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-uniformBuffers-06935**
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT` or `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT` for uniformBuffers, and the `robustBufferAccess` feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08612**
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-storageBuffers-06936**
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT` or `VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT` for storageBuffers, and the `robustBufferAccess` feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08613**
  If the `robustBufferAccess` feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-commandBuffer-02707**
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by bound shaders must not be a protected resource

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-06550**
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'CbCr conversion, that object must only be used with OpImageSample* or OpImageSparseSample* instructions

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-ConstOffset-06551**
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'CbCr conversion, that object must not use the ConstOffset and Offset operands

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-viewType-07752**
  If a VkImageView is accessed as a result of this command, then the image view's viewType must match the Dim operand of the OpTypeImage as described in Instruction/Sampler/Image View Validation

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-format-07753**
  If a VkImageView is accessed as a result of this command, then the numeric type of the
image view's format and the Sampled Type operand of the OpTypeImage must match

- VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageWrite-08795
  If a VkImageView created with a format other than VK_FORMAT_A8_UNORM_KHR is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have at least as many components as the image view's format

- VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageWrite-08796
  If a VkImageView created with the format VK_FORMAT_A8_UNORM_KHR is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have four components

- VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageWrite-04469
  If a VkImageView is accessed using OpImageWrite as a result of this command, then the Type of the Texel operand of that instruction must have at least as many components as the buffer view's format

- VUID-vkCmdDrawMeshTasksIndirectCountNV-SampledType-04470
  If a VkImageView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 64

- VUID-vkCmdDrawMeshTasksIndirectCountNV-SampledType-04471
  If a VkImageView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32

- VUID-vkCmdDrawMeshTasksIndirectCountNV-SampledType-04472
  If a VkBufferView with a VkFormat that has a 64-bit component width is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 64

- VUID-vkCmdDrawMeshTasksIndirectCountNV-SampledType-04473
  If a VkBufferView with a VkFormat that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32

- VUID-vkCmdDrawMeshTasksIndirectCountNV-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageWeightedSampleQCOM-06971
  If OpImageWeightedSampleQCOM is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM

- VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageWeightedSampleQCOM-06972
  If OpImageWeightedSampleQCOM uses a VkImageView as a sample weight image as a result of
this command, then the image view's format features must contain
VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageBoxFilterQCOM-06973
  If OpImageBoxFilterQCOM is used to sample a VkImageView as a result of this command, then the image view's format features must contain
  VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageBlockMatchSSDQCOM-06974
  If OpImageBlockMatchSSDQCOM is used to read from an VkImageView as a result of this command, then the image view's format features must contain
  VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageBlockMatchSADQCOM-06975
  If OpImageBlockMatchSADQCOM is used to read from an VkImageView as a result of this command, then the image view's format features must contain
  VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageBlockMatchSSDQCOM-06976
  If OpImageBlockMatchSSDQCOM or OpImageBlockMatchSSDQCOM is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageWeightedSampleQCOM-06977
  If OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler must have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageWeightedSampleQCOM-06978
  If any command other than OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler must not have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageBlockMatchWindow-09215
  If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view's format features must contain
  VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageBlockMatchWindow-09216
  If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view's format must be a single-component format.

• VUID-vkCmdDrawMeshTasksIndirectCountNV-OpImageBlockMatchWindow-09217
  If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07288
Any shader invocation executed by this command must terminate

- VUID-vkCmdDrawMeshTasksIndirectCountNV-renderPass-02684
  The current render pass must be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawMeshTasksIndirectCountNV-subpass-02685
  The subpass index of the current render pass must be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07748
  If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set

- VUID-vkCmdDrawMeshTasksIndirectCountNV-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it must be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07469
  Input attachment views accessed in a subpass must be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments [InputAttachmentIndex] in the currently bound VkFramebuffer as specified by Fragment Input Attachment Compatibility

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-06537
  Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-09000
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  
  ◦ the VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  
  ◦ the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_COLOR_BIT and
    
    - there is no currently bound graphics pipeline or
    
    - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-09001
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  
  ◦ the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_DEPTH_BIT` and

- there is no currently bound graphics pipeline or
- the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-09002
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:

  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT` and

    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it **must** not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-06539
  If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, **depth writes must be disabled**

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back **writeMask** are not zero, and stencil test is enabled, **all stencil ops must be** `VK_STENCIL_OP_KEEP`

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07831
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07832
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07833
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled then `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08617**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08618**
  If a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08619**
  If a shader object that outputs line primitives is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT` stage, `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07834**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS` dynamic state enabled then `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08620**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBiasEnable` in the current command buffer set `depthBiasEnable` to `VK_TRUE`, `vkCmdSetDepthBias` or `vkCmdSetDepthBias2EXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07835**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled then `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08621**
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer set any element of `pColorBlendEnables` to `VK_TRUE`, and the most recent call to `vkCmdSetColorBlendEquationEXT` in the current command buffer set the same element of `pColorBlendEquations` to a `VkColorBlendEquationEXT` structure with any `VkBlendFactor` member with a value of `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBoundsTestEnable` in the current command buffer set `depthBoundsTestEnable` to `VK_TRUE`, then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled then `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled then `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command.

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`.
If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE` and the current subpass has a depth/stencil attachment, then that attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEXT` **must** have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetSampleLocationsEnableEXT` in the current command buffer set `sampleLocationsEnable` to `VK_TRUE`, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEXT` **must** have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_PERPIXEL` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` **must** equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled then `vkCmdSetCullMode` **must** have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCullMode` **must** have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled then `vkCmdSetFrontFace` **must** have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFrontFace` **must** have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthTestEnable` **must** have been called in the current command buffer prior to this drawing command.
this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08629
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthTestEnable` must have been
  called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07844
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled then
  `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to
  this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08630
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been
  called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07845
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then
  `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to
  this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08631
  If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled,
  and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command
  buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable`
  must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07846
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then
  `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to
  this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08632
  If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled,
  and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command
  buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable`
  must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07847
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then
  `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to
  this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08633
If a shader object is bound to any graphics stage, and the most recent call to
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetStencilTestEnable} must have been
called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07848
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_STENCIL_OP}
dynamic state enabled then \texttt{vkCmdSetStencilOp} must have been called in the current
command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08634
  If a shader object is bound to any graphics stage, and the most recent call to
\texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set
\texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to
\texttt{vkCmdSetStencilTestEnable} in the current command buffer set \texttt{stencilTestEnable}
to \texttt{VK_TRUE}, then \texttt{vkCmdSetStencilOp} must have been called in the current command buffer
prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-viewportCount-03417
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT}
dynamic state enabled, but not the \texttt{VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT} dynamic state enabled, then
\texttt{vkCmdSetViewportWithCount} must have been called in the current command buffer
prior to this drawing command, and the \texttt{viewportCount} parameter of
\texttt{vkCmdSetViewportWithCount} must match the \texttt{VkPipelineViewportStateCreateInfo::scissorCount}
of the pipeline

- VUID-vkCmdDrawMeshTasksIndirectCountNV-scissorCount-03418
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT}
dynamic state enabled, but not the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic state enabled, then
\texttt{vkCmdSetScissorWithCount} must have been called in the current command buffer prior
to this drawing command, and the \texttt{scissorCount} parameter of \texttt{vkCmdSetScissorWithCount}
must match the \texttt{VkPipelineViewportStateCreateInfo::viewportCount} of the pipeline

- VUID-vkCmdDrawMeshTasksIndirectCountNV-viewportCount-03419
  If the bound graphics pipeline state was created with both the
\texttt{VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic
states enabled then both \texttt{vkCmdSetViewportWithCount} and \texttt{vkCmdSetScissorWithCount}
must have been called in the current command buffer prior to this drawing command,
and the \texttt{viewportCount} parameter of \texttt{vkCmdSetViewportWithCount} must match the
\texttt{scissorCount} parameter of \texttt{vkCmdSetScissorWithCount}

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08635
  If a shader object is bound to any graphics stage, then both \texttt{vkCmdSetViewportWithCount}
and \texttt{vkCmdSetScissorWithCount} must have been called in the current command buffer
prior to this drawing command, and the \texttt{viewportCount} parameter of
\texttt{vkCmdSetViewportWithCount} must match the \texttt{scissorCount} parameter of
\texttt{vkCmdSetScissorWithCount}

- VUID-vkCmdDrawMeshTasksIndirectCountNV-viewportCount-04137
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic state enabled, then the bound graphics pipeline **must** have been created with VkPipelineViewportWScalingStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountNVviewportCount-04138
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportWScalingNV **must** be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-09232
  If a shader object is bound to any graphics stage, and the VK_NV_clip_space_w_scaling extension is enabled on the device, then vkCmdSetViewportWScalingNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08636
  If a shader object is bound to any graphics stage, and the VK_NV_clip_space_w_scaling extension is enabled on the device, then the viewportCount parameter in the last call to vkCmdSetViewportWScalingNV **must** be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountNVviewportCount-04139
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic state enabled, then the bound graphics pipeline **must** have been created with VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountNVviewportCount-04140
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV **must** be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountNV-shadingRateImage-09233
  If the shadingRateImage feature is enabled, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoarseSampleOrderNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-shadingRateImage-09234
  If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetShadingRateImageEnableNV in the current command buffer set shadingRateImageEnable to VK_TRUE, then vkCmdSetViewportShadingRatePaletteNV must
have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08637
If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, then the viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawMeshTasksIndirectCountNV-VkPipelineViewportCreateInfo-04141
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportSwizzleStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawMeshTasksIndirectCountNV-VkPipelineViewportCreateInfo-04142
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportExclusiveScissorStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07878
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV dynamic state enabled then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07879
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV dynamic state enabled then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-exclusiveScissor-09235
If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08638
If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetExclusiveScissorEnableNV in the current command buffer set any element of pExclusiveScissorEnables to VK_TRUE, then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-04876
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command
If a shader object is bound to any graphics stage, then `vkCmdSetRasterizerDiscardEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled, then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled, then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value.

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view’s `format_features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`.

If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments.

If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment.
member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment

- VUID-vkCmdDrawMeshTasksIndirectCountNV-imageView-06176
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment

- VUID-vkCmdDrawMeshTasksIndirectCountNV-imageView-06177
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment

- VUID-vkCmdDrawMeshTasksIndirectCountNV-viewMask-06178
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`

- VUID-vkCmdDrawMeshTasksIndirectCountNV-colorAttachmentCount-06179
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`

- VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-08910
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline

- VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-08911
  If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-08912
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`
::colorAttachmentCount greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView equal to VK_NULL_HANDLE must have the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the currently bound pipeline equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07749
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled then vkCmdSetColorWriteEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08646
  If the colorWriteEnable feature is enabled on the device, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorWriteEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-attachmentCount-07750
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled then the attachmentCount parameter of vkCmdSetColorWriteEnableEXT must be greater than or equal to the VkPipelineColorBlendStateCreateInfo::attachmentCount of the currently bound graphics pipeline

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08647
  If the colorWriteEnable feature is enabled on the device, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07751
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled then vkCmdSetDiscardRectangleEXT must have been called in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07880
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled then vkCmdSetDiscardRectangleEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-rasterizerDiscardEnable-09236
  If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDiscardRectangleEXT must have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08648
  If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any
  graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the
  current command buffer set rasterizerDiscardEnable to VK_FALSE, then
  vkCmdSetDiscardRectangleEnableEXT must have been called in the current command
  buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07881
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled then
  vkCmdSetDiscardRectangleModeEXT must have been called in the current command
  buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08649
  If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any
  graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the
  current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call
  to vkCmdSetDiscardRectangleEnableEXT in the current command buffer set
discardRectangleEnable to VK_TRUE, then vkCmdSetDiscardRectangleModeEXT must have
  been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-
  08913
  If the current render pass instance was begun with vkCmdBeginRendering, the
dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo
::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of
VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound
graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-
  08914
  If current render pass instance was begun with vkCmdBeginRendering, the
dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo
::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of
VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound
graphics pipeline must be equal to the VkFormat used to create
VkRenderingInfo::pDepthAttachment->imageView

• VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-
  08915
  If the current render pass instance was begun with vkCmdBeginRendering, the
dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo
::pDepthAttachment->imageView was not VK_NULL_HANDLE, and the value of
VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound
graphics pipeline was not equal to the VkFormat used to create
VkRenderingInfo::pDepthAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-
  08916
  If the current render pass instance was begun with vkCmdBeginRendering, the
dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo

pStencilAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline must be equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView

• VUID-vkCmdDrawMeshTasksIndirectCountNV-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is enabled, VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, and the value of VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the currently bound graphics pipeline was not equal to the VkFormat used to create VkRenderingInfo::pStencilAttachment->imageView, the value of the format must be VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawMeshTasksIndirectCountNV-imageView-06183
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR

• VUID-vkCmdDrawMeshTasksIndirectCountNV-imageView-06184
  If the current render pass instance was begun with vkCmdBeginRendering and VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView was not VK_NULL_HANDLE, the currently bound graphics pipeline must have been created with VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT

• VUID-vkCmdDrawMeshTasksIndirectCountNV-colorAttachmentCount-06185
  If the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and the current render pass instance was begun with vkCmdBeginRendering with a VkRenderingInfo::colorAttachmentCount parameter greater than 0, then each element of the VkRenderingInfo::pColorAttachments array with a imageView not equal to VK_NULL_HANDLE must have been created with a sample count equal to the corresponding element of the pColorAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline

• VUID-vkCmdDrawMeshTasksIndirectCountNV-pDepthAttachment-06186
  If the currently bound pipeline was created with a VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV structure, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of the depthStencilAttachmentSamples member of VkAttachmentSampleCountInfoAMD or VkAttachmentSampleCountInfoNV used to create the currently bound graphics pipeline must be equal to the sample count
used to create `VkRenderingInfo::pDepthAttachment->imageView` 

- VUID-vkCmdDrawMeshTasksIndirectCountNV-pStencilAttachment-06187
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView` 

- VUID-vkCmdDrawMeshTasksIndirectCountNV-multisampledRenderToSingleSampled-07285
  If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of `rasterizationSamples` for the currently bound graphics pipeline 

- VUID-vkCmdDrawMeshTasksIndirectCountNV-multisampledRenderToSingleSampled-07286
  If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView` 

- VUID-vkCmdDrawMeshTasksIndirectCountNV-multisampledRenderToSingleSampled-07287
  If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView` 

- VUID-vkCmdDrawMeshTasksIndirectCountNV-pNext-07935
  If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples` 

- VUID-vkCmdDrawMeshTasksIndirectCountNV-renderPass-06198
If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline \textbf{must} have been created with a \texttt{VkGraphicsPipelineCreateInfo::renderPass} equal to \texttt{VK_NULL_HANDLE}

\begin{itemize}
  \item VUID-vkCmdDrawMeshTasksIndirectCountNV-pColorAttachments-08963
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the \texttt{VkRenderingInfo::pColorAttachments->imageView} was not \texttt{VK_NULL_HANDLE}, then the corresponding element of \texttt{VkPipelineRenderingCreateInfo::pColorAttachmentFormats} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

  \item VUID-vkCmdDrawMeshTasksIndirectCountNV-pDepthAttachment-08964
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the \texttt{VkRenderingInfo::pDepthAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, then the \texttt{VkPipelineRenderingCreateInfo::depthAttachmentFormat} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

  \item VUID-vkCmdDrawMeshTasksIndirectCountNV-pStencilAttachment-08965
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, there is a graphics pipeline bound, stencil test is enabled and the \texttt{VkRenderingInfo::pStencilAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, then the \texttt{VkPipelineRenderingCreateInfo::stencilAttachmentFormat} used to create the pipeline \textbf{must} not be \texttt{VK_FORMAT_UNDEFINED}

  \item VUID-vkCmdDrawMeshTasksIndirectCountNV-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the \texttt{primitivesGeneratedQueryWithRasterizerDiscard} feature is not enabled and the \texttt{VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT} query is active, rasterization discard \textbf{must} not be enabled

  \item VUID-vkCmdDrawMeshTasksIndirectCountNV-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the \texttt{primitivesGeneratedQueryWithNonZeroStreams} feature is not enabled and the \texttt{VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT} query is active, the bound graphics pipeline \textbf{must} not have been created with a non-zero value in \texttt{VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream}

  \item VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07619
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT} dynamic state enabled then \texttt{vkCmdSetTessellationDomainOriginEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \item VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07620
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetDepthClampEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command

  \item VUID-vkCmdDrawMeshTasksIndirectCountNV-None-09237
  If a shader object is bound to the \texttt{VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT} stage, then
**VUID-vkCmdSetTessellationDomainOriginEXT** must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08650**
  If the depthClamp feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07621**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07622**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08652**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07623**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08653**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07624**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-alphaToCoverageEnable-08919**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and
alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08654
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07625
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08655
  If the alphaToOne feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07626
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled then vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08656
  If the logicOp feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07627
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08657
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment's value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then...
vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08662
  If the VK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetConservativeRasterizationModeEXT in the current command buffer set conservativeRasterizationMode to VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07633
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state enabled then vkCmdSetDepthClipEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08663
  If the depthClipEnable feature is enabled, and a shader object is bound to any graphics stage, then vkCmdSetDepthClipEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07634
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT dynamic state enabled then vkCmdSetSampleLocationsEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08664
  If the VK_EXT_sample_locations extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleLocationsEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07635
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07636
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT dynamic state enabled then vkCmdSetProvokingVertexModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08665
  If the VK_EXT_provoking_vertex extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, then vkCmdSetProvokingVertexModeEXT must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08672
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetLineStippleEnableEXT` in the current command buffer set `stippledLineEnable` to `VK_TRUE`, then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07639
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetLineStippleEnableEXT` in the current command buffer set `stippledLineEnable` to `VK_TRUE`, then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08673
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07640
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08674
  If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07641
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08675
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07642
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08676
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoverageToColorEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07643
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV dynamic state enabled then vkCmdSetCoverageToColorLocationNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08677
  If the VK_NV_fragment_coverage_to_color extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetCoverageToColorEnableNV in the current command buffer set coverageToColorEnable to VK_TRUE, then vkCmdSetCoverageToColorLocationNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07644
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV dynamic state enabled then vkCmdSetCoverageModulationModeNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08678
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoverageModulationModeNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07645
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV dynamic state enabled then vkCmdSetCoverageModulationTableEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08679
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetCoverageModulationModeNV in the current command buffer set coverageModulationMode to any value other than VK_COVERAGE_MODULATION_MODE_NONE_NV, then vkCmdSetCoverageModulationTableEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07646
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV dynamic state enabled then vkCmdSetCoverageModulationTableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08680
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the
current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationTableEnable` to `VK_TRUE`, then `vkCmdSetCoverageModulationTableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07647**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV` dynamic state enabled then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-pipelineFragmentShadingRate-09238**
  If the `pipelineFragmentShadingRate` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFragmentShadingRateKHR` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08681**
  If the `shadingRateImage` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07648**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV` dynamic state enabled then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08682**
  If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07649**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08683**
  If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view’s format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-samples-07473**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-rasterizationSamples-07474**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-09211**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the `rasterizationSamples` member of that structure.

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-firstAttachment-07476**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEnableEXT` calls must specify an enable for all active color attachments in the current subpass.
• VUID-vkCmdDrawMeshTasksIndirectCountNV-firstAttachment-07477
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then
vkCmdSetColorBlendEquationEXT must have been called in the current command buffer
prior to this drawing command, and the attachments specified by the firstAttachment and
attachmentCount parameters of vkCmdSetColorBlendEquationEXT calls must specify the blend
equations for all active color attachments in the current subpass where blending is enabled

• VUID-vkCmdDrawMeshTasksIndirectCountNV-firstAttachment-07478
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then
vkCmdSetColorWriteMaskEXT must have been called in the current command buffer
prior to this drawing command, and the attachments specified by the firstAttachment and
attachmentCount parameters of vkCmdSetColorWriteMaskEXT calls must specify the color
write mask for all active color attachments in the current subpass

• VUID-vkCmdDrawMeshTasksIndirectCountNV-firstAttachment-07479
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then
vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer
prior to this drawing command, and the attachments specified by the firstAttachment and
attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

• VUID-vkCmdDrawMeshTasksIndirectCountNV-advancedBlendMaxColorAttachments-07480
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT
dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and
vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of
active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments

• VUID-vkCmdDrawMeshTasksIndirectCountNV-primitivesGeneratedQueryWithNonZeroStreams-07481
If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the
VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, and the bound graphics pipeline
was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to
vkCmdSetRasterizationStreamEXT must have set the rasterizationStream to zero

• VUID-vkCmdDrawMeshTasksIndirectCountNV-sampleLocationsPerPixel-07482
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the
sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to
vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the
VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`.

If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code must not statically use the extended instruction `InterpolateAtSample`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by...
vkGetPhysicalDeviceMultisamplePropertiesEXT with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-sampleLocationsEnable-07937**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-sampleLocationsEnable-07938**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationsPerPixel` must equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-coverageModulationTableEnable-07488**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to `VK_TRUE`, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-rasterizationSamples-07489**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-coverageToColorEnable-07490**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set the `coverageToColorEnable` to `VK_TRUE`, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV coverageToColorLocation`, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-coverageReductionMode-07491**
  If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode`, then the current `rasterizationSamples`, and the
sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by
vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV

• VUID-vkCmdDrawMeshTasksIndirectCountNV-viewportCount-07492
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the
  VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV
  ::=viewportCount greater or equal to the viewportCount parameter in the last call to
  vkCmdSetViewportWithCount

• VUID-vkCmdDrawMeshTasksIndirectCountNV-viewportCount-07493
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic states enabled then the viewportCount parameter in the last call to
  vkCmdSetViewportSwizzleNV must be greater than or equal to the viewportCount parameter in the last call to
  vkCmdSetViewportWithCount

• VUID-vkCmdDrawMeshTasksIndirectCountNV-rasterizationSamples-07494
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if the current subpass has any color attachments and rasterizationSamples of the last call to
  vkCmdSetRasterizationSamplesEXT is greater than the number of color samples, then the pipeline sampleShadingEnable must be VK_FALSE

• VUID-vkCmdDrawMeshTasksIndirectCountNV-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or
  VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is
  VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT, then the stippledRectangularLines feature must be enabled

• VUID-vkCmdDrawMeshTasksIndirectCountNV-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or
  VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is
  VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT, then the stippledBresenhamLines feature must be enabled

• VUID-vkCmdDrawMeshTasksIndirectCountNV-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or
  VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is
  VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT, then the stippledSmoothLines feature must be enabled

• VUID-vkCmdDrawMeshTasksIndirectCountNV-stippledLineEnable-07498
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or
VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT, then the stippledRectangularLines feature must be enabled and VkPhysicalDeviceLimits::strictLines must be VK_TRUE

• VUID-vkCmdDrawMeshTasksIndirectCountNV-conservativePointAndLineRasterization-07499
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled, conservativePointAndLineRasterization is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the conservativeRasterizationMode set by the last call to vkCmdSetConservativeRasterizationModeEXT must be VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT

• VUID-vkCmdDrawMeshTasksIndirectCountNV-stage-07073
  If the currently bound pipeline was created with the VkPipelineShaderStageCreateInfo ::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT, then Mesh Shader Queries must not be active

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08877
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT dynamic state vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07850
  If dynamic state was inherited from VkCommandBufferInheritanceViewportScissorInfoNV, it must be set in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08684
  If there is no bound graphics pipeline, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_VERTEX_BIT

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08685
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT

• VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08688
If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08689**
  If there is no bound graphics pipeline, and the taskShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08690**
  If there is no bound graphics pipeline, and the meshShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08693**
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages must have a valid `VkShaderEXT` bound, and the other must have no `VkShaderEXT` bound

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08694**
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid `VkShaderEXT` must be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08695**
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created with the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, there must be no `VkShaderEXT` bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08696**
  If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there must be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08698**
  If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call must also be bound

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08699**
  If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call must not have any `VkShaderEXT` bound

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08878**
  All bound graphics shader objects must have been created with identical or identically defined push constant ranges

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08879**
All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-08880**
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage and the `attachmentFeedbackLoopDynamicState` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE` `vkCmdSetAttachmentFeedbackLoopEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-pDynamicStates-08715**
  If the bound graphics pipeline state includes a fragment shader stage, was created with `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` set in `VkPipelineDynamicStateCreateInfo`::`pDynamicStates`, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` must be `VK_FALSE`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-pDynamicStates-08716**
  If the bound graphics pipeline state includes a fragment shader stage, was created with `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` set in `VkPipelineDynamicStateCreateInfo`::`pDynamicStates`, and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` must be `0`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-09116**
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` must either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, and `VK_COLOR_COMPONENT_B_BIT`, or none of them

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-maxFragmentDualSrcAttachments-09239**
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of `Location` for any output attachment statically used in the Fragment Execution Model executed by this command must be less than `maxFragmentDualSrcAttachments`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-stage-06480**
  The bound graphics pipeline must not have been created with the `VkPipelineShaderStageCreateInfo`::`stage` member of an element of `VkGraphicsPipelineCreateInfo`::`pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07074**
  Transform Feedback Queries must not be active

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-None-07075**
  Primitives Generated Queries must not be active

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-pipelineStatistics-07076**
  The `pipelineStatistics` member used to create any active Pipeline Statistics Query must
not contain `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_VERTICES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_VERTEX_SHADER_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_CLIPPING_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_CLIPPING_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_CONTROL_SHADER_PATCHES_BIT`, or `VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-buffer-02708
  If `buffer` is non-sparse then it must be bound completely and contiguously to a single `VkDeviceMemory` object.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-buffer-02709
  `buffer` must have been created with the `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` bit set.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-offset-02710
  `offset` must be a multiple of 4.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-commandBuffer-02711
  `commandBuffer` must not be a protected command buffer.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-countBuffer-02714
  If `countBuffer` is non-sparse then it must be bound completely and contiguously to a single `VkDeviceMemory` object.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-countBuffer-02715
  `countBuffer` must have been created with the `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` bit set.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-countBufferOffset-02716
  `countBufferOffset` must be a multiple of 4.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-countBuffer-02717
  The count stored in `countBuffer` must be less than or equal to `VkPhysicalDeviceLimits::maxDrawIndirectCount`.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-countBufferOffset-04129
  `(countBufferOffset + sizeof(uint32_t))` must be less than or equal to the size of `countBuffer`.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-None-04445
  If `drawIndirectCount` is not enabled this function must not be used.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-stride-02182
  `stride` must be a multiple of 4 and must be greater than or equal to `sizeof(VkDrawMeshTasksIndirectCommandNV)`.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-maxDrawCount-02183
  If `maxDrawCount` is greater than or equal to 1, `(stride \times (maxDrawCount - 1) + offset + sizeof(VkDrawMeshTasksIndirectCommandNV))` must be less than or equal to the size of `buffer`.

- VUID-vkCmdDrawMeshTasksIndirectCountNV-countBuffer-02191
  If the count stored in `countBuffer` is equal to 1, `(offset + sizeof(VkDrawMeshTasksIndirectCommandNV))` must be less than or equal to the size of `buffer`.
If the count stored in `countBuffer` is greater than 1, \((\text{stride} \times (\text{drawCount} - 1) + \text{offset} + \text{sizeof(VkDrawMeshTasksIndirectCommandNV}))\) must be less than or equal to the size of `buffer`.

The current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` must contain a shader stage using the `MeshNV Execution Model`.

### Valid Usage (Implicit)

- **VUID-vkCmdDrawMeshTasksIndirectCountNV-commandBuffer-parameter**
  - `commandBuffer` must be a valid `VkCommandBuffer` handle.
- **VUID-vkCmdDrawMeshTasksIndirectCountNV-buffer-parameter**
  - `buffer` must be a valid `VkBuffer` handle.
- **VUID-vkCmdDrawMeshTasksIndirectCountNV-countBuffer-parameter**
  - `countBuffer` must be a valid `VkBuffer` handle.
- **VUID-vkCmdDrawMeshTasksIndirectCountNV-commandBuffer-recording**
  - `commandBuffer` must be in the recording state.
- **VUID-vkCmdDrawMeshTasksIndirectCountNV-commandBuffer-cmdpool**
  - The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations.
- **VUID-vkCmdDrawMeshTasksIndirectCountNV-renderpass**
  - This command must only be called inside of a render pass instance.
- **VUID-vkCmdDrawMeshTasksIndirectCountNV-videocoding**
  - This command must only be called outside of a video coding scope.
- **VUID-vkCmdDrawMeshTasksIndirectCountNV-commonparent**
  - Each of `buffer`, `commandBuffer`, and `countBuffer` must have been created, allocated, or retrieved from the same `VkDevice`.

### Host Synchronization

- Host access to `commandBuffer` must be externally synchronized.
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized.

### Command Properties

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render Pass Scope</th>
<th>Video Coding Scope</th>
<th>Supported Queue Types</th>
<th>Command Type</th>

To record a mesh tasks drawing command, call:

```c
// Provided by VK_EXT_mesh_shader
void vkCmdDrawMeshTasksEXT(
    VkCommandBuffer commandBuffer,
    uint32_t groupCountX,
    uint32_t groupCountY,
    uint32_t groupCountZ);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `groupCountX` is the number of local workgroups to dispatch in the X dimension.
- `groupCountY` is the number of local workgroups to dispatch in the Y dimension.
- `groupCountZ` is the number of local workgroups to dispatch in the Z dimension.

When the command is executed, a global workgroup consisting of `groupCountX × groupCountY × groupCountZ` local workgroups is assembled.

### Valid Usage

- **VUID-vkCmdDrawMeshTasksEXT-magFilter-04553**
  If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-mipmapMode-04770**
  If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-06479**
  If a `VkImageView` is sampled with depth comparison, the image view's format features must contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-02691**
  If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-07888**
  If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's format features must contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-02692**
  If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`.
If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it **must** not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY.

Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2.

Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command **must** have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified byVkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2.

If the cubicRangeClamp feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must not have** a VkSamplerReductionModeCreateInfo reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM.

Any VkImageView being sampled with a VkSamplerReductionModeCreateInfo::reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM as a result of this command **must** sample with VK_FILTER_CUBIC_EXT.

If the selectableCubicWeights feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command **must** have VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights equal to VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM.

Any VkImage created with a VkImageCreateInfo::flags containing VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV sampled as a result of this command **must** only be sampled using a VkSamplerAddressMode of VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE.

For any VkImage being written as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT.

For any VkImage being read as a storage image where the image format field of the OpTypeImage is Unknown, the view's format features **must** contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT.
For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view’s buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-OpTypeImage-07030**
  Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view’s buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08600**
  For each set $n$ that is statically used by a bound shader, a descriptor set must have been bound to $n$ at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set $n$, with the `VkPipelineLayout` or `VkDescriptorsetLayout` array that was used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

- **VUID-vkCmdDrawMeshTasksEXT-None-08601**
  For each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorsetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

- **VUID-vkCmdDrawMeshTasksEXT-maintenance4-08602**
  If the maintenance4 feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorsetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

- **VUID-vkCmdDrawMeshTasksEXT-None-08114**
  Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, must be valid if they are statically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08115**
  If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` must have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08116**
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08604**
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command.
If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline must have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT.

If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident.

If a descriptor is dynamically used with a VkShaderEXT created with a VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident.

If the shaderObject feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command.

If the shaderObject is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and VK_NULL_HANDLE shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command.

If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound.

If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used to sample from any VkImage with a VkImageView of the type VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, VK_IMAGE_VIEW_TYPE_1D_ARRAY, VK_IMAGE_VIEW_TYPE_2D_ARRAY or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY, in any shader stage.

If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name, in any shader stage.

If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage.
If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for storageBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point.

If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders must not be a protected resource.

If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'CaN conversion, that object must only be used with OpImageSample* or OpImageSparseSample* instructions.

If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'CaN conversion, that object must not use the ConstOffset and Offset operands.

If a VkImageView is accessed as a result of this command, then the image view's viewType must match the Dim operand of the OpTypeImage as described in Instruction/Sampler/Image View Validation.

If a VkImageView is accessed as a result of this command, then the numeric type of the image view's format and the Sampled Type operand of the OpTypeImage must match.
If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction must have at least as many components as the image view’s format.

- VUID-vkCmdDrawMeshTasksEXT-OpImageWrite-08796
  If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction must have four components.

- VUID-vkCmdDrawMeshTasksEXT-OpImageWrite-04469
  If a `VkBufferView` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction must have at least as many components as the buffer view’s format.

- VUID-vkCmdDrawMeshTasksEXT-SampledType-04470
  If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 64.

- VUID-vkCmdDrawMeshTasksEXT-SampledType-04471
  If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 32.

- VUID-vkCmdDrawMeshTasksEXT-SampledType-04472
  If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 64.

- VUID-vkCmdDrawMeshTasksEXT-SampledType-04473
  If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 32.

- VUID-vkCmdDrawMeshTasksEXT-sparseImageInt64Atomics-04474
  If the `sparseImageInt64Atomics` feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag must not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command.

- VUID-vkCmdDrawMeshTasksEXT-sparseImageInt64Atomics-04475
  If the `sparseImageInt64Atomics` feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag must not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command.

- VUID-vkCmdDrawMeshTasksEXT-OpImageWeightedSampleQCOM-06971
  If `OpImageWeightedSampleQCOM` is used to sample a `VkImageView` as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM`.

- VUID-vkCmdDrawMeshTasksEXT-OpImageWeightedSampleQCOM-06972
  If `OpImageWeightedSampleQCOM` uses a `VkImageView` as a sample weight image as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM`.
If \texttt{OpImageBoxFilterQCOM} is used to sample a \texttt{VkImageView} as a result of this command, then the image view's \textit{format features} must contain \texttt{VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM}.

If \texttt{OpImageBlockMatchSSDQCOM} is used to read from an \texttt{VkImageView} as a result of this command, then the image view's \textit{format features} must contain \texttt{VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM}.

If \texttt{OpImageBlockMatchSADQCOM} is used to read from an \texttt{VkImageView} as a result of this command, then the image view's \textit{format features} must contain \texttt{VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM}.

If \texttt{OpImageBlockMatchSSDQCOM} or \texttt{OpImageBlockMatchSADQCOM} is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.

If any command other than \texttt{OpImageWeightedSampleQCOM}, \texttt{OpImageBoxFilterQCOM}, \texttt{OpImageBlockMatchWindowSSDQCOM}, \texttt{OpImageBlockMatchWindowSADQCOM}, \texttt{OpImageBlockMatchGatherSSDQCOM}, \texttt{OpImageBlockMatchGatherSADQCOM}, \texttt{OpImageBlockMatchSSDQCOM}, or \texttt{OpImageBlockMatchSADQCOM} uses a \texttt{VkSampler} as a result of this command, then the sampler must not have been created with \texttt{VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM}.

Any shader invocation executed by this command must terminate.
The current render pass must be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawMeshTasksEXT-subpass-02685
  The subpass index of the current render pass must be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdDrawMeshTasksEXT-None-07748
  If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set

- VUID-vkCmdDrawMeshTasksEXT-OpTypeImage-07468
  If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it must be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass

- VUID-vkCmdDrawMeshTasksEXT-None-07469
  Input attachment views accessed in a subpass must be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass' pInputAttachments[InputAttachmentIndex] in the currently bound VkFramebuffer as specified by Fragment Input Attachment Compatibility

- VUID-vkCmdDrawMeshTasksEXT-None-06537
  Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksEXT-None-09000
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  - the VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  - the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_COLOR_BIT and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksEXT-None-09001
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  - the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  - the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_DEPTH_BIT and
- there is no currently bound graphics pipeline or
- the currently bound graphics pipeline was created with 
  `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

• VUID-vkCmdDrawMeshTasksEXT-None-09002
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT` and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

• VUID-vkCmdDrawMeshTasksEXT-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

• VUID-vkCmdDrawMeshTasksEXT-None-06539
  If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command must not write to that image subresource as an attachment

• VUID-vkCmdDrawMeshTasksEXT-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes must be disabled

• VUID-vkCmdDrawMeshTasksEXT-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back writeMask are not zero, and stencil test is enabled, all stencil ops must be `VK_STENCIL_OP_KEEP`

• VUID-vkCmdDrawMeshTasksEXT-None-07831
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT` dynamic state enabled then `vkCmdSetViewport` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07832
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR` dynamic state enabled then `vkCmdSetScissor` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07833
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_WIDTH` dynamic state enabled then `vkCmdSetLineWidth` must have been called in the current command buffer prior to this drawing command
If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPolygonModeEXT} in the current command buffer set \texttt{polygonMode} to \texttt{VK_POLYGON_MODE_LINE}, \texttt{vkCmdSetLineWidth} \textbf{must} have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the \texttt{VK_SHADER_STAGE_VERTEX_BIT} stage, and the most recent call to \texttt{vkCmdSetPrimitiveTopology} in the current command buffer set \texttt{primitiveTopology} to any line topology, \texttt{vkCmdSetLineWidth} \textbf{must} have been called in the current command buffer prior to this drawing command.

If a shader object that outputs line primitives is bound to the \texttt{VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT} or \texttt{VK_SHADER_STAGE_GEOMETRY_BIT} stage, \texttt{vkCmdSetLineWidth} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_BIAS} dynamic state enabled then \texttt{vkCmdSetDepthBias} or \texttt{vkCmdSetDepthBias2EXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetDepthBiasEnable} in the current command buffer set \texttt{depthBiasEnable} to \texttt{VK_TRUE}, \texttt{vkCmdSetDepthBias} or \texttt{vkCmdSetDepthBias2EXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_BLEND_CONSTANTS} dynamic state enabled then \texttt{vkCmdSetBlendConstants} \textbf{must} have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetColorBlendEnableEXT} in the current command buffer set any element of \texttt{pColorBlendEnables} to \texttt{VK_TRUE}, and the most recent call to \texttt{vkCmdSetColorBlendEquationEXT} in the current command buffer set the same element of \texttt{pColorBlendEquations} to a \texttt{VkColorBlendEquationEXT} structure with any \texttt{VkBlendFactor} member with a value of \texttt{VK_BLEND_FACTOR_CONSTANT_COLOR}, \texttt{VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR}, \texttt{VK_BLEND_FACTOR_CONSTANT_ALPHA}, or \texttt{VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA}, \texttt{vkCmdSetBlendConstants} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_BOUNDS} dynamic state enabled then \texttt{vkCmdSetDepthBounds} \textbf{must} have been called in the current command buffer prior to this drawing command.
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBoundsTestEnable` in the current command buffer set `depthBoundsTestEnable` to `VK_TRUE`, then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled then `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled then `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled then `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command.

If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`.

If the bound graphics pipeline was created with...
VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawMeshTasksEXT-None-06666
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08626
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetSampleLocationsEnableEXT in the current command buffer set sampleLocationsEnable to VK_TRUE, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-sampleLocationsPerPixel-07934
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawMeshTasksEXT-None-07840
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08627
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07841
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_FRONT_FACE dynamic state enabled then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08628
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetFrontFace must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07843
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled then vkCmdSetDepthTestEnable must have been called in the current command buffer prior to this drawing command
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthTestEnable` in the current command buffer set `depthTestEnable` to `VK_TRUE`, then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetStencilTestEnable must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07848
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_OP dynamic state enabled then vkCmdSetStencilOp must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08634
If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, then vkCmdSetStencilOp must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-viewportCount-03417
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, then vkCmdSetViewportWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the VkPipelineViewportStateCreateInfo::scissorCount of the pipeline

- VUID-vkCmdDrawMeshTasksEXT-scissorCount-03418
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, then vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the scissorCount parameter of vkCmdSetScissorWithCount must match the VkPipelineViewportStateCreateInfo::viewportCount of the pipeline

- VUID-vkCmdDrawMeshTasksEXT-viewportCount-03419
If the bound graphics pipeline state was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the scissorCount parameter of vkCmdSetScissorWithCount

- VUID-vkCmdDrawMeshTasksEXT-None-08635
If a shader object is bound to any graphics stage, then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the scissorCount parameter of vkCmdSetScissorWithCount

- VUID-vkCmdDrawMeshTasksEXT-viewportCount-04137
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic state enabled, then the bound graphics
pipeline **must** have been created with `VkPipelineViewportWScalingStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawMeshTasksEXT-viewportCount-04138**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawMeshTasksEXT-None-09232**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then `vkCmdSetViewportWScalingNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-08636**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawMeshTasksEXT-viewportCount-04139**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic state enabled, then the bound graphics pipeline **must** have been created with `VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawMeshTasksEXT-viewportCount-04140**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawMeshTasksEXT-shadingRateImage-09233**
  If the shadingRateImage feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-shadingRateImage-09234**
  If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, and the most recent call to `vkCmdSetShadingRateImageEnableNV` in the current command buffer set shadingRateImageEnable to `VK_TRUE`, then `vkCmdSetViewportShadingRatePaletteNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-08637**
If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, then the viewportCount parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

- VUID-vkCmdDrawMeshTasksEXT-VkPipelineViewportCreateInfo-04141
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a `VkPipelineViewportSwizzleStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

- VUID-vkCmdDrawMeshTasksEXT-VkPipelineViewportCreateInfo-04142
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a `VkPipelineViewportExclusiveScissorStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount` greater or equal to the viewportCount parameter in the last call to `vkCmdSetViewportWithCount`.

- VUID-vkCmdDrawMeshTasksEXT-None-07878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV dynamic state enabled then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksEXT-None-07879
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV dynamic state enabled then `vkCmdSetExclusiveScissorNV` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksEXT-exclusiveScissor-09235
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksEXT-None-08638
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetExclusiveScissorEnableNV` in the current command buffer set any element of `pExclusiveScissorEnables` to VK_TRUE, then `vkCmdSetExclusiveScissorNV` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksEXT-None-04876
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled then `vkCmdSetRasterizerDiscardEnable` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawMeshTasksEXT-None-08639
  If a shader object is bound to any graphics stage, then `vkCmdSetRasterizerDiscardEnable`...
must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-04877
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE` dynamic state enabled then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08640
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthBiasEnable` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-logicOp-04878
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_EXT` dynamic state enabled then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value

- VUID-vkCmdDrawMeshTasksEXT-None-08641
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the `logicOp` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEXT` must have been called in the current command buffer prior to this drawing command and the `logicOp` must be a valid `VkLogicOp` value

- VUID-vkCmdDrawMeshTasksEXT-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1

- VUID-vkCmdDrawMeshTasksEXT-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1

- VUID-vkCmdDrawMeshTasksEXT-blendEnable-04727
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view's format features do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be `VK_FALSE`

- VUID-vkCmdDrawMeshTasksEXT-None-08643
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view’s format features do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`.

- **VUID-vkCmdDrawMeshTasksEXT-multisampledRenderToSingleSampled-07284**
  If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawMeshTasksEXT-None-08644**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawMeshTasksEXT-None-08876**
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`.

- **VUID-vkCmdDrawMeshTasksEXT-imageView-06172**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

- **VUID-vkCmdDrawMeshTasksEXT-imageView-06173**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

- **VUID-vkCmdDrawMeshTasksEXT-imageView-06174**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

- **VUID-vkCmdDrawMeshTasksEXT-imageView-06175**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.
If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline.

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.

If the bound graphics pipeline state was created with the...
VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT dynamic state enabled then
\texttt{vkCmdSetColorWriteEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08646
  If the \texttt{colorWriteEnable} feature is enabled on the device, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetColorWriteEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-attachmentCount-07750
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT} dynamic state enabled then the \texttt{attachmentCount} parameter of \texttt{vkCmdSetColorWriteEnableEXT} must be greater than or equal to the \texttt{VkPipelineColorBlendStateCreateInfo::attachmentCount} of the currently bound graphics pipeline

- VUID-vkCmdDrawMeshTasksEXT-None-08647
  If the \texttt{colorWriteEnable} feature is enabled on the device, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then the \texttt{attachmentCount} parameter of most recent call to \texttt{vkCmdSetColorWriteEnableEXT} in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance

- VUID-vkCmdDrawMeshTasksEXT-None-07751
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT} dynamic state enabled then \texttt{vkCmdSetDiscardRectangleEXT} must have been called in the current command buffer prior to this drawing command for each discard rectangle in \texttt{VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount}

- VUID-vkCmdDrawMeshTasksEXT-None-07880
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetDiscardRectangleEnableEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-rasterizerDiscardEnable-09236
  If the \texttt{VK_EXT_discard_rectangles} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDiscardRectangleEXT} must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08648
  If the \texttt{VK_EXT_discard_rectangles} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDiscardRectangleEnableEXT} must have been called in the current command buffer prior to this drawing command
• **VUID-vkCmdDrawMeshTasksEXT-None-07881**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-08649**
If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08913**
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

• **VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08914**
If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`.

• **VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08915**
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`.

• **VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08916**
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

• **VUID-vkCmdDrawMeshTasksEXT-dynamicRenderingUnusedAttachments-08917**
If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline must be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`.
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`

If the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline

If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `2217`
the `multisampledRenderToSingleSampled` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of `rasterizationSamples` for the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksEXT-multisampledRenderToSingleSampled-07286**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksEXT-multisampledRenderToSingleSampled-07287**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksEXT-pNext-07935**
  If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`.

- **VUID-vkCmdDrawMeshTasksEXT-renderPass-06198**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline must have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`.

- **VUID-vkCmdDrawMeshTasksEXT-pColorAttachments-08963**
  If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline must not be `VK_FORMAT_UNDEFINED`.

- **VUID-vkCmdDrawMeshTasksEXT-pDepthAttachment-08964**
  If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline must
not be VK_FORMAT_UNDEFINED

- **VUID-vkCmdDrawMeshTasksEXT-pStencilAttachment-08965**
  If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline must not be VK_FORMAT_UNDEFINED.

- **VUID-vkCmdDrawMeshTasksEXT-primitivesGeneratedQueryWithRasterizerDiscard-06708**
  If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, rasterization discard must not be enabled.

- **VUID-vkCmdDrawMeshTasksEXT-primitivesGeneratedQueryWithNonZeroStreams-06709**
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline must not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`.

- **VUID-vkCmdDrawMeshTasksEXT-None-07619**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-07620**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-09237**
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-08650**
  If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-07621**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.
called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07622
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-08652
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07623
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-08653
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07624
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and `alphaToCoverageEnable` was `VK_TRUE` in the last call to `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawMeshTasksEXT-None-08654
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set `alphaToCoverageEnable` to `VK_TRUE`, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawMeshTasksEXT-None-07625
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled then
vkCmdSetAlphaToOneEnableEXT **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-08655**
  If the `alphaToOne` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT **must**` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-07626**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled then `vkCmdSetLogicOpEnableEXT **must**` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-08656**
  If the `logicOp` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT **must**` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-07627**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT **must**` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-08657**
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorBlendEnableEXT **must**` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-07628**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT **must**` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-08658**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment’s value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT **must**` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksEXT-None-07629**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT **must**` have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawMeshTasksEXT-None-08659
If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07630
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-08660
If the geometryStreams feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_GEOMETRY_BIT stage, then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07631
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-08661
If the VK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07632
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT dynamic state enabled then vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-08662
If the VK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetConservativeRasterizationModeEXT in the current command buffer set conservativeRasterizationMode to VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT, then vkCmdSetExtraPrimitiveOverestimationSizeEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-07633
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT dynamic state enabled then vkCmdSetDepthClipEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksEXT-None-08663
If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07634
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08664
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07635
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07636
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08665
  If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-07637
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08666
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksEXT-None-08667
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command
If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then \texttt{vkCmdSetLineRasterizationModeEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPolygonModeEXT} in the current command buffer set \texttt{polygonMode} to \texttt{VK\_POLYGON\_MODE\_LINE}, then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetPrimitiveTopology} in the current command buffer set \texttt{primitiveTopology} to any line topology, then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then \texttt{vkCmdSetLineStippleEnableEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_EXT} dynamic state enabled then \texttt{vkCmdSetLineStippleEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetLineStippleEnableEXT} in the current command buffer set \texttt{stippledLineEnable} to \texttt{VK\_TRUE}, then \texttt{vkCmdSetLineStippleEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the \texttt{VK\_EXT\_line\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} in the current command buffer set \texttt{depthClipNegativeOneToOne} to \texttt{VK\_TRUE}, then \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.

If the \texttt{depthClipControl} feature is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetDepthClipNegativeOneToOneEXT} \textbf{must} have been called in the current command buffer prior to this drawing command.
• **VUID-vkCmdDrawMeshTasksEXT-None-07640**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-08674**
  If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-07641**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-08675**
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-07642**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-08676**
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-07643**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV` dynamic state enabled then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-08677**
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetCoverageToColorEnableNV` in the current command buffer set `coverageToColorEnable` to `VK_TRUE`, then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawMeshTasksEXT-None-07644**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.
If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetCoverageModulationModeNV must} have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationTableEnableNV must} have been called in the current command buffer prior to this drawing command.

If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetCoverageModulationModeNV} in the current command buffer set \texttt{coverageModulationMode} to any value other than \texttt{VK_COVERAGE_MODULATION_MODE_NONE_NV}, then \texttt{vkCmdSetCoverageModulationTableEnableNV must} have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationTableNV must} have been called in the current command buffer prior to this drawing command.

If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetCoverageModulationTableEnableNV} in the current command buffer set \texttt{coverageModulationTableEnable} to \texttt{VK_TRUE}, then \texttt{vkCmdSetCoverageModulationTableNV must} have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetShadingRateImageEnableNV must} have been called in the current command buffer prior to this drawing command.

If the \texttt{pipelineFragmentShadingRate} feature is enabled, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetFragmentShadingRateKHR must} have been called in the current command buffer prior to this drawing command.

If the \texttt{shadingRateImage} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current
command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-07648**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV` dynamic state enabled then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-08682**
  If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-07649**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-08683**
  If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view’s format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass.

- **VUID-vkCmdDrawMeshTasksEXT-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksEXT-samples-07473**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawMeshTasksEXT-rasterizationSamples-07474**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawMeshTasksEXT-None-09211**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the `rasterizationSamples` member of that structure.

- **VUID-vkCmdDrawMeshTasksEXT-firstAttachment-07476**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEnableEXT` calls must specify an enable for all active color attachments in the current subpass.

- **VUID-vkCmdDrawMeshTasksEXT-firstAttachment-07477**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEquationEXT` calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled.

- **VUID-vkCmdDrawMeshTasksEXT-firstAttachment-07478**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorWriteMaskEXT` calls must specify the color write mask for all active color attachments in the current subpass.

- **VUID-vkCmdDrawMeshTasksEXT-firstAttachment-07479**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then ...
vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawMeshTasksEXT-advancedBlendMaxColorAttachments-07480
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments

- VUID-vkCmdDrawMeshTasksEXT-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, and the bound graphics pipeline was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT must have set the rasterizationStream to zero

- VUID-vkCmdDrawMeshTasksEXT-sampleLocationsPerPixel-07482
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsPerPixelEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawMeshTasksEXT-sampleLocationsPerPixel-07483
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsPerPixelEXT must equal the rasterizationSamples parameter of the last call to vkCmdSetSampleLocationsPerPixelEXT

- VUID-vkCmdDrawMeshTasksEXT-sampleLocationsEnable-07484
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawMeshTasksEXT-sampleLocationsEnable-07485
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEnableEXT must evenly divide VkMultisamplePropertiesEXT
cdot sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

• VUID-vkCmdDrawMeshTasksEXT-sampleLocationsEnable-07486
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

• VUID-vkCmdDrawMeshTasksEXT-sampleLocationsEnable-07487
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code must not statically use the extended instruction InterpolateAtSample

• VUID-vkCmdDrawMeshTasksEXT-sampleLocationsEnable-07936
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.width must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

• VUID-vkCmdDrawMeshTasksEXT-sampleLocationsEnable-07937
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationGridSize.height must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling the value of rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT

• VUID-vkCmdDrawMeshTasksEXT-sampleLocationsEnable-07938
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable in the bound graphics pipeline is VK_TRUE or VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, then, sampleLocationsInfo.sampleLocationsPerPixel must equal rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to `VK_TRUE`, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set the `coverageToColorEnable` to `VK_TRUE`, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV` `coverageToColorLocation`, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.

If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode`, then the current `rasterizationSamples`, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by `vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV` ::`viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportSwizzleNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if the current subpass has any color attachments and `rasterizationSamples` of the last call to `vkCmdSetRasterizationSamplesEXT` is greater than the number of color samples, then the
pipeline `sampleShadingEnable` must be `VK_FALSE`

- **VUID-vkCmdDrawMeshTasksEXT-stippledLineEnable-07495**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT`, then the `stippledRectangularLines` feature must be enabled

- **VUID-vkCmdDrawMeshTasksEXT-stippledLineEnable-07496**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT`, then the `stippledBresenhamLines` feature must be enabled

- **VUID-vkCmdDrawMeshTasksEXT-stippledLineEnable-07497**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT`, then the `stippledSmoothLines` feature must be enabled

- **VUID-vkCmdDrawMeshTasksEXT-stippledLineEnable-07498**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature must be enabled and `VkPhysicalDeviceLimits::strictLines` must be `VK_TRUE`

- **VUID-vkCmdDrawMeshTasksEXT-conservativePointAndLineRasterization-07499**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, `conservativePointAndLineRasterization` is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to `vkCmdSetConservativeRasterizationModeEXT` must be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- **VUID-vkCmdDrawMeshTasksEXT-stage-07073**
  If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then `Mesh Shader Queries` must not be active

- **VUID-vkCmdDrawMeshTasksEXT-None-08877**
  If the bound graphics pipeline state was created with the
**VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT** dynamic state `vkCmdSetAttachmentFeedbackLoopEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-07850**
  If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksEXT-None-08684**
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08685**
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08686**
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08687**
  If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08688**
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08689**
  If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08690**
  If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`.

- **VUID-vkCmdDrawMeshTasksEXT-None-08693**
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages must have a valid VkShaderEXT bound, and the other must have no VkShaderEXT bound.

- **VUID-vkCmdDrawMeshTasksEXT-None-08694**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, a valid VkShaderEXT is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that VkShaderEXT was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid VkShaderEXT must be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.
If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created with the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, there **must** be no `VkShaderEXT` bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there **must** be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage.

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound.

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound.

All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges.

All bound graphics shader objects **must** have been created with identical or identically defined arrays of descriptor set layouts.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage and the `attachmentFeedbackLoopDynamicState` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE` `vkCmdSetAttachmentFeedbackLoopEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state includes a fragment shader stage, was created with `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` set in `VkPipelineDynamicStateCreateInfo` and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`.

If the bound graphics pipeline state includes a fragment shader stage, was created with `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` set in `VkPipelineDynamicStateCreateInfo` and the fragment shader declares the `EarlyFragmentTests` execution mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to `vkCmdSetStencilWriteMask` **must** be `0`.

All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges.

All bound graphics shader objects **must** have been created with identical or identically defined arrays of descriptor set layouts.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage and the `attachmentFeedbackLoopDynamicState` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE` `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must** have been called in the current command buffer prior to this drawing command.

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call **must** also be bound.

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound.
If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` must either include all of `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, and `VK_COLOR_COMPONENT_B_BIT`, or none of them

- **VUID-vkCmdDrawMeshTasksEXT-maxFragmentDualSrcAttachments-09239**
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of `Location` for any output attachment statically used in the Fragment Execution Model executed by this command must be less than `maxFragmentDualSrcAttachments`

- **VUID-vkCmdDrawMeshTasksEXT-stage-06480**
  The bound graphics pipeline must not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`

- **VUID-vkCmdDrawMeshTasksEXT-None-07074**
  Transform Feedback Queries must not be active

- **VUID-vkCmdDrawMeshTasksEXT-None-07075**
  Primitives Generated Queries must not be active

- **VUID-vkCmdDrawMeshTasksEXT-pipelineStatistics-07076**
  The `pipelineStatistics` member used to create any active Pipeline Statistics Query must not contain `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_VERTICES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_VERTEX_SHADER_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_CLIPPING_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_CLIPPING_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_CONTROL_SHADER_PATCHES_BIT`, or `VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT`

- **VUID-vkCmdDrawMeshTasksEXT-TaskEXT-07322**
  If the current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` contains a shader using the TaskEXT Execution Model, `groupCountX` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxTaskWorkGroupCount[0]`

- **VUID-vkCmdDrawMeshTasksEXT-TaskEXT-07323**
  If the current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` contains a shader using the TaskEXT Execution Model, `groupCountY` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxTaskWorkGroupCount[1]`

- **VUID-vkCmdDrawMeshTasksEXT-TaskEXT-07324**
  If the current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` contains a shader using the TaskEXT Execution Model, `groupCountZ` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxTaskWorkGroupCount[2]`
If the current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` contains a shader using the TaskEXT Execution Model, the product of `groupCountX`, `groupCountY` and `groupCountZ` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxTaskWorkGroupTotalCount`.

If the current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` does not contain a shader using the TaskEXT Execution Model, `groupCountX` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupCount[0]`.

If the current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` does not contain a shader using the TaskEXT Execution Model, `groupCountY` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupCount[1]`.

If the current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` does not contain a shader using the TaskEXT Execution Model, `groupCountZ` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupCount[2]`.

If the current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` does not contain a shader using the TaskEXT Execution Model, the product of `groupCountX`, `groupCountY` and `groupCountZ` must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupTotalCount`.

The current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` must contain a shader stage using the MeshEXT Execution Model.

### Valid Usage (Implicit)

- **VUID-vkCmdDrawMeshTasksEXT-commandBuffer-parameter**
  
  `commandBuffer` must be a valid `VkCommandBuffer` handle.

- **VUID-vkCmdDrawMeshTasksEXT-commandBuffer-recording**
  
  `commandBuffer` must be in the recording state.

- **VUID-vkCmdDrawMeshTasksEXT-commandBuffer-cmdpool**
  
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations.

- **VUID-vkCmdDrawMeshTasksEXT-renderpass**
  
  This command must only be called inside of a render pass instance.

- **VUID-vkCmdDrawMeshTasksEXT-videocoding**
  
  This command must only be called outside of a video coding scope.
Host Synchronization

- Host access to `commandBuffer` must be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized

Command Properties

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>

To record an indirect mesh tasks drawing command, call:

```c
// Provided by VK_EXT_mesh_shader
void vkCmdDrawMeshTasksIndirectEXT(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    uint32_t drawCount,
    uint32_t stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `drawCount` is the number of draws to execute, and can be zero.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawMeshTasksIndirectEXT` behaves similarly to `vkCmdDrawMeshTasksEXT` except that the parameters are read by the device from a buffer during execution. `drawCount` draws are executed by the command, with parameters taken from `buffer` starting at `offset` and increasing by `stride` bytes for each successive draw. The parameters of each draw are encoded in an array of `VkDrawMeshTasksIndirectCommandEXT` structures. If `drawCount` is less than or equal to one, `stride` is ignored.

Valid Usage

- VUID-vkCmdDrawMeshTasksIndirectEXT-magFilter-04553
  If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view’s format features must contain
If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's `format features` must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

If a `VkImageView` is sampled with `depth comparison`, the image view's `format features` must contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`.

If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's `format features` must contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`.

If a `VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER` descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer's `format features` must contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`.

If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's `format features` must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`.

If the `VK_EXT_filter_cubic` extension is not enabled and any `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, it must not have a `VkImageViewType` of `VK_IMAGE_VIEW_TYPE_3D`, `VK_IMAGE_VIEW_TYPE_CUBE`, or `VK_IMAGE_VIEW_TYPE_CUBE_ARRAY`.

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

If the `cubicRangeClamp` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must not have a `VkSamplerReductionModeCreateInfo` `reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGE_CLAMP_QCOM`. 
Any `VkImageView` being sampled with a `VkSamplerReductionModeCreateInfo`::reductionMode equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM` as a result of this command **must** sample with `VK_FILTER_CUBIC_EXT`

If the selectableCubicWeights feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have `VkSamplerCubicWeightsCreateInfoQCOM`::cubicWeights equal to `VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM`

Any `VkImage` created with a `VkImageCreateInfo`::flags containing `VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV` sampled as a result of this command **must** only be sampled using a `VkSamplerAddressMode` of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`

Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`

For each set \( n \) that is statically used by a bound shader, a descriptor set **must** have been bound to \( n \) at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set \( n \), with the `VkPipelineLayout` or `VkDescriptorSetLayout` array that was used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility

For each push constant that is statically used by a bound shader, a push constant value **must** have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility

If the maintenance4 feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value **must** have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the
VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08114**
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, must be valid if they are statically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08115**
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline must have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08116**
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08604**
  Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08117**
  If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline must have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08119**
  If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08605**
  If a descriptor is dynamically used with a VkShaderEXT created with a VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08606**
  If the shaderObject feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08607**
  If the shaderObject is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and VK_NULL_HANDLE shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08608**
  If a pipeline is bound to the pipeline bind point used by this command, there must not
have been any calls to dynamic state setting commands for any state not specified as dynamic in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08609
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler **must** not be used to sample from any VkImage with a VkImageView of the type VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, VK_IMAGE_VIEW_TYPE_1D_ARRAY, VK_IMAGE_VIEW_TYPE_2D_ARRAY or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY, in any shader stage

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08610
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name, in any shader stage

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08611
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

- VUID-vkCmdDrawMeshTasksIndirectEXT-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksIndirectEXT-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for storageBuffers, and the robustBufferAccess feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage
corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawMeshTasksIndirectEXT-commandBuffer-02707**
  If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by *bound shaders** must not be a protected resource

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-06550**
  If a *bound shader* accesses a `VkSampler` or `VkImageView` object that enables sampler Y’C₈ aC₈ conversion, that object **must** only be used with `OpImageSample*` or `OpImageSparseSample*` instructions

- **VUID-vkCmdDrawMeshTasksIndirectEXT-ConstOffset-06551**
  If a *bound shader* accesses a `VkSampler` or `VkImageView` object that enables sampler Y’C₈ aC₈ conversion, that object **must** not use the `ConstOffset` and `Offset` operands

- **VUID-vkCmdDrawMeshTasksIndirectEXT-viewType-07752**
  If a `VkImageView` is accessed as a result of this command, then the image view's **viewType** **must** match the `Dim` operand of the `OpTypeImage` as described in Instruction/Sampler/Image View Validation

- **VUID-vkCmdDrawMeshTasksIndirectEXT-format-07753**
  If a `VkImageView` is accessed as a result of this command, then the **numeric type** of the image view’s `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match

- **VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageWrite-08795**
  If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's `format`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageWrite-08796**
  If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components

- **VUID-vkCmdDrawMeshTasksIndirectEXT-SampledType-04470**
  If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64

- **VUID-vkCmdDrawMeshTasksIndirectEXT-SampledType-04471**
  If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32

- **VUID-vkCmdDrawMeshTasksIndirectEXT-SampledType-04472**
  If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must**...
must have a Width of 64

- **VUID-vkCmdDrawMeshTasksIndirectEXT-SampledType-04473**
  If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the SampledType of the OpTypeImage operand of that instruction must have a Width of 32

- **VUID-vkCmdDrawMeshTasksIndirectEXT-sparseImageInt64Atomics-04474**
  If the sparseImageInt64Atomics feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-sparseImageInt64Atomics-04475**
  If the sparseImageInt64Atomics feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageWeightedSampleQCOM-06971**
  If `OpImageWeightedSampleQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageWeightedSampleQCOM-06972**
  If `OpImageWeightedSampleQCOM` uses a `VkImageView` as a sample weight image as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageBoxFilterQCOM-06973**
  If `OpImageBoxFilterQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageBlockMatchWindowSSDQCOM-06974**
  If `OpImageBlockMatchWindowSSDQCOM` is used to read from a `VkImageView` as a result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

- **VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageWeightedSampleQCOM-06977**
  If `OpImageWeightedSampleQCOM`, `OpImageBoxFilterQCOM`, `OpImageBlockMatchWindowSSDQCOM`, `OpImageBlockMatchWindowSADQCOM`, `OpImageBlockMatchGatherSSDQCOM`, `OpImageBlockMatchGatherSADQCOM`, `OpImageBlockMatchSADQCOM`, or `OpImageBlockMatchSADQCOM` uses a `VkSampler` as a result of this command, then the sampler must have been created with `VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM`
• VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageWeightedSampleQCOM-06978
If any command other than OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, or OpImageBlockMatchSSDQCOM uses a VkSampler as a result of this command, then the sampler must not have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageBlockMatchWindow-09215
If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM

• VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageBlockMatchWindow-09216
If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from an VkImageView as a result of this command, then the image view's format must be a single-component format.

• VUID-vkCmdDrawMeshTasksIndirectEXT-OpImageBlockMatchWindow-09217
If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-07288
Any shader invocation executed by this command must terminate

• VUID-vkCmdDrawMeshTasksIndirectEXT-renderPass-02684
The current render pass must be compatible with the renderPass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

• VUID-vkCmdDrawMeshTasksIndirectEXT-subpass-02685
The subpass index of the current render pass must be equal to the subpass member of the VkGraphicsPipelineCreateInfo structure specified when creating the VkPipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-07748
If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set

• VUID-vkCmdDrawMeshTasksIndirectEXT-OpTypeImage-07468
If any shader executed by this pipeline accesses an OpTypeImage variable with a Dim operand of SubpassData, it must be decorated with an InputAttachmentIndex that corresponds to a valid input attachment in the current subpass

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-07469
Input attachment views accessed in a subpass must be created with the same VkFormat as the corresponding subpass definition, and be created with a VkImageView that is compatible with the attachment referenced by the subpass’ pInputAttachments[InputAttachmentIndex] in the currently bound VkFramebuffer as specified by Fragment Input Attachment Compatibility

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-06537
Memory backing image subresources used as attachments in the current render pass
must not be written in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-09000
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  - the VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  - the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_COLOR_BIT and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-09001
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  - the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  - the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_DEPTH_BIT and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-09002
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  - the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  - the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_STENCIL_BIT and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command
If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command **must** not write to that image subresource as an attachment.

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, **depth writes must be disabled**.

If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back writeMask are not zero, and stencil test is enabled, **all stencil ops must be** VK_STENCIL_OP_KEEP.

If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetPolygonModeEXT in the current command buffer set polygonMode to VK_POLYGON_MODE_LINE, **vkCmdSetLineWidth must have been called in the current command buffer prior to this drawing command**.

If a shader object is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, and the most recent call to vkCmdSetPrimitiveTopology in the current command buffer set primitiveTopology to any line topology, **vkCmdSetLineWidth must have been called in the current command buffer prior to this drawing command**.

If a shader object that outputs line primitives is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT stage, **vkCmdSetLineWidth must have been called in the current command buffer prior to this drawing command**.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT dynamic state enabled then vkCmdSetViewport **must** have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SCISSOR dynamic state enabled then vkCmdSetScissor **must** have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_WIDTH dynamic state enabled then **vkCmdSetLineWidth must have been called in the current command buffer prior to this drawing command**.

If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetDepthBias or vkCmdSetDepthBias2EXT **must have been called in the current command buffer prior to this drawing command**.
vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDepthBiasEnable in the current command buffer set depthBiasEnable to VK_TRUE, vkCmdSetDepthBias or vkCmdSetDepthBias2EXT must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07835**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_BLEND_CONSTANTS dynamic state enabled then vkCmdSetBlendConstants must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08621**
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetColorBlendEnableEXT in the current command buffer set any element of pColorBlendEnables to VK_TRUE, and the most recent call to vkCmdSetColorBlendEquationEXT in the current command buffer set the same element of pColorBlendEquations to a VkColorBlendEquationEXT structure with any VkBlendFactor member with a value of VK_BLEND_FACTOR_CONSTANT_COLOR, VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR, VK_BLEND_FACTOR_CONSTANT_ALPHA, or VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA, vkCmdSetBlendConstants must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07836**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled then vkCmdSetDepthBounds must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08622**
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDepthBoundsTestEnable in the current command buffer set depthBoundsTestEnable to VK_TRUE, then vkCmdSetDepthBounds must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07837**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK dynamic state enabled then vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08623**
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilCompareMask must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07838**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_WRITE_MASK dynamic state enabled then
vkCmdSetStencilWriteMask **must** have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08624
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilWriteMask **must**` have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07839
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled then `vkCmdSetStencilReference **must**` have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08625
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilReference **must**` have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index **must** be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawMeshTasksIndirectEXT-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE` and the current subpass has a depth/stencil attachment, then that attachment **must** have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-06666
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEXT **must**` have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08626
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetSampleLocationsEnableEXT` in the current command buffer set `sampleLocationsEnable` to `VK_TRUE`, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEXT **must**` have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-sampleLocationsPerPixel-07934
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT **must**` equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with
• VUID-vkCmdDrawMeshTasksIndirectEXT-None-07840
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled then `vkCmdSetCullMode` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08627
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCullMode` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-07841
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled then `vkCmdSetFrontFace` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08628
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFrontFace` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-07843
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08629
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-07844
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08630
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-07845
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08631
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthTestEnable` in the current command buffer set `depthTestEnable` to `VK_TRUE`, then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

**VUID-vkCmdDrawMeshTasksIndirectEXT-None-07846**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

**VUID-vkCmdDrawMeshTasksIndirectEXT-None-08632**
If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

**VUID-vkCmdDrawMeshTasksIndirectEXT-None-07847**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

**VUID-vkCmdDrawMeshTasksIndirectEXT-None-08633**
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

**VUID-vkCmdDrawMeshTasksIndirectEXT-None-07848**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

**VUID-vkCmdDrawMeshTasksIndirectEXT-None-08634**
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

**VUID-vkCmdDrawMeshTasksIndirectEXT-viewportCount-03417**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `VkPipelineViewportStateCreateInfo::scissorCount` of the pipeline.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `scissorCount` parameter of `vkCmdSetScissorWithCount` must match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline.

If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

If a shader object is bound to any graphics stage, then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportWScalingStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV`.

If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then `vkCmdSetViewportWScalingNV` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

If a shader object is bound to any graphics stage, then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `scissorCount` parameter of `vkCmdSetScissorWithCount` must match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline.

If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

If a shader object is bound to any graphics stage, then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `scissorCount` parameter of `vkCmdSetScissorWithCount`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportWScalingStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV`.

If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then `vkCmdSetViewportWScalingNV` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.
VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic state enabled, then the bound graphics pipeline **must** have been created with 

```
VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount
```

- **VUID-vkCmdDrawMeshTasksIndirectEXT-viewportCount-04140**
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and
  VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic states enabled then the
  viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV **must**
  be greater than or equal to the viewportCount parameter in the last call to
  vkCmdSetViewportWithCount

- **VUID-vkCmdDrawMeshTasksIndirectEXT-shadingRateImage-09233**
  If the shadingRateImage feature is enabled, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set
  rasterizerDiscardEnable to **VK_FALSE**, then
  vkCmdSetCoarseSampleOrderNV must have
  been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-shadingRateImage-09234**
  If a shader object is bound to any graphics stage, and the
  shadingRateImage feature is enabled on the device, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in
  the current command buffer set rasterizerDiscardEnable to **VK_FALSE**, and the most recent
  call to vkCmdSetShadingRateImageEnableNV in
  the current command buffer set shadingRateImageEnable to **VK_TRUE**, then
  vkCmdSetViewportShadingRatePaletteNV must have
  been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08637**
  If a shader object is bound to any graphics stage, and the
  shadingRateImage feature is enabled on the device, then the
  viewportCount parameter in the last call to
  vkCmdSetViewportShadingRatePaletteNV **must** be greater than or equal to the
  viewportCount parameter in the last call to
  vkCmdSetViewportWithCount

- **VUID-vkCmdDrawMeshTasksIndirectEXT-VkPipelineViewportCreateInfo-04141**
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a
  VkPipelineViewportSwizzleStateCreateInfoNV structure chained from
  VkPipelineViewportStateCreateInfo, then the bound graphics pipeline **must** have been
  created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the
  viewportCount parameter in the last call to
  vkCmdSetViewportWithCount

- **VUID-vkCmdDrawMeshTasksIndirectEXT-VkPipelineViewportCreateInfo-04142**
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a
  VkPipelineViewportExclusiveScissorStateCreateInfoNV structure chained from
  VkPipelineViewportStateCreateInfo, then the bound graphics pipeline **must** have been
  created with VkPipelineViewportExclusiveScissorStateCreateInfoNV:
  exclusiveScissorCount greater or equal to the viewportCount parameter in the last call to
  vkCmdSetViewportWithCount

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07878**
  If the bound graphics pipeline state was created with the
If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV** dynamic state enabled then **vkCmdSetExclusiveScissorEnableNV** must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07879**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV** dynamic state enabled then **vkCmdSetExclusiveScissorNV** must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-exclusiveScissor-09235**
  If a shader object is bound to any graphics stage, and the **exclusiveScissor** feature is enabled, then **vkCmdSetExclusiveScissorEnableNV** must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08638**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetExclusiveScissorEnableNV** in the current command buffer set any element of **pExclusiveScissorEnables** to **VK_TRUE**, then **vkCmdSetExclusiveScissorNV** must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-04876**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE** dynamic state enabled then **vkCmdSetRasterizerDiscardEnable** must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08639**
  If a shader object is bound to any graphics stage, then **vkCmdSetRasterizerDiscardEnable** must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-04877**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE** dynamic state enabled then **vkCmdSetDepthBiasEnable** must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08640**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, then **vkCmdSetDepthBiasEnable** must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-logicOp-04878**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LOGIC_OP_EXT** dynamic state enabled then **vkCmdSetLogicOpEXT** must have been called in the current command buffer prior to this drawing command and the **logicOp** must be a valid **VkLogicOp** value.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08641**
  If a shader object is bound to the **VK_SHADER_STAGE_FRAGMENT_BIT** stage, and the **logicOp** feature is enabled on the device, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then \texttt{vkCmdSetLogicOpEXT} must have been called in the current command buffer prior to this drawing command and the logicOp must be a valid \texttt{VkLogicOp} value.

- VUID-vkCmdDrawMeshTasksIndirectEXT-
  primitiveFragmentShadingRateWithMultipleViewports-04552
  If the \texttt{primitiveFragmentShadingRateWithMultipleViewports} limit is not supported, the bound graphics pipeline was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the \texttt{PrimitiveShadingRateKHR} built-in, then \texttt{vkCmdSetViewportWithCount} must have been called in the current command buffer prior to this drawing command, and the \texttt{viewportCount} parameter of \texttt{vkCmdSetViewportWithCount} must be \texttt{1}.

- VUID-vkCmdDrawMeshTasksIndirectEXT-
  primitiveFragmentShadingRateWithMultipleViewports-08642
  If the \texttt{primitiveFragmentShadingRateWithMultipleViewports} limit is not supported, and any shader object bound to a graphics stage writes to the \texttt{PrimitiveShadingRateKHR} built-in, then \texttt{vkCmdSetViewportWithCount} must have been called in the current command buffer prior to this drawing command, and the \texttt{viewportCount} parameter of \texttt{vkCmdSetViewportWithCount} must be \texttt{1}.

- VUID-vkCmdDrawMeshTasksIndirectEXT-blendEnable-04727
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view's format features do not contain \texttt{VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT}, then the blendEnable member of the corresponding element of the \texttt{pAttachments} member of \texttt{pColorBlendState} must be \texttt{VK_FALSE}.

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08643
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and none of the \texttt{VK_AMD_mixed_attachment_samples} extension, the \texttt{VK_NV_framebuffer_mixed_samples} extension, or the \texttt{multisampledRenderToSingleSampled} feature is enabled, then the most recent call to \texttt{vkCmdSetRasterizationSamplesEXT} in the current command buffer that affected that attachment index must have been \texttt{VK_FALSE}.

- VUID-vkCmdDrawMeshTasksIndirectEXT-multisampledRenderToSingleSampled-07284
  If rasterization is not disabled in the bound graphics pipeline, and none of the \texttt{VK_AMD_mixed_attachment_samples} extension, the \texttt{VK_NV_framebuffer_mixed_samples} extension, or the \texttt{multisampledRenderToSingleSampled} feature is enabled, then the \texttt{rasterizationSamples} for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08644
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then for each color attachment in the render pass, if the corresponding image view's format features do not contain \texttt{VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT}, then the corresponding member of \texttt{pColorBlendEnables} in the most recent call to \texttt{vkCmdSetColorBlendEnableEXT} in the current command buffer that affected that attachment index must have been \texttt{VK_FALSE}.
rasterizationSamples to be the same as the number of samples for the current render pass color and/or depth/stencil attachments

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with vkCmdBeginRendering

- VUID-vkCmdDrawMeshTasksIndirectEXT-imageView-06172
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView member of pDepthAttachment is not VK_NULL_HANDLE, and the layout member of pDepthAttachment is VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL, this command must not write any values to the depth attachment

- VUID-vkCmdDrawMeshTasksIndirectEXT-imageView-06173
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView member of pStencilAttachment is not VK_NULL_HANDLE, and the layout member of pStencilAttachment is VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL, this command must not write any values to the stencil attachment

- VUID-vkCmdDrawMeshTasksIndirectEXT-imageView-06174
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView member of pDepthAttachment is not VK_NULL_HANDLE, and the layout member of pDepthAttachment is VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL, this command must not write any values to the depth attachment

- VUID-vkCmdDrawMeshTasksIndirectEXT-imageView-06175
  If the current render pass instance was begun with vkCmdBeginRendering, the imageView member of pStencilAttachment is not VK_NULL_HANDLE, and the layout member of pStencilAttachment is VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL, this command must not write any values to the stencil attachment

- VUID-vkCmdDrawMeshTasksIndirectEXT-viewMask-06178
  If the current render pass instance was begun with vkCmdBeginRendering, the currently bound graphics pipeline must have been created with a VkPipelineRenderingCreateInfo ::viewMask equal to VkRenderingInfo ::viewMask

- VUID-vkCmdDrawMeshTasksIndirectEXT-colorAttachmentCount-06179
  If the current render pass instance was begun with vkCmdBeginRendering, the currently bound graphics pipeline must have been created with a VkPipelineRenderingCreateInfo ::colorAttachmentCount equal to VkRenderingInfo ::colorAttachmentCount

- VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08910
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08911**
If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08912**
If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-attachmentCount-07750**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08646**
If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-attachmentCount-07750**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-attachmentCount-08647**
If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then the attachmentCount parameter of most recent call to vkCmdSetColorWriteEnableEXT in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07751
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT dynamic state enabled then vkCmdSetDiscardRectangleEXT must have been called in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07880
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled then vkCmdSetDiscardRectangleEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-09236
  If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDiscardRectangleEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07881
  If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDiscardRectangleEnableEXT in the current command buffer set discardRectangleEnable to VK_TRUE, then vkCmdSetDiscardRectangleModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08913
  If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08914
If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08915**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08916**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08917**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-dynamicRenderingUnusedAttachments-08918**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-imageView-06183**
  If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-imageView-06184**
  If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-colorAttachmentCount-06185**
  If the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD`
or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-pDepthAttachment-06186**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-pStencilAttachment-06187**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-multisampledRenderToSingleSampled-07285**
  If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of `rasterizationSamples` for the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-multisampledRenderToSingleSampled-07286**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-multisampledRenderToSingleSampled-07287**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.
pipeline **must** be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-pNext-07935**
  If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the value of `rasterizationSamples` for the currently bound graphics pipeline **must** be equal to `VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-renderPass-06198**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline **must** have been created with a `VkGraphicsPipelineCreateInfo::renderPass` equal to `VK_NULL_HANDLE`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-pColorAttachments-08963**
  If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the `VkRenderingInfo::pColorAttachments->imageView` was not `VK_NULL_HANDLE`, then the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-pDepthAttachment-08964**
  If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-pStencilAttachment-08965**
  If the current render pass instance was begun with `vkCmdBeginRendering`, there is a graphics pipeline bound, stencil test is enabled and the `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, then the `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the pipeline **must** not be `VK_FORMAT_UNDEFINED`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-primitivesGeneratedQueryWithRasterizerDiscard-06708**
  If the `primitivesGeneratedQueryWithRasterizerDiscard` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, rasterization discard **must** not be enabled

- **VUID-vkCmdDrawMeshTasksIndirectEXT-primitivesGeneratedQueryWithNonZeroStreams-06709**
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, the bound graphics pipeline **must** not have been created with a non-zero value in `VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream`

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07619**
  If the bound graphics pipeline state was created with the
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07620**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-09237**
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08650**
  If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07621**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07622**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08652**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07623**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08653**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07624
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08654
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07625
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08655
  If the alphaToOne feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07626
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled then vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08656
  If the logicOp feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment’s value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.
command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08661**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetConservativeRasterizationModeEXT` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07632**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08662**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetConservativeRasterizationModeEXT` in the current command buffer set `conservativeRasterizationMode` to `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07633**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClipEnableEXT` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08663**
  If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07634**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08664**
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` **must** have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07635**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` **must** have been called in the current command buffer.
prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07636**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08665**
  If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07637**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08666**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08667**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08668**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07638**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08669**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08670**
If the VK_EXT_line_rasterization extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to vkCmdSetPrimitiveTopology in the current command buffer set primitiveTopology to any line topology, then vkCmdSetLineStippleEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08671
  If the VK_EXT_line_rasterization extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then vkCmdSetLineStippleEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07849
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_EXT dynamic state enabled then vkCmdSetLineStippleEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08672
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT dynamic state enabled then vkCmdSetDepthClipNegativeOneToOneEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07639
  If the depthClipControl feature is enabled, and a shader object is bound to any graphics stage, then vkCmdSetDepthClipNegativeOneToOneEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08673
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV dynamic state enabled then vkCmdSetViewportWScalingEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08674
  If the VK_NV_clip_space_w_scaling extension is enabled, and a shader object is bound to any graphics stage, then vkCmdSetViewportWScalingEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07641
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled then vkCmdSetViewportSwizzleNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-08675
  If the VK_NV_viewport_swizzle extension is enabled, and a shader object is bound to any
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV` dynamic state enabled then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetCoverageToColorEnableNV` in the current command buffer set `coverageToColorEnable` to `VK_TRUE`, then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationModeNV` in the current command buffer set...
coverageModulationMode to any value other than VK_COVERAGE_MODULATION_MODE_NONE_NV, then \texttt{vkCmdSetCoverageModulationTableEnableNV} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07646**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationTableNV} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08680**
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetCoverageModulationTableEnableNV} in the current command buffer set \texttt{coverageModulationTableEnable} to \texttt{VK_TRUE}, then \texttt{vkCmdSetCoverageModulationTableNV} must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08683
If the coverageReductionMode feature is enabled, and a shader object is bound to any
graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the
current command buffer set rasterizerDiscardEnable to VK_FALSE, then
vkCmdSetCoverageReductionModeNV  must have been called in the current command
buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectEXT-pColorBlendEnables-07470
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT state enabled and the last call to
vkCmdSetColorBlendEnableEXT set pColorBlendEnables for any attachment to VK_TRUE,
then for those attachments in the subpass the corresponding image view's format features
must contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT

• VUID-vkCmdDrawMeshTasksIndirectEXT-rasterizationSamples-07471
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does
not use any color and/or depth/stencil attachments, then the rasterizationSamples in the
last call to vkCmdSetRasterizationSamplesEXT  must follow the rules for a zero-
attachment subpass

• VUID-vkCmdDrawMeshTasksIndirectEXT-samples-07472
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in
the last call to vkCmdSetSampleMaskEXT  must be greater or equal to the
VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create
the bound graphics pipeline

• VUID-vkCmdDrawMeshTasksIndirectEXT-samples-07473
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT
states enabled, then the samples parameter in the last call to vkCmdSetSampleMaskEXT
must be greater or equal to the rasterizationSamples parameter in the last call to
vkCmdSetRasterizationSamplesEXT

• VUID-vkCmdDrawMeshTasksIndirectEXT-rasterizationSamples-07474
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and neither the
VK_AMD_mixed_attachment_samples nor the VK_NV_framebuffer_mixed_samples extensions are
enabled, then the rasterizationSamples in the last call to
vkCmdSetRasterizationSamplesEXT  must be the same as the current subpass color and/or
depth/stencil attachments

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-09211
If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to
any graphics stage, and the current render pass instance includes a
VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must be the same as the rasterizationSamples member of that structure.

- VUID-vkCmdDrawMeshTasksIndirectEXT-firstAttachment-07476
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEnableEXT calls must specify an enable for all active color attachments in the current subpass.

- VUID-vkCmdDrawMeshTasksIndirectEXT-firstAttachment-07477
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEquationEXT calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled.

- VUID-vkCmdDrawMeshTasksIndirectEXT-firstAttachment-07478
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorWriteMaskEXT calls must specify the color write mask for all active color attachments in the current subpass.

- VUID-vkCmdDrawMeshTasksIndirectEXT-firstAttachment-07479
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled.

- VUID-vkCmdDrawMeshTasksIndirectEXT-advancedBlendMaxColorAttachments-07480
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments.

- VUID-vkCmdDrawMeshTasksIndirectEXT-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, and the bound graphics pipeline
was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` must have set the `rasterizationStream` to zero.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-sampleLocationsPerPixel-07482**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `sampleLocationsPerPixel` member of `pNextSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-sampleLocationsPerPixel-07483**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pNextSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` parameter of the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-sampleLocationsEnable-07484**
  If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-sampleLocationsEnable-07485**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-sampleLocationsEnable-07486**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-sampleLocationsEnable-07487**
  If the bound graphics pipeline state was created with the
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationsPerPixel` must equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to `VK_TRUE`, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass.

If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV state enabled and the last call to vkCmdSetCoverageToColorEnableNV set the coverageToColorEnable to VK_TRUE, then the current subpass must have a color attachment at the location selected by the last call to vkCmdSetCoverageToColorLocationNV coverageToColorLocation, with a VkFormat of VK_FORMAT_R8_UINT, VK_FORMAT_R8_SINT, VK_FORMAT_R16_UINT, VK_FORMAT_R16_SINT, VK_FORMAT_R32_UINT, or VK_FORMAT_R32_SINT

• VUID-vkCmdDrawMeshTasksIndirectEXT-coverageReductionMode-07491
  If this VK_NV_coverage_reduction_mode extension is enabled, the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, the current coverage reduction mode coverageReductionMode, then the current rasterizationSamples, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV

• VUID-vkCmdDrawMeshTasksIndirectEXT-viewportCount-07492
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV ::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawMeshTasksIndirectEXT-viewportCount-07493
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportSwizzleNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

• VUID-vkCmdDrawMeshTasksIndirectEXT-rasterizationSamples-07494
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if the current subpass has any color attachments and rasterizationSamples of the last call to vkCmdSetRasterizationSamplesEXT is greater than the number of color samples, then the pipeline sampleShadingEnable must be VK_FALSE

• VUID-vkCmdDrawMeshTasksIndirectEXT-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT, then the stippledRectangularLines feature must be enabled

• VUID-vkCmdDrawMeshTasksIndirectEXT-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESEHAM_EXT, then the stippledBresenhamLines feature must
be enabled

- **VUID-vkCmdDrawMeshTasksIndirectEXT-stippledLineEnable-07497**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT`, then the `stippledSmoothLines` feature must be enabled.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-stippledLineEnable-07498**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature must be enabled and `VkPhysicalDeviceLimits::strictLines` must be `VK_TRUE`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-conservativePointAndLineRasterization-07499**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, `conservativePointAndLineRasterization` is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to `vkCmdSetConservativeRasterizationModeEXT` must be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-stage-07073**
  If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries must not be active.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08877**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state `vkCmdSetAttachmentFeedbackLoopEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-07850**
  If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08684**
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`.

- **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08685**
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`.
• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08686**
  If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08687**
  If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08688**
  If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08689**
  If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08690**
  If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08693**
  If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages must have a valid `VkShaderEXT` bound, and the other must have no `VkShaderEXT` bound.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08694**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid `VkShaderEXT` must be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08695**
  If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created with the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, there must be no `VkShaderEXT` bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08696**
  If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there must be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage.

• **VUID-vkCmdDrawMeshTasksIndirectEXT-None-08698**
  If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call must also be bound.
• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08699
   If any graphics shader is bound which was created with the
   `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders
   which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of
   the same `vkCreateShadersEXT` call **must** not have any `VkShaderEXT` bound

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08878
   All bound graphics shader objects **must** have been created with identical or identically
defined push constant ranges

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08879
   All bound graphics shader objects **must** have been created with identical or identically
defined arrays of descriptor set layouts

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-08880
   If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage and the
   `attachmentFeedbackLoopDynamicState` feature is enabled on the device, and the most
   recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
   `rasterizerDiscardEnable` to `VK_FALSE` `vkCmdSetAttachmentFeedbackLoopEnableEXT` **must
   have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectEXT-pDynamicStates-08715
   If the bound graphics pipeline state includes a fragment shader stage, was created with
   `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` set in `VkPipelineDynamicStateCreateInfo`
   **::pDynamicStates**, and the fragment shader declares the `EarlyFragmentTests` execution
   mode and uses `OpDepthAttachmentReadEXT`, the `depthWriteEnable` parameter in the last call
to `vkCmdSetDepthWriteEnable` **must** be `VK_FALSE`

• VUID-vkCmdDrawMeshTasksIndirectEXT-pDynamicStates-08716
   If the bound graphics pipeline state includes a fragment shader stage, was created with
   `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` set in `VkPipelineDynamicStateCreateInfo`
   **::pDynamicStates**, and the fragment shader declares the `EarlyFragmentTests` execution
   mode and uses `OpStencilAttachmentReadEXT`, the `writeMask` parameter in the last call to
   `vkCmdSetStencilWriteMask` **must** be `0`

• VUID-vkCmdDrawMeshTasksIndirectEXT-None-09116
   If a shader object is bound to any graphics stage or the currently bound graphics pipeline
   was created with `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT`, and the format of any color
   attachment is `VK_FORMAT_E5B9G9R9_UFLOAT_PACK32`, the corresponding element of the
   `pColorWriteMasks` parameter of `vkCmdSetColorWriteMaskEXT` **must** either include all of
   `VK_COLOR_COMPONENT_R_BIT`, `VK_COLOR_COMPONENT_G_BIT`, and `VK_COLOR_COMPONENT_B_BIT`, or
   none of them

• VUID-vkCmdDrawMeshTasksIndirectEXT-maxFragmentDualSrcAttachments-09239
   If **blending** is enabled for any attachment where either the source or destination blend
   factors for that attachment use the secondary color input, the maximum value of `Location`
   for any output attachment **statically used** in the Fragment Execution Model executed by this
   command **must** be less than `maxFragmentDualSrcAttachments`

• VUID-vkCmdDrawMeshTasksIndirectEXT-stage-06480
   The bound graphics pipeline **must** not have been created with the
   `VkPipelineShaderStageCreateInfo::stage` member of an element of
VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07074
  Transform Feedback Queries must not be active

- VUID-vkCmdDrawMeshTasksIndirectEXT-None-07075
  Primitives Generated Queries must not be active

- VUID-vkCmdDrawMeshTasksIndirectEXT-pipelineStatistics-07076
  The pipelineStatistics member used to create any active Pipeline Statistics Query must not contain VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_VERTICES_BIT, VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_PRIMITIVES_BIT, VK_QUERY_PIPELINE_STATISTIC_VERTEX_SHADER_INVOCATIONS_BIT, VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_INVOCATIONS_BIT, VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_PRIMITIVES_BIT, VK_QUERY_PIPELINE_STATISTIC_CLIPPING_INVOCATIONS_BIT, VK_QUERY_PIPELINE_STATISTIC_CLIPPING_PRIMITIVES_BIT, VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_CONTROL_SHADER_PATCHES_BIT, or VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT

- VUID-vkCmdDrawMeshTasksIndirectEXT-buffer-02708
  If buffer is non-sparse then it must be bound completely and contiguously to a single VkDeviceMemory object

- VUID-vkCmdDrawMeshTasksIndirectEXT-buffer-02709
  buffer must have been created with the VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT bit set

- VUID-vkCmdDrawMeshTasksIndirectEXT-offset-02710
  offset must be a multiple of 4

- VUID-vkCmdDrawMeshTasksIndirectEXT-commandBuffer-02711
  commandBuffer must not be a protected command buffer

- VUID-vkCmdDrawMeshTasksIndirectEXT-drawCount-02718
  If the multiDrawIndirect feature is not enabled, drawCount must be 0 or 1

- VUID-vkCmdDrawMeshTasksIndirectEXT-drawCount-02719
  drawCount must be less than or equal to VkPhysicalDeviceLimits::maxDrawIndirectCount

- VUID-vkCmdDrawMeshTasksIndirectEXT-drawCount-07088
  If drawCount is greater than 1, stride must be a multiple of 4 and must be greater than or equal to sizeof(VkDrawMeshTasksIndirectCommandEXT)

- VUID-vkCmdDrawMeshTasksIndirectEXT-drawCount-07089
  If drawCount is equal to 1, (offset + sizeof(VkDrawMeshTasksIndirectCommandEXT)) must be less than or equal to the size of buffer

- VUID-vkCmdDrawMeshTasksIndirectEXT-drawCount-07090
  If drawCount is greater than 1, (stride × (drawCount - 1) + offset + sizeof(VkDrawMeshTasksIndirectCommandEXT)) must be less than or equal to the size of buffer

- VUID-vkCmdDrawMeshTasksIndirectEXT-MeshEXT-07091
The current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` must contain a shader stage using the MeshEXT Execution Model

**Valid Usage (Implicit)**

- VUID-vkCmdDrawMeshTasksIndirectEXT-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle
- VUID-vkCmdDrawMeshTasksIndirectEXT-buffer-parameter
  buffer must be a valid VkBuffer handle
- VUID-vkCmdDrawMeshTasksIndirectEXT-commandBuffer-recording
  commandBuffer must be in the recording state
- VUID-vkCmdDrawMeshTasksIndirectEXT-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations
- VUID-vkCmdDrawMeshTasksIndirectEXT-renderpass
  This command must only be called inside of a render pass instance
- VUID-vkCmdDrawMeshTasksIndirectEXT-videocoding
  This command must only be called outside of a video coding scope
- VUID-vkCmdDrawMeshTasksIndirectEXT-commonparent
  Both of buffer, and commandBuffer must have been created, allocated, or retrieved from the same VkDevice

**Host Synchronization**

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

**Command Properties**

The `VkDrawMeshTasksIndirectCommandEXT` structure is defined as:

```c
// Provided by VK_EXT_mesh_shader
typedef struct VkDrawMeshTasksIndirectCommandEXT {
    uint32_t groupCountX;
};
```
uint32_t groupCountY;
uint32_t groupCountZ;
} VkDrawMeshTasksIndirectCommandEXT;

• groupCountX is the number of local workgroups to dispatch in the X dimension.
• groupCountY is the number of local workgroups to dispatch in the Y dimension.
• groupCountZ is the number of local workgroups to dispatch in the Z dimension.

The members of VkDrawMeshTasksIndirectCommandEXT have the same meaning as the similarly named parameters of vkCmdDrawMeshTasksEXT.

Valid Usage

• VUID-VkDrawMeshTasksIndirectCommandEXT-TaskEXT-07322
  If the current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS contains a shader using the TaskEXT Execution Model, groupCountX must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesEXT::maxTaskWorkGroupCount[0]

• VUID-VkDrawMeshTasksIndirectCommandEXT-TaskEXT-07323
  If the current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS contains a shader using the TaskEXT Execution Model, groupCountY must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesEXT::maxTaskWorkGroupCount[1]

• VUID-VkDrawMeshTasksIndirectCommandEXT-TaskEXT-07324
  If the current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS contains a shader using the TaskEXT Execution Model, groupCountZ must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesEXT::maxTaskWorkGroupCount[2]

• VUID-VkDrawMeshTasksIndirectCommandEXT-TaskEXT-07325
  If the current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS contains a shader using the TaskEXT Execution Model, The product of groupCountX, groupCountY and groupCountZ must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesEXT::maxTaskWorkGroupTotalCount

• VUID-VkDrawMeshTasksIndirectCommandEXT-TaskEXT-07326
  If the current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS does not contain a shader using the TaskEXT Execution Model, groupCountX must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupCount[0]

• VUID-VkDrawMeshTasksIndirectCommandEXT-TaskEXT-07327
  If the current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS does not contain a shader using the TaskEXT Execution Model, groupCountY must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupCount[1]

• VUID-VkDrawMeshTasksIndirectCommandEXT-TaskEXT-07328
  If the current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS does not contain a shader using the TaskEXT Execution Model, groupCountZ must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupCount[2]

• VUID-VkDrawMeshTasksIndirectCommandEXT-TaskEXT-07329
  If the current pipeline bound to VK_PIPELINE_BIND_POINT_GRAPHICS does not contain a
To record an indirect mesh tasks drawing command with the draw count sourced from a buffer, call:

```c
// Provided by VK_EXT_mesh_shader
void vkCmdDrawMeshTasksIndirectCountEXT(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset,
    VkBuffer countBuffer,
    VkDeviceSize countBufferOffset,
    uint32_t maxDrawCount,
    uint32_t stride);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.
- `countBuffer` is the buffer containing the draw count.
- `countBufferOffset` is the byte offset into `countBuffer` where the draw count begins.
- `maxDrawCount` specifies the maximum number of draws that will be executed. The actual number of executed draw calls is the minimum of the count specified in `countBuffer` and `maxDrawCount`.
- `stride` is the byte stride between successive sets of draw parameters.

`vkCmdDrawMeshTasksIndirectCountEXT` behaves similarly to `vkCmdDrawMeshTasksIndirectEXT` except that the draw count is read by the device from a buffer during execution. The command will read an unsigned 32-bit integer from `countBuffer` located at `countBufferOffset` and use this as the draw count.

### Valid Usage

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-magFilter-04553**  
  If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-mipmapMode-04770**  
  If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-06479**
If a `VkImageView` is sampled with depth comparison, the image view's format features must contain `VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-02691 If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07888 If a `VkImageView` is accessed using atomic operations as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-02692 If a `VkImageView` is sampled with `VK_FILTER_CUBIC_EXT` as a result of this command, then the image view's format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-filterCubic-02694 Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-filterCubicMinmax-02695 Any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` with a reduction mode of either `VK_SAMPLER_REDUCTION_MODE_MIN` or `VK_SAMPLER_REDUCTION_MODE_MAX` as a result of this command must have a `VkImageViewType` and format that supports cubic filtering together with minmax filtering, as specified by `VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax` returned by `vkGetPhysicalDeviceImageFormatProperties2`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-cubicRangeClamp-09212 If the `cubicRangeClamp` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must not have a `VkSamplerReductionModeCreateInfo::reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-reductionMode-09213 Any `VkImageView` being sampled with a `VkSamplerReductionModeCreateInfo::reductionMode` equal to `VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM` as a result of this command must sample with `VK_FILTER_CUBIC_EXT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-selectableCubicWeights-09214 If the `selectableCubicWeights` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have `VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights` equal to `2281`.
VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-flags-02696
  Any VkImage created with a VkImageCreateInfo::flags containing VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV sampled as a result of this command must only be sampled using a VkSamplerAddressMode of VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpTypeImage-07027
  For any VkImageView being written as a storage image where the image format field of the OpTypeImage is Unknown, the view’s format features must contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpTypeImage-07028
  For any VkImageView being read as a storage image where the image format field of the OpTypeImage is Unknown, the view’s format features must contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpTypeImage-07029
  For any VkBufferView being written as a storage texel buffer where the image format field of the OpTypeImage is Unknown, the view’s buffer features must contain VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpTypeImage-07030
  Any VkBufferView being read as a storage texel buffer where the image format field of the OpTypeImage is Unknown then the view’s buffer features must contain VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08600
  For each set n that is statically used by a bound shader, a descriptor set must have been bound to n at the same pipeline bind point, with a VkPipelineLayout that is compatible for set n, with the VkPipelineLayout or VkDescriptorSetLayout array that was used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08601
  For each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-maintenance4-08602
  If the maintenance4 feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a VkPipelineLayout that is compatible for push constants, with the VkPipelineLayout or VkDescriptorSetLayout and VkPushConstantRange arrays used to create the current VkPipeline or VkShaderEXT, as described in Pipeline Layout Compatibility

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08114
  Descriptors in each bound descriptor set, specified via vkCmdBindDescriptorSets, must be valid if they are statically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was not created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT
If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdBindDescriptorSets, the bound VkPipeline must have been created without VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT.

Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by the VkPipeline bound to the pipeline bind point used by this command and the bound VkPipeline was created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT.

Descriptors in bound descriptor buffers, specified via vkCmdSetDescriptorBufferOffsetsEXT, must be valid if they are dynamically used by any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command.

If the descriptors used by the VkPipeline bound to the pipeline bind point were specified via vkCmdSetDescriptorBufferOffsetsEXT, the bound VkPipeline must have been created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT.

If a descriptor is dynamically used with a VkPipeline created with VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident.

If a descriptor is dynamically used with a VkShaderEXT created with a VkDescriptorSetLayout that was created with VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT, the descriptor memory must be resident.

If the shaderObject feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command.

If the shaderObject is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and VK_NULL_HANDLE shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command.

If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the VkPipeline object bound to the pipeline bind point used by this command, since that pipeline was bound.

If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used to sample from any VkImage with a VkImageView of the type.
VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, VK_IMAGE_VIEW_TYPE_1D_ARRAY, VK_IMAGE_VIEW_TYPE_2D_ARRAY or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY, in any shader stage

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08610
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions with ImplicitLod, Dref or Proj in their name, in any shader stage

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08611
  If the VkPipeline object bound to the pipeline bind point used by this command or any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a VkSampler object that uses unnormalized coordinates, that sampler must not be used with any of the SPIR-V OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-uniformBuffers-06935
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for uniformBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08612
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-storageBuffers-06936
  If any stage of the VkPipeline object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT or VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT for storageBuffers, and the robustBufferAccess feature is not enabled, that stage must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08613
  If the robustBufferAccess feature is not enabled, and any VkShaderEXT bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it must not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-commandBuffer-02707
  If commandBuffer is an unprotected command buffer and protectedNoFault is not supported, any resource accessed by bound shaders must not be a protected resource

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-06550
  If a bound shader accesses a VkSampler or VkImageView object that enables sampler Y'C
aC_r conversion, that object **must** only be used with `OpImageSample*` or `OpImageSparseSample*` instructions.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-ConstOffset-06551
  If a bound shader accesses a `VkSampler` or `VkImageView` object that enables sampler YC_aC_r conversion, that object **must** not use the `ConstOffset` and `Offset` operands.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-viewType-07752
  If a `VkImageView` is accessed as a result of this command, then the image view's `viewType` **must** match the `Dim` operand of the `OpTypeImage` as described in Instruction/Sampler/Image View Validation.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-format-07753
  If a `VkImageView` is accessed as a result of this command, then the numeric type of the image view's `format` and the `Sampled Type` operand of the `OpTypeImage` **must** match.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageWrite-08795
  If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the image view's format.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageWrite-08796
  If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have four components.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageWrite-04469
  If a `VkBufferView` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction **must** have at least as many components as the buffer view's format.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-SampledType-04470
  If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-SampledType-04471
  If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-SampledType-04472
  If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 64.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-SampledType-04473
  If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction **must** have a `Width` of 32.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-sparseImageInt64Atomics-04474
  If the `sparseImageInt64Atomics` feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions.
through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageWeightedSampleQCOM-06971
  If OpImageWeightedSampleQCOM is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageWeightedSampleQCOM-06972
  If OpImageWeightedSampleQCOM uses a VkImageView as a sample weight image as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageBoxFilterQCOM-06973
  If OpImageBoxFilterQCOM is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageBlockMatchSSDQCOM-06974
  If OpImageBlockMatchSSDQCOM is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageWeightedSampleQCOM-06977
  If OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, OpImageBlockMatchSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler must have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageBlockMatchWindow-09215
  If any command other than OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, OpImageBlockMatchGatherSADQCOM, OpImageBlockMatchSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler must not have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageBlockMatchWindow-09215
  If a OpImageBlockMatchWindow*QCOM or OpImageBlockMatchGather*QCOM instruction is used to
read from an \texttt{VkImageView} as a result of this command, then the image view’s format features must contain \texttt{VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM}.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageBlockMatchWindow-09216
  If a \texttt{OpImageBlockMatchWindow*QCOM} or \texttt{OpImageBlockMatchGather*QCOM} instruction is used to read from an \texttt{VkImageView} as a result of this command, then the image view’s format must be a single-component format.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpImageBlockMatchWindow-09217
  If a \texttt{OpImageBlockMatchWindow*QCOM} or \texttt{OpImageBlockMatchGather*QCOM} read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07288
  Any shader invocation executed by this command must terminate.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-renderPass-02684
  The current render pass must be compatible with the \texttt{renderPass} member of the \texttt{VkGraphicsPipelineCreateInfo} structure specified when creating the \texttt{VkPipeline} bound to \texttt{VK_PIPELINE_BIND_POINT_GRAPHICS}.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-subpass-02685
  The subpass index of the current render pass must be equal to the \texttt{subpass} member of the \texttt{VkGraphicsPipelineCreateInfo} structure specified when creating the \texttt{VkPipeline} bound to \texttt{VK_PIPELINE_BIND_POINT_GRAPHICS}.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07748
  If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-OpTypeImage-07468
  If any shader executed by this pipeline accesses an \texttt{OpTypeImage} variable with a \texttt{Dim} operand of \texttt{SubpassData}, it must be decorated with an \texttt{InputAttachmentIndex} that corresponds to a valid input attachment in the current subpass.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07469
  Input attachment views accessed in a subpass must be created with the same \texttt{VkFormat} as the corresponding subpass definition, and be created with a \texttt{VkImage} that is compatible with the attachment referenced by the subpass’ \texttt{pInputAttachments} [\texttt{InputAttachmentIndex}] in the currently bound \texttt{VkFramebuffer} as specified by Fragment Input Attachment Compatibility.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-06537
  Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-09000
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the \texttt{VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT} image layout, and either:
    - the \texttt{VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT} is set on the currently bound pipeline or
    - the last call to \texttt{vkCmdSetAttachmentFeedbackLoopEnableEXT} included.
and

- there is no currently bound graphics pipeline or
- the currently bound graphics pipeline was created with
  `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-09001**
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_DEPTH_BIT`
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-09002**
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
  - the `VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT` is set on the currently bound pipeline or
  - the last call to `vkCmdSetAttachmentFeedbackLoopEnableEXT` included `VK_IMAGE_ASPECT_STENCIL_BIT`
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` it must not be accessed in any way other than as an attachment by this command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-09003**
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-06539**
  If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command must not write to that image subresource as an attachment

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-06886**
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, depth writes must be disabled

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-06887**
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back writeMask are not zero, and stencil test is enabled, **all stencil ops must be VK_STENCIL_OP_KEEP**

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07831**  
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT** dynamic state enabled then **vkCmdSetViewport must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07832**  
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SCISSOR** dynamic state enabled then **vkCmdSetScissor must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07833**  
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LINE_WIDTH** dynamic state enabled then **vkCmdSetLineWidth must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08617**  
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetPolygonModeEXT** in the current command buffer set **polygonMode** to **VK_POLYGON_MODE_LINE**, **vkCmdSetLineWidth must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08618**  
  If a shader object is bound to the **VK_SHADER_STAGE_VERTEX_BIT** stage, and the most recent call to **vkCmdSetPrimitiveTopology** in the current command buffer set **primitiveTopology** to any line topology, **vkCmdSetLineWidth must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08619**  
  If a shader object that outputs line primitives is bound to the **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT** or **VK_SHADER_STAGE_GEOMETRY_BIT** stage, **vkCmdSetLineWidth must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07834**  
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_BIAS** dynamic state enabled then **vkCmdSetDepthBias or vkCmdSetDepthBias2EXT must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08620**  
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, and the most recent call to **vkCmdSetDepthBiasEnable** in the current command buffer set **depthBiasEnable** to **VK_TRUE**, **vkCmdSetDepthBias or vkCmdSetDepthBias2EXT must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07835**  
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_BLEND_CONSTANTS** dynamic state enabled then **vkCmdSetBlendConstants**
must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08621
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, and the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer set any element of `pColorBlendEnables` to VK_TRUE, and the most recent call to `vkCmdSetColorBlendEquationEXT` in the current command buffer set the same element of `pColorBlendEquations` to a `VkColorBlendEquationEXT` structure with any `VkBlendFactor` member with a value of `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07836
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BOUNDS dynamic state enabled then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08622
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, and the most recent call to `vkCmdSetDepthBoundsTestEnable` in the current command buffer set `depthBoundsTestEnable` to VK_TRUE, then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07837
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCILCOMPAREMASK dynamic state enabled then `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08623
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to VK_TRUE, `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07838
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCILWRITEMASK dynamic state enabled then `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08624
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to VK_TRUE, `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07839
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_REFERENCE` dynamic state enabled then `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08625
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilReference` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to `VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex`

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` set to `VK_TRUE` and the current subpass has a depth/stencil attachment, then that attachment must have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-06666
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08626
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetSampleLocationsEnableEXT` in the current command buffer set `sampleLocationsEnable` to `VK_TRUE`, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsPerPixel-07934
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07840
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CULL_MODE` dynamic state enabled then `vkCmdSetCullMode` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08627
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCullMode` must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_FRONT_FACE` dynamic state enabled then `vkCmdSetFrontFace` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFrontFace` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthTestEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE` dynamic state enabled then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_COMPARE_OP` dynamic state enabled then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthTestEnable` in the current command buffer set `depthTestEnable` to `VK_TRUE`, then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.
prior to this drawing command

- **VID-vkCmdDrawMeshTasksIndirectCountEXT-None-08632**
  If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawMeshTasksIndirectCountEXT-None-07847**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawMeshTasksIndirectCountEXT-None-08633**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawMeshTasksIndirectCountEXT-None-07848**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VID-vkCmdDrawMeshTasksIndirectCountEXT-viewportCount-03417**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline.

- **VID-vkCmdDrawMeshTasksIndirectCountEXT-scissorCount-03418**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `scissorCount` parameter of `vkCmdSetScissorWithCount` must match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline.

- **VID-vkCmdDrawMeshTasksIndirectCountEXT-viewportCount-03419**
  If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `scissorCount` parameter of `vkCmdSetScissorWithCount` must match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline.

2293
states enabled then both \texttt{vkCmdSetViewportWithCount} and \texttt{vkCmdSetScissorWithCount} must have been called in the current command buffer prior to this drawing command, and the \texttt{viewportCount} parameter of \texttt{vkCmdSetViewportWithCount} must match the \texttt{scissorCount} parameter of \texttt{vkCmdSetScissorWithCount}.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08635**
  If a shader object is bound to any graphics stage, then both \texttt{vkCmdSetViewportWithCount} and \texttt{vkCmdSetScissorWithCount} must have been called in the current command buffer prior to this drawing command, and the \texttt{viewportCount} parameter of \texttt{vkCmdSetViewportWithCount} must match the \texttt{scissorCount} parameter of \texttt{vkCmdSetScissorWithCount}.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-viewportCount-04137**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic state enabled, but not the \texttt{VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV} dynamic state enabled, then the bound graphics pipeline must have been created with \texttt{VkPipelineViewportWScalingStateCreateInfoNV::viewportCount} greater or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-viewportCount-04138**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV} dynamic states enabled then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWScalingNV} must be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-09232**
  If a shader object is bound to any graphics stage, and the \texttt{VK_NV_clip_space_w_scaling} extension is enabled on the device, then \texttt{vkCmdSetViewportWScalingNV} must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08636**
  If a shader object is bound to any graphics stage, and the \texttt{VK_NV_clip_space_w_scaling} extension is enabled on the device, then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWScalingNV} must be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-viewportCount-04139**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic state enabled, but not the \texttt{VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV} dynamic state enabled, then the bound graphics pipeline must have been created with \texttt{VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount} greater or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-viewportCount-04140**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} and \texttt{VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV} dynamic states enabled then the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportShadingRatePaletteNV} must be greater than or equal to the \texttt{viewportCount} parameter in the last call to \texttt{vkCmdSetViewportWithCount}.
vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-shadingRateImage-09233
  If the shadingRateImage feature is enabled, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoarseSampleOrderNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-shadingRateImage-09234
  If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetShadingRateImageEnableNV in the current command buffer set shadingRateImageEnable to VK_TRUE, then vkCmdSetViewportShadingRatePaletteNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08637
  If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, then the viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-VkPipelineViewportCreateInfo-04141
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportSwizzleStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-VkPipelineViewportCreateInfo-04142
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportExclusiveScissorStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV dynamic state enabled then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07879
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV dynamic state enabled then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-exclusiveScissor-09235
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is
enabled, then \texttt{vkCmdSetExclusiveScissorEnableNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08638**
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetExclusiveScissorEnableNV} in the current command buffer set any element of \texttt{pExclusiveScissorEnables} to \texttt{VK_TRUE}, then \texttt{vkCmdSetExclusiveScissorNV} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-04876**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE} dynamic state enabled then \texttt{vkCmdSetRasterizerDiscardEnable} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08639**
  If a shader object is bound to any graphics stage, then \texttt{vkCmdSetRasterizerDiscardEnable} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-04877**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE} dynamic state enabled then \texttt{vkCmdSetDepthBiasEnable} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08640**
  If a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDepthBiasEnable} must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-logicOp-04878**
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_LOGIC_OP_EXT} dynamic state enabled then \texttt{vkCmdSetLogicOpEXT} must have been called in the current command buffer prior to this drawing command and the \texttt{logicOp} must be a valid \texttt{VkLogicOp} value

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-primitiveFragmentShadingRateWithMultipleViewports-04552**
  If the \texttt{primitiveFragmentShadingRateWithMultipleViewports} limit is not supported, the bound graphics pipeline was created with the \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the \texttt{PrimitiveShadingRateKHR} built-in, then \texttt{vkCmdSetViewportWithCount} must have been called in the current command buffer prior to this drawing command, and the \texttt{viewportCount} parameter of \texttt{vkCmdSetViewportWithCount} must be 1

2296
If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be `VK_FALSE`.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`.

If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments.

If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.
If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is `VK_NULL_HANDLE`, and the layout member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is `VK_NULL_HANDLE`, and the layout member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is `VK_NULL_HANDLE`, and the layout member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is `VK_NULL_HANDLE`, and the layout member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_OPTIMAL`, this command must not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is `VK_NULL_HANDLE`, and the layout member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command must not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::viewMask` equal to `VkRenderingInfo::viewMask`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline must have been created with a `VkPipelineRenderingCreateInfo::colorAttachmentCount` equal to `VkRenderingInfo::colorAttachmentCount`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with an `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline.

If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass...
instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-dynamicRenderingUnusedAttachments-08912**
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07749**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08646**
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-attachmentCount-07750**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08647**
  If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07751**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command for each discard rectangle in
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_discard_rectangles` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDiscardRectangleEnableEXT` in the current command buffer set `discardRectangleEnable` to `VK_TRUE`, then `vkCmdSetDiscardRectangleModeEXT` must have been called in the current command buffer prior to this drawing command.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline must be equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`.
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline **must** be equal to `VK_FORMAT_UNDEFINED`.

If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline **must** be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format **must** be `VK_FORMAT_UNDEFINED`.

If the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`.

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline **must** have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`.

If the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount`.
parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-pDepthAttachment-06186**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-pStencilAttachment-06187**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-multisampledRenderToSingleSampled-07285**
  If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of `rasterizationSamples` for the currently bound graphics pipeline.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-multisampledRenderToSingleSampled-07286**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-multisampledRenderToSingleSampled-07287**
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not
VK_NULL_HANDLE, the value of rasterizationSamples for the currently bound graphics pipeline must be equal to the sample count used to create VkRenderingInfo::pStencilAttachment->imageView

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-pNext-07935
  If this command has been called inside a render pass instance started with vkCmdBeginRendering, and the pNext chain of VkRenderingInfo includes a VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the currently bound graphics pipeline must be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline must have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard must not be enabled

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline must not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07619
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_TESSSELLATION_DOMAIN_ORIGIN_EXT` dynamic state enabled then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07620**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-09237**
  If a shader object is bound to the `VK_SHADER_STAGE_TESSSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08650**
  If the depthClamp feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07621**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07622**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08652**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to VK_FALSE, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07623**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08653**
  If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07624**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-alphaToCoverageEnable-08919**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled, and alphaToCoverageEnable was VK_TRUE in the last call to vkCmdSetAlphaToCoverageEnableEXT, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08654**
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-alphaToCoverageEnable-08920**
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetAlphaToCoverageEnableEXT in the current command buffer set alphaToCoverageEnable to VK_TRUE, then the Fragment Output Interface must contain a variable for the alpha Component word in Location 0 at Index 0.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07625**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08655**
  If the alphaToOne feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetAlphaToOneEnableEXT must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07626**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT dynamic state enabled then vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08656**
  If the logicOp feature is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEnableEXT must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment's value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmdSetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.
command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08661
  If the \texttt{VK\_EXT\_conservative\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, then \texttt{vkCmdSetConservativeRasterizationModeEXT} must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07632
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_EXTRA\_PRIMITIVE\_OVERESTIMATION\_SIZE\_EXT} dynamic state enabled then \texttt{vkCmdSetExtraPrimitiveOverestimationSizeEXT} must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08662
  If the \texttt{VK\_EXT\_conservative\_rasterization} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, and the most recent call to \texttt{vkCmdSetConservativeRasterizationModeEXT} in the current command buffer set \texttt{conservativeRasterizationMode} to \texttt{VK\_CONSERVATIVE\_RASTERIZATION\_MODE\_OVERESTIMATE\_EXT}, then \texttt{vkCmdSetExtraPrimitiveOverestimationSizeEXT} must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07633
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_DEPTH\_CLIP\_ENABLE\_EXT} dynamic state enabled then \texttt{vkCmdSetDepthClipEnableEXT} must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08663
  If the \texttt{depthClipEnable} feature is enabled, and a shader object is bound to any graphics stage, then \texttt{vkCmdSetDepthClipEnableEXT} must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07634
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_SAMPLE\_LOCATIONS\_ENABLE\_EXT} dynamic state enabled then \texttt{vkCmdSetSampleLocationsEnableEXT} must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08664
  If the \texttt{VK\_EXT\_sample\_locations} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK\_FALSE}, then \texttt{vkCmdSetSampleLocationsEnableEXT} must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07635
  If the bound graphics pipeline state was created with the \texttt{VK\_DYNAMIC\_STATE\_COLOR\_BLEND\_ADVANCED\_EXT} dynamic state enabled then \texttt{vkCmdSetColorBlendAdvancedEXT} must have been called in the current command buffer
prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07636**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08665**
  If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07637**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08666**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08667**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08668**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07638**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08669**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08670**
If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to the vertex stage, and the most recent call to `vkCmdSetPrimitiveTopology` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08671
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07849
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08672
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then `vkCmdSetDepthClipNegativeOneToOneEXT` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07639
  If the bind graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08673
  If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07640
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08674
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08675
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV` must have been called in the current command buffer prior to this drawing command
graphics stage, then \texttt{vkCmdSetViewportSwizzleNV} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07642}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageToColorEnableNV} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08676}
  If the \texttt{VK_NV_fragment_coverage_to_color} extension is enabled, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetCoverageToColorEnableNV} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07643}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV} dynamic state enabled then \texttt{vkCmdSetCoverageToColorLocationNV} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08677}
  If the \texttt{VK_NV_fragment_coverage_to_color} extension is enabled, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetCoverageToColorEnableNV} in the current command buffer set \texttt{coverageToColorEnable} to \texttt{VK_TRUE}, then \texttt{vkCmdSetCoverageToColorLocationNV} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07644}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationModeNV} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08678}
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetCoverageModulationModeNV} \textbf{must} have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08679}
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetCoverageModulationModeNV} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetCoverageModulationTableEnableNV} in the current command buffer set \texttt{coverageToColorEnable} to \texttt{VK_TRUE}, \texttt{vkCmdSetCoverageToColorLocationNV} \textbf{must} have been called in the current command buffer prior to this drawing command
coverageModulationMode to any value other than \texttt{VK_COVERAGE_MODULATION_MODE_NONE_NV}, then \texttt{vkCmdSetCoverageModulationTableEnableNV} must have been called in the current command buffer prior to this drawing command.

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07646}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV} dynamic state enabled then \texttt{vkCmdSetCoverageModulationTableEnableNV} must have been called in the current command buffer prior to this drawing command.

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08680}
  If the \texttt{VK_NV_framebuffer_mixed_samples} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetCoverageModulationTableEnableNV} in the current command buffer set \texttt{coverageModulationTableEnable} to \texttt{VK_TRUE}, then \texttt{vkCmdSetCoverageModulationTableNV} must have been called in the current command buffer prior to this drawing command.

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07647}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetShadingRateImageEnableNV} must have been called in the current command buffer prior to this drawing command.

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-pipelineFragmentShadingRate-09238}
  If the \texttt{pipelineFragmentShadingRate} feature is enabled, and a shader object is bound to the \texttt{VK_SHADER_STAGE_FRAGMENT_BIT} stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetFragmentShadingRateKHR} must have been called in the current command buffer prior to this drawing command.

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08681}
  If the \texttt{shadingRateImage} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetShadingRateImageEnableNV} must have been called in the current command buffer prior to this drawing command.

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07648}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV} dynamic state enabled then \texttt{vkCmdSetRepresentativeFragmentTestEnableNV} must have been called in the current command buffer prior to this drawing command.

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08682}
  If the \texttt{representativeFragmentTest} feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetRepresentativeFragmentTestEnableNV} must have been called in the current command buffer prior to this drawing command.

- \textbf{VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07649}
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV  
dynamic state enabled then 
vkCmdSetCoverageReductionModeNV must have been called in the current command 
buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08683
  If the coverageReductionMode feature is enabled, and a shader object is bound to any 
  graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the 
current command buffer set rasterizerDiscardEnable to VK_FALSE, then 
vkCmdSetCoverageReductionModeNV must have been called in the current command 
buffer prior to this drawing command

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-pColorBlendEnables-07470
  If the bound graphics pipeline state was created with the 
  VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT state enabled and the last call to 
vkCmdSetColorBlendEnableEXT set pColorBlendEnables for any attachment to VK_TRUE, 
then for those attachments in the subpass the corresponding image view's format features 
must contain VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-rasterizationSamples-07471
  If the bound graphics pipeline state was created with the 
  VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and the current subpass does 
not use any color and/or depth/stencil attachments, then the rasterizationSamples in the 
last call to vkCmdSetRasterizationSamplesEXT must follow the rules for a zero- 
attachment subpass

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-samples-07472
  If the bound graphics pipeline state was created with the 
  VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state enabled and the 
  VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the samples parameter in 
the last call to vkCmdSetSampleMaskEXT must be greater or equal to the 
VkPipelineMultisampleStateCreateInfo::rasterizationSamples parameter used to create 
the bound graphics pipeline

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-samples-07473
  If the bound graphics pipeline state was created with the 
  VK_DYNAMIC_STATE_SAMPLE_MASK_EXT state and 
  VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, then the samples parameter in the last call to 
vkCmdSetSampleMaskEXT must be greater or equal to the rasterizationSamples parameter in the last call to 
vkCmdSetRasterizationSamplesEXT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-rasterizationSamples-07474
  If the bound graphics pipeline state was created with the 
  VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, and neither the 
  VK_AMD_mixed_attachment_samples nor the VK_NV_framebuffer_mixed_samples extensions are 
enabled, then the rasterizationSamples in the last call to 
vkCmdSetRasterizationSamplesEXT must be the same as the current subpass color and/or 
depth/stencil attachments

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-09211
  If the bound graphics pipeline state was created with the 
  VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, or a shader object is bound to 
any graphics stage, and the current render pass instance includes a
VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the rasterizationSamples in the last call to vkCmdSetRasterizationSamplesEXT must be the same as the rasterizationSamples member of that structure

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-firstAttachment-07476
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic state enabled then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEnableEXT calls must specify an enable for all active color attachments in the current subpass

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-firstAttachment-07477
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEquationEXT calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-firstAttachment-07478
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorWriteMaskEXT calls must specify the color write mask for all active color attachments in the current subpass

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-firstAttachment-07479
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-advancedBlendMaxColorAttachments-07480
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-primitivesGeneratedQueryWithNonZeroStreams-07481
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the
VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, and the bound graphics pipeline was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT must have set the rasterizationStream to zero.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsPerPixel-07482**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsPerPixel-07483**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsEnable-07484**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsEnable-07485**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_DISABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsEnable-07486**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsEnable-07487**
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code must not statically use the extended instruction `InterpolateAtSample`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsEnable-07937
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-sampleLocationsEnable-07938
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationsPerPixel` must equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-coverageModulationTableEnable-07488
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to `VK_TRUE`, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-rasterizationSamples-07489
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-coverageToColorEnable-07490
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set the `coverageToColorEnable` to `VK_TRUE`, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV` `coverageToColorLocation`, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-coverageReductionMode-07491**
  If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, the current coverage reduction mode `coverageReductionMode`, then the current `rasterizationSamples`, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by `vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-viewportCount-07492**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV` ::`viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-viewportCount-07493**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportSwizzleNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-rasterizationSamples-07494**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if the current subpass has any color attachments and `rasterizationSamples` of the last call to `vkCmdSetRasterizationSamplesEXT` is greater than the number of color samples, then the pipeline `sampleShadingEnable` must be `VK_FALSE`.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-stippledLineEnable-07495**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT`, then the `stippledRectangularLines` feature must be enabled.

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-stippledLineEnable-07496**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is...
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT`, then the `stippledSmoothLines` feature must be enabled

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-stippledLineEnable-07497**
- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-stippledLineEnable-07498**

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature must be enabled and `VkPhysicalDeviceLimits::strictLines` must be `VK_TRUE`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-conservativePointAndLineRasterization-07499**

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, `conservativePointAndLineRasterization` is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to `vkCmdSetConservativeRasterizationModeEXT` must be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-stage-07073**

If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries must not be active

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08877**

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT` dynamic state `vkCmdSetAttachmentFeedbackLoopEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07850**

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08684**

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08685**

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled,
vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08686
  If there is no bound graphics pipeline, and the tessellationShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08687
  If there is no bound graphics pipeline, and the geometryShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_GEOMETRY_BIT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08688
  If there is no bound graphics pipeline, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08689
  If there is no bound graphics pipeline, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08690
  If there is no bound graphics pipeline, and the taskShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_TASK_BIT_EXT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08691
  If there is no bound graphics pipeline, and the meshShader feature is enabled, vkCmdBindShadersEXT must have been called in the current command buffer with pStages with an element of VK_SHADER_STAGE_MESH_BIT_EXT

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08692
  If there is no bound graphics pipeline, and at least one of the taskShader and meshShader features is enabled, one of the VK_SHADER_STAGE_VERTEX_BIT or VK_SHADER_STAGE_MESH_BIT_EXT stages must have a valid VkShaderEXT bound, and the other must have no VkShaderEXT bound

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08693
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created without the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, a valid VkShaderEXT must be bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08694
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, and that VkShaderEXT was created with the VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT flag, there must be no VkShaderEXT bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08695
  If there is no bound graphics pipeline, and both the taskShader and meshShader features are enabled, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_MESH_BIT_EXT stage, there must be no VkShaderEXT bound to either the VK_SHADER_STAGE_TASK_BIT_EXT stage or the VK_SHADER_STAGE_MESH_BIT_EXT stage

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08696
  If there is no bound graphics pipeline, and a valid VkShaderEXT is bound to the VK_SHADER_STAGE_VERTEX_BIT stage, there must be no VkShaderEXT bound to the VK_SHADER_STAGE_TASK_BIT_EXT stage

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08697
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, then all shaders created with the
VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag in the same `vkCreateShadersEXT` call must also be bound

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08699**
  If any graphics shader is bound which was created with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag, any stages in between stages whose shaders which did not create a shader with the VK_SHADER_CREATE_LINK_STAGE_BIT_EXT flag as part of the same `vkCreateShadersEXT` call must not have any `VkShaderEXT` bound

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08878**
  All bound graphics shader objects must have been created with identical or identically defined push constant ranges

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08879**
  All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-08880**
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to VK_FALSE `vkCmdSetAttachmentFeedbackLoopEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-pDynamicStates-08715**
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in `VkPipelineDynamicStateCreateInfo` ::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses `OpDepthAttachmentReadEXT`, the depthWriteEnable parameter in the last call to `vkCmdSetDepthWriteEnable` must be VK_FALSE

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-pDynamicStates-08716**
  If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_STENCIL_WRITE_MASK set in `VkPipelineDynamicStateCreateInfo` ::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses `OpStencilAttachmentReadEXT`, the writeMask parameter in the last call to `vkCmdSetStencilWriteMask` must be 0

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-09116**
  If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of `vkCmdSetColorWriteMaskEXT` must either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, and VK_COLOR_COMPONENT_B_BIT, or none of them

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-maxFragmentDualSrcAttachments-09239**
  If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command must be less than `maxFragmentDualSrcAttachments`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-stage-06480**
The bound graphics pipeline must not have been created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07074 Transform Feedback Queries must not be active
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-07075 Primitives Generated Queries must not be active
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-pipelineStatistics-07076 The `pipelineStatistics` member used to create any active Pipeline Statistics Query must not contain `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_VERTICES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_VERTEX_SHADER_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_CLIPPING_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_CLIPPING_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_CONTROL_SHADER_PATCHES_BIT`, or `VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT`.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-buffer-02708 If `buffer` is non-sparse then it must be bound completely and contiguously to a single `VkDeviceMemory` object.
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-buffer-02709 `buffer` must have been created with the `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` bit set.
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-offset-02710 `offset` must be a multiple of 4.
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-commandBuffer-02711 `commandBuffer` must not be a protected command buffer.

- VUID-vkCmdDrawMeshTasksIndirectCountEXT-countBuffer-02714 If `countBuffer` is non-sparse then it must be bound completely and contiguously to a single `VkDeviceMemory` object.
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-countBuffer-02715 `countBuffer` must have been created with the `VK_BUFFER_USAGE_INDIRECT_BUFFER_BIT` bit set.
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-countBufferOffset-02716 `countBufferOffset` must be a multiple of 4.
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-countBuffer-02717 The count stored in `countBuffer` must be less than or equal to `VkPhysicalDeviceLimits::maxDrawIndirectCount`.
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-countBufferOffset-04129 `countBufferOffset + sizeof(uint32_t)` must be less than or equal to the size of `countBuffer`.
- VUID-vkCmdDrawMeshTasksIndirectCountEXT-None-04445
If `drawIndirectCount` is not enabled this function must not be used

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-stride-07096**
  
  `stride` must be a multiple of 4 and must be greater than or equal to `sizeof(VkDrawMeshTasksIndirectCommandEXT)`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-maxDrawCount-07097**
  
  If `maxDrawCount` is greater than or equal to 1, `(stride × (maxDrawCount - 1) + offset + sizeof(VkDrawMeshTasksIndirectCommandEXT))` must be less than or equal to the size of `buffer`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-countBuffer-07098**
  
  If the count stored in `countBuffer` is equal to 1, `(offset + sizeof(VkDrawMeshTasksIndirectCommandEXT))` must be less than or equal to the size of `buffer`

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-MeshEXT-07100**
  
  The current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` must contain a shader stage using the `MeshEXT Execution Model`

**Valid Usage (Implicit)**

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-commandBuffer-parameter**
  
  `commandBuffer` must be a valid `VkCommandBuffer` handle

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-buffer-parameter**
  
  `buffer` must be a valid `VkBuffer` handle

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-countBuffer-parameter**
  
  `countBuffer` must be a valid `VkBuffer` handle

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-commandBuffer-recording**
  
  `commandBuffer` must be in the recording state

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-commandBuffer-cmdpool**
  
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-renderpass**
  
  This command must only be called inside of a render pass instance

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-videocoding**
  
  This command must only be called outside of a video coding scope

- **VUID-vkCmdDrawMeshTasksIndirectCountEXT-commonparent**
  
  Each of `buffer`, `commandBuffer`, and `countBuffer` must have been created, allocated, or retrieved from the same `VkDevice`

**Host Synchronization**

- Host access to `commandBuffer` must be externally synchronized
• Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

21.6. Programmable Cluster Culling Shading

In this drawing approach, cluster are generated by the cluster culling shader stage. It operates similarly to dispatching compute as the shaders make use of workgroups.

To record a cluster culling shader drawing command, call:

```c
// Provided by VK_HUAWEI_cluster_culling_shader
void vkCmdDrawClusterHUAWEI(
    VkCommandBuffer commandBuffer,
    uint32_t groupCountX,
    uint32_t groupCountY,
    uint32_t groupCountZ);
```

• commandBuffer is the command buffer into which the command will be recorded.
• groupCountX is the number of local workgroups to dispatch in the X dimension.
• groupCountY is the number of local workgroups to dispatch in the Y dimension.
• groupCountZ is the number of local workgroups to dispatch in the Z dimension.

When the command is executed, a global workgroup consisting of groupCountX*groupCountY*groupCountZ local workgroup is assembled. Note that the cluster culling shader pipeline only accepts `vkCmdDrawClusterHUAWEI` and `vkCmdDrawClusterIndirectHUAWEI` as drawing commands.

Valid Usage

• VUID-vkCmdDrawClusterHUAWEI-magFilter-04553
  If a VkSampler created with magFilter or minFilter equal to VK_FILTER_LINEAR and compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

• VUID-vkCmdDrawClusterHUAWEI-mipmapMode-04770
  If a VkSampler created with.mipmapMode equal to VK_SAMPLER_MIPMAP_MODE_LINEAR and
compareEnable equal to VK_FALSE is used to sample a VkImageView as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawClusterHUAWEI-None-06479
  If a VkImageView is sampled with depth comparison, the image view’s format features must contain VK_FORMAT_FEATURE_2_SAMPLES_IMAGE_DEPTH_COMPARISON_BIT

- VUID-vkCmdDrawClusterHUAWEI-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT

- VUID-vkCmdDrawClusterHUAWEI-None-07888
  If a VK_DESCRIPTOR_TYPE_STORAGE_TEXEL_BUFFER descriptor is accessed using atomic operations as a result of this command, then the storage texel buffer’s format features must contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT

- VUID-vkCmdDrawClusterHUAWEI-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT

- VUID-vkCmdDrawClusterHUAWEI-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it must not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY

- VUID-vkCmdDrawClusterHUAWEI-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawClusterHUAWEI-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command must have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawClusterHUAWEI-cubicRangeClamp-09212
  If the cubicRangeClamp feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must not have a VkSamplerReductionModeCreateInfo::reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM

- VUID-vkCmdDrawClusterHUAWEI-reductionMode-09213
  Any VkImageView being sampled with a VkSamplerReductionModeCreateInfo::reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM as a result of this command must sample with VK_FILTER_CUBIC_EXT
If the `selectableCubicWeights` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command **must** have `VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights` equal to `VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM`.

Any `VkImage` created with a `VkImageCreateInfo::flags` containing `VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV` sampled as a result of this command **must** only be sampled using a `VkSamplerAddressMode` of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`.

For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view’s format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view’s format features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view’s buffer features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view’s buffer features **must** contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

For each set `n` that is statically used by a bound shader, a descriptor set **must** have been bound to `n` at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set `n`, with the `VkPipelineLayout` or `VkDescriptorSetLayout` array that was used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

For each push constant that is statically used by a bound shader, a push constant value **must** have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

If the `maintenance4` feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value **must** have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.
Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, must be valid if they are statically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was not created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

- **VUID-vkCmdDrawClusterHUAWEI-None-08115**
  If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdBindDescriptorSets`, the bound `VkPipeline` must have been created without `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

- **VUID-vkCmdDrawClusterHUAWEI-None-08116**
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by the `VkPipeline` bound to the pipeline bind point used by this command and the bound `VkPipeline` was created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

- **VUID-vkCmdDrawClusterHUAWEI-None-08604**
  Descriptors in bound descriptor buffers, specified via `vkCmdSetDescriptorBufferOffsetsEXT`, must be valid if they are dynamically used by any `VkShaderEXT` bound to a stage corresponding to the pipeline bind point used by this command.

- **VUID-vkCmdDrawClusterHUAWEI-None-08117**
  If the descriptors used by the `VkPipeline` bound to the pipeline bind point were specified via `vkCmdSetDescriptorBufferOffsetsEXT`, the bound `VkPipeline` must have been created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`.

- **VUID-vkCmdDrawClusterHUAWEI-None-08119**
  If a descriptor is dynamically used with a `VkPipeline` created with `VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory must be resident.

- **VUID-vkCmdDrawClusterHUAWEI-None-08605**
  If a descriptor is dynamically used with a `VkShaderEXT` created with a `VkDescriptorSetLayout` that was created with `VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT`, the descriptor memory must be resident.

- **VUID-vkCmdDrawClusterHUAWEI-None-08606**
  If the `shaderObject` feature is not enabled, a valid pipeline must be bound to the pipeline bind point used by this command.

- **VUID-vkCmdDrawClusterHUAWEI-None-08607**
  If the `shaderObject` is enabled, either a valid pipeline must be bound to the pipeline bind point used by this command, or a valid combination of valid and `VK_NULL_HANDLE` shader objects must be bound to every supported shader stage corresponding to the pipeline bind point used by this command.

- **VUID-vkCmdDrawClusterHUAWEI-None-08608**
  If a pipeline is bound to the pipeline bind point used by this command, there must not have been any calls to dynamic state setting commands for any state not specified as dynamic in the `VkPipeline` object bound to the pipeline bind point used by this command, since that pipeline was bound.

- **VUID-vkCmdDrawClusterHUAWEI-None-08609**
If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler **must** not be used to sample from any **VkImage** with a **VkImageView** of the type **VK_IMAGE_VIEW_TYPE_3D**, **VK_IMAGE_VIEW_TYPE_CUBE**, **VK_IMAGE_VIEW_TYPE_1D_ARRAY**, **VK_IMAGE_VIEW_TYPE_2D_ARRAY** or **VK_IMAGE_VIEW_TYPE_CUBE_ARRAY**, in any shader stage

- **VUID-vkCmdDrawClusterHUAWEI-None-08610**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V **OpImageSample** or **OpImageSparseSample** instructions with **ImplicitLod**, **Dref** or **Proj** in their name, in any shader stage

- **VUID-vkCmdDrawClusterHUAWEI-None-08611**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V **OpImageSample** or **OpImageSparseSample** instructions that includes a LOD bias or any offset values, in any shader stage

- **VUID-vkCmdDrawClusterHUAWEI-uniformBuffers-06935**
  If any stage of the **VkPipeline** object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT** or **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT** for **uniformBuffers**, and the **robustBufferAccess** feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawClusterHUAWEI-None-08612**
  If the **robustBufferAccess** feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawClusterHUAWEI-storageBuffers-06936**
  If any stage of the **VkPipeline** object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT** or **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT** for **storageBuffers**, and the **robustBufferAccess** feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawClusterHUAWEI-None-08613**
  If the **robustBufferAccess** feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawClusterHUAWEI-commandBuffer-02707**

2326
If `commandBuffer` is an unprotected command buffer and `protectedNoFault` is not supported, any resource accessed by `bound shaders` must not be a protected resource.

- **VUID-vkCmdDrawClusterHUAWEI-None-06550**
  If a bound shader accesses a `VkSampler` or `VkImageView` object that enables sampler Y’C_aC_b conversion, that object must only be used with `OpImageSample*` or `OpImageSparseSample*` instructions.

- **VUID-vkCmdDrawClusterHUAWEI-ConstOffset-06551**
  If a bound shader accesses a `VkSampler` or `VkImageView` object that enables sampler Y’C_aC_b conversion, that object must not use the `ConstOffset` and `Offset` operands.

- **VUID-vkCmdDrawClusterHUAWEI-viewType-07752**
  If a `VkImageView` is accessed as a result of this command, then the image view’s `viewType` must match the `Dim` operand of the `OpTypeImage` as described in Instruction/Sampler/Image View Validation.

- **VUID-vkCmdDrawClusterHUAWEI-format-07753**
  If a `VkImageView` is accessed as a result of this command, then the numeric type of the image view’s `format` and the `Sampled Type` operand of the `OpTypeImage` must match.

- **VUID-vkCmdDrawClusterHUAWEI-OpImageWrite-08795**
  If a `VkImageView` created with a format other than `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction must have at least as many components as the image view’s format.

- **VUID-vkCmdDrawClusterHUAWEI-OpImageWrite-08796**
  If a `VkImageView` created with the format `VK_FORMAT_A8_UNORM_KHR` is accessed using `OpImageWrite` as a result of this command, then the `Type` of the `Texel` operand of that instruction must have four components.

- **VUID-vkCmdDrawClusterHUAWEI-SampledType-04470**
  If a `VkImageView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 64.

- **VUID-vkCmdDrawClusterHUAWEI-SampledType-04471**
  If a `VkImageView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 32.

- **VUID-vkCmdDrawClusterHUAWEI-SampledType-04472**
  If a `VkBufferView` with a `VkFormat` that has a 64-bit component width is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that instruction must have a `Width` of 64.

- **VUID-vkCmdDrawClusterHUAWEI-SampledType-04473**
  If a `VkBufferView` with a `VkFormat` that has a component width less than 64-bit is accessed as a result of this command, the `SampledType` of the `OpTypeImage` operand of that...
instruction must have a Width of 32

- VUID-vkCmdDrawClusterHUAWEI-sparseImageInt64Atomics-04474
  If the sparseImageInt64Atomics feature is not enabled, VkImage objects created with the VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawClusterHUAWEI-sparseImageInt64Atomics-04475
  If the sparseImageInt64Atomics feature is not enabled, VkBuffer objects created with the VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT flag must not be accessed by atomic instructions through an OpTypeImage with a SampledType with a Width of 64 by this command

- VUID-vkCmdDrawClusterHUAWEI-OpImageWeightedSampleQCOM-06971
  If OpImageWeightedSampleQCOM is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM

- VUID-vkCmdDrawClusterHUAWEI-OpImageWeightedSampleQCOM-06972
  If OpImageWeightedSampleQCOM uses a VkImageView as a sample weight image as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM

- VUID-vkCmdDrawClusterHUAWEI-OpImageBoxFilterQCOM-06973
  If OpImageBoxFilterQCOM is used to sample a VkImageView as a result of this command, then the image view's format features must contain VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM

- VUID-vkCmdDrawClusterHUAWEI-OpImageBlockMatchSSDQCOM-06974
  If OpImageBlockMatchSSDQCOM is used to read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation

- VUID-vkCmdDrawClusterHUAWEI-OpImageWeightedSampleQCOM-06977
  If any command other than OpImageWeightedSampleQCOM, OpImageBoxFilterQCOM, OpImageBlockMatchWindowSSDQCOM, OpImageBlockMatchWindowSADQCOM, OpImageBlockMatchGatherSSDQCOM, or OpImageBlockMatchSADQCOM uses a VkSampler as a result of this command, then the sampler must have been created with VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM
command, then the sampler **must** not have been created with

```cpp
VK_SAMPER_CREATE_IMAGE_PROCESSING_BIT_QCOM
```

- **VUID-vkCmdDrawClusterHUAWEI-OpImageBlockMatchWindow-09215**
  If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from an `VkImageView` as a result of this command, then the image view's **format features** must contain `VK_FORMAT_FEATURE_2_BLOCK_MATCHING_BIT_QCOM`

- **VUID-vkCmdDrawClusterHUAWEI-OpImageBlockMatchWindow-09216**
  If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from an `VkImageView` as a result of this command, then the image view's format **must** be a single-component format.

- **VUID-vkCmdDrawClusterHUAWEI-OpImageBlockMatchWindow-09217**
  If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` read from a reference image as result of this command, then the specified reference coordinates **must** not fail integer texel coordinate validation

- **VUID-vkCmdDrawClusterHUAWEI-None-07288**
  Any shader invocation executed by this command **must** terminate

- **VUID-vkCmdDrawClusterHUAWEI-renderPass-02684**
  The current render pass **must** be compatible with the `renderPass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- **VUID-vkCmdDrawClusterHUAWEI-subpass-02685**
  The subpass index of the current render pass **must** be equal to the `subpass` member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`

- **VUID-vkCmdDrawClusterHUAWEI-None-07748**
  If any shader statically accesses an input attachment, a valid descriptor **must** be bound to the pipeline via a descriptor set

- **VUID-vkCmdDrawClusterHUAWEI-OpTypeImage-07468**
  If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it **must** be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass

- **VUID-vkCmdDrawClusterHUAWEI-None-07469**
  Input attachment views accessed in a subpass **must** be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass' `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility

- **VUID-vkCmdDrawClusterHUAWEI-None-06537**
  Memory backing image subresources used as attachments in the current render pass **must** not be written in any way other than as an attachment by this command

- **VUID-vkCmdDrawClusterHUAWEI-None-09000**
  If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the
VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:

- the VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
- the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_COLOR_BIT and
  - there is no currently bound graphics pipeline or
  - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawClusterHUAWEI-None-09001
  If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:

  - the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  - the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_DEPTH_BIT and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawClusterHUAWEI-None-09002
  If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:

  - the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  - the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_STENCIL_BIT and
    - there is no currently bound graphics pipeline or
    - the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

- VUID-vkCmdDrawClusterHUAWEI-None-09003
  If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

- VUID-vkCmdDrawClusterHUAWEI-None-06539
  If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command must not write to that image subresource as an attachment
• VUID-vkCmdDrawClusterHUAWEI-None-06886
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, **depth writes must** be disabled

• VUID-vkCmdDrawClusterHUAWEI-None-06887
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back **writeMask** are not zero, and stencil test is enabled, **all stencil ops must** be **VK_STENCIL_OP_KEEP**

• VUID-vkCmdDrawClusterHUAWEI-None-07831
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT** dynamic state enabled then **vkCmdSetViewport** **must** have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07832
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SCISSOR** dynamic state enabled then **vkCmdSetScissor** **must** have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07833
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LINE_WIDTH** dynamic state enabled then **vkCmdSetLineWidth** **must** have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08617
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetPolygonModeEXT** in the current command buffer set **polygonMode** to **VK_POLYGON_MODE_LINE**, **vkCmdSetLineWidth** **must** have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08618
  If a shader object is bound to the **VK_SHADER_STAGE_VERTEX_BIT** stage, and the most recent call to **vkCmdSetPrimitiveTopology** in the current command buffer set **primitiveTopology** to any line topology, **vkCmdSetLineWidth** **must** have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08619
  If a shader object that outputs line primitives is bound to the **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT** or **VK_SHADER_STAGE_GEOMETRY_BIT** stage, **vkCmdSetLineWidth** **must** have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07834
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_BIAS** dynamic state enabled then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** **must** have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08620
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, and the most recent call to **vkCmdSetDepthBiasEnable** in the current command buffer set **depthBiasEnable** to **VK_TRUE**, **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT** **must** have been called in the current
command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07835
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled then `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08621
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer set any element of `pColorBlendEnables` to `VK_TRUE`, and the most recent call to `vkCmdSetColorBlendEquationEXT` in the current command buffer set the same element of `pColorBlendEquations` to a `VkColorBlendEquationEXT` structure with any `VkBlendFactor` member with a value of `VK_BLEND_FACTOR_CONSTANT_COLOR`, `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or `VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, `vkCmdSetBlendConstants` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07836
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS` dynamic state enabled then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08622
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetDepthBoundsTestEnable` in the current command buffer set `depthBoundsTestEnable` to `VK_TRUE`, then `vkCmdSetDepthBounds` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07837
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK` dynamic state enabled then `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08623
If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, `vkCmdSetStencilCompareMask` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07838
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK` dynamic state enabled then `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08624
If a shader object is bound to any graphics stage, and the most recent call to
vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-07839
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled then vkCmdSetStencilReference must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-08625
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetStencilTestEnable in the current command buffer set stencilTestEnable to VK_TRUE, vkCmdSetStencilReference must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum instance index must be less than or equal to VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex

- VUID-vkCmdDrawClusterHUAWEI-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawClusterHUAWEI-None-06666
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-08626
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetSampleLocationsEnableEXT in the current command buffer set sampleLocationsEnable to VK_TRUE, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-sampleLocationsPerPixel-07934
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawClusterHUAWEI-None-07840
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled then vkCmdSetCullMode must have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawClusterHUAWEI-None-08627
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set
  rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCullMode must have been called in
  the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07841
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_FRONT_FACE
  dynamic state enabled then vkCmdSetFrontFace must have been called in the current
  command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08628
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set
  rasterizerDiscardEnable to VK_FALSE, then vkCmdSetFrontFace must have been called in
  the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07843
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE dynamic state enabled then
  vkCmdSetDepthTestEnable must have been called in the current command buffer prior to
  this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08629
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set
  rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthTestEnable must have been
  called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07844
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE dynamic state enabled then
  vkCmdSetDepthWriteEnable must have been called in the current command buffer prior to
  this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08630
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set
  rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthWriteEnable must have been
  called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07845
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_DEPTH_COMPARE_OP dynamic state enabled then
  vkCmdSetDepthCompareOp must have been called in the current command buffer prior to
  this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08631
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set
  rasterizerDiscardEnable to VK_FALSE, and the most recent call to
  vkCmdSetDepthTestEnable in the current command buffer set depthTestEnable to VK_TRUE,
  then vkCmdSetDepthCompareOp must have been called in the current command buffer
prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07846**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterHUAWEI-None-08632**
  If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterHUAWEI-None-07847**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterHUAWEI-None-08633**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterHUAWEI-None-07848**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterHUAWEI-None-08634**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-03417**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `VkPipelineViewportStateCreateInfo::scissorCount` of the pipeline.

- **VUID-vkCmdDrawClusterHUAWEI-scissorCount-03418**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior
to this drawing command, and the `scissorCount` parameter of `vkCmdSetScissorWithCount`

**must** match the `VkPipelineViewportStateCreateInfo::viewportCount` of the pipeline

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-03419**
  If the bound graphics pipeline state was created with both the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic states enabled then both `vkCmdSetViewportWithCount` and `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` **must** match the `scissorCount` parameter of `vkCmdSetScissorWithCount`

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-04137**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic state enabled, then the bound graphics pipeline **must** have been created with `VkPipelineViewportWScalingStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-04138**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-04139**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, but not the `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic state enabled, then the bound graphics pipeline **must** have been created with `VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-04140**

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-04140**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then `vkCmdSetViewportWScalingNV` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-08636**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

- **VUID-vkCmdDrawClusterHUAWEI-intersectionCount-09731**
  The `intersectionCount` parameter can only be compared to the `intersectionCount` parameter of a recently called `vkCmdSetIntersectionWithCount`

- **VUID-vkCmdDrawClusterHUAWEI-viewportCount-04140**
  If a shader object is bound to any graphics stage, and the `VK_NV_clip_space_w_scaling` extension is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportWScalingNV` **must** be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` and `VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV` dynamic states enabled then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

• VUID-vkCmdDrawClusterHUAWEI-shadingRateImage-09233
  If the `shadingRateImage` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, then `vkCmdSetCoarseSampleOrderNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-shadingRateImage-09234
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set rasterizerDiscardEnable to `VK_FALSE`, and the most recent call to `vkCmdSetShadingRateImageEnableNV` in the current command buffer set shadingRateImageEnable to `VK_TRUE`, then `vkCmdSetViewportShadingRatePaletteNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08637
  If a shader object is bound to any graphics stage, and the `shadingRateImage` feature is enabled on the device, then the `viewportCount` parameter in the last call to `vkCmdSetViewportShadingRatePaletteNV` must be greater than or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

• VUID-vkCmdDrawClusterHUAWEI-VkPipelineViewportCreateInfo-04141
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportSwizzleStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportSwizzleStateCreateInfoNV::viewportCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

• VUID-vkCmdDrawClusterHUAWEI-VkPipelineViewportCreateInfo-04142
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled and a `VkPipelineViewportExclusiveScissorStateCreateInfoNV` structure chained from `VkPipelineViewportStateCreateInfo`, then the bound graphics pipeline must have been created with `VkPipelineViewportExclusiveScissorStateCreateInfoNV::exclusiveScissorCount` greater or equal to the `viewportCount` parameter in the last call to `vkCmdSetViewportWithCount`

• VUID-vkCmdDrawClusterHUAWEI-None-07878
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV` dynamic state enabled then `vkCmdSetExclusiveScissorEnableNV` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07879
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV dynamic state enabled then
vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-exclusiveScissor-09235
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08638
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetExclusiveScissorEnableNV in the current command buffer set any element of pExclusiveScissorEnables to VK_TRUE, then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-04876
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08639
  If a shader object is bound to any graphics stage, then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-04877
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08640
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-logicOp-04878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled then vkCmdSetLogicOpEXT must have been called in the current command buffer prior to this drawing command and the logicOp must be a valid VkLogicOp value

• VUID-vkCmdDrawClusterHUAWEI-logicOp-04552
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the logicOp feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEXT must have been called in the current command buffer prior to this drawing command and the logicOp must be a valid VkLogicOp value

• VUID-vkCmdDrawClusterHUAWEI-primitiveFragmentShadingRateWithMultipleViewports-04552
If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

- VUID-vkCmdDrawClusterHUAWEI-primitiveFragmentShadingRateWithMultipleViewports-08642
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1.

- VUID-vkCmdDrawClusterHUAWEI-blendEnable-04727
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be `VK_FALSE`.

- VUID-vkCmdDrawClusterHUAWEI-None-08643
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view’s `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`.

- VUID-vkCmdDrawClusterHUAWEI-multisampledRenderToSingleSampled-07284
  If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments.

- VUID-vkCmdDrawClusterHUAWEI-None-08644
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments.

- VUID-vkCmdDrawClusterHUAWEI-None-08876
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`.
If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_STENCIL_ATTACHMENT_OPTIMAL`, this command **must** not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_ATTACHMENT_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_READ_ONLY_OPTIMAL`, this command **must** not write any values to the depth attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment.

If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo` ::`viewMask` equal to `VkRenderingInfo` ::`viewMask`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo` ::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo` ::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo` ::`pColorAttachmentFormats` used to create the currently
bound graphics pipeline

- VUID-vkCmdDrawClusterHUAWEI-dynamicRenderingUnusedAttachments-08911
  If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawClusterHUAWEI-dynamicRenderingUnusedAttachments-08912
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`

- VUID-vkCmdDrawClusterHUAWEI-attachmentCount-07750
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline

- VUID-vkCmdDrawClusterHUAWEI-attachmentCount-07751
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the number of color attachments in the current render pass instance

- VUID-vkCmdDrawClusterHUAWEI-attachmentCount-07752
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the number of color attachments in the current render pass instance

- VUID-vkCmdDrawClusterHUAWEI-attachmentCount-07753
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the number of color attachments in the current render pass instance
vkCmdSetDiscardRectangleEXT must have been called in the current command buffer prior to this drawing command for each discard rectangle in VkPipelineDiscardRectangleStateCreateInfoEXT::discardRectangleCount

• VUID-vkCmdDrawClusterHUAWEI-None-07880
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT dynamic state enabled then vkCmdSetDiscardRectangleEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-rasterizerDiscardEnable-09236
If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08648
If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDiscardRectangleEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07881
If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT dynamic state enabled then vkCmdSetDiscardRectangleModeEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08649
If the VK_EXT_discard_rectangles extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetDiscardRectangleEnableEXT in the current command buffer set discardRectangleEnable to VK_TRUE, then vkCmdSetDiscardRectangleModeEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-dynamicRenderingUnusedAttachments-08913
If the current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to VK_FORMAT_UNDEFINED

• VUID-vkCmdDrawClusterHUAWEI-dynamicRenderingUnusedAttachments-08914
If current render pass instance was begun with vkCmdBeginRendering, the dynamicRenderingUnusedAttachments feature is not enabled, and VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, the value of VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the currently bound graphics pipeline must be equal to the VkFormat used to create VkRenderingInfo::pDepthAttachment->imageView
If the current render pass instance was begun with `vkCmdBeginRendering`, the dynamicRenderingUnusedAttachments feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the dynamicRenderingUnusedAttachments feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering`, the dynamicRenderingUnusedAttachments feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`.

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`.

If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`.

If the current bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to
create the currently bound graphics pipeline

• VUID-vkCmdDrawClusterHUAWEI-pDepthAttachment-06186
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

• VUID-vkCmdDrawClusterHUAWEI-pStencilAttachment-06187
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of the `depthStencilAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

• VUID-vkCmdDrawClusterHUAWEI-multisampledRenderToSingleSampled-07285
  If the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the value of `rasterizationSamples` for the currently bound graphics pipeline.

• VUID-vkCmdDrawClusterHUAWEI-multisampledRenderToSingleSampled-07286
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pDepthAttachment->imageView`.

• VUID-vkCmdDrawClusterHUAWEI-multisampledRenderToSingleSampled-07287
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound pipeline was created without a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the `multisampledRenderToSingleSampled` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `rasterizationSamples` for the currently bound graphics pipeline must be equal to the sample count used to create `VkRenderingInfo::pStencilAttachment->imageView`.

• VUID-vkCmdDrawClusterHUAWEI-pNext-07935
  If this command has been called inside a render pass instance started with `vkCmdBeginRendering`, and the `pNext` chain of `VkRenderingInfo` includes a
VkMultisampledRenderToSingleSampledInfoEXT structure with multisampledRenderToSingleSampledEnable equal to VK_TRUE, then the value of rasterizationSamples for the currently bound graphics pipeline must be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples

- VUID-vkCmdDrawClusterHUAWEI-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline must have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE

- VUID-vkCmdDrawClusterHUAWEI-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawClusterHUAWEI-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawClusterHUAWEI-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawClusterHUAWEI-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard must not be enabled

- VUID-vkCmdDrawClusterHUAWEI-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline must not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream

- VUID-vkCmdDrawClusterHUAWEI-None-07619
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled then vkCmdSetTessellationDomainOriginEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-07620
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled then
vkCmdSetDepthClampEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-09237
  If a shader object is bound to the VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT stage, then vkCmdSetTessellationDomainOriginEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-08650
  If the depthClamp feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthClampEnableEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-07621
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_POLYGON_MODE_EXT dynamic state enabled then vkCmdSetPolygonModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-08651
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetPolygonModeEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-07622
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT dynamic state enabled then vkCmdSetRasterizationSamplesEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-08652
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetRasterizationSamplesEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-07623
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_MASK_EXT dynamic state enabled then vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-08653
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetSampleMaskEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterHUAWEI-None-07624
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT dynamic state enabled then vkCmdSetAlphaToCoverageEnableEXT must have been called in the current command
buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-alphaToCoverageEnable-08919
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and
  `alphaToCoverageEnable` was `VK_TRUE` in the last call to
  `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain
  a variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawClusterHUAWEI-None-08654
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` must
  have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-alphaToCoverageEnable-08920
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set
  `alphaToCoverageEnable` to `VK_TRUE`, then the Fragment Output Interface must contain a
  variable for the alpha Component word in Location 0 at Index 0

• VUID-vkCmdDrawClusterHUAWEI-None-07625
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled then
  `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer
  prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08655
  If the `alphaToOne` feature is enabled, and a shader object is bound to any graphics stage,
  and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command
  buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` must
  have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07626
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled then
  `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer
  prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08656
  If the `logicOp` feature is enabled, and a shader object is bound to the
  `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` must have been
  called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-07627
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then
  `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer
  prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-None-08657
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterHUAWEI-None-07628
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmd setColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterHUAWEI-None-08658
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetColorBlendEnableEXT` for any attachment set that attachment’s value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmd setColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterHUAWEI-None-07629
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmd setColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterHUAWEI-None-08659
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetRasterizerDiscardEnableEXT` for any attachment set that attachment’s value in `pColorBlendEnables` to `VK_TRUE`, then `vkCmd setColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterHUAWEI-None-07630
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` dynamic state enabled then `vkCmd SetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterHUAWEI-None-08660
  If the `geometryStreams` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_GEOMETRY_BIT` stage, then `vkCmd SetRasterizationStreamEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterHUAWEI-None-07631
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmd SetConservativeRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterHUAWEI-None-08661
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmd SetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmd SetConservativeRasterizationModeEXT`
must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07632**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08662**
  If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetConservativeRasterizationModeEXT` in the current command buffer set `conservativeRasterizationMode` to `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07633**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08663**
  If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07634**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08664**
  If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07635**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07636**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command
If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.
line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineStippleEnableEXT must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07849**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_EXT` dynamic state enabled then `vkCmdSetLineStippleEXT must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08672**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetLineStippleEnableEXT` in the current command buffer set `stippledLineEnable` to `VK_TRUE`, then `vkCmdSetLineStippleEXT must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07639**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` dynamic state enabled then `vkCmdSetDepthClipNegativeOneToOneEXT must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08673**
  If the `depthClipControl` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipNegativeOneToOneEXT must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07640**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV` dynamic state enabled then `vkCmdSetViewportWScalingEnableNV must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08674**
  If the `VK_NV_clip_space_w_scaling` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportWScalingEnableNV must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07641**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV` dynamic state enabled then `vkCmdSetViewportSwizzleNV must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08675**
  If the `VK_NV_viewport_swizzle` extension is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetViewportSwizzleNV must` have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07642**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageToColorEnableNV must` have been called in the current command buffer prior to this drawing command
If the VK_NV_fragment_coverage_to_color extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoverageToColorEnableNV must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV dynamic state enabled then vkCmdSetCoverageToColorLocationNV must have been called in the current command buffer prior to this drawing command.

If the VK_NV_fragment_coverage_to_color extension is enabled, and a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call to vkCmdSetCoverageToColorEnableNV in the current command buffer set coverageToColorEnable to VK_TRUE, then vkCmdSetCoverageToColorLocationNV must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV dynamic state enabled then vkCmdSetCoverageModulationModeNV must have been called in the current command buffer prior to this drawing command.

If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoverageModulationModeNV must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV dynamic state enabled then vkCmdSetCoverageModulationTableEnableNV must have been called in the current command buffer prior to this drawing command.

If the VK_NV_framebuffer_mixed_samples extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call to vkCmdSetCoverageModulationModeNV in the current command buffer set coverageModulationMode to any value other than VK_COVERAGE_MODULATION_MODE_NONE_NV, then vkCmdSetCoverageModulationTableEnableNV must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV dynamic state enabled then vkCmdSetCoverageModulationTableNV must have been called in the current command buffer prior to this drawing command.
buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08680**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationTableEnable` to `VK_TRUE`, then `vkCmdSetCoverageModulationTableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07647**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV` dynamic state enabled then `vkCmdSetShadingRateImageEnableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-pipelineFragmentShadingRate-09238**
  If the `pipelineFragmentShadingRate` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFragmentShadingRateKHR` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08681**
  If the `shadingRateImage` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetShadingRateImageEnableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07648**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV` dynamic state enabled then `vkCmdSetRepresentativeFragmentTestEnableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08682**
  If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-07649**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV` **must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterHUAWEI-None-08683**
  If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then
vkCmdSetCoverageReductionModeNV must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterHUAWEI-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view's format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`.

- **VUID-vkCmdDrawClusterHUAWEI-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass.

- **VUID-vkCmdDrawClusterHUAWEI-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline.

- **VUID-vkCmdDrawClusterHUAWEI-samples-07473**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or depth/stencil attachments.

- **VUID-vkCmdDrawClusterHUAWEI-None-09211**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the `rasterizationSamples` member of that structure.

- **VUID-vkCmdDrawClusterHUAWEI-firstAttachment-07476**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then...
vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEnableEXT calls must specify an enable for all active color attachments in the current subpass.

- **VUID-vkCmdDrawClusterHUAWEI-firstAttachment-07477**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendEquationEXT calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled.

- **VUID-vkCmdDrawClusterHUAWEI-firstAttachment-07478**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorWriteMaskEXT calls must specify the color write mask for all active color attachments in the current subpass.

- **VUID-vkCmdDrawClusterHUAWEI-firstAttachment-07479**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT dynamic state enabled then vkCmdSetColorBlendAdvancedEXT must have been called in the current command buffer prior to this drawing command, and the attachments specified by the firstAttachment and attachmentCount parameters of vkCmdSetColorBlendAdvancedEXT calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled.

- **VUID-vkCmdDrawClusterHUAWEI-advancedBlendMaxColorAttachments-07480**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT and VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT dynamic states enabled and the last calls to vkCmdSetColorBlendEnableEXT and vkCmdSetColorBlendAdvancedEXT have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed advancedBlendMaxColorAttachments.

- **VUID-vkCmdDrawClusterHUAWEI-primitivesGeneratedQueryWithNonZeroStreams-07481**
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, and the bound graphics pipeline was created with VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT state enabled, the last call to vkCmdSetRasterizationStreamEXT must have set the rasterizationStream to zero.

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsPerPixel-07482**
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state disabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples member of the
The `VkPipelineMultisampleStateCreateInfo` structure the bound graphics pipeline has been created with

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsPerPixel-07483**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` parameter of the last call to `vkCmdSetSampleLocationsEXT`.

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsEnable-07484**
  If the bound graphics pipeline was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the `VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT` bit set.

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsEnable-07485**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.width` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsEnable-07486**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, then the `sampleLocationsInfo.sampleLocationGridSize.height` in the last call to `vkCmdSetSampleLocationsEXT` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling `rasterizationSamples`.

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsEnable-07487**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, and if `sampleLocationsEnable` was `VK_TRUE` in the last call to `vkCmdSetSampleLocationsEnableEXT`, the fragment shader code must not statically use the extended instruction `InterpolateAtSample`.

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsEnable-07936**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the
bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsEnable-07937**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawClusterHUAWEI-sampleLocationsEnable-07938**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationsPerPixel` must equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawClusterHUAWEI-coverageModulationTableEnable-07488**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to `VK_TRUE`, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass.

- **VUID-vkCmdDrawClusterHUAWEI-rasterizationSamples-07489**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

- **VUID-vkCmdDrawClusterHUAWEI-coverageToColorEnable-07490**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set `coverageToColorEnable` to `VK_TRUE`, then the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV` `coverageToColorLocation`, with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.

- **VUID-vkCmdDrawClusterHUAWEI-coverageReductionMode-07491**
  If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline...
state was created with the VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV and VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT states enabled, the current coverage reduction mode coverageReductionMode, then the current rasterizationSamples, and the sample counts for the color and depth/stencil attachments (if the subpass has them) must be a valid combination returned by vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV

- VUID-vkCmdDrawClusterHUAWEI-viewportCount-07492
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV ::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterHUAWEI-viewportCount-07493
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportSwizzleNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterHUAWEI-rasterizationSamples-07494
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if the current subpass has any color attachments and rasterizationSamples of the last call to vkCmdSetRasterizationSamplesEXT is greater than the number of color samples, then the pipeline sampleShadingEnable must be VK_FALSE

- VUID-vkCmdDrawClusterHUAWEI-stippledLineEnable-07495
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_EXT, then the stippledRectangularLines feature must be enabled

- VUID-vkCmdDrawClusterHUAWEI-stippledLineEnable-07496
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_BRESENHAM_EXT, then the stippledBresenhamLines feature must be enabled

- VUID-vkCmdDrawClusterHUAWEI-stippledLineEnable-07497
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT or VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT dynamic states enabled, and if the current stippledLineEnable state is VK_TRUE and the current lineRasterizationMode state is VK_LINE_RASTERIZATION_MODE_RECTANGULAR_SMOOTH_EXT, then the stippledSmoothLines feature must be enabled
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature **must** be enabled and `VkPhysicalDeviceLimits::strictLines` **must** be `VK_TRUE`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, `conservativePointAndLineRasterization` is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to `vkCmdSetConservativeRasterizationModeEXT` **must** be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`.

If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries **must** not be active.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it **must** be set in the current command buffer prior to this drawing command.

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`.

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`.

If there is no bound graphics pipeline, and the `tessellationShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`.

If there is no bound graphics pipeline, and the `geometryShader` feature is enabled, `vkCmdBindShadersEXT` **must** have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`.

2359
If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_FRAGMENT_BIT`.

If there is no bound graphics pipeline, and the `taskShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TASK_BIT_EXT`.

If there is no bound graphics pipeline, and the `meshShader` feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_MESH_BIT_EXT`.

If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the `VK_SHADER_STAGE_VERTEX_BIT` or `VK_SHADER_STAGE_MESH_BIT_EXT` stages must have a valid `VkShaderEXT` bound, and the other must have no `VkShaderEXT` bound.

If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_MESH_BIT_EXT` stage, and that `VkShaderEXT` was created without the `VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT` flag, a valid `VkShaderEXT` must be bound to the `VK_SHADER_STAGE_TASK_BIT_EXT` stage.

If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, there must be no `VkShaderEXT` bound to either the `VK_SHADER_STAGE_TASK_BIT_EXT` stage or the `VK_SHADER_STAGE_MESH_BIT_EXT` stage.

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, then all shaders created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag in the same `vkCreateShadersEXT` call must also be bound.

If any graphics shader is bound which was created with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag, any stages in between stages whose shaders which did not create a shader with the `VK_SHADER_CREATE_LINK_STAGE_BIT_EXT` flag as part of the same `vkCreateShadersEXT` call must not have any `VkShaderEXT` bound.

All bound graphics shader objects must have been created with identical or identically defined push constant ranges.
• VUID-vkCmdDrawClusterHUAWEI-None-08879
All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts

• VUID-vkCmdDrawClusterHUAWEI-None-08880
If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterHUAWEI-pDynamicStates-08715
If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable must be VK_FALSE

• VUID-vkCmdDrawClusterHUAWEI-pDynamicStates-08716
If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_STENCIL_WRITE_MASK set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask must be 0

• VUID-vkCmdDrawClusterHUAWEI-None-09116
If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT must either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, and VK_COLOR_COMPONENT_B_BIT, or none of them

• VUID-vkCmdDrawClusterHUAWEI-maxFragmentDualSrcAttachments-09239
If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command must be less than maxFragmentDualSrcAttachments

• VUID-vkCmdDrawClusterHUAWEI-stage-06480
The bound graphics pipeline must not have been created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT

• VUID-vkCmdDrawClusterHUAWEI-None-07074
Transform Feedback Queries must not be active

• VUID-vkCmdDrawClusterHUAWEI-None-07075
Primitives Generated Queries must not be active

• VUID-vkCmdDrawClusterHUAWEI-pipelineStatistics-07076
The `pipelineStatistics` member used to create any active Pipeline Statistics Query must not contain `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_VERTICES_BIT, VK_QUERY_PIPELINE_STATISTIC_INPUT_ASSEMBLY_PRIMITIVES_BIT, VK_QUERY_PIPELINE_STATISTIC_VERTEX_SHADER_INVOCATIONS_BIT, VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_INVOCATIONS_BIT, VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_PRIMITIVES_BIT, VK_QUERY_PIPELINE_STATISTIC_CLIPPING_INVOCATIONS_BIT, VK_QUERY_PIPELINE_STATISTIC_CLIPPING_PRIMITIVES_BIT, VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_CONTROL_SHADER_PATCHES_BIT, VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT`, or `VK_QUERY_PIPELINE_STATISTIC_TASK_SHADER_INVOCATIONS_BIT_EXT, or VK_QUERY_PIPELINE_STATISTIC_MESH_SHADER_INVOCATIONS_BIT_EXT`

- **VUID-vkCmdDrawClusterHUAWEI-None-07819**
  The `pipelineStatistics` member used to create any active Pipeline Statistics Query must not contain `VK_QUERY_PIPELINE_STATISTIC_TASK_SHADER_INVOCATIONS_BIT_EXT, or VK_QUERY_PIPELINE_STATISTIC_MESH_SHADER_INVOCATIONS_BIT_EXT`

- **VUID-vkCmdDrawClusterHUAWEI-groupCountX-07820**
  `groupCountX` must be less than or equal to `VkPhysicalDeviceClusterCullingShaderPropertiesHUAWEI::maxWorkGroupCount[0]`

- **VUID-vkCmdDrawClusterHUAWEI-groupCountY-07821**
  `groupCountY` must be less than or equal to `VkPhysicalDeviceClusterCullingShaderPropertiesHUAWEI::maxWorkGroupCount[1]`

- **VUID-vkCmdDrawClusterHUAWEI-groupCountZ-07822**
  `groupCountZ` must be less than or equal to `VkPhysicalDeviceClusterCullingShaderPropertiesHUAWEI::maxWorkGroupCount[2]`

- **VUID-vkCmdDrawClusterHUAWEI-ClusterCullingHUAWEI-07823**
  The current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` must contain a shader stage using the `ClusterCullingHUAWEI Execution Model`.

### Valid Usage (Implicit)

- **VUID-vkCmdDrawClusterHUAWEI-commandBuffer-parameter**
  `commandBuffer` must be a valid `VkCommandBuffer` handle

- **VUID-vkCmdDrawClusterHUAWEI-commandBuffer-recording**
  `commandBuffer` must be in the recording state

- **VUID-vkCmdDrawClusterHUAWEI-commandBuffer-cmdpool**
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations

- **VUID-vkCmdDrawClusterHUAWEI-renderpass**
  This command must only be called inside of a render pass instance

- **VUID-vkCmdDrawClusterHUAWEI-videocoding**
  This command must only be called outside of a video coding scope
Host Synchronization

- Host access to `commandBuffer` must be externally synchronized.
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized.

To record an indirect cluster culling drawing command, call:

```c
// Provided by VK_HUAWEI_cluster_culling_shader
void vkCmdDrawClusterIndirectHUAWEI(
    VkCommandBuffer commandBuffer,
    VkBuffer buffer,
    VkDeviceSize offset);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `buffer` is the buffer containing draw parameters.
- `offset` is the byte offset into `buffer` where parameters begin.

`vkCmdDrawClusterIndirectHUAWEI` behaves similarly to `vkCmdDrawClusterHUAWEI` except that the parameters are read by the device from a buffer during execution. The parameters of the dispatch are encoded in a `VkDispatchIndirectCommand` structure taken from buffer starting at offset. Note the cluster culling shader pipeline only accepts `vkCmdDrawClusterHUAWEI` and `vkCmdDrawClusterIndirectHUAWEI` as drawing commands.

Valid Usage

- VUID-vkCmdDrawClusterIndirectHUAWEI-magFilter-04553
  If a `VkSampler` created with `magFilter` or `minFilter` equal to `VK_FILTER_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT`.

- VUID-vkCmdDrawClusterIndirectHUAWEI-mipmapMode-04770
  If a `VkSampler` created with `mipmapMode` equal to `VK_SAMPLER_MIPMAP_MODE_LINEAR` and `compareEnable` equal to `VK_FALSE` is used to sample a `VkImageView` as a result of this command, then the image view’s format features must contain...
VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-06479
  If a VkImageView is sampled with depth comparison, the image view’s format features must contain VK_FORMAT_FEATURE_2_SAMPLED_IMAGE_DEPTH_COMPARISON_BIT

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-02691
  If a VkImageView is accessed using atomic operations as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_STORAGE_IMAGE_ATOMIC_BIT

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07888
  If a VkImageView is accessed using atomic operations as a result of this command, then the storage texel buffer’s format features must contain VK_FORMAT_FEATURE_STORAGE_TEXEL_BUFFER_ATOMIC_BIT

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-02692
  If a VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, then the image view’s format features must contain VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_CUBIC_BIT_EXT

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-02693
  If the VK_EXT_filter_cubic extension is not enabled and any VkImageView is sampled with VK_FILTER_CUBIC_EXT as a result of this command, it must not have a VkImageViewType of VK_IMAGE_VIEW_TYPE_3D, VK_IMAGE_VIEW_TYPE_CUBE, or VK_IMAGE_VIEW_TYPE_CUBE_ARRAY

- VUID-vkCmdDrawClusterIndirectHUAWEI-filterCubic-02694
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must have a VkImageViewType and format that supports cubic filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubic returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawClusterIndirectHUAWEI-filterCubicMinmax-02695
  Any VkImageView being sampled with VK_FILTER_CUBIC_EXT with a reduction mode of either VK_SAMPLER_REDUCTION_MODE_MIN or VK_SAMPLER_REDUCTION_MODE_MAX as a result of this command must have a VkImageViewType and format that supports cubic filtering together with minmax filtering, as specified by VkFilterCubicImageViewImageFormatPropertiesEXT::filterCubicMinmax returned by vkGetPhysicalDeviceImageFormatProperties2

- VUID-vkCmdDrawClusterIndirectHUAWEI-cubicRangeClamp-09212
  If the cubicRangeClamp feature is not enabled, then any VkImageView being sampled with VK_FILTER_CUBIC_EXT as a result of this command must not have a VkSamplerReductionModeCreateInfo reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM

- VUID-vkCmdDrawClusterIndirectHUAWEI-reductionMode-09213
  Any VkImageView being sampled with a VkSamplerReductionModeCreateInfo::reductionMode equal to VK_SAMPLER_REDUCTION_MODE_WEIGHTED_AVERAGE_RANGECLAMP_QCOM as a result of this command must sample with VK_FILTER_CUBIC_EXT

- VUID-vkCmdDrawClusterIndirectHUAWEI-selectableCubicWeights-09214
If the `selectableCubicWeights` feature is not enabled, then any `VkImageView` being sampled with `VK_FILTER_CUBIC_EXT` as a result of this command must have `VkSamplerCubicWeightsCreateInfoQCOM::cubicWeights` equal to `VK_CUBIC_FILTER_WEIGHTS_CATMULL_ROM_QCOM`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-flags-02696**
  Any `VkImage` created with a `VkImageCreateInfo::flags` containing `VK_IMAGE_CREATE_CORNER_SAMPLED_BIT_NV` sampled as a result of this command must only be sampled using a `VkSamplerAddressMode` of `VK_SAMPLER_ADDRESS_MODE_CLAMP_TO_EDGE`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-OpTypeImage-07027**
  For any `VkImageView` being written as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-OpTypeImage-07028**
  For any `VkImageView` being read as a storage image where the image format field of the `OpTypeImage` is `Unknown`, the view's format features must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-OpTypeImage-07029**
  For any `VkBufferView` being written as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown`, the view's buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_WRITE_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-OpTypeImage-07030**
  Any `VkBufferView` being read as a storage texel buffer where the image format field of the `OpTypeImage` is `Unknown` then the view's buffer features must contain `VK_FORMAT_FEATURE_2_STORAGE_READ_WITHOUT_FORMAT_BIT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08600**
  For each set `n` that is statically used by a bound shader, a descriptor set must have been bound to `n` at the same pipeline bind point, with a `VkPipelineLayout` that is compatible for set `n`, with the `VkPipelineLayout` or `VkDescriptorSetLayout` array that was used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08601**
  For each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-maintenance4-08602**
  If the `maintenance4` feature is not enabled, then for each push constant that is statically used by a bound shader, a push constant value must have been set for the same pipeline bind point, with a `VkPipelineLayout` that is compatible for push constants, with the `VkPipelineLayout` or `VkDescriptorSetLayout` and `VkPushConstantRange` arrays used to create the current `VkPipeline` or `VkShaderEXT`, as described in Pipeline Layout Compatibility.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08114**
  Descriptors in each bound descriptor set, specified via `vkCmdBindDescriptorSets`, must be
valid if they are statically used by the \texttt{VkPipeline} bound to the pipeline bind point used by this command and the bound \texttt{VkPipeline} was not created with \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08115}
  If the descriptors used by the \texttt{VkPipeline} bound to the pipeline bind point were specified via \texttt{vkCmdBindDescriptorSets}, the bound \texttt{VkPipeline} \textbf{must} have been created without \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08116}
  Descriptors in bound descriptor buffers, specified via \texttt{vkCmdSetDescriptorBufferOffsetsEXT}, \textbf{must} be valid if they are dynamically used by the \texttt{VkPipeline} bound to the pipeline bind point used by this command and the bound \texttt{VkPipeline} was created with \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08604}
  Descriptors in bound descriptor buffers, specified via \texttt{vkCmdSetDescriptorBufferOffsetsEXT}, \textbf{must} be valid if they are dynamically used by any \texttt{VkShaderEXT} bound to a stage corresponding to the pipeline bind point used by this command

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08117}
  If the descriptors used by the \texttt{VkPipeline} bound to the pipeline bind point were specified via \texttt{vkCmdSetDescriptorBufferOffsetsEXT}, the bound \texttt{VkPipeline} \textbf{must} have been created with \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08119}
  If a descriptor is dynamically used with a \texttt{VkPipeline} created with \texttt{VK_PIPELINE_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}, the descriptor memory \textbf{must} be resident

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08605}
  If a descriptor is dynamically used with a \texttt{VkShaderEXT} created with a \texttt{VkDescriptorSetLayout} that was created with \texttt{VK_DESCRIPTOR_SET_LAYOUT_CREATE_DESCRIPTOR_BUFFER_BIT_EXT}, the descriptor memory \textbf{must} be resident

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08606}
  If the \texttt{shaderObject} feature is not enabled, a valid pipeline \textbf{must} be bound to the pipeline bind point used by this command

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08607}
  If the \texttt{shaderObject} is enabled, either a valid pipeline \textbf{must} be bound to the pipeline bind point used by this command, or a valid combination of valid and \texttt{VK_NULL_HANDLE} shader objects \textbf{must} be bound to every supported shader stage corresponding to the pipeline bind point used by this command

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08608}
  If a pipeline is bound to the pipeline bind point used by this command, there \textbf{must} not have been any calls to dynamic state setting commands for any state not specified as dynamic in the \texttt{VkPipeline} object bound to the pipeline bind point used by this command, since that pipeline was bound

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08609}
  If the \texttt{VkPipeline} object bound to the pipeline bind point used by this command or any
**VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler **must** not be used to sample from any **VkImage** with a **VkImageView** of the type

- **VK_IMAGE_VIEW_TYPE_3D**
- **VK_IMAGE_VIEW_TYPE_CUBE**
- **VK_IMAGE_VIEW_TYPE_1D_ARRAY**
- **VK_IMAGE_VIEW_TYPE_2D_ARRAY**
- **VK_IMAGE_VIEW_TYPE_CUBE_ARRAY**

in any shader stage

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08610**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V **OpImageSample* or OpImageSparseSample* instructions with **ImplicitLod**, **Dref** or **Proj** in their name, in any shader stage

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08611**
  If the **VkPipeline** object bound to the pipeline bind point used by this command or any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a **VkSampler** object that uses unnormalized coordinates, that sampler **must** not be used with any of the SPIR-V **OpImageSample* or OpImageSparseSample* instructions that includes a LOD bias or any offset values, in any shader stage

- **VUID-vkCmdDrawClusterIndirectHUAWEI-uniformBuffers-06935**
  If any stage of the **VkPipeline** object bound to the pipeline bind point used by this command accesses a uniform buffer, and that stage was created without enabling either **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT** or **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT** for **uniformBuffers**, and the **robustBufferAccess** feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08612**
  If the **robustBufferAccess** feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a uniform buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawClusterIndirectHUAWEI-storageBuffers-06936**
  If any stage of the **VkPipeline** object bound to the pipeline bind point used by this command accesses a storage buffer, and that stage was created without enabling either **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_EXT** or **VK_PIPELINE_ROBUSTNESS_BUFFER_BEHAVIOR_ROBUST_BUFFER_ACCESS_2_EXT** for **storageBuffers**, and the **robustBufferAccess** feature is not enabled, that stage **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08613**
  If the **robustBufferAccess** feature is not enabled, and any **VkShaderEXT** bound to a stage corresponding to the pipeline bind point used by this command accesses a storage buffer, it **must** not access values outside of the range of the buffer as specified in the descriptor set bound to the same pipeline bind point

- **VUID-vkCmdDrawClusterIndirectHUAWEI-commandBuffer-02707**
  If **commandBuffer** is an unprotected command buffer and **protectedNoFault** is not supported,
any resource accessed by **bound shaders** must not be a protected resource

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-06550**
  If a **bound shader** accesses a **VkSampler** or **VkImageView** object that enables **sampler YC<br>\(\alpha C_b\)** conversion, that object must only be used with **OpImageSample** or **OpImageSparseSample** instructions

- **VUID-vkCmdDrawClusterIndirectHUAWEI-ConstOffset-06551**
  If a **bound shader** accesses a **VkSampler** or **VkImageView** object that enables **sampler YC<br>\(\alpha C_b\)** conversion, that object must not use the **ConstOffset** and **Offset** operands

- **VUID-vkCmdDrawClusterIndirectHUAWEI-viewType-07752**
  If a **VkImageView** is accessed as a result of this command, then the image view’s **viewType** must match the **Dim** operand of the **OpTypeImage** as described in **Instruction/Sampler/Image View Validation**

- **VUID-vkCmdDrawClusterIndirectHUAWEI-format-07753**
  If a **VkImageView** is accessed as a result of this command, then the numeric type of the image view’s **format** and the **Sampled Type** operand of the **OpTypeImage** must match

- **VUID-vkCmdDrawClusterIndirectHUAWEI-OpImageWrite-08795**
  If a **VkImageView** created with a format other than **VK_FORMAT_A8_UNORM_KHR** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction must have at least as many components as the image view’s format

- **VUID-vkCmdDrawClusterIndirectHUAWEI-OpImageWrite-08796**
  If a **VkImageView** created with the format **VK_FORMAT_A8_UNORM_KHR** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction must have four components

- **VUID-vkCmdDrawClusterIndirectHUAWEI-OpImageWrite-04469**
  If a **VkBufferView** is accessed using **OpImageWrite** as a result of this command, then the **Type** of the **Texel** operand of that instruction must have at least as many components as the buffer view’s format

- **VUID-vkCmdDrawClusterIndirectHUAWEI-SampledType-04470**
  If a **VkImageView** with a **VkFormat** that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction must have a **Width** of 64

- **VUID-vkCmdDrawClusterIndirectHUAWEI-SampledType-04471**
  If a **VkImageView** with a **VkFormat** that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction must have a **Width** of 32

- **VUID-vkCmdDrawClusterIndirectHUAWEI-SampledType-04472**
  If a **VkBufferView** with a **VkFormat** that has a 64-bit component width is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction must have a **Width** of 64

- **VUID-vkCmdDrawClusterIndirectHUAWEI-SampledType-04473**
  If a **VkBufferView** with a **VkFormat** that has a component width less than 64-bit is accessed as a result of this command, the **SampledType** of the **OpTypeImage** operand of that instruction must have a **Width** of 32
If the `sparseImageInt64Atomics` feature is not enabled, `VkImage` objects created with the `VK_IMAGE_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command.

If the `sparseImageInt64Atomics` feature is not enabled, `VkBuffer` objects created with the `VK_BUFFER_CREATE_SPARSE_RESIDENCY_BIT` flag **must** not be accessed by atomic instructions through an `OpTypeImage` with a `SampledType` with a `Width` of 64 by this command.

If `OpImageWeightedSampleQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's `format` features **must** contain `VK_FORMAT_FEATURE_2_WEIGHT_SAMPLED_IMAGE_BIT_QCOM`.

If `OpImageWeightedSampleQCOM` uses a `VkImageView` as a sample weight image as a result of this command, then the image view's `format` features **must** contain `VK_FORMAT_FEATURE_2_WEIGHT_IMAGE_BIT_QCOM`.

If `OpImageBoxFilterQCOM` is used to sample a `VkImageView` as a result of this command, then the image view's `format` features **must** contain `VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM`.

If `OpImageBoxFilterQCOM` is used to read from an `VkImage` as a result of this command, then the image view's `format` features **must** contain `VK_FORMAT_FEATURE_2_BOX_FILTER_SAMPLED_BIT_QCOM`.

If `OpImageBlockMatchSSDQCOM`, or `OpImageBlockMatchSADQCOM` is used to read from a reference image as result of this command, then the specified reference coordinates **must** not fail integer texel coordinate validation.

If any command other than `OpImageWeightedSampleQCOM`, `OpImageBoxFilterQCOM`, `OpImageBlockMatchWindowSSDQCOM`, `OpImageBlockMatchWindowSADQCOM`, `OpImageBlockMatchGatherSSDQCOM`, `OpImageBlockMatchGatherSADQCOM`, or `OpImageBlockMatchSSDQCOM`, or `OpImageBlockMatchSADQCOM` uses a `VkSampler` as a result of this command, then the sampler **must** have been created with `VK_SAMPLER_CREATE_IMAGE_PROCESSING_BIT_QCOM`.

If any command other than `OpImageWeightedSampleQCOM`, `OpImageBoxFilterQCOM`, `OpImageBlockMatchWindowSSDQCOM`, `OpImageBlockMatchWindowSADQCOM`, `OpImageBlockMatchGatherSSDQCOM`, `OpImageBlockMatchGatherSADQCOM`, `OpImageBlockMatchSSDQCOM`, or `OpImageBlockMatchSADQCOM` uses a `VkSampler` as a result of this command, then the sampler **must** not have been created with.
If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from an `VkImageView` as a result of this command, then the image view’s format features must contain `VK_FORMAT_FEATURE_2 BLOCK MATCHING_BIT_QCOM`

If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` instruction is used to read from an `VkImageView` as a result of this command, then the image view’s format must be a single-component format.

If a `OpImageBlockMatchWindow*QCOM` or `OpImageBlockMatchGather*QCOM` read from a reference image as result of this command, then the specified reference coordinates must not fail integer texel coordinate validation.

Any shader invocation executed by this command must terminate.

The current render pass must be compatible with the renderPass member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`.

The subpass index of the current render pass must be equal to the subpass member of the `VkGraphicsPipelineCreateInfo` structure specified when creating the `VkPipeline` bound to `VK_PIPELINE_BIND_POINT_GRAPHICS`.

If any shader statically accesses an input attachment, a valid descriptor must be bound to the pipeline via a descriptor set.

If any shader executed by this pipeline accesses an `OpTypeImage` variable with a `Dim` operand of `SubpassData`, it must be decorated with an `InputAttachmentIndex` that corresponds to a valid input attachment in the current subpass.

Input attachment views accessed in a subpass must be created with the same `VkFormat` as the corresponding subpass definition, and be created with a `VkImageView` that is compatible with the attachment referenced by the subpass’ `pInputAttachments[InputAttachmentIndex]` in the currently bound `VkFramebuffer` as specified by Fragment Input Attachment Compatibility.

Memory backing image subresources used as attachments in the current render pass must not be written in any way other than as an attachment by this command.

If a color attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the `VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT` image layout, and either:
• the VK_PIPELINE_CREATE_COLOR_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  • the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_COLOR_BIT and
    • there is no currently bound graphics pipeline or
    • the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-09001
If a depth attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  • the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  • the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_DEPTH_BIT and
    • there is no currently bound graphics pipeline or
    • the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-09002
If a stencil attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it is not in the VK_IMAGE_LAYOUT_ATTACHMENT_FEEDBACK_LOOP_OPTIMAL_EXT image layout, and either:
  • the VK_PIPELINE_CREATE_DEPTH_STENCIL_ATTACHMENT_FEEDBACK_LOOP_BIT_EXT is set on the currently bound pipeline or
  • the last call to vkCmdSetAttachmentFeedbackLoopEnableEXT included VK_IMAGE_ASPECT_STENCIL_BIT and
    • there is no currently bound graphics pipeline or
    • the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_ATTACHMENT_FEEDBACK_LOOP_ENABLE_EXT it must not be accessed in any way other than as an attachment by this command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-09003
If an attachment is written by any prior command in this subpass or by the load, store, or resolve operations for this subpass, it must not be accessed in any way other than as an attachment, storage image, or sampled image by this command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-06539
If any previously recorded command in the current subpass accessed an image subresource used as an attachment in this subpass in any way other than as an attachment, this command must not write to that image subresource as an attachment

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-06886
If the current render pass instance uses a depth/stencil attachment with a read-only layout for the depth aspect, **depth writes must be disabled**

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-06887**
  If the current render pass instance uses a depth/stencil attachment with a read-only layout for the stencil aspect, both front and back writeMask are not zero, and stencil test is enabled, **all stencil ops must be VK_STENCIL_OP_KEEP**

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07831**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT** dynamic state enabled then **vkCmdSetViewport must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07832**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_SCISSOR** dynamic state enabled then **vkCmdSetScissor must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07833**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LINE_WIDTH** dynamic state enabled then **vkCmdSetLineWidth must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08617**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetPolygonModeEXT** in the current command buffer set **polygonMode** to **VK_POLYGON_MODE_LINE**, **vkCmdSetLineWidth must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08618**
  If a shader object is bound to the **VK_SHADER_STAGE_VERTEX_BIT** stage, and the most recent call to **vkCmdSetPrimitiveTopology** in the current command buffer set **primitiveTopology** to any line topology, **vkCmdSetLineWidth must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08619**
  If a shader object that outputs line primitives is bound to the **VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT** or **VK_SHADER_STAGE_GEOMETRY_BIT** stage, **vkCmdSetLineWidth must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07834**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_BIAS** dynamic state enabled then **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT must** have been called in the current command buffer prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08620**
  If a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetRasterizerDiscardEnable** in the current command buffer set **rasterizerDiscardEnable** to **VK_FALSE**, and the most recent call to **vkCmdSetDepthBiasEnable** in the current command buffer set **depthBiasEnable** to **VK_TRUE**, **vkCmdSetDepthBias** or **vkCmdSetDepthBias2EXT must** have been called in the current command buffer prior to this drawing command
• VUID-vkCmdDrawClusterIndirectHUAWEI-None-07835
If the bound graphics pipeline state was created with the
`VK_DYNAMIC_STATE_BLEND_CONSTANTS` dynamic state enabled then `vkCmdSetBlendConstants`
must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-08621
If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent
call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
`rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to
`vkCmdSetColorBlendEnableEXT` in the current command buffer set any element of
`pColorBlendEnables` to `VK_TRUE`, and the most recent call to
`vkCmdSetColorBlendEquationEXT` in the current command buffer set the same element of
`pColorBlendEquations` to a `VkColorBlendEquationEXT` structure with any `VkBlendFactor`
member with a value of `VK_BLEND_FACTOR_CONSTANT_COLOR`,
`VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_COLOR`, `VK_BLEND_FACTOR_CONSTANT_ALPHA`, or
`VK_BLEND_FACTOR_ONE_MINUS_CONSTANT_ALPHA`, `vkCmdSetBlendConstants` must have been
called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-07836
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS`
dynamic state enabled then `vkCmdSetDepthBounds` must have been called in the current
command buffer prior to this drawing command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-08622
If a shader object is bound to any graphics stage, and the most recent call to
`vkCmdSetRasterizerDiscardEnable` in the current command buffer set
`rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to
`vkCmdSetDepthBoundsTestEnable` in the current command buffer set
`depthBoundsTestEnable` to `VK_TRUE`, then `vkCmdSetDepthBounds` must have been called in
the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-07837
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_COMPARE_MASK`
dynamic state enabled then `vkCmdSetStencilCompareMask` must have been called in the current
command buffer prior to this drawing command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-08623
If a shader object is bound to any graphics stage, and the most recent call to
`vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to
`VK_TRUE`, `vkCmdSetStencilCompareMask` must have been called in the current command
buffer prior to this drawing command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-07838
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_WRITE_MASK`
dynamic state enabled then `vkCmdSetStencilWriteMask` must have been called in the current command buffer prior to this drawing command

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-08624
If a shader object is bound to any graphics stage, and the most recent call to
`vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to
VK_TRUE, vkCmdSetStencilWriteMask must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07839
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_STENCIL_REFERENCE dynamic state enabled then
  vkCmdSetStencilReference must have been called in the current command buffer prior to
  this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08625
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetStencilTestEnable in the current command buffer set
  stencilTestEnable to
  VK_TRUE, vkCmdSetStencilReference must have been called in the current command buffer prior to
  this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-maxMultiviewInstanceIndex-02688
  If the draw is recorded in a render pass instance with multiview enabled, the maximum
  instance index must be less than or equal to
  VkPhysicalDeviceMultiviewProperties::maxMultiviewInstanceIndex

- VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsEnable-02689
  If the bound graphics pipeline was created with
  VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable set to VK_TRUE and
  the current subpass has a depth/stencil attachment, then that attachment must have been
  created with the
  VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-06666
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT dynamic state enabled then
  vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to
  this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08626
  If a shader object is bound to any graphics stage, and the most recent call to
  vkCmdSetSampleLocationsEnableEXT in the current command buffer set
  sampleLocationsEnable to VK_TRUE, and the most recent call to
  vkCmdSetRasterizerDiscardEnable in the current command buffer set
  rasterizerDiscardEnable to VK_FALSE, then
  vkCmdSetSampleLocationsEXT must have been called in the current command buffer prior to
  this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsPerPixel-07934
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled, then the
  sampleLocationsPerPixel member of
  pSampleLocationsInfo in the last call to
  vkCmdSetSampleLocationsEXT must equal the
  rasterizationSamples member of the
  VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07840
  If the bound graphics pipeline state was created with the
  VK_DYNAMIC_STATE_CULL_MODE dynamic state enabled then
  vkCmdSetCullMode must have been called in the current command buffer prior to
  this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08627
If a shader object is bound to any graphics stage, and the most recent call to
`vkCmdSetRasterizerDiscardEnable` in the current command buffer set
`rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCullMode` must have been called in
the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07841
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_FRONT_FACE`
dynamic state enabled then `vkCmdSetFrontFace` must have been called in the current
command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08628
  If a shader object is bound to any graphics stage, and the most recent call to
`vkCmdSetRasterizerDiscardEnable` in the current command buffer set
`rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFrontFace` must have been called in
the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07843
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_TEST_ENABLE`
dynamic state enabled then `vkCmdSetDepthTestEnable` must have been called in the current
command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08629
  If a shader object is bound to any graphics stage, and the most recent call to
`vkCmdSetRasterizerDiscardEnable` in the current command buffer set
`rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthTestEnable` must have been called in the current
command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07844
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE`
dynamic state enabled then `vkCmdSetDepthWriteEnable` must have been called in the current
command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08630
  If a shader object is bound to any graphics stage, and the most recent call to
`vkCmdSetRasterizerDiscardEnable` in the current command buffer set
`rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthWriteEnable` must have been called in the current
command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07845
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTHCOMPARE_OP`
dynamic state enabled then `vkCmdSetDepthCompareOp` must have been called in the current
command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08631
  If a shader object is bound to any graphics stage, and the most recent call to
`vkCmdSetRasterizerDiscardEnable` in the current command buffer set
`rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to
`vkCmdSetDepthTestEnable` in the current command buffer set `depthTestEnable` to `VK_TRUE`,
then `vkCmdSetDepthCompareOp` must have been called in the current command buffer prior to this drawing command
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_BOUNDS_TEST_ENABLE` dynamic state enabled then `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command

If a shader object is bound to any graphics stage, and the `depthBounds` feature is enabled, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `vkCmdSetDepthBoundsTestEnable` must have been called in the current command buffer prior to this drawing command

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_TEST_ENABLE` dynamic state enabled then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetStencilTestEnable` must have been called in the current command buffer prior to this drawing command

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_STENCIL_OP` dynamic state enabled then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command

If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetStencilTestEnable` in the current command buffer set `stencilTestEnable` to `VK_TRUE`, then `vkCmdSetStencilOp` must have been called in the current command buffer prior to this drawing command

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled but not the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must match the `VkPipelineViewportStateCreateInfo`::`scissorCount` of the pipeline

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT` dynamic state enabled but not the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, then `vkCmdSetScissorWithCount` must have been called in the current command buffer prior to this drawing command, and the `scissorCount` parameter of `vkCmdSetScissorWithCount`...
must match the VkPipelineViewportStateCreateInfo::viewportCount of the pipeline

- VUID-vkCmdDrawClusterIndirectHUAWEI-viewportCount-03419
  If the bound graphics pipeline state was created with both the VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic states enabled then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the scissorCount parameter of vkCmdSetScissorWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08635
  If a shader object is bound to any graphics stage, then both vkCmdSetViewportWithCount and vkCmdSetScissorWithCount must have been called in the current command buffer prior to this drawing command, and the viewportCount parameter of vkCmdSetViewportWithCount must match the scissorCount parameter of vkCmdSetScissorWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-viewportCount-04137
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportWScalingStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-viewportCount-04138
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportWScalingNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-09232
  If a shader object is bound to any graphics stage, and the VK_NV_clip_space_w_scaling extension is enabled on the device, then vkCmdSetViewportWScalingNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08636
  If a shader object is bound to any graphics stage, and the VK_NV_clip_space_w_scaling extension is enabled on the device, then the viewportCount parameter in the last call to vkCmdSetViewportWScalingNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-viewportCount-04139
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic state enabled, but not the VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_IMAGE_NV dynamic state enabled, then the bound graphics pipeline must have been created with VkPipelineViewportShadingRateImageStateCreateInfoNV::viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-viewportCount-04140
  If the bound graphics pipeline state was created with the
VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT and VK_DYNAMIC_STATE_VIEWPORT_SHADING_RATE_PALETTE_NV dynamic states enabled then the viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-shadingRateImage-09233
  If the shadingRateImage feature is enabled, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetCoarseSampleOrderNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-shadingRateImage-09234
  If a shader object is bound to any graphics stage, and the shadingRateImage feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set shadingRateImageEnableNV to VK_FALSE, and the most recent call to vkCmdSetViewportShadingRatePaletteNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08637
  If a shader object is bound to any graphics stage, and the viewportCount parameter in the last call to vkCmdSetViewportShadingRatePaletteNV must be greater than or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-VkPipelineViewportCreateInfo-04141
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportSwizzleStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportSwizzleStateCreateInfoNV:viewportCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-VkPipelineViewportCreateInfo-04142
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT dynamic state enabled and a VkPipelineViewportExclusiveScissorStateCreateInfoNV structure chained from VkPipelineViewportStateCreateInfo, then the bound graphics pipeline must have been created with VkPipelineViewportExclusiveScissorStateCreateInfoNV:exclusiveScissorCount greater or equal to the viewportCount parameter in the last call to vkCmdSetViewportWithCount

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_ENABLE_NV dynamic state enabled then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07879
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_EXCLUSIVE_SCISSOR_NV dynamic state enabled then
vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterIndirectHUAWEI-exclusiveScissor-09235
  If a shader object is bound to any graphics stage, and the exclusiveScissor feature is enabled, then vkCmdSetExclusiveScissorEnableNV must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08638
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetExclusiveScissorEnableNV in the current command buffer set any element of pExclusiveScissorEnables to VK_TRUE, then vkCmdSetExclusiveScissorNV must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-04876
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE dynamic state enabled, then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08639
  If a shader object is bound to any graphics stage, then vkCmdSetRasterizerDiscardEnable must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-04877
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_BIAS_ENABLE dynamic state enabled then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-08640
  If a shader object is bound to any graphics stage, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetDepthBiasEnable must have been called in the current command buffer prior to this drawing command.

- VUID-vkCmdDrawClusterIndirectHUAWEI-logicOp-04878
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_LOGIC_OP_EXT dynamic state enabled, then vkCmdSetLogicOpEXT must have been called in the current command buffer prior to this drawing command and the logicOp must be a valid VkLogicOp value.

- VUID-vkCmdDrawClusterIndirectHUAWEI-logicOp-08641
  If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage, and the logicOp feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetLogicOpEXT must have been called in the current command buffer prior to this drawing command and the logicOp must be a valid VkLogicOp value.

- VUID-vkCmdDrawClusterIndirectHUAWEI-primitiveFragmentShadingRateWithMultipleViewports-04552
  If the primitiveFragmentShadingRateWithMultipleViewports limit is not supported, the
bound graphics pipeline was created with the `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` dynamic state enabled, and any of the shader stages of the bound graphics pipeline write to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1

- **VUID-vkCmdDrawClusterIndirectHUAWEI-primitiveFragmentShadingRateWithMultipleViewports-08642**
  If the `primitiveFragmentShadingRateWithMultipleViewports` limit is not supported, and any shader object bound to a graphics stage writes to the `PrimitiveShadingRateKHR` built-in, then `vkCmdSetViewportWithCount` must have been called in the current command buffer prior to this drawing command, and the `viewportCount` parameter of `vkCmdSetViewportWithCount` must be 1

- **VUID-vkCmdDrawClusterIndirectHUAWEI-blendEnable-04727**
  If rasterization is not disabled in the bound graphics pipeline, then for each color attachment in the subpass, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the `blendEnable` member of the corresponding element of the `pAttachments` member of `pColorBlendState` must be `VK_FALSE`

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08643**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then for each color attachment in the render pass, if the corresponding image view's `format features` do not contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`, then the corresponding member of `pColorBlendEnables` in the most recent call to `vkCmdSetColorBlendEnableEXT` in the current command buffer that affected that attachment index must have been `VK_FALSE`

- **VUID-vkCmdDrawClusterIndirectHUAWEI-multisampledRenderToSingleSampled-07284**
  If rasterization is not disabled in the bound graphics pipeline, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then `rasterizationSamples` for the currently bound graphics pipeline must be the same as the current subpass color and/or depth/stencil attachments

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08644**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and none of the `VK_AMD_mixed_attachment_samples` extension, the `VK_NV_framebuffer_mixed_samples` extension, or the `multisampledRenderToSingleSampled` feature is enabled, then the most recent call to `vkCmdSetRasterizationSamplesEXT` in the current command buffer must have set `rasterizationSamples` to be the same as the number of samples for the current render pass color and/or depth/stencil attachments

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08876**
  If a shader object is bound to any graphics stage, the current render pass instance must have been begun with `vkCmdBeginRendering`
If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pDepthAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pDepthAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the depth attachment

- VUID-vkCmdDrawClusterIndirectHUAWEI-imageView-06173
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `imageView` member of `pStencilAttachment` is not `VK_NULL_HANDLE`, and the `layout` member of `pStencilAttachment` is `VK_IMAGE_LAYOUT_DEPTH_STENCIL_READ_ONLY_OPTIMAL`, this command **must** not write any values to the stencil attachment

- VUID-vkCmdDrawClusterIndirectHUAWEI-viewMask-06178
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo`::`viewMask` equal to `VkRenderingInfo`::`viewMask`

- VUID-vkCmdDrawClusterIndirectHUAWEI-colorAttachmentCount-06179
  If the current render pass instance was begun with `vkCmdBeginRendering`, the currently bound graphics pipeline **must** have been created with a `VkPipelineRenderingCreateInfo`::`colorAttachmentCount` equal to `VkRenderingInfo`::`colorAttachmentCount`

- VUID-vkCmdDrawClusterIndirectHUAWEI-dynamicRenderingUnusedAttachments-08910
  If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo`::`colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo`::`pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` **must** have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo`::`pColorAttachmentFormats` used to create the currently bound graphics pipeline
If the `dynamicRenderingUnusedAttachments` feature is enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a `VkFormat` equal to the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound graphics pipeline, or the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats`, if it exists, must be `VK_FORMAT_UNDEFINED`.

If the `dynamicRenderingUnusedAttachments` feature is not enabled, and the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingInfo::colorAttachmentCount` greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` equal to `VK_NULL_HANDLE` must have the corresponding element of `VkPipelineRenderingCreateInfo::pColorAttachmentFormats` used to create the currently bound pipeline equal to `VK_FORMAT_UNDEFINED`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetColorWriteEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_ENABLE_EXT` dynamic state enabled then the `attachmentCount` parameter of `vkCmdSetColorWriteEnableEXT` must be greater than or equal to the `VkPipelineColorBlendStateCreateInfo::attachmentCount` of the currently bound graphics pipeline.

If the `colorWriteEnable` feature is enabled on the device, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then the `attachmentCount` parameter of most recent call to `vkCmdSetColorWriteEnableEXT` in the current command buffer must be greater than or equal to the number of color attachments in the current render pass instance.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DISCARD_RECTANGLE_EXT` dynamic state enabled then `vkCmdSetDiscardRectangleEXT` must have been called in the current command buffer.
prior to this drawing command for each discard rectangle in

\texttt{VkPipelineDiscardRectangleStateCreateInfoEXT:discardRectangleCount}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-07880}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DISCARD_RECTANGLE_ENABLE_EXT} dynamic state enabled then \texttt{vkCmdSetDiscardRectangleEnableEXT} must have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-rasterizerDiscardEnable-09236}
  If the \texttt{VK_EXT_discard_rectangles} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, then \texttt{vkCmdSetDiscardRectangleEnableEXT} must have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-07881}
  If the bound graphics pipeline state was created with the \texttt{VK_DYNAMIC_STATE_DISCARD_RECTANGLE_MODE_EXT} dynamic state enabled then \texttt{vkCmdSetDiscardRectangleModeEXT} must have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-None-08648}
  If the \texttt{VK_EXT_discard_rectangles} extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to \texttt{vkCmdSetRasterizerDiscardEnable} in the current command buffer set \texttt{rasterizerDiscardEnable} to \texttt{VK_FALSE}, and the most recent call to \texttt{vkCmdSetDiscardRectangleEnableEXT} in the current command buffer set \texttt{discardRectangleEnable} to \texttt{VK_TRUE}, then \texttt{vkCmdSetDiscardRectangleModeEXT} must have been called in the current command buffer prior to this drawing command

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-dynamicRenderingUnusedAttachments-08913}
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the \texttt{dynamicRenderingUnusedAttachments} feature is not enabled, and \texttt{VkRenderingInfo::pDepthAttachment->imageView} was \texttt{VK_NULL_HANDLE}, the value of \texttt{VkPipelineRenderingCreateInfo::depthAttachmentFormat} used to create the currently bound graphics pipeline must be equal to \texttt{VK_FORMAT_UNDEFINED}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-dynamicRenderingUnusedAttachments-08914}
  If current render pass instance was begun with \texttt{vkCmdBeginRendering}, the \texttt{dynamicRenderingUnusedAttachments} feature is not enabled, and \texttt{VkRenderingInfo::pDepthAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of \texttt{VkPipelineRenderingCreateInfo::depthAttachmentFormat} used to create the currently bound graphics pipeline must be equal to the \texttt{VkFormat} used to create \texttt{VkRenderingInfo::pDepthAttachment->imageView}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-dynamicRenderingUnusedAttachments-08915}
If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pDepthAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::depthAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pDepthAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`.

- VUID-vkCmdDrawClusterIndirectHUAWEI-dynamicRenderingUnusedAttachments-08916
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline must be equal to `VK_FORMAT_UNDEFINED`.

- VUID-vkCmdDrawClusterIndirectHUAWEI-dynamicRenderingUnusedAttachments-08917
  If current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is not enabled, and `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline must be equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`.

- VUID-vkCmdDrawClusterIndirectHUAWEI-dynamicRenderingUnusedAttachments-08918
  If the current render pass instance was begun with `vkCmdBeginRendering`, the `dynamicRenderingUnusedAttachments` feature is enabled, `VkRenderingInfo::pStencilAttachment->imageView` was not `VK_NULL_HANDLE`, and the value of `VkPipelineRenderingCreateInfo::stencilAttachmentFormat` used to create the currently bound graphics pipeline was not equal to the `VkFormat` used to create `VkRenderingInfo::pStencilAttachment->imageView`, the value of the format must be `VK_FORMAT_UNDEFINED`.

- VUID-vkCmdDrawClusterIndirectHUAWEI-imageView-06183
  If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentShadingRateAttachmentInfoKHR::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_SHADING_RATE_ATTACHMENT_BIT_KHR`.

- VUID-vkCmdDrawClusterIndirectHUAWEI-imageView-06184
  If the current render pass instance was begun with `vkCmdBeginRendering` and `VkRenderingFragmentDensityMapAttachmentInfoEXT::imageView` was not `VK_NULL_HANDLE`, the currently bound graphics pipeline must have been created with `VK_PIPELINE_CREATE_RENDERING_FRAGMENT_DENSITY_MAP_ATTACHMENT_BIT_EXT`.

- VUID-vkCmdDrawClusterIndirectHUAWEI-colorAttachmentCount-06185
  If the currently bound pipeline was created with a `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` structure, and the current render pass instance was begun with `vkCmdBeginRendering` with a `VkRenderingInfo::colorAttachmentCount` parameter greater than 0, then each element of the `VkRenderingInfo::pColorAttachments` array with a `imageView` not equal to `VK_NULL_HANDLE` must have been created with a sample count equal to the corresponding element of the `pColorAttachmentSamples` member of `VkAttachmentSampleCountInfoAMD` or `VkAttachmentSampleCountInfoNV` used to create the currently bound graphics pipeline.
• VUID-vkCmdDrawClusterIndirectHUAWEI-pDepthAttachment-06186
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline was created with a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and \texttt{VkRenderingInfo::pDepthAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of the \texttt{depthStencilAttachmentSamples} member of \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} used to create the currently bound graphics pipeline must be equal to the sample count used to create \texttt{VkRenderingInfo::pDepthAttachment->imageView}

• VUID-vkCmdDrawClusterIndirectHUAWEI-pStencilAttachment-06187
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline was created with a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and \texttt{VkRenderingInfo::pStencilAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of the \texttt{depthStencilAttachmentSamples} member of \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} used to create the currently bound graphics pipeline must be equal to the sample count used to create \texttt{VkRenderingInfo::pStencilAttachment->imageView}

• VUID-vkCmdDrawClusterIndirectHUAWEI-multisampledRenderToSingleSampled-07285
  If the currently bound pipeline was created without a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and the \texttt{multisampledRenderToSingleSampled} feature is not enabled, and the current render pass instance was begun with \texttt{vkCmdBeginRendering} with a \texttt{VkRenderingInfo::colorAttachmentCount} parameter greater than 0, then each element of the \texttt{VkRenderingInfo::pColorAttachments} array with a \texttt{imageView} not equal to \texttt{VK_NULL_HANDLE} must have been created with a sample count equal to the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline

• VUID-vkCmdDrawClusterIndirectHUAWEI-multisampledRenderToSingleSampled-07286
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline was created without a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and the \texttt{multisampledRenderToSingleSampled} feature is not enabled, and \texttt{VkRenderingInfo::pDepthAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline must be equal to the sample count used to create \texttt{VkRenderingInfo::pDepthAttachment->imageView}

• VUID-vkCmdDrawClusterIndirectHUAWEI-multisampledRenderToSingleSampled-07287
  If the current render pass instance was begun with \texttt{vkCmdBeginRendering}, the currently bound pipeline was created without a \texttt{VkAttachmentSampleCountInfoAMD} or \texttt{VkAttachmentSampleCountInfoNV} structure, and the \texttt{multisampledRenderToSingleSampled} feature is not enabled, and \texttt{VkRenderingInfo::pStencilAttachment->imageView} was not \texttt{VK_NULL_HANDLE}, the value of \texttt{rasterizationSamples} for the currently bound graphics pipeline must be equal to the sample count used to create \texttt{VkRenderingInfo::pStencilAttachment->imageView}

• VUID-vkCmdDrawClusterIndirectHUAWEI-pNext-07935
  If this command has been called inside a render pass instance started with \texttt{vkCmdBeginRendering}, and the \texttt{pNext} chain of \texttt{VkRenderingInfo} includes a \texttt{VkMultisampledRenderToSingleSampledInfoEXT} structure with \texttt{multisampledRenderToSingleSampledEnable} equal to \texttt{VK_TRUE}, then the value of
rasterizationSamples for the currently bound graphics pipeline must be equal to VkMultisampledRenderToSingleSampledInfoEXT::rasterizationSamples

- VUID-vkCmdDrawClusterIndirectHUAWEI-renderPass-06198
  If the current render pass instance was begun with vkCmdBeginRendering, the currently bound pipeline must have been created with a VkGraphicsPipelineCreateInfo::renderPass equal to VK_NULL_HANDLE

- VUID-vkCmdDrawClusterIndirectHUAWEI-pColorAttachments-08963
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound with a fragment shader that statically writes to a color attachment, the color write mask is not zero, color writes are enabled, and the corresponding element of the VkRenderingInfo::pColorAttachments->imageView was not VK_NULL_HANDLE, then the corresponding element of VkPipelineRenderingCreateInfo::pColorAttachmentFormats used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawClusterIndirectHUAWEI-pDepthAttachment-08964
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound, depth test is enabled, depth write is enabled, and the VkRenderingInfo::pDepthAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::depthAttachmentFormat used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawClusterIndirectHUAWEI-pStencilAttachment-08965
  If the current render pass instance was begun with vkCmdBeginRendering, there is a graphics pipeline bound, stencil test is enabled and the VkRenderingInfo::pStencilAttachment->imageView was not VK_NULL_HANDLE, then the VkPipelineRenderingCreateInfo::stencilAttachmentFormat used to create the pipeline must not be VK_FORMAT_UNDEFINED

- VUID-vkCmdDrawClusterIndirectHUAWEI-primitivesGeneratedQueryWithRasterizerDiscard-06708
  If the primitivesGeneratedQueryWithRasterizerDiscard feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, rasterization discard must not be enabled

- VUID-vkCmdDrawClusterIndirectHUAWEI-primitivesGeneratedQueryWithNonZeroStreams-06709
  If the primitivesGeneratedQueryWithNonZeroStreams feature is not enabled and the VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT query is active, the bound graphics pipeline must not have been created with a non-zero value in VkPipelineRasterizationStateStreamCreateInfoEXT::rasterizationStream

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07619
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT dynamic state enabled then vkCmdSetTessellationDomainOriginEXT must have been called in the current command buffer prior to this drawing command

- VUID-vkCmdDrawClusterIndirectHUAWEI-None-07620
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT dynamic state enabled then vkCmdSetDepthClampEnableEXT must have been called in the current command buffer
prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-09237**
  If a shader object is bound to the `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` stage, then `vkCmdSetTessellationDomainOriginEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08650**
  If the `depthClamp` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetDepthClampEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07621**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_POLYGON_MODE_EXT` dynamic state enabled then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08651**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetPolygonModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07622**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state enabled then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08652**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRasterizationSamplesEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07623**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state enabled then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08653**
  If a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleMaskEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07624**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled then `vkCmdSetAlphaToCoverageEnableEXT` must have been called in the current command buffer prior to this drawing command.
• **VUID-vkCmdDrawClusterIndirectHUAWEI-alphaToCoverageEnable-08919**
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_ALPHA_TO_COVERAGE_ENABLE_EXT` dynamic state enabled, and
  `alphaToCoverageEnable` was `VK_TRUE` in the last call to
  `vkCmdSetAlphaToCoverageEnableEXT`, then the Fragment Output Interface must contain
  a variable for the alpha Component word in Location 0 at Index 0.

• **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08654**
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToCoverageEnableEXT` must
  have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawClusterIndirectHUAWEI-alphaToCoverageEnable-08920**
  If a shader object is bound to any graphics stage, and the most recent call to
  `vkCmdSetAlphaToCoverageEnableEXT` in the current command buffer set
  `alphaToCoverageEnable` to `VK_TRUE`, then the Fragment Output Interface must contain
  a variable for the alpha Component word in Location 0 at Index 0.

• **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07625**
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_ALPHA_TO_ONE_ENABLE_EXT` dynamic state enabled then
  `vkCmdSetAlphaToOneEnableEXT` must have been called in the current command buffer
  prior to this drawing command.

• **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08655**
  If the `alphaToOne` feature is enabled, and a shader object is bound to any graphics stage,
  and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command
  buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetAlphaToOneEnableEXT` must
  have been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07626**
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_LOGIC_OP_ENABLE_EXT` dynamic state enabled then
  `vkCmdSetLogicOpEnableEXT` must have been called in the current command buffer
  prior to this drawing command.

• **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08656**
  If the `logicOp` feature is enabled, and a shader object is bound to the
  `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to
  `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
  `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetLogicOpEnableEXT` must have
  been called in the current command buffer prior to this drawing command.

• **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07627**
  If the bound graphics pipeline state was created with the
  `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then
  `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer
  prior to this drawing command.

• **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08657**
  If a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent
  call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set
rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorBlendEnableEXT must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-07628
If the bound graphics pipeline state was created with theVK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT dynamic state enabled then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-08658
If a shader object is bound to any graphics stage, and the most recent call tovkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, and the most recent call tovkCmdSetColorBlendEnableEXT for any attachment set that attachment’s value in pColorBlendEnables to VK_TRUE, then vkCmdSetColorBlendEquationEXT must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-07629
If the bound graphics pipeline state was created with theVK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT dynamic state enabled then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-08659
If a shader object is bound to theVK_SHADER_STAGE_FRAGMENT_BIT stage, and the most recent call tovkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetColorWriteMaskEXT must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-07630
If the bound graphics pipeline state was created with theVK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT dynamic state enabled then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-08660
If the geometryStreams feature is enabled, and a shader object is bound to theVK_SHADER_STAGE_GEOMETRY_BIT stage, then vkCmdSetRasterizationStreamEXT must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-07631
If the bound graphics pipeline state was created with theVK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT dynamic state enabled then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command.

• VUID-vkCmdDrawClusterIndirectHUAWEI-None-08661
If theVK_EXT_conservative_rasterization extension is enabled, and a shader object is bound to any graphics stage, and the most recent call tovkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE, then vkCmdSetConservativeRasterizationModeEXT must have been called in the current command buffer prior to this drawing command.
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_EXTRA_PRIMITIVE_OVERESTIMATION_SIZE_EXT` dynamic state enabled then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_conservative_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetConservativeRasterizationModeEXT` in the current command buffer set `conservativeRasterizationMode` to `VK_CONSERVATIVE_RASTERIZATION_MODE_OVERESTIMATE_EXT`, then `vkCmdSetExtraPrimitiveOverestimationSizeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` dynamic state enabled then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `depthClipEnable` feature is enabled, and a shader object is bound to any graphics stage, then `vkCmdSetDepthClipEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` dynamic state enabled then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the `VK_EXT_sample_locations` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetSampleLocationsEnableEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT` dynamic state enabled then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command.
If the `VK_EXT_provoking_vertex` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_VERTEX_BIT` stage, then `vkCmdSetProvokingVertexModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07637**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic state enabled then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08666**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08667**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08668**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `polygonMode` to `VK_POLYGON_MODE_LINE`, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08669**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetPolygonModeEXT` in the current command buffer set `primitiveTopology` to any line topology, then `vkCmdSetLineStippleEnableEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08670**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object outputs line primitives is bound to the tessellation evaluation or geometry stage, then `vkCmdSetLineRasterizationModeEXT` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08671**
  If the `VK_EXT_line_rasterization` extension is enabled, and a shader object that outputs line primitives is bound to the tessellation evaluation or geometry stage, then
**vkCmdSetLineStippleEnableEXT** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-07849**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_LINE_STIPPLE_EXT** dynamic state enabled then **vkCmdSetLineStippleEXT** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-08672**
  If the **VK_EXT_line_rasterization** extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to **vkCmdSetLineStippleEnableEXT** in the current command buffer set **stippledLineEnable** to **VK_TRUE**, then **vkCmdSetLineStippleEnableEXT** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-07639**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT** dynamic state enabled then **vkCmdSetDepthClipNegativeOneToOneEXT** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-08673**
  If the **depthClipControl** feature is enabled, and a shader object is bound to any graphics stage, then **vkCmdSetDepthClipNegativeOneToOneEXT** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-07640**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV** dynamic state enabled then **vkCmdSetViewportWScalingEnableNV** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-08674**
  If the **VK_NV_clip_space_w_scaling** extension is enabled, and a shader object is bound to any graphics stage, then **vkCmdSetViewportWScalingEnableNV** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-07641**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV** dynamic state enabled then **vkCmdSetViewportSwizzleNV** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-08675**
  If the **VK_NV_viewport_swizzle** extension is enabled, and a shader object is bound to any graphics stage, then **vkCmdSetViewportSwizzleNV** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-07642**
  If the bound graphics pipeline state was created with the **VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV** dynamic state enabled then **vkCmdSetCoverageToColorEnableNV** *must* have been called in the current command buffer prior to this drawing command

- **VID-vkCmdDrawClusterIndirectHUAWEI-None-08676**
  If the **VK_NV_viewport_swizzle** extension is enabled, and a shader object is bound to any graphics stage, then **vkCmdSetCoverageToColorEnableNV** *must* have been called in the current command buffer prior to this drawing command
If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageToColorEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07643**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_LOCATION_NV` dynamic state enabled then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08677**
  If the `VK_NV_fragment_coverage_to_color` extension is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetCoverageToColorEnableNV` in the current command buffer set `coverageToColorEnable` to `VK_TRUE`, then `vkCmdSetCoverageToColorLocationNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07644**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08678**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageModulationModeNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07645**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-08679**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationModeNV` in the current command buffer set `coverageModulationMode` to any value other than `VK_COVERAGE_MODULATION_MODE_NONE_NV`, then `vkCmdSetCoverageModulationTableEnableNV` must have been called in the current command buffer prior to this drawing command.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-07646**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_NV` dynamic state enabled then `vkCmdSetCoverageModulationTableNV` must have been called in the current command buffer prior to this drawing command.
If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, and the most recent call to `vkCmdSetCoverageModulationTableEnableNV` in the current command buffer set `coverageModulationTableEnable` to `VK_TRUE`, then `vkCmdSetCoverageModulationTableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SHADING_RATE_IMAGE_ENABLE_NV` dynamic state enabled then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `pipelineFragmentShadingRate` feature is enabled, and a shader object is bound to the `VK_SHADER_STAGE_FRAGMENT_BIT` stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetFragmentShadingRateKHR` must have been called in the current command buffer prior to this drawing command.

If the `shadingRateImage` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetShadingRateImageEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_REPRESENTATIVE_FRAGMENT_TEST_ENABLE_NV` dynamic state enabled then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command.

If the `representativeFragmentTest` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetRepresentativeFragmentTestEnableNV` must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_REDUCTION_MODE_NV` dynamic state enabled then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.

If the `coverageReductionMode` feature is enabled, and a shader object is bound to any graphics stage, and the most recent call to `vkCmdSetRasterizerDiscardEnable` in the current command buffer set `rasterizerDiscardEnable` to `VK_FALSE`, then `vkCmdSetCoverageReductionModeNV` must have been called in the current command buffer prior to this drawing command.
buffer prior to this drawing command

- **VUID-vkCmdDrawClusterIndirectHUAWEI-pColorBlendEnables-07470**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` state enabled and the last call to `vkCmdSetColorBlendEnableEXT` set `pColorBlendEnables` for any attachment to `VK_TRUE`, then for those attachments in the subpass the corresponding image view’s format features must contain `VK_FORMAT_FEATURE_COLOR_ATTACHMENT_BLEND_BIT`

- **VUID-vkCmdDrawClusterIndirectHUAWEI-rasterizationSamples-07471**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and the current subpass does not use any color and/or depth/stencil attachments, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must follow the rules for a zero-attachment subpass

- **VUID-vkCmdDrawClusterIndirectHUAWEI-samples-07472**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `VkPipelineMultisampleStateCreateInfo::rasterizationSamples` parameter used to create the bound graphics pipeline

- **VUID-vkCmdDrawClusterIndirectHUAWEI-samples-07473**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` state and `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` states enabled, then the `samples` parameter in the last call to `vkCmdSetSampleMaskEXT` must be greater or equal to the `rasterizationSamples` parameter in the last call to `vkCmdSetRasterizationSamplesEXT`

- **VUID-vkCmdDrawClusterIndirectHUAWEI-rasterizationSamples-07474**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, and neither the `VK_AMD_mixed_attachment_samples` nor the `VK_NV_framebuffer_mixed_samples` extensions are enabled, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the current subpass color and/or depth/stencil attachments

- **VUID-vkCmdDrawClusterIndirectHUAWEI-None-09211**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, or a shader object is bound to any graphics stage, and the current render pass instance includes a `VkMultisampledRenderToSingleSampledInfoEXT` structure with `multisampledRenderToSingleSampledEnable` equal to `VK_TRUE`, then the `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT` must be the same as the `rasterizationSamples` member of that structure

- **VUID-vkCmdDrawClusterIndirectHUAWEI-firstAttachment-07476**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic state enabled then `vkCmdSetColorBlendEnableEXT` must have been called in the current command buffer
prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEnableEXT` calls must specify an enable for all active color attachments in the current subpass

- **VUID-vkCmdDrawClusterIndirectHUAWEI-firstAttachment-07477**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_EQUATION_EXT` dynamic state enabled then `vkCmdSetColorBlendEquationEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendEquationEXT` calls must specify the blend equations for all active color attachments in the current subpass where blending is enabled

- **VUID-vkCmdDrawClusterIndirectHUAWEI-firstAttachment-07478**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT` dynamic state enabled then `vkCmdSetColorWriteMaskEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorWriteMaskEXT` calls must specify the color write mask for all active color attachments in the current subpass

- **VUID-vkCmdDrawClusterIndirectHUAWEI-firstAttachment-07479**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` dynamic state enabled then `vkCmdSetColorBlendAdvancedEXT` must have been called in the current command buffer prior to this drawing command, and the attachments specified by the `firstAttachment` and `attachmentCount` parameters of `vkCmdSetColorBlendAdvancedEXT` calls must specify the advanced blend equations for all active color attachments in the current subpass where blending is enabled

- **VUID-vkCmdDrawClusterIndirectHUAWEI-advancedBlendMaxColorAttachments-07480**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COLOR_BLEND_ADVANCED_EXT` and `VK_DYNAMIC_STATE_COLOR_BLEND_ENABLE_EXT` dynamic states enabled and the last calls to `vkCmdSetColorBlendEnableEXT` and `vkCmdSetColorBlendAdvancedEXT` have enabled advanced blending, then the number of active color attachments in the current subpass must not exceed `advancedBlendMaxColorAttachments`

- **VUID-vkCmdDrawClusterIndirectHUAWEI-primitivesGeneratedQueryWithNonZeroStreams-07481**
  If the `primitivesGeneratedQueryWithNonZeroStreams` feature is not enabled and the `VK_QUERY_TYPE_PRIMITIVES_GENERATED_EXT` query is active, and the bound graphics pipeline was created with `VK_DYNAMIC_STATE_RASTERIZATION_STREAM_EXT` state enabled, the last call to `vkCmdSetRasterizationStreamEXT` must have set the `rasterizationStream` to zero

- **VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsPerPixel-07482**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state enabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state disabled, then the `sampleLocationsPerPixel` member of `pSampleLocationsInfo` in the last call to `vkCmdSetSampleLocationsEXT` must equal the `rasterizationSamples` member of the
 VkPipelineMultisampleStateCreateInfo structure the bound graphics pipeline has been created with

• VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsPerPixel-07483
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, then the sampleLocationsPerPixel member of pSampleLocationsInfo in the last call to vkCmdSetSampleLocationsEXT must equal the rasterizationSamples parameter of the last call to vkCmdSetRasterizationSamplesEXT

• VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsEnable-07484
  If the bound graphics pipeline was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, and the current subpass has a depth/stencil attachment, then that attachment must have been created with the VK_IMAGE_CREATE_SAMPLE_LOCATIONS_COMPATIBLE_DEPTH_BIT_EXT bit set

• VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsEnable-07485
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.width in the last call to vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.width as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

• VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsEnable-07486
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state enabled and the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, then the sampleLocationsInfo.sampleLocationGridSize.height in the last call to vkCmdSetSampleLocationsEXT must evenly divide VkMultisamplePropertiesEXT::sampleLocationGridSize.height as returned by vkGetPhysicalDeviceMultisamplePropertiesEXT with a samples parameter equaling rasterizationSamples

• VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsEnable-07487
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT state enabled, and if sampleLocationsEnable was VK_TRUE in the last call to vkCmdSetSampleLocationsEnableEXT, the fragment shader code must not statically use the extended instruction InterpolateAtSample

• VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsEnable-07936
  If the bound graphics pipeline state was created with the VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT state disabled and the VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT state enabled, the sampleLocationsEnable member of a VkPipelineSampleLocationsStateCreateInfo::sampleLocationsEnable in the
If the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.width` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.width` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsEnable-07937**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationGridSize.height` must evenly divide `VkMultisamplePropertiesEXT::sampleLocationGridSize.height` as returned by `vkGetPhysicalDeviceMultisamplePropertiesEXT` with a `samples` parameter equaling the value of `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-sampleLocationsEnable-07938**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_EXT` state disabled and the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` state enabled, the `sampleLocationsEnable` member of a `VkPipelineSampleLocationsStateCreateInfoEXT::sampleLocationsEnable` in the bound graphics pipeline is `VK_TRUE` or `VK_DYNAMIC_STATE_SAMPLE_LOCATIONS_ENABLE_EXT` state enabled, then, `sampleLocationsInfo.sampleLocationsPerPixel` must equal `rasterizationSamples` in the last call to `vkCmdSetRasterizationSamplesEXT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-coverageModulationTableEnable-07488**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_MODULATION_TABLE_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageModulationTableEnableNV` set `coverageModulationTableEnable` to `VK_TRUE`, then the `coverageModulationTableCount` parameter in the last call to `vkCmdSetCoverageModulationTableNV` must equal the current `rasterizationSamples` divided by the number of color samples in the current subpass.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-rasterizationSamples-07489**
  If the `VK_NV_framebuffer_mixed_samples` extension is enabled, and if current subpass has a depth/stencil attachment and depth test, stencil test, or depth bounds test are enabled in the currently bound pipeline state, then the current `rasterizationSamples` must be the same as the sample count of the depth/stencil attachment.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-coverageToColorEnable-07490**
  If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_COVERAGE_TO_COLOR_ENABLE_NV` state enabled and the last call to `vkCmdSetCoverageToColorEnableNV` set `coverageToColorEnable` to `VK_TRUE`, the current subpass must have a color attachment at the location selected by the last call to `vkCmdSetCoverageToColorLocationNV` with a `VkFormat` of `VK_FORMAT_R8_UINT`, `VK_FORMAT_R8_SINT`, `VK_FORMAT_R16_UINT`, `VK_FORMAT_R16_SINT`, `VK_FORMAT_R32_UINT`, or `VK_FORMAT_R32_SINT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-coverageReductionMode-07491**
  If this `VK_NV_coverage_reduction_mode` extension is enabled, the bound graphics pipeline...
state was created with the \texttt{VK\_DYNAMIC\_STATE\_COVERAGE\_TO\_COLOR\_ENABLE\_NV} and 
\texttt{VK\_DYNAMIC\_STATE\_RASTERIZATION\_SAMPLES\_EXT} states enabled, the current coverage 
reduction mode \texttt{coverageReductionMode}, then the current \texttt{rasterizationSamples}, and the 
sample counts for the color and depth/stencil attachments (if the subpass has them) \textbf{must} 
be a valid combination returned by \texttt{vkGetPhysicalDeviceSupportedFramebufferMixedSamplesCombinationsNV}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-viewportCount-07492}
  If the bound graphics pipeline state was created with the 
\texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT} dynamic state enabled, but not the 
\texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_SWIZZLE\_NV} dynamic state enabled, then the bound graphics 
Pipeline must have been created with \texttt{VkPipelineViewportSwizzleStateCreateInfoNV} 
::\texttt{viewportCount} greater or equal to the \texttt{viewportCount} parameter in the last call to 
\texttt{vkCmdSetViewportWithCount}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-viewportCount-07493}
  If the bound graphics pipeline state was created with the 
\texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_WITH\_COUNT} and \texttt{VK\_DYNAMIC\_STATE\_VIEWPORT\_SWIZZLE\_NV} dynamic states enabled then the bound graphics 
Pipeline must be created with \texttt{VkPipelineViewportSwizzleStateCreateInfoNV} 
::\texttt{viewportCount} greater than or equal to the \texttt{viewportCount} parameter in the last call to 
\texttt{vkCmdSetViewportSwizzleNV}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-rasterizationSamples-07494}
  If the \texttt{VK\_NV\_framebuffer\_mixed\_samples} extension is enabled, and if the current subpass 
has any color attachments and \texttt{rasterizationSamples} of the last call to 
\texttt{vkCmdSetRasterizationSamplesEXT} is greater than the number of color samples, then the 
Pipeline \texttt{sampleShadingEnable} must be \texttt{VK\_FALSE}

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-stippledLineEnable-07495}
  If the bound graphics pipeline state was created with the 
\texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} or 
\texttt{VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT} dynamic states enabled, and if the current 
stippledLineEnable state is \texttt{VK\_TRUE} and the current \texttt{lineRasterizationMode} state is 
\texttt{VK\_LINE\_RASTERIZATION\_MODE\_RECTANGULAR\_EXT}, then the \texttt{stippledRectangularLines} feature 
\textbf{must} be enabled

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-stippledLineEnable-07496}
  If the bound graphics pipeline state was created with the 
\texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} or 
\texttt{VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT} dynamic states enabled, and if the current 
stippledLineEnable state is \texttt{VK\_TRUE} and the current \texttt{lineRasterizationMode} state is 
\texttt{VK\_LINE\_RASTERIZATION\_MODE\_BRESENHAM\_EXT}, then the \texttt{stippledBresenhamLines} feature \textbf{must} 
be enabled

- \textbf{VUID-vkCmdDrawClusterIndirectHUAWEI-stippledLineEnable-07497}
  If the bound graphics pipeline state was created with the 
\texttt{VK\_DYNAMIC\_STATE\_LINE\_STIPPLE\_ENABLE\_EXT} or 
\texttt{VK\_DYNAMIC\_STATE\_LINE\_RASTERIZATION\_MODE\_EXT} dynamic states enabled, and if the current 
stippledLineEnable state is \texttt{VK\_TRUE} and the current \texttt{lineRasterizationMode} state is 
\texttt{VK\_LINE\_RASTERIZATION\_MODE\_RECTANGULAR\_SMOOTH\_EXT}, then the \texttt{stippledSmoothLines} feature \textbf{must} 
be enabled
If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_LINE_STIPPLE_ENABLE_EXT` or `VK_DYNAMIC_STATE_LINE_RASTERIZATION_MODE_EXT` dynamic states enabled, and if the current `stippledLineEnable` state is `VK_TRUE` and the current `lineRasterizationMode` state is `VK_LINE_RASTERIZATION_MODE_DEFAULT_EXT`, then the `stippledRectangularLines` feature must be enabled and `VkPhysicalDeviceLimits::strictLines` must be `VK_TRUE`.

If the bound graphics pipeline state was created with the `VK_DYNAMIC_STATE_CONSERVATIVE_RASTERIZATION_MODE_EXT` dynamic state enabled, `conservativePointAndLineRasterization` is not supported, and the effective primitive topology output by the last pre-rasterization shader stage is a line or point, then the `conservativeRasterizationMode` set by the last call to `vkCmdSetConservativeRasterizationModeEXT` must be `VK_CONSERVATIVE_RASTERIZATION_MODE_DISABLED_EXT`.

If the currently bound pipeline was created with the `VkPipelineShaderStageCreateInfo::stage` member of an element of `VkGraphicsPipelineCreateInfo::pStages` set to `VK_SHADER_STAGE_VERTEX_BIT`, `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`, `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT` or `VK_SHADER_STAGE_GEOMETRY_BIT`, then Mesh Shader Queries must not be active.

If dynamic state was inherited from `VkCommandBufferInheritanceViewportScissorInfoNV`, it must be set in the current command buffer prior to this drawing command.

If there is no bound graphics pipeline, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_VERTEX_BIT`.

If there is no bound graphics pipeline, and the tessellationShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT`.

If there is no bound graphics pipeline, and the tessellationShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT`.

If there is no bound graphics pipeline, and the geometryShader feature is enabled, `vkCmdBindShadersEXT` must have been called in the current command buffer with `pStages` with an element of `VK_SHADER_STAGE_GEOMETRY_BIT`.
If there is no bound graphics pipeline, **vkCmdBindShadersEXT must** have been called in the current command buffer with `pStages` with an element of **VK_SHADER_STAGE_FRAGMENT_BIT**

If there is no bound graphics pipeline, and the `taskShader` feature is enabled, **vkCmdBindShadersEXT must** have been called in the current command buffer with `pStages` with an element of **VK_SHADER_STAGE_TASK_BIT_EXT**

If there is no bound graphics pipeline, and the `meshShader` feature is enabled, **vkCmdBindShadersEXT must** have been called in the current command buffer with `pStages` with an element of **VK_SHADER_STAGE_MESH_BIT_EXT**

If there is no bound graphics pipeline, and at least one of the `taskShader` and `meshShader` features is enabled, one of the **VK_SHADER_STAGE_VERTEX_BIT** or **VK_SHADER_STAGE_MESH_BIT_EXT** stages **must** have a valid `VkShaderEXT` bound, and the other **must** have no `VkShaderEXT` bound

If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the **VK_SHADER_STAGE_MESH_BIT_EXT** stage, and that `VkShaderEXT` was created without the **VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT** flag, a valid `VkShaderEXT` **must** be bound to the **VK_SHADER_STAGE_TASK_BIT_EXT** stage

If there is no bound graphics pipeline, and both the `taskShader` and `meshShader` features are enabled, and a valid `VkShaderEXT` is bound to the **VK_SHADER_STAGE_MESH_BIT_EXT** stage, and that `VkShaderEXT` was created with the **VK_SHADER_CREATE_NO_TASK_SHADER_BIT_EXT** flag, there **must** be no `VkShaderEXT` bound to the **VK_SHADER_STAGE_TASK_BIT_EXT** stage

If there is no bound graphics pipeline, and a valid `VkShaderEXT` is bound to the **VK_SHADER_STAGE_VERTEX_BIT** stage, there **must** be no `VkShaderEXT` bound to either the **VK_SHADER_STAGE_TASK_BIT_EXT** stage or the **VK_SHADER_STAGE_MESH_BIT_EXT** stage

If any graphics shader is bound which was created with the **VK_SHADER_CREATE_LINK_STAGE_BIT_EXT** flag, any stages in between stages whose shaders did not create a shader with the **VK_SHADER_CREATE_LINK_STAGE_BIT_EXT** flag in the same `vkCreateShadersEXT` call **must** also be bound

If any graphics shader is bound which was created with the **VK_SHADER_CREATE_LINK_STAGE_BIT_EXT** flag, then all shaders created with the **VK_SHADER_CREATE_LINK_STAGE_BIT_EXT** flag in the same `vkCreateShadersEXT` call **must** also be bound

All bound graphics shader objects **must** have been created with identical or identically defined push constant ranges
All bound graphics shader objects must have been created with identical or identically defined arrays of descriptor set layouts.

If a shader object is bound to the VK_SHADER_STAGE_FRAGMENT_BIT stage and the attachmentFeedbackLoopDynamicState feature is enabled on the device, and the most recent call to vkCmdSetRasterizerDiscardEnable in the current command buffer set rasterizerDiscardEnable to VK_FALSE vkCmdSetAttachmentFeedbackLoopEnableEXT must have been called in the current command buffer prior to this drawing command.

If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_DEPTH_WRITE_ENABLE set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpDepthAttachmentReadEXT, the depthWriteEnable parameter in the last call to vkCmdSetDepthWriteEnable must be VK_FALSE.

If the bound graphics pipeline state includes a fragment shader stage, was created with VK_DYNAMIC_STATE_STENCIL_WRITE_MASK set in VkPipelineDynamicStateCreateInfo::pDynamicStates, and the fragment shader declares the EarlyFragmentTests execution mode and uses OpStencilAttachmentReadEXT, the writeMask parameter in the last call to vkCmdSetStencilWriteMask must be 0.

If a shader object is bound to any graphics stage or the currently bound graphics pipeline was created with VK_DYNAMIC_STATE_COLOR_WRITE_MASK_EXT, and the format of any color attachment is VK_FORMAT_E5B9G9R9_UFLOAT_PACK32, the corresponding element of the pColorWriteMasks parameter of vkCmdSetColorWriteMaskEXT must either include all of VK_COLOR_COMPONENT_R_BIT, VK_COLOR_COMPONENT_G_BIT, and VK_COLOR_COMPONENT_B_BIT, or none of them.

If blending is enabled for any attachment where either the source or destination blend factors for that attachment use the secondary color input, the maximum value of Location for any output attachment statically used in the Fragment Execution Model executed by this command must be less than maxFragmentDualSrcAttachments.

The bound graphics pipeline must not have been created with the VkPipelineShaderStageCreateInfo::stage member of an element of VkGraphicsPipelineCreateInfo::pStages set to VK_SHADER_STAGE_VERTEX_BIT, VK_SHADER_STAGE_TESSELLATION_CONTROL_BIT, VK_SHADER_STAGE_TESSELLATION_EVALUATION_BIT or VK_SHADER_STAGE_GEOMETRY_BIT.

Transform Feedback Queries must not be active.

Primitives Generated Queries must not be active.

pipelineStatistics-07076
The `pipelineStatistics` member used to create any active *Pipeline Statistics Query* must not contain `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASMBELY_VERTICES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_INPUT_ASMBELY_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_VERTEX_SHADER_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_GEOMETRY_SHADER_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_CLIPPING_INVOCATIONS_BIT`, `VK_QUERY_PIPELINE_STATISTIC_CLIPPING_PRIMITIVES_BIT`, `VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_CONTROL_SHADER_PATCHES_BIT`, or `VK_QUERY_PIPELINE_STATISTIC_TESSELLATION_EVALUATION_SHADER_INVOCATIONS_BIT`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-drawCount-02718**
  If the `multiDrawIndirect` feature is not enabled, `drawCount` must be 0 or 1.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-drawCount-02719**
  `drawCount` must be less than or equal to `VkPhysicalDeviceLimits::maxDrawIndirectCount`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-ClusterCullingHUAWEI-07824**
  The current pipeline bound to `VK_PIPELINE_BIND_POINT_GRAPHICS` must contain a shader stage using the `ClusterCullingHUAWEI Execution Model`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-offset-07918**
  `offset` must be a multiple of `VkPhysicalDeviceClusterCullingShaderPropertiesHUAWEI::indirectBufferOffsetAlignment`.

### Valid Usage (Implicit)

- **VUID-vkCmdDrawClusterIndirectHUAWEI-commandBuffer-parameter**
  `commandBuffer` must be a valid `VkCommandBuffer` handle.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-buffer-parameter**
  `buffer` must be a valid `VkBuffer` handle.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-commandBuffer-recording**
  `commandBuffer` must be in the `recording state`.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-commandBuffer-cmdpool**
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-renderpass**
  This command must only be called inside of a render pass instance.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-videocoding**
  This command must only be called outside of a video coding scope.

- **VUID-vkCmdDrawClusterIndirectHUAWEI-commonparent**
  Both of `buffer`, and `commandBuffer` must have been created, allocated, or retrieved from the same `VkDevice`.
Host Synchronization

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

2404
Chapter 22. Fixed-Function Vertex Processing

Vertex fetching is controlled via configurable state, as a logically distinct graphics pipeline stage.

22.1. Vertex Attributes

Vertex shaders can define input variables, which receive vertex attribute data transferred from one or more VkBuffer(s) by drawing commands. Vertex shader input variables are bound to buffers via an indirect binding where the vertex shader associates a vertex input attribute number with each variable, vertex input attributes are associated to vertex input bindings on a per-pipeline basis, and vertex input bindings are associated with specific buffers on a per-draw basis via the vkCmdBindVertexBuffers command. Vertex input attribute and vertex input binding descriptions also contain format information controlling how data is extracted from buffer memory and converted to the format expected by the vertex shader.

There are VkPhysicalDeviceLimits::maxVertexInputAttributes number of vertex input attributes and VkPhysicalDeviceLimits::maxVertexInputBindings number of vertex input bindings (each referred to by zero-based indices), where there are at least as many vertex input attributes as there are vertex input bindings. Applications can store multiple vertex input attributes interleaved in a single buffer, and use a single vertex input binding to access those attributes.

In GLSL, vertex shaders associate input variables with a vertex input attribute number using the location layout qualifier. The Component layout qualifier associates components of a vertex shader input variable with components of a vertex input attribute.

GLSL example

```glsl
// Assign location M to variableName
layout (location=M, component=2) in vec2 variableName;

// Assign locations [N,N+L) to the array elements of variableNameArray
layout (location=N) in vec4 variableNameArray[L];
```

In SPIR-V, vertex shaders associate input variables with a vertex input attribute number using the Location decoration. The Component decoration associates components of a vertex shader input variable with components of a vertex input attribute. The Location and Component decorations are specified via the OpDecorate instruction.

SPIR-V example

```spir-v
...%1 = OpExtInstImport "GLSL.std.450"
...
OpName %9 "variableName"
OpName %15 "variableNameArray"
OpDecorate %18 BuiltIn VertexIndex
```
22.1.1. Attribute Location and Component Assignment

The Location decoration specifies which vertex input attribute is used to read and interpret the data that a variable will consume.

When a vertex shader input variable declared using a 16- or 32-bit scalar or vector data type is assigned a Location, its value(s) are taken from the components of the input attribute specified with the corresponding VkVertexInputAttributeDescription::location. The components used depend on the type of variable and the Component decoration specified in the variable declaration, as identified in Input attribute components accessed by 16-bit and 32-bit input variables. Any 16-bit or 32-bit scalar or vector input will consume a single Location. For 16-bit and 32-bit data types, missing components are filled in with default values as described below.

If an implementation supports storageInputOutput16, vertex shader input variables can have a width of 16 bits.

Table 32. Input attribute components accessed by 16-bit and 32-bit input variables

<table>
<thead>
<tr>
<th>16-bit or 32-bit data type</th>
<th>Component decoration</th>
<th>Components consumed</th>
</tr>
</thead>
<tbody>
<tr>
<td>scalar</td>
<td>0 or unspecified</td>

<td>1</td>
<td>(o, y, z, o)</td>
</tr>
<tr>
<td>two-component vector</td>
<td>2</td>
<td>(o, o, z, w)</td>
</tr>
</tbody>
</table>
Components indicated by “o” are available for use by other input variables which are sourced from the same attribute, and if used, are either filled with the corresponding component from the input format (if present), or the default value.

When a vertex shader input variable declared using a scalar or vector 64-bit data type is assigned a Location \( i \), its values are taken from consecutive input attributes starting with the corresponding VkVertexInputAttributeDescription::location. Such matrices are treated as an array of column vectors with values taken from the input attributes identified in Input attributes accessed by 32-bit input matrix variables. The VkVertexInputAttributeDescription::format must be specified with a VkFormat that corresponds to the appropriate type of column vector. The Component decoration must not be used with matrix types.

### Table 33. Input attributes accessed by 32-bit input matrix variables

</tr>
</tbody>
</table>

Components indicated by “o” are available for use by other input variables which are sourced from the same attribute, and if used, are either filled with the corresponding component from the input format (if present), or the default value.

When a vertex shader input variable declared using a scalar or vector 64-bit data type is assigned a Location \( i \), its values are taken from consecutive input attributes starting with the corresponding
VkVertexInputAttributeDescription::location. The Location slots and Component words used depend on the type of variable and the Component decoration specified in the variable declaration, as identified in Input attribute locations and components accessed by 64-bit input variables. For 64-bit data types, no default attribute values are provided. Input variables must not use more components than provided by the attribute.

Table 34. Input attribute locations and components accessed by 64-bit input variables

</tbody>
</table>
Components indicated by “o” are available for use by other input variables which are sourced from the same attribute. Components indicated by “-” are not available for input variables as there are no default values provided for 64-bit data types, and there is no data provided by the input format.

When a vertex shader input variable declared using a 64-bit floating-point matrix type is assigned a Location \( i \), its values are taken from consecutive input attribute locations. Such matrices are treated as an array of column vectors with values taken from the input attributes as shown in Input attribute locations and components accessed by 64-bit input variables. Each column vector starts at the Location immediately following the last Location of the previous column vector. The number of attributes and components assigned to each matrix is determined by the matrix dimensions and ranges from two to eight locations.

When a vertex shader input variable declared using an array type is assigned a location, its values are taken from consecutive input attributes starting with the corresponding VkVertexInputAttributeDescription::location. The number of attributes and components assigned to each element are determined according to the data type of the array elements and Component decoration (if any) specified in the declaration of the array, as described above. Each element of the array, in order, is assigned to consecutive locations, but all at the same specified component within each location.

Only input variables declared with the data types and component decorations as specified above are supported. Two variables are allowed to share the same Location slot only if their Component words do not overlap. If multiple variables share the same Location slot, they must all have the same SPIR-V floating-point component type or all have the same width scalar type components.

### 22.2. Vertex Input Description

Applications specify vertex input attribute and vertex input binding descriptions as part of graphics pipeline creation by setting the VkGraphicsPipelineCreateInfo::pVertexInputState pointer to a VkPipelineVertexInputStateCreateInfo structure. Alternatively, if the graphics pipeline is created with the VK_DYNAMIC_STATE_VERTEX_INPUT_EXT dynamic state enabled, then the vertex input attribute and vertex input binding descriptions are specified dynamically with vkCmdSetVertexInputEXT, and the VkGraphicsPipelineCreateInfo::pVertexInputState pointer is ignored.

The VkPipelineVertexInputStateCreateInfo structure is defined as:

```c
// Provided by VK_VERSION_1_0
typedef struct VkPipelineVertexInputStateCreateInfo {
    VkStructureType sType;
    const void* pNext;
    VkPipelineVertexInputStateCreateFlags flags;
    uint32_t vertexBindingDescriptionCount;
    const VkVertexInputBindingDescription* pVertexBindingDescriptions;
    uint32_t vertexAttributeDescriptionCount;
    const VkVertexInputAttributeDescription* pVertexAttributeDescriptions;
} VkPipelineVertexInputStateCreateInfo;
```

- `sType` is a VkStructureType value identifying this structure.
• \( pNext \) is NULL or a pointer to a structure extending this structure.
• flags is reserved for future use.
• \( \text{vertexBindingDescriptionCount} \) is the number of vertex binding descriptions provided in \( p\text{VertexBindingDescriptions} \).
• \( p\text{VertexBindingDescriptions} \) is a pointer to an array of \( \text{VkVertexInputBindingDescription} \) structures.
• \( \text{vertexAttributeDescriptionCount} \) is the number of vertex attribute descriptions provided in \( p\text{VertexAttributeDescriptions} \).
• \( p\text{VertexAttributeDescriptions} \) is a pointer to an array of \( \text{VkVertexInputAttributeDescription} \) structures.

### Valid Usage

- VUID-VkPipelineVertexInputStateCreateInfo-vertexBindingDescriptionCount-00613
  
  \( \text{vertexBindingDescriptionCount} \) must be less than or equal to \( \text{VkPhysicalDeviceLimits}::\text{maxVertexInputBindings} \)

- VUID-VkPipelineVertexInputStateCreateInfo-vertexAttributeDescriptionCount-00614
  
  \( \text{vertexAttributeDescriptionCount} \) must be less than or equal to \( \text{VkPhysicalDeviceLimits}::\text{maxVertexInputAttributes} \)

- VUID-VkPipelineVertexInputStateCreateInfo-binding-00615
  
  For every binding specified by each element of \( p\text{VertexAttributeDescriptions} \), a \( \text{VkVertexInputBindingDescription} \) must exist in \( p\text{VertexBindingDescriptions} \) with the same value of binding

- VUID-VkPipelineVertexInputStateCreateInfo-pVertexBindingDescriptions-00616
  
  All elements of \( p\text{VertexBindingDescriptions} \) must describe distinct binding numbers

- VUID-VkPipelineVertexInputStateCreateInfo-pVertexAttributeDescriptions-00617
  
  All elements of \( p\text{VertexAttributeDescriptions} \) must describe distinct attribute locations

### Valid Usage (Implicit)

- VUID-VkPipelineVertexInputStateCreateInfo-sType-sType
  
  \( s\text{Type} \) must be \( \text{VK_STRUCTURE_TYPE_PIPELINE_VERTEX_INPUT_STATE_CREATE_INFO} \)

- VUID-VkPipelineVertexInputStateCreateInfo-pNext-pNext
  
  \( pNext \) must be NULL or a pointer to a valid instance of \( \text{VkPipelineVertexInputDivisorStateCreateInfoEXT} \)

- VUID-VkPipelineVertexInputStateCreateInfo-sType-unique
  
  The \( s\text{Type} \) value of each struct in the \( pNext \) chain must be unique

- VUID-VkPipelineVertexInputStateCreateInfo-flags-zerobitmask
  
  \( \text{flags} \) must be 0

- VUID-VkPipelineVertexInputStateCreateInfo-pVertexBindingDescriptions-parameter
  
  If \( \text{vertexBindingDescriptionCount} \) is not 0, \( p\text{VertexBindingDescriptions} \) must be a valid
pointer to an array of `vertexBindingDescriptionCount` valid `VkVertexInputBindingDescription` structures

- VUID-VkPipelineVertexInputStateCreateInfo-pVertexAttributeDescriptions-parameter
  If `vertexAttributeDescriptionCount` is not 0, `pVertexAttributeDescriptions` must be a valid pointer to an array of `vertexAttributeDescriptionCount` valid `VkVertexInputAttributeDescription` structures

```c
// Provided by VK_VERSION_1_0
typedef VkFlags VkPipelineVertexInputStateCreateFlags;
```

`VkPipelineVertexInputStateCreateFlags` is a bitmask type for setting a mask, but is currently reserved for future use.

Each vertex input binding is specified by the `VkVertexInputBindingDescription` structure, defined as:

```c
// Provided by VK_VERSION_1_0
typedef struct VkVertexInputBindingDescription {
    uint32_t binding;
    uint32_t stride;
    VkVertexInputRate inputRate;
} VkVertexInputBindingDescription;
```

- `binding` is the binding number that this structure describes.
- `stride` is the byte stride between consecutive elements within the buffer.
- `inputRate` is a `VkVertexInputRate` value specifying whether vertex attribute addressing is a function of the vertex index or of the instance index.

### Valid Usage

- VUID-VkVertexInputBindingDescription-binding-00618
  `binding` must be less than `VkPhysicalDeviceLimits::maxVertexInputBindings`

- VUID-VkVertexInputBindingDescription-stride-00619
  `stride` must be less than or equal to `VkPhysicalDeviceLimits::maxVertexInputBindingStride`

- VUID-VkVertexInputBindingDescription-stride-04456
  If the VK_KHR_portability_subset extension is enabled, `stride` must be a multiple of, and at least as large as, `VkPhysicalDevicePortabilitySubsetPropertiesKHR::minVertexInputBindingStrideAlignment`

### Valid Usage (Implicit)

- VUID-VkVertexInputBindingDescription-inputRate-parameter
  `inputRate` must be a valid `VkVertexInputRate` value
Possible values of `VkVertexInputBindingDescription::inputRate`, specifying the rate at which vertex attributes are pulled from buffers, are:

```c
// Provided by VK_VERSION_1_0
typedef enum VkVertexInputRate {
    VK_VERTEX_INPUT_RATE_VERTEX = 0,
    VK_VERTEX_INPUT_RATE_INSTANCE = 1,
} VkVertexInputRate;
```

- `VK_VERTEX_INPUT_RATE_VERTEX` specifies that vertex attribute addressing is a function of the vertex index.
- `VK_VERTEX_INPUT_RATE_INSTANCE` specifies that vertex attribute addressing is a function of the instance index.

Each vertex input attribute is specified by the `VkVertexInputAttributeDescription` structure, defined as:

```c
// Provided by VK_VERSION_1_0
typedef struct VkVertexInputAttributeDescription {
    uint32_t location;
    uint32_t binding;
    VkFormat format;
    uint32_t offset;
} VkVertexInputAttributeDescription;
```

- `location` is the shader input location number for this attribute.
- `binding` is the binding number which this attribute takes its data from.
- `format` is the size and type of the vertex attribute data.
- `offset` is a byte offset of this attribute relative to the start of an element in the vertex input binding.

### Valid Usage

- **VUID-VkVertexInputAttributeDescription-location-00620**
  - `location` must be less than `VkPhysicalDeviceLimits::maxVertexInputAttributes`

- **VUID-VkVertexInputAttributeDescription-binding-00621**
  - `binding` must be less than `VkPhysicalDeviceLimits::maxVertexInputBindings`

- **VUID-VkVertexInputAttributeDescription-offset-00622**
  - `offset` must be less than or equal to `VkPhysicalDeviceLimits::maxVertexInputAttributeOffset`

- **VUID-VkVertexInputAttributeDescription-format-00623**
  - The `format features` of `format` must contain `VK_FORMAT_FEATURE_VERTEX_BUFFER_BIT`

- **VUID-VkVertexInputAttributeDescription-vertexAttributeAccessBeyondStride-04457**
If the VK_KHR_portability_subset extension is enabled, and VkPhysicalDevicePortabilitySubsetFeaturesKHR::vertexAttributeAccessBeyondStride is VK_FALSE, the sum of offset plus the size of the vertex attribute data described by format must not be greater than stride in the VkVertexInputBindingDescription referenced in binding.

Valid Usage (Implicit)

- VUID-VkVertexInputAttributeDescription-format-parameter format must be a valid VkFormat value

To dynamically set the vertex input attribute and vertex input binding descriptions, call:

```c
void vkCmdSetVertexInputEXT(
    VkCommandBuffer commandBuffer,
    uint32_t vertexBindingDescriptionCount,
    const VkVertexInputBindingDescription2EXT* pVertexBindingDescriptions,
    uint32_t vertexAttributeDescriptionCount,
    const VkVertexInputAttributeDescription2EXT* pVertexAttributeDescriptions);
```

- commandBuffer is the command buffer into which the command will be recorded.
- vertexBindingDescriptionCount is the number of vertex binding descriptions provided in pVertexBindingDescriptions.
- pVertexBindingDescriptions is a pointer to an array of VkVertexInputBindingDescription2EXT structures.
- vertexAttributeDescriptionCount is the number of vertex attribute descriptions provided in pVertexAttributeDescriptions.
- pVertexAttributeDescriptions is a pointer to an array of VkVertexInputAttributeDescription2EXT structures.

This command sets the vertex input attribute and vertex input binding descriptions state for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE dynamic state enabled, then vkCmdBindVertexBuffers2 can be used instead of vkCmdSetVertexInputEXT to dynamically set the stride.
Valid Usage

- **VUID-vkCmdSetVertexInputEXT-None-08546**
  Either the `vertexInputDynamicState` feature or the `shaderObject` feature or both **must** be enabled.

- **VUID-vkCmdSetVertexInputEXT-vertexBindingDescriptionCount-04791**
  `vertexBindingDescriptionCount` **must** be less than or equal to `VkPhysicalDeviceLimits::maxVertexInputBindings`

- **VUID-vkCmdSetVertexInputEXT-vertexAttributeDescriptionCount-04792**
  `vertexAttributeDescriptionCount` **must** be less than or equal to `VkPhysicalDeviceLimits::maxVertexInputAttributes`

- **VUID-vkCmdSetVertexInputEXT-binding-04793**
  For every `binding` specified by each element of `pVertexAttributeDescriptions`, a `VkVertexInputBindingDescription2EXT` **must** exist in `pVertexBindingDescriptions` with the same value of `binding`.

- **VUID-vkCmdSetVertexInputEXT-pVertexBindingDescriptions-04794**
  All elements of `pVertexBindingDescriptions` **must** describe distinct binding numbers

- **VUID-vkCmdSetVertexInputEXT-pVertexAttributeDescriptions-04795**
  All elements of `pVertexAttributeDescriptions` **must** describe distinct attribute locations

Valid Usage (Implicit)

- **VUID-vkCmdSetVertexInputEXT-commandBuffer-parameter**
  `commandBuffer` **must** be a valid `VkCommandBuffer` handle

- **VUID-vkCmdSetVertexInputEXT-pVertexBindingDescriptions-parameter**
  If `vertexBindingDescriptionCount` is not 0, `pVertexBindingDescriptions` **must** be a valid pointer to an array of `vertexBindingDescriptionCount` valid `VkVertexInputBindingDescription2EXT` structures

- **VUID-vkCmdSetVertexInputEXT-pVertexAttributeDescriptions-parameter**
  If `vertexAttributeDescriptionCount` is not 0, `pVertexAttributeDescriptions` **must** be a valid pointer to an array of `vertexAttributeDescriptionCount` valid `VkVertexInputAttributeDescription2EXT` structures

- **VUID-vkCmdSetVertexInputEXT-commandBuffer-recording**
  `commandBuffer` **must** be in the recording state

- **VUID-vkCmdSetVertexInputEXT-commandBuffer-cmdpool**
  The `VkCommandPool` that `commandBuffer` was allocated from **must** support graphics operations

- **VUID-vkCmdSetVertexInputEXT-videocoding**
  This command **must** only be called outside of a video coding scope
Host Synchronization

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

Command Properties

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render Pass Scope</th>
<th>Video Coding Scope</th>
<th>Supported Queue Types</th>
<th>Command Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary</td>
<td>Both</td>
<td>Outside</td>
<td>Graphics</td>

</tr>
<tr>
<td>Secondary</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The VkVertexInputBindingDescription2EXT structure is defined as:

```c
// Provided by VK_EXT_shader_object, VK_EXT_vertex_input_dynamic_state
typedef struct VkVertexInputBindingDescription2EXT {
    VkStructureType sType;
    void* pNext;
    uint32_t binding;
    uint32_t stride;
    VkVertexInputRate inputRate;
    uint32_t divisor;
} VkVertexInputBindingDescription2EXT;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is NULL or a pointer to a structure extending this structure.
- `binding` is the binding number that this structure describes.
- `stride` is the byte stride between consecutive elements within the buffer.
- `inputRate` is a VkVertexInputRate value specifying whether vertex attribute addressing is a function of the vertex index or of the instance index.
- `divisor` is the number of successive instances that will use the same value of the vertex attribute when instanced rendering is enabled. This member can be set to a value other than 1 if the vertexAttributeInstanceRateDivisor feature is enabled. For example, if the divisor is N, the same vertex attribute will be applied to N successive instances before moving on to the next vertex attribute. The maximum value of divisor is implementation-dependent and can be queried using VkPhysicalDeviceVertexAttributeDivisorPropertiesEXT:maxVertexAttribDivisor. A value of 0 can be used for the divisor if the vertexAttributeInstanceRateZeroDivisor feature is enabled. In this case, the same vertex attribute will be applied to all instances.
Valid Usage

- VUID-VkVertexInputBindingDescription2EXT-binding-04796
  binding must be less than VkPhysicalDeviceLimits::maxVertexInputBindings

- VUID-VkVertexInputBindingDescription2EXT-stride-04797
  stride must be less than or equal to VkPhysicalDeviceLimits::maxVertexInputBindingStride

- VUID-VkVertexInputBindingDescription2EXT-divisor-04798
  If the vertexAttributeInstanceRateZeroDivisor feature is not enabled, divisor must not be 0

- VUID-VkVertexInputBindingDescription2EXT-divisor-04799
  If the vertexAttributeInstanceRateDivisor feature is not enabled, divisor must be 1

- VUID-VkVertexInputBindingDescription2EXT-divisor-06226
  divisor must be a value between 0 and VkPhysicalDeviceVertexAttributeDivisorPropertiesEXT::maxVertexAttribDivisor, inclusive

- VUID-VkVertexInputBindingDescription2EXT-divisor-06227
  If divisor is not 1 then inputRate must be of type VK_VERTEX_INPUT_RATE_INSTANCE

Valid Usage (Implicit)

- VUID-VkVertexInputBindingDescription2EXT-sType-sType
  sType must be VK_STRUCTURE_TYPE_VERTEX_INPUT_BINDING_DESCRIPTION_2_EXT

- VUID-VkVertexInputBindingDescription2EXT-inputRate-parameter
  inputRate must be a valid VkVertexInputRate value

The VkVertexInputAttributeDescription2EXT structure is defined as:

```c
// Provided by VK_EXT_shader_object, VK_EXT_vertex_input_dynamic_state
typedef struct VkVertexInputAttributeDescription2EXT {
    VkStructureType sType;
    void* pNext;
    uint32_t location;
    uint32_t binding;
    VkFormat format;
    uint32_t offset;
} VkVertexInputAttributeDescription2EXT;
```

- sType is a VkStructureType value identifying this structure.
- pNext is NULL or a pointer to a structure extending this structure.
- location is the shader input location number for this attribute.
- binding is the binding number which this attribute takes its data from.
- format is the size and type of the vertex attribute data.
• **offset** is a byte offset of this attribute relative to the start of an element in the vertex input binding.

## Valid Usage

- **VUID-VkVertexInputAttributeDescription2EXT-location-06228**
  location **must** be less than **VkPhysicalDeviceLimits::maxVertexInputAttributes**

- **VUID-VkVertexInputAttributeDescription2EXT-binding-06229**
  binding **must** be less than **VkPhysicalDeviceLimits::maxVertexInputBindings**

- **VUID-VkVertexInputAttributeDescription2EXT-offset-06230**
  offset **must** be less than or equal to **VkPhysicalDeviceLimits::maxVertexInputAttributeOffset**

- **VUID-VkVertexInputAttributeDescription2EXT-format-04805**
  The format features of format **must** contain **VK_FORMAT_FEATURE_VERTEX_BUFFER_BIT**

- **VUID-VkVertexInputAttributeDescription2EXT-vertexAttributeAccessBeyondStride-04806**
  If the **VK_KHR_portability_subset** extension is enabled, and **VkPhysicalDevicePortabilitySubsetFeaturesKHR::vertexAttributeAccessBeyondStride** is **VK_FALSE**, the sum of offset plus the size of the vertex attribute data described by format **must** not be greater than stride in the **VkVertexInputBindingDescription2EXT** referenced in binding

## Valid Usage (Implicit)

- **VUID-VkVertexInputAttributeDescription2EXT-sType-sType**
  sType **must** be **VK_STRUCTURE_TYPE_VERTEX_INPUT_ATTRIBUTE>Description_2_EXT**

- **VUID-VkVertexInputAttributeDescription2EXT-format-parameter**
  format **must** be a valid **VkFormat** value

To bind vertex buffers to a command buffer for use in subsequent drawing commands, call:

```c
// Provided by VK_VERSION_1_0
void vkCmdBindVertexBuffers(
    VkCommandBuffer commandBuffer,
    uint32_t firstBinding,
    uint32_t bindingCount,
    const VkBuffer* pBuffers,
    const VkDeviceSize* pOffsets);
```

- **commandBuffer** is the command buffer into which the command is recorded.
- **firstBinding** is the index of the first vertex input binding whose state is updated by the command.
- **bindingCount** is the number of vertex input bindings whose state is updated by the command.
• `pBuffers` is a pointer to an array of buffer handles.
• `pOffsets` is a pointer to an array of buffer offsets.

The values taken from elements i of `pBuffers` and `pOffsets` replace the current state for the vertex input binding `firstBinding + i`, for i in `[0, bindingCount)`. The vertex input binding is updated to start at the offset indicated by `pOffsets[i]` from the start of the buffer `pBuffers[i]`. All vertex input attributes that use each of these bindings will use these updated addresses in their address calculations for subsequent drawing commands. If the `nullDescriptor` feature is enabled, elements of `pBuffers` can be `VK_NULL_HANDLE`, and can be used by the vertex shader. If a vertex input attribute is bound to a vertex input binding that is `VK_NULL_HANDLE`, the values taken from memory are considered to be zero, and missing G, B, or A components are filled with `(0,0,1)`.

**Valid Usage**

- VUID-vkCmdBindVertexBuffers-firstBinding-00624
  `firstBinding` must be less than `VkPhysicalDeviceLimits::maxVertexInputBindings`

- VUID-vkCmdBindVertexBuffers-firstBinding-00625
  The sum of `firstBinding` and `bindingCount` must be less than or equal to `VkPhysicalDeviceLimits::maxVertexInputBindings`

- VUID-vkCmdBindVertexBuffers-pOffsets-00626
  All elements of `pOffsets` must be less than the size of the corresponding element in `pBuffers`

- VUID-vkCmdBindVertexBuffers-pBuffers-00627
  All elements of `pBuffers` must have been created with the `VK_BUFFER_USAGE_VERTEX_BUFFER_BIT` flag

- VUID-vkCmdBindVertexBuffers-pBuffers-00628
  Each element of `pBuffers` that is non-sparse must be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-vkCmdBindVertexBuffers-pBuffers-04001
  If the `nullDescriptor` feature is not enabled, all elements of `pBuffers` must not be `VK_NULL_HANDLE`

- VUID-vkCmdBindVertexBuffers-pBuffers-04002
  If an element of `pBuffers` is `VK_NULL_HANDLE`, then the corresponding element of `pOffsets` must be zero

**Valid Usage (Implicit)**

- VUID-vkCmdBindVertexBuffers-commandBuffer-parameter
  `commandBuffer` must be a valid `VkCommandBuffer` handle

- VUID-vkCmdBindVertexBuffers-pBuffers-parameter
  `pBuffers` must be a valid pointer to an array of `bindingCount` valid or `VK_NULL_HANDLE` `VkBuffer` handles

- VUID-vkCmdBindVertexBuffers-pOffsets-parameter
**pOffsets** must be a valid pointer to an array of `bindingCount` `VkDeviceSize` values

- VUID-vkCmdBindVertexBuffers-commandBuffer-recording
  `commandBuffer` must be in the recording state

- VUID-vkCmdBindVertexBuffers-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations

- VUID-vkCmdBindVertexBuffers-videocoding
  This command must only be called outside of a video coding scope

- VUID-vkCmdBindVertexBuffers-bindingCount-arraylength
  `bindingCount` must be greater than 0

- VUID-vkCmdBindVertexBuffers-commonparent
  Both of `commandBuffer`, and the elements of `pBuffers` that are valid handles of non-ignored parameters must have been created, allocated, or retrieved from the same `VkDevice`

**Host Synchronization**

- Host access to `commandBuffer` must be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized

**Command Properties**

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render Pass Scope</th>
<th>Video Coding Scope</th>
<th>Supported Queue Types</th>
<th>Command Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary</td>
<td>Both</td>
<td>Outside</td>
<td>Graphics</td>
<td>State</td>
</tr>
<tr>
<td>Secondary</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Alternatively, to bind vertex buffers, along with their sizes and strides, to a command buffer for use in subsequent drawing commands, call:

```c
// Provided by VK_VERSION_1_3
define void vkCmdBindVertexBuffers2(
  VkCommandBuffer
  uint32_t
  uint32_t
  const VkBuffer*
  const VkDeviceSize*
  const VkDeviceSize*
  const VkDeviceSize*

  commandBuffer,
  firstBinding,
  bindingCount,
  pBuffers,
  p0Offsets,
  pSizes,
  pStrides);
```

or the equivalent command
void vkCmdBindVertexBuffers2EXT(
    VkCommandBuffer                      commandBuffer,
    uint32_t                             firstBinding,
    uint32_t                             bindingCount,
    const VkBuffer*                     pBuffers,
    const VkDeviceSize*                 pOffsets,
    const VkDeviceSize*                 pSizes,
    const VkDeviceSize*                 pStrides);

- **commandBuffer** is the command buffer into which the command is recorded.
- **firstBinding** is the index of the first vertex input binding whose state is updated by the command.
- **bindingCount** is the number of vertex input bindings whose state is updated by the command.
- **pBuffers** is a pointer to an array of buffer handles.
- **pOffsets** is a pointer to an array of buffer offsets.
- **pSizes** is **NULL** or a pointer to an array of the size in bytes of vertex data bound from **pBuffers**.
- **pStrides** is **NULL** or a pointer to an array of buffer strides.

The values taken from elements i of **pBuffers** and **pOffsets** replace the current state for the vertex input binding **firstBinding + i**, for i in [0, bindingCount). The vertex input binding is updated to start at the offset indicated by **pOffsets[i]** from the start of the buffer **pBuffers[i]**. If **pSizes** is not **NULL** then **pSizes[i]** specifies the bound size of the vertex buffer starting from the corresponding elements of **pBuffers[i]** plus **pOffsets[i]**. If **pSizes[i]** is **VK_WHOLE_SIZE** then the bound size is from **pBuffers[i]** plus **pOffsets[i]** to the end of the buffer **pBuffers[i]**. All vertex input attributes that use each of these bindings will use these updated addresses in their address calculations for subsequent drawing commands. If the **nullDescriptor** feature is enabled, elements of **pBuffers** can be **VK_NULL_HANDLE**, and can be used by the vertex shader. If a vertex input attribute is bound to a vertex input binding that is **VK_NULL_HANDLE**, the values taken from memory are considered to be zero, and missing G, B, or A components are filled with (0,0,1).

This command also **dynamically sets** the byte strides between consecutive elements within buffer **pBuffers[i]** to the corresponding **pStrides[i]** value when drawing using shader objects, or when the graphics pipeline is created with **VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE** set in **VkPipelineDynamicStateCreateInfo::pDynamicStates**. Otherwise, strides are specified by the **VkVertexInputBindingDescription::stride** values used to create the currently active pipeline.

If drawing using shader objects or if the bound pipeline state object was also created with the **VK_DYNAMIC_STATE_VERTEX_INPUT_EXT** dynamic state enabled then **vkCmdSetVertexInputEXT** can be used instead of **vkCmdBindVertexBuffers2** to set the stride.

**Note**
Unlike the static state to set the same, **pStrides** must be between 0 and the maximum extent of the attributes in the binding. **vkCmdSetVertexInputEXT** does not have this restriction so can be used if other stride values are desired.
Valid Usage

- VUID-vkCmdBindVertexBuffers2-firstBinding-03355
  `firstBinding` must be less than `VkPhysicalDeviceLimits::maxVertexInputBindings`

- VUID-vkCmdBindVertexBuffers2-firstBinding-03356
  The sum of `firstBinding` and `bindingCount` must be less than or equal to `VkPhysicalDeviceLimits::maxVertexInputBindings`

- VUID-vkCmdBindVertexBuffers2-pOffsets-03357
  If `pSizes` is not `NULL`, all elements of `pOffsets` must be less than the size of the corresponding element in `pBuffers`

- VUID-vkCmdBindVertexBuffers2-pSizes-03358
  If `pSizes` is not `NULL`, all elements of `pOffsets` plus `pSizes`, where `pSizes` is not `VK_WHOLE_SIZE`, must be less than or equal to the size of the corresponding element in `pBuffers`

- VUID-vkCmdBindVertexBuffers2-pBuffers-03359
  All elements of `pBuffers` must have been created with the `VK_BUFFER_USAGE_VERTEX_BUFFER_BIT` flag

- VUID-vkCmdBindVertexBuffers2-pBuffers-03360
  Each element of `pBuffers` that is non-sparse must be bound completely and contiguously to a single `VkDeviceMemory` object

- VUID-vkCmdBindVertexBuffers2-pBuffers-04111
  If the `nullDescriptor` feature is not enabled, all elements of `pBuffers` must not be `VK_NULL_HANDLE`

- VUID-vkCmdBindVertexBuffers2-pBuffers-04112
  If an element of `pBuffers` is `VK_NULL_HANDLE`, then the corresponding element of `pOffsets` must be zero

- VUID-vkCmdBindVertexBuffers2-pStrides-03362
  If `pStrides` is not `NULL` each element of `pStrides` must be less than or equal to `VkPhysicalDeviceLimits::maxVertexInputBindingStride`

- VUID-vkCmdBindVertexBuffers2-pStrides-06209
  If `pStrides` is not `NULL` each element of `pStrides` must be either 0 or greater than or equal to the maximum extent of all vertex input attributes fetched from the corresponding binding, where the extent is calculated as the `VkVertexInputAttributeDescription::offset` plus `VkVertexInputAttributeDescription::format` size

Valid Usage (Implicit)

- VUID-vkCmdBindVertexBuffers2-commandBuffer-parameter
  `commandBuffer` must be a valid `VkCommandBuffer` handle

- VUID-vkCmdBindVertexBuffers2-pBuffers-parameter
  `pBuffers` must be a valid pointer to an array of `bindingCount` valid or `VK_NULL_HANDLE` `VkBuffer` handles
• VUID-vkCmdBindVertexBuffers2-pOffsets-parameter
  \texttt{pOffsets} must be a valid pointer to an array of \texttt{bindingCount} \texttt{VkDeviceSize} values

• VUID-vkCmdBindVertexBuffers2-pSizes-parameter
  If \texttt{pSizes} is not NULL, \texttt{pSizes} must be a valid pointer to an array of \texttt{bindingCount} \texttt{VkDeviceSize} values

• VUID-vkCmdBindVertexBuffers2-pStrides-parameter
  If \texttt{pStrides} is not NULL, \texttt{pStrides} must be a valid pointer to an array of \texttt{bindingCount} \texttt{VkDeviceSize} values

• VUID-vkCmdBindVertexBuffers2-commandBuffer-recording
  \texttt{commandBuffer} must be in the recording state

• VUID-vkCmdBindVertexBuffers2-commandBuffer-cmdpool
  The \texttt{VkCommandPool} that \texttt{commandBuffer} was allocated from must support graphics operations

• VUID-vkCmdBindVertexBuffers2-videocoding
  This command must only be called outside of a video coding scope

• VUID-vkCmdBindVertexBuffers2-bindingCount-arraylength
  If any of \texttt{pSizes}, or \texttt{pStrides} are not NULL, \texttt{bindingCount} must be greater than 0

• VUID-vkCmdBindVertexBuffers2-commonparent
  Both of \texttt{commandBuffer}, and the elements of \texttt{pBuffers} that are valid handles of non-ignored parameters must have been created, allocated, or retrieved from the same \texttt{VkDevice}

---

**Host Synchronization**

• Host access to \texttt{commandBuffer} must be externally synchronized

• Host access to the \texttt{VkCommandPool} that \texttt{commandBuffer} was allocated from must be externally synchronized

---

22.3. **Vertex Attribute Divisor in Instanced Rendering**

If the \texttt{vertexAttributeInstanceRateDivisor} feature is enabled and the \texttt{pNext} chain of \texttt{VkPipelineVertexInputStateCreateInfo} includes a \texttt{VkPipelineVertexInputDivisorStateCreateInfoEXT} structure, then that structure controls how vertex attributes are assigned to an instance when instanced rendering is enabled.
The `VkPipelineVertexInputDivisorStateCreateInfoEXT` structure is defined as:

```c
typedef struct VkPipelineVertexInputDivisorStateCreateInfoEXT {
    VkStructureType sType;
    const void* pNext;
    uint32_t vertexBindingDivisorCount;
    const VkVertexInputBindingDivisorDescriptionEXT* pVertexBindingDivisors;
} VkPipelineVertexInputDivisorStateCreateInfoEXT;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `vertexBindingDivisorCount` is the number of elements in the `pVertexBindingDivisors` array.
- `pVertexBindingDivisors` is a pointer to an array of `VkVertexInputBindingDivisorDescriptionEXT` structures specifying the divisor value for each binding.

### Valid Usage (Implicit)

- `VUID-VkPipelineVertexInputDivisorStateCreateInfoEXT-sType-sType`  
  `sType` must be `VK_STRUCTURE_TYPE_PIPELINE_VERTEX_INPUT_DIVISOR_STATE_CREATE_INFO_EXT`
- `VUID-VkPipelineVertexInputDivisorStateCreateInfoEXT-pVertexBindingDivisors-parameter`  
  `pVertexBindingDivisors` must be a valid pointer to an array of `vertexBindingDivisorCount` `VkVertexInputBindingDivisorDescriptionEXT` structures
- `VUID-VkPipelineVertexInputDivisorStateCreateInfoEXT-vertexBindingDivisorCount-arraylength`  
  `vertexBindingDivisorCount` must be greater than 0

The individual divisor values per binding are specified using the `VkVertexInputBindingDivisorDescriptionEXT` structure which is defined as:

```c
typedef struct VkVertexInputBindingDivisorDescriptionEXT {
    uint32_t binding;
    uint32_t divisor;
} VkVertexInputBindingDivisorDescriptionEXT;
```

- `binding` is the binding number for which the divisor is specified.
- `divisor` is the number of successive instances that will use the same value of the vertex attribute when instanced rendering is enabled. For example, if the divisor is N, the same vertex attribute will be applied to N successive instances before moving on to the next vertex attribute. The maximum value of `divisor` is implementation-dependent and can be queried using `VkPhysicalDeviceVertexAttributeDivisorPropertiesEXT::maxVertexAttribDivisor`. A value of 0 cannot
be used for the divisor if the vertexAttributeInstanceRateZeroDivisor feature is enabled. In this case, the same vertex attribute will be applied to all instances.

If this structure is not used to define a divisor value for an attribute, then the divisor has a logical default value of 1.

### Valid Usage

- **VUID-VkVertexInputBindingDivisorDescriptionEXT-binding-01869**
  - Binding must be less than VkPhysicalDeviceLimits::maxVertexInputBindings

- **VUID-VkVertexInputBindingDivisorDescriptionEXT-vertexAttributeInstanceRateZeroDivisor-02228**
  - If the vertexAttributeInstanceRateZeroDivisor feature is not enabled, divisor must not be 0

- **VUID-VkVertexInputBindingDivisorDescriptionEXT-vertexAttributeInstanceRateDivisor-02229**
  - If the vertexAttributeInstanceRateDivisor feature is not enabled, divisor must be 1

- **VUID-VkVertexInputBindingDivisorDescriptionEXT-divisor-01870**
  - Divisor must be a value between 0 and VkPhysicalDeviceVertexAttributeDivisorPropertiesEXT::maxVertexAttribDivisor, inclusive

- **VUID-VkVertexInputBindingDivisorDescriptionEXT-inputRate-01871**
  - VkVertexInputBindingDescription::inputRate must be of type VK_VERTEX_INPUT_RATE_INSTANCE for this binding

### 22.4. Vertex Input Address Calculation

The address of each attribute for each vertexIndex and instanceIndex is calculated as follows:

- Let attribDesc be the member of VkPipelineVertexInputStateCreateInfo::pVertexAttributeDescriptions with VkVertexInputAttributeDescription::location equal to the vertex input attribute number.

- Let bindingDesc be the member of VkPipelineVertexInputStateCreateInfo::pVertexBindingDescriptions with VkVertexInputAttributeDescription::binding equal to attribDesc.binding.

- Let vertexIndex be the index of the vertex within the draw (a value between firstVertex and firstVertex+vertexCount for vkCmdDraw, or a value taken from the index buffer plus vertexOffset for vkCmdDrawIndexed), and let instanceIndex be the instance number of the draw (a value between firstInstance and firstInstance+instanceCount).

- Let offset be an array of offsets into the currently bound vertex buffers specified during vkCmdBindVertexBuffers or vkCmdBindVertexBuffers2 with pOffsets.

- Let divisor be the member of VkPipelineVertexInputDivisorStateCreateInfoEXT::pVertexBindingDivisors with VkVertexInputBindingDivisorDescriptionEXT::binding equal to attribDesc.binding.
bufferBindingAddress = buffer[binding].baseAddress + offset[binding];

if (bindingDesc.inputRate == VK_VERTEX_INPUT_RATE_VERTEX)
    effectiveVertexOffset = vertexIndex * bindingDesc.stride;
else
    if (divisor == 0)
        effectiveVertexOffset = firstInstance * bindingDesc.stride;
    else
        effectiveVertexOffset = (firstInstance + ((instanceIndex - firstInstance) / divisor)) * bindingDesc.stride;

attribAddress = bufferBindingAddress + effectiveVertexOffset + attribDesc.offset;

22.4.1. Vertex Input Extraction

For each attribute, raw data is extracted starting at attribAddress and is converted from the VkVertexInputAttributeDescription's format to either floating-point, unsigned integer, or signed integer based on the numeric type of format. The numeric type of format must match the numeric type of the input variable in the shader. The input variable in the shader must be declared as a 64-bit data type if and only if format is a 64-bit data type. If format is a packed format, attribAddress must be a multiple of the size in bytes of the whole attribute data type as described in Packed Formats. Otherwise, attribAddress must be a multiple of the size in bytes of the component type indicated by format (see Formats). For attributes that are not 64-bit data types, each component is converted to the format of the input variable based on its type and size (as defined in the Format Definition section for each VkFormat), using the appropriate equations in 16-Bit Floating-Point Numbers, Unsigned 11-Bit Floating-Point Numbers, Unsigned 10-Bit Floating-Point Numbers, Fixed-Point Data Conversion, and Shared Exponent to RGB. Signed integer components smaller than 32 bits are sign-extended. Attributes that are not 64-bit data types are expanded to four components in the same way as described in conversion to RGBA. The number of components in the vertex shader input variable need not exactly match the number of components in the format. If the vertex shader has fewer components, the extra components are discarded.
Chapter 23. Tessellation

Tessellation involves three pipeline stages. First, a **tessellation control shader** transforms control points of a patch and can produce per-patch data. Second, a fixed-function tessellator generates multiple primitives corresponding to a tessellation of the patch in \((u,v)\) or \((u,v,w)\) parameter space. Third, a **tessellation evaluation shader** transforms the vertices of the tessellated patch, for example to compute their positions and attributes as part of the tessellated surface. The tessellator is enabled when the pipeline contains both a tessellation control shader and a tessellation evaluation shader.

23.1. Tessellator

If a pipeline includes both tessellation shaders (control and evaluation), the tessellator consumes each input patch (after vertex shading) and produces a new set of independent primitives (points, lines, or triangles). These primitives are logically produced by subdividing a geometric primitive (rectangle or triangle) according to the per-patch outer and inner tessellation levels written by the tessellation control shader. These levels are specified using the **built-in variables** `TessLevelOuter` and `TessLevelInner`, respectively. This subdivision is performed in an implementation-dependent manner. If no tessellation shaders are present in the pipeline, the tessellator is disabled and incoming primitives are passed through without modification.

The type of subdivision performed by the tessellator is specified by an **OpExecutionMode** instruction using one of the **Triangles**, **Quads**, or **IsoLines** execution modes. When using **shader objects**, this instruction **must** be specified in the tessellation evaluation shader, and **may** also be specified in the tessellation control shader. When using pipelines, this instruction **may** be specified in either the tessellation evaluation or tessellation control shader. When using shader objects, tessellation-related modes that are **required** **must** be specified in the tessellation evaluation shader, and **may** also be specified in the tessellation control shader. Other tessellation-related modes **may** be specified in the tessellation evaluation shader. When using pipelines, other tessellation-related execution modes **can** also be specified in either the tessellation control or tessellation evaluation shaders.

Any tessellation-related modes specified in both the tessellation control and tessellation evaluation shaders **must** be the same.

Tessellation execution modes include:

- **Triangles**, **Quads**, and **IsoLines**. These control the type of subdivision and topology of the output primitives. When using **shader objects**, one mode **must** be set in at least the tessellation evaluation stage. When using pipelines, one mode **must** be set in at least one of the tessellation shader stages. If the `VK_KHR_portability_subset` extension is enabled, and `VkPhysicalDevicePortabilitySubsetFeaturesKHR::tessellationIsolines` is `VK_FALSE`, then isoline tessellation is not supported by the implementation, and **IsoLines** **must** not be used in either tessellation shader stage.

- **VertexOrderCw** and **VertexOrderCcw**. These control the orientation of triangles generated by the tessellator. When using **shader objects**, one mode **must** be set in at least the tessellation evaluation stage. When using pipelines, one mode **must** be set in at least one of the tessellation
shader stages.

- **PointMode.** Controls generation of points rather than triangles or lines. This functionality defaults to disabled, and is enabled if either shader stage includes the execution mode. When using shader objects, if PointMode is set in the tessellation control stage, it **must** be identically set in the tessellation evaluation stage. If the **VK_KHR_portability_subset** extension is enabled, and **VkPhysicalDevicePortabilitySubsetFeaturesKHR::tessellationPointMode** is **VK_FALSE**, then point mode tessellation is not supported by the implementation, and PointMode **must** not be used in either tessellation shader stage.

- **SpacingEqual, SpacingFractionalEven, and SpacingFractionalOdd.** Controls the spacing of segments on the edges of tessellated primitives. When using shader objects, one mode **must** be set in at least the tessellation evaluation stage. When using pipelines, one mode **must** be set in at least one of the tessellation shader stages.

- **OutputVertices.** Controls the size of the output patch of the tessellation control shader. When using shader objects, one value **must** be set in at least the tessellation control stage. When using pipelines, one value **must** be set in at least one of the tessellation shader stages.

For triangles, the tessellator subdivides a triangle primitive into smaller triangles. For quads, the tessellator subdivides a rectangle primitive into smaller triangles. For isolines, the tessellator subdivides a rectangle primitive into a collection of line segments arranged in strips stretching across the rectangle in the u dimension (i.e. the coordinates in **TessCoord** are of the form (0,x) through (1,x) for all tessellation evaluation shader invocations that share a line).

Each vertex produced by the tessellator has an associated (u,v,w) or (u,v) position in a normalized parameter space, with parameter values in the range [0,1], as illustrated in figures **Domain parameterization for tessellation primitive modes (upper-left origin)** and **Domain parameterization for tessellation primitive modes (lower-left origin)**. The domain space **can** have either an upper-left or lower-left origin, selected by the **domainOrigin** member of **VkPipelineTessellationDomainOriginStateCreateInfo**.
Figure 15. Domain parameterization for tessellation primitive modes (upper-left origin)
Figure 16. Domain parameterization for tessellation primitive modes (lower-left origin)

Caption

In the domain parameterization diagrams, the coordinates illustrate the value of TessCoord at the corners of the domain. The labels on the edges indicate the inner (IL0 and IL1) and outer (OL0 through OL3) tessellation level values used to control the number of subdivisions along each edge of the domain.

For triangles, the vertex's position is a barycentric coordinate \((u,v,w)\), where \(u + v + w = 1.0\), and indicates the relative influence of the three vertices of the triangle on the position of the vertex. For quads and isolines, the position is a \((u,v)\) coordinate indicating the relative horizontal and vertical position of the vertex relative to the subdivided rectangle. The subdivision process is explained in more detail in subsequent sections.

23.2. Tessellator Patch Discard

A patch is discarded by the tessellator if any relevant outer tessellation level is less than or equal to zero.

Patches will also be discarded if any relevant outer tessellation level corresponds to a floating-point
NaN (not a number) in implementations supporting NaN.

No new primitives are generated and the tessellation evaluation shader is not executed for patches that are discarded. For Quads, all four outer levels are relevant. For Triangles and IsoLines, only the first three or two outer levels, respectively, are relevant. Negative inner levels will not cause a patch to be discarded; they will be clamped as described below.

### 23.3. Tessellator Spacing

Each of the tessellation levels is used to determine the number and spacing of segments used to subdivide a corresponding edge. The method used to derive the number and spacing of segments is specified by an OpExecutionMode in the tessellation control or tessellation evaluation shader using one of the identifiers SpacingEqual, SpacingFractionalEven, or SpacingFractionalOdd.

If SpacingEqual is used, the floating-point tessellation level is first clamped to \([1, \text{maxLevel}]\), where \(\text{maxLevel}\) is the implementation-dependent maximum tessellation level (VkPhysicalDeviceLimits::maxTessellationGenerationLevel). The result is rounded up to the nearest integer \(n\), and the corresponding edge is divided into \(n\) segments of equal length in \((u,v)\) space.

If SpacingFractionalEven is used, the tessellation level is first clamped to \([2, \text{maxLevel}]\) and then rounded up to the nearest even integer \(n\). If SpacingFractionalOdd is used, the tessellation level is clamped to \([1, \text{maxLevel} - 1]\) and then rounded up to the nearest odd integer \(n\). If \(n\) is one, the edge will not be subdivided. Otherwise, the corresponding edge will be divided into \(n - 2\) segments of equal length, and two additional segments of equal length that are typically shorter than the other segments. The length of the two additional segments relative to the others will decrease monotonically with \(n - f\), where \(f\) is the clamped floating-point tessellation level. When \(n - f\) is zero, the additional segments will have equal length to the other segments. As \(n - f\) approaches 2.0, the relative length of the additional segments approaches zero. The two additional segments must be placed symmetrically on opposite sides of the subdivided edge. The relative location of these two segments is implementation-dependent, but must be identical for any pair of subdivided edges with identical values of \(f\).

When tessellating triangles or quads using point mode with fractional odd spacing, the tessellator may produce interior vertices that are positioned on the edge of the patch if an inner tessellation level is less than or equal to one. Such vertices are considered distinct from vertices produced by subdividing the outer edge of the patch, even if there are pairs of vertices with identical coordinates.

### 23.4. Tessellation Primitive Ordering

Few guarantees are provided for the relative ordering of primitives produced by tessellation, as they pertain to primitive order.

- The output primitives generated from each input primitive are passed to subsequent pipeline stages in an implementation-dependent order.
- All output primitives generated from a given input primitive are passed to subsequent pipeline stages before any output primitives generated from subsequent input primitives.
23.5. Tessellator Vertex Winding Order

When the tessellator produces triangles (in the Triangles or Quads modes), the orientation of all triangles is specified with an OpExecutionMode of VertexOrderCw or VertexOrderCcw in the tessellation control or tessellation evaluation shaders. If the order is VertexOrderCw, the vertices of all generated triangles will have clockwise ordering in (u,v) or (u,v,w) space. If the order is VertexOrderCcw, the vertices will have counter-clockwise ordering in that space.

If the tessellation domain has an upper-left origin, the vertices of a triangle have counter-clockwise ordering if

\[ a = u_0 v_0 - u_1 v_0 + u_1 v_2 - u_2 v_1 + u_2 v_0 - u_0 v_2 \]

is negative, and clockwise ordering if a is positive. \( u_i \) and \( v_i \) are the u and v coordinates in normalized parameter space of the \( i \)th vertex of the triangle. If the tessellation domain has a lower-left origin, the vertices of a triangle have counter-clockwise ordering if \( a \) is positive, and clockwise ordering if \( a \) is negative.

Note
The value \( a \) is proportional (with a positive factor) to the signed area of the triangle.

In Triangles mode, even though the vertex coordinates have a w value, it does not participate directly in the computation of \( a \), being an affine combination of \( u \) and \( v \).

23.6. Triangle Tessellation

If the tessellation primitive mode is Triangles, an equilateral triangle is subdivided into a collection of triangles covering the area of the original triangle. First, the original triangle is subdivided into a collection of concentric equilateral triangles. The edges of each of these triangles are subdivided, and the area between each triangle pair is filled by triangles produced by joining the vertices on the subdivided edges. The number of concentric triangles and the number of subdivisions along each triangle except the outermost is derived from the first inner tessellation level. The edges of the outermost triangle are subdivided independently, using the first, second, and third outer tessellation levels to control the number of subdivisions of the \( u = 0 \) (left), \( v = 0 \) (bottom), and \( w = 0 \) (right) edges, respectively. The second inner tessellation level and the fourth outer tessellation level have no effect in this mode.

If the first inner tessellation level and all three outer tessellation levels are exactly one after clamping and rounding, only a single triangle with (u,v,w) coordinates of (0,0,1), (1,0,0), and (0,1,0) is generated. If the inner tessellation level is one and any of the outer tessellation levels is greater than one, the inner tessellation level is treated as though it were originally specified as \( 1 + \varepsilon \) and will result in a two- or three-segment subdivision depending on the tessellation spacing. When used with fractional odd spacing, the three-segment subdivision may produce inner vertices positioned on the edge of the triangle.
If any tessellation level is greater than one, tessellation begins by producing a set of concentric inner triangles and subdividing their edges. First, the three outer edges are temporarily subdivided using the clamped and rounded first inner tessellation level and the specified tessellation spacing, generating \( n \) segments. For the outermost inner triangle, the inner triangle is degenerate — a single point at the center of the triangle — if \( n \) is two. Otherwise, for each corner of the outer triangle, an inner triangle corner is produced at the intersection of two lines extended perpendicular to the corner’s two adjacent edges running through the vertex of the subdivided outer edge nearest that corner. If \( n \) is three, the edges of the inner triangle are not subdivided and it is the final triangle in the set of concentric triangles. Otherwise, each edge of the inner triangle is divided into \( n - 2 \) segments, with the \( n - 1 \) vertices of this subdivision produced by intersecting the inner edge with lines perpendicular to the edge running through the \( n - 1 \) innermost vertices of the subdivision of the outer edge. Once the outermost inner triangle is subdivided, the previous subdivision process repeats itself, using the generated triangle as an outer triangle. This subdivision process is illustrated in Inner Triangle Tessellation.

![Inner Triangle Tessellation](image)

**Caption**

In the Inner Triangle Tessellation diagram, inner tessellation levels of (a) four and (b) five are shown (not to scale). Solid black circles depict vertices along the edges of the concentric triangles. The edges of inner triangles are subdivided by intersecting the edge with segments perpendicular to the edge passing through each inner vertex of the subdivided outer edge. Dotted lines depict edges connecting corresponding vertices on the inner and outer triangle edges.

Once all the concentric triangles are produced and their edges are subdivided, the area between each pair of adjacent inner triangles is filled completely with a set of non-overlapping triangles. In this subdivision, two of the three vertices of each triangle are taken from adjacent vertices on a subdivided edge of one triangle; the third is one of the vertices on the corresponding edge of the other triangle. If the innermost triangle is degenerate (i.e., a point), the triangle containing it is subdivided into six triangles by connecting each of the six vertices on that triangle with the center point. If the innermost triangle is not degenerate, that triangle is added to the set of generated triangles as-is.
After the area corresponding to any inner triangles is filled, the tessellator generates triangles to cover the area between the outermost triangle and the outermost inner triangle. To do this, the temporary subdivision of the outer triangle edge above is discarded. Instead, the \( u = 0 \), \( v = 0 \), and \( w = 0 \) edges are subdivided according to the first, second, and third outer tessellation levels, respectively, and the tessellation spacing. The original subdivision of the first inner triangle is retained. The area between the outer and first inner triangles is completely filled by non-overlapping triangles as described above. If the first (and only) inner triangle is degenerate, a set of triangles is produced by connecting each vertex on the outer triangle edges with the center point.

After all triangles are generated, each vertex in the subdivided triangle is assigned a barycentric \((u,v,w)\) coordinate based on its location relative to the three vertices of the outer triangle. The algorithm used to subdivide the triangular domain in \((u,v,w)\) space into individual triangles is implementation-dependent. However, the set of triangles produced will completely cover the domain, and no portion of the domain will be covered by multiple triangles.

Output triangles are generated with a topology similar to triangle lists, except that the order in which each triangle is generated, and the order in which the vertices are generated for each triangle, are implementation-dependent. However, the order of vertices in each triangle is consistent across the domain as described in Tessellator Vertex Winding Order.

**23.7. Quad Tessellation**

If the tessellation primitive mode is Quads, a rectangle is subdivided into a collection of triangles covering the area of the original rectangle. First, the original rectangle is subdivided into a regular mesh of rectangles, where the number of rectangles along the \( u = 0 \) and \( u = 1 \) (vertical) and \( v = 0 \) and \( v = 1 \) (horizontal) edges are derived from the first and second inner tessellation levels, respectively. All rectangles, except those adjacent to one of the outer rectangle edges, are decomposed into triangle pairs. The outermost rectangle edges are subdivided independently, using the first, second, third, and fourth outer tessellation levels to control the number of subdivisions of the \( u = 0 \) (left), \( v = 0 \) (bottom), \( u = 1 \) (right), and \( v = 1 \) (top) edges, respectively. The area between the inner rectangles of the mesh and the outer rectangle edges are filled by triangles produced by joining the vertices on the subdivided outer edges to the vertices on the edge of the inner rectangle mesh.

If both clamped inner tessellation levels and all four clamped outer tessellation levels are exactly one, only a single triangle pair covering the outer rectangle is generated. Otherwise, if either clamped inner tessellation level is one, that tessellation level is treated as though it was originally specified as \( 1 + \varepsilon \) and will result in a two- or three-segment subdivision depending on the tessellation spacing. When used with fractional odd spacing, the three-segment subdivision may produce inner vertices positioned on the edge of the rectangle.

If any tessellation level is greater than one, tessellation begins by subdividing the \( u = 0 \) and \( u = 1 \) edges of the outer rectangle into \( m \) segments using the clamped and rounded first inner tessellation level and the tessellation spacing. The \( v = 0 \) and \( v = 1 \) edges are subdivided into \( n \) segments using the second inner tessellation level. Each vertex on the \( u = 0 \) and \( v = 0 \) edges are joined with the corresponding vertex on the \( u = 1 \) and \( v = 1 \) edges to produce a set of vertical and horizontal lines that divide the rectangle into a grid of smaller rectangles. The primitive generator emits a pair of
non-overlapping triangles covering each such rectangle not adjacent to an edge of the outer rectangle. The boundary of the region covered by these triangles forms an inner rectangle, the edges of which are subdivided by the grid vertices that lie on the edge. If either m or n is two, the inner rectangle is degenerate, and one or both of the rectangle’s edges consist of a single point. This subdivision is illustrated in Figure Inner Quad Tessellation.

![Figure 18. Inner Quad Tessellation](image)

Caption

In the Inner Quad Tessellation diagram, inner quad tessellation levels of (a) (4,2) and (b) (7,4) are shown. The regions highlighted in red in figure (b) depict the 10 inner rectangles, each of which will be subdivided into two triangles. Solid black circles depict vertices on the boundary of the outer and inner rectangles, where the inner rectangle of figure (a) is degenerate (a single line segment). Dotted lines depict the horizontal and vertical edges connecting corresponding vertices on the inner and outer rectangle edges.

After the area corresponding to the inner rectangle is filled, the tessellator must produce triangles to cover the area between the inner and outer rectangles. To do this, the subdivision of the outer rectangle edge above is discarded. Instead, the u = 0, v = 0, u = 1, and v = 1 edges are subdivided according to the first, second, third, and fourth outer tessellation levels, respectively, and the tessellation spacing. The original subdivision of the inner rectangle is retained. The area between the outer and inner rectangles is completely filled by non-overlapping triangles. Two of the three vertices of each triangle are adjacent vertices on a subdivided edge of one rectangle; the third is one of the vertices on the corresponding edge of the other rectangle. If either edge of the innermost rectangle is degenerate, the area near the corresponding outer edges is filled by connecting each vertex on the outer edge with the single vertex making up the inner edge.

The algorithm used to subdivide the rectangular domain in (u,v) space into individual triangles is implementation-dependent. However, the set of triangles produced will completely cover the domain, and no portion of the domain will be covered by multiple triangles.

Output triangles are generated with a topology similar to triangle lists, except that the order in which each triangle is generated, and the order in which the vertices are generated for each triangle, are implementation-dependent. However, the order of vertices in each triangle is
consistent across the domain as described in Tessellator Vertex Winding Order.

23.8. Isoline Tessellation

If the tessellation primitive mode is Isolines, a set of independent horizontal line segments is drawn. The segments are arranged into connected strips called isolines, where the vertices of each isoline have a constant v coordinate and u coordinates covering the full range [0,1]. The number of isolines generated is derived from the first outer tessellation level; the number of segments in each isoline is derived from the second outer tessellation level. Both inner tessellation levels and the third and fourth outer tessellation levels have no effect in this mode.

As with quad tessellation above, isoline tessellation begins with a rectangle. The $u = 0$ and $u = 1$ edges of the rectangle are subdivided according to the first outer tessellation level. For the purposes of this subdivision, the tessellation spacing mode is ignored and treated as equal_spacing. An isoline is drawn connecting each vertex on the $u = 0$ rectangle edge to the corresponding vertex on the $u = 1$ rectangle edge, except that no line is drawn between $(0,1)$ and $(1,1)$. If the number of isolines on the subdivided $u = 0$ and $u = 1$ edges is $n$, this process will result in $n$ equally spaced lines with constant v coordinates of $0, \frac{1}{n}, \frac{2}{n}, ..., \frac{n-1}{n}$.

Each of the $n$ isolines is then subdivided according to the second outer tessellation level and the tessellation spacing, resulting in $m$ line segments. Each segment of each line is emitted by the tessellator. These line segments are generated with a topology similar to line lists, except that the order in which each line is generated, and the order in which the vertices are generated for each line segment, are implementation-dependent.

Note

If the VK_KHR_portability_subset extension is enabled, and VkPhysicalDevicePortabilitySubsetFeaturesKHR::tessellationIsolines is VK_FALSE, then isoline tessellation is not supported by the implementation.

23.9. Tessellation Point Mode

For all primitive modes, the tessellator is capable of generating points instead of lines or triangles. If the tessellation control or tessellation evaluation shader specifies the OpExecutionMode PointMode, the primitive generator will generate one point for each distinct vertex produced by tessellation, rather than emitting triangles or lines. Otherwise, the tessellator will produce a collection of line segments or triangles according to the primitive mode. These points are generated with a topology similar to point lists, except the order in which the points are generated for each input primitive is undefined.

Note

If the VK_KHR_portability_subset extension is enabled, and VkPhysicalDevicePortabilitySubsetFeaturesKHR::tessellationPointMode is VK_FALSE, then tessellation point mode is not supported by the implementation.
23.10. Tessellation Pipeline State

The `pTessellationState` member of `VkGraphicsPipelineCreateInfo` is a pointer to a `VkPipelineTessellationStateCreateInfo` structure.

The `VkPipelineTessellationStateCreateInfo` structure is defined as:

```c
// Provided by VK_VERSION_1_0
typedef struct VkPipelineTessellationStateCreateInfo {
    VkStructureType sType;
    const void* pNext;
    VkPipelineTessellationStateCreateFlags flags;
    uint32_t patchControlPoints;
} VkPipelineTessellationStateCreateInfo;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `flags` is reserved for future use.
- `patchControlPoints` is the number of control points per patch.

**Valid Usage**

- VUID-VkPipelineTessellationStateCreateInfo-patchControlPoints-01214
  `patchControlPoints` must be greater than zero and less than or equal to `VkPhysicalDeviceLimits::maxTessellationPatchSize`

**Valid Usage (Implicit)**

- VUID-VkPipelineTessellationStateCreateInfo-sType-sType
  `sType` must be `VK_STRUCTURE_TYPE_PIPELINE_TESSELLATION_STATE_CREATE_INFO`

- VUID-VkPipelineTessellationStateCreateInfo-pNext-pNext
  `pNext` must be `NULL` or a pointer to a valid instance of `VkPipelineTessellationDomainOriginStateCreateInfo`

- VUID-VkPipelineTessellationStateCreateInfo-sType-unique
  The `sType` value of each struct in the `pNext` chain must be unique

- VUID-VkPipelineTessellationStateCreateInfo-flags-zerobitmask
  `flags` must be 0

```c
// Provided by VK_VERSION_1_0
typedef VkFlags VkPipelineTessellationStateCreateFlags;
```

`VkPipelineTessellationStateCreateFlags` is a bitmask type for setting a mask, but is currently
reserved for future use.

The `VkPipelineTessellationDomainOriginStateCreateInfo` structure is defined as:

```c
// Provided by VK_VERSION_1_1
typedef struct VkPipelineTessellationDomainOriginStateCreateInfo {
    VkStructureType sType;
    const void* pNext;
    VkTessellationDomainOrigin domainOrigin;
} VkPipelineTessellationDomainOriginStateCreateInfo;
```

or the equivalent

```c
// Provided by VK_KHR_maintenance2
typedef VkPipelineTessellationDomainOriginStateCreateInfo
    VkPipelineTessellationDomainOriginStateCreateInfoKHR;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `domainOrigin` is a `VkTessellationDomainOrigin` value controlling the origin of the tessellation domain space.

If the `VkPipelineTessellationDomainOriginStateCreateInfo` structure is included in the `pNext` chain of `VkPipelineTessellationStateCreateInfo`, it controls the origin of the tessellation domain. If this structure is not present, it is as if `domainOrigin` was `VK_TESSELLATION_DOMAIN_ORIGIN_UPPER_LEFT`.

**Valid Usage (Implicit)**

- `VUID-VkPipelineTessellationDomainOriginStateCreateInfo-sType-sType` `sType` must be `VK_STRUCTURE_TYPE_PIPELINE_TESSELLATION_DOMAIN_ORIGIN_STATE_CREATE_INFO`
- `VUID-VkPipelineTessellationDomainOriginStateCreateInfo-domainOrigin-parameter` `domainOrigin` must be a valid `VkTessellationDomainOrigin` value

The possible tessellation domain origins are specified by the `VkTessellationDomainOrigin` enumeration:

```c
// Provided by VK_VERSION_1_1
typedef enum VkTessellationDomainOrigin {
    VK_TESSELLATION_DOMAIN_ORIGIN_UPPER_LEFT = 0,
    VK_TESSELLATION_DOMAIN_ORIGIN_LOWER_LEFT = 1,
    // Provided by VK_KHR_maintenance2
    VK_TESSELLATION_DOMAIN_ORIGIN_UPPER_LEFT_KHR = 2437,
    // Provided by VK_KHR_maintenance2
    VK_TESSELLATION_DOMAIN_ORIGIN_LOWER_LEFT_KHR =...
}
```
VK_TESSELLATION_DOMAIN_ORIGIN_LOWER_LEFT,
} VkTessellationDomainOrigin;

or the equivalent

// Provided by VK_KHR_maintenance2
typedef VkTessellationDomainOrigin VkTessellationDomainOriginKHR;

- **VK_TESSELLATION_DOMAIN_ORIGIN_UPPER_LEFT** specifies that the origin of the domain space is in the upper left corner, as shown in figure Domain parameterization for tessellation primitive modes (upper-left origin).

- **VK_TESSELLATION_DOMAIN_ORIGIN_LOWER_LEFT** specifies that the origin of the domain space is in the lower left corner, as shown in figure Domain parameterization for tessellation primitive modes (lower-left origin).

This enum affects how the **VertexOrderCw** and **VertexOrderCcw** tessellation execution modes are interpreted, since the winding is defined relative to the orientation of the domain.

To **dynamically set** the origin of the tessellation domain space, call:

```
// Provided by VK_EXT_extended_dynamic_state3, VK_EXT_shader_object
void vkCmdSetTessellationDomainOriginEXT(
    VkCommandBuffer commandBuffer,
    VkTessellationDomainOrigin domainOrigin);
```

- **commandBuffer** is the command buffer into which the command will be recorded.

- **domainOrigin** specifies the origin of the tessellation domain space.

This command sets the origin of the tessellation domain space for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with **VK_DYNAMIC_STATE_TESSELLATION_DOMAIN_ORIGIN_EXT** set in **VkPipelineDynamicStateCreateInfo::pDynamicStates**. Otherwise, this state is specified by the **VkPipelineTessellationDomainOriginStateCreateInfo::domainOrigin** value used to create the currently active pipeline.

### Valid Usage

- **VUID-vkCmdSetTessellationDomainOriginEXT-None-08576**
  Either the **extendedDynamicState3TessellationDomainOrigin** feature or the **shaderObject** feature or both **must** be enabled

### Valid Usage (Implicit)

- **VUID-vkCmdSetTessellationDomainOriginEXT-commandBuffer-parameter**
**Host Synchronization**

- Host access to `commandBuffer` **must** be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from **must** be externally synchronized

**Command Properties**

Chapter 24. Geometry Shading

The geometry shader operates on a group of vertices and their associated data assembled from a single input primitive, and emits zero or more output primitives and the group of vertices and their associated data required for each output primitive. Geometry shading is enabled when a geometry shader is included in the pipeline.

24.1. Geometry Shader Input Primitives

Each geometry shader invocation has access to all vertices in the primitive (and their associated data), which are presented to the shader as an array of inputs.

The input primitive type expected by the geometry shader is specified with an `OpExecutionMode` instruction in the geometry shader, and must match the incoming primitive type specified by either the pipeline’s primitive topology if tessellation is inactive, or the tessellation mode if tessellation is active, as follows:

- An input primitive type of `InputPoints` must only be used with a pipeline topology of `VK_PRIMITIVE_TOPOLOGY_POINT_LIST`, or with a tessellation shader specifying `PointMode`. The input arrays always contain one element, as described by the point list topology or tessellation in point mode.

- An input primitive type of `InputLines` must only be used with a pipeline topology of `VK_PRIMITIVE_TOPOLOGY_LINE_LIST` or `VK_PRIMITIVE_TOPOLOGY_LINE_STRIP`, or with a tessellation shader specifying `IsoLines` that does not specify `PointMode`. The input arrays always contain two elements, as described by the line list topology or line strip topology, or by isoline tessellation.

- An input primitive type of `InputLinesAdjacency` must only be used when tessellation is inactive, with a pipeline topology of `VK_PRIMITIVE_TOPOLOGY_LINE_LIST_WITH_ADJACENCY` or `VK_PRIMITIVE_TOPOLOGY_LINE_STRIP_WITH_ADJACENCY`. The input arrays always contain four elements, as described by the line list with adjacency topology or line strip with adjacency topology.

- An input primitive type of `Triangles` must only be used with a pipeline topology of `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST`, `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP`, or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN`; or with a tessellation shader specifying `Quads` or `Triangles` that does not specify `PointMode`. The input arrays always contain three elements, as described by the triangle list topology, triangle strip topology, or triangle fan topology, or by triangle or quad tessellation. Vertices may be in a different absolute order than specified by the topology, but must adhere to the specified winding order.

- An input primitive type of `InputTrianglesAdjacency` must only be used when tessellation is inactive, with a pipeline topology of `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_LIST_WITH_ADJACENCY` or `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP_WITH_ADJACENCY`. The input arrays always contain six elements, as described by the triangle list with adjacency topology or triangle strip with adjacency topology. Vertices may be in a different absolute order than specified by the topology, but must adhere to the specified winding order, and the vertices making up the main primitive must still occur at the first, third, and fifth index.
24.2. Geometry Shader Output Primitives

A geometry shader generates primitives in one of three output modes: points, line strips, or triangle strips. The primitive mode is specified in the shader using an `OpExecutionMode` instruction with the `OutputPoints`, `OutputLineStrip` or `OutputTriangleStrip` modes, respectively. Each geometry shader must include exactly one output primitive mode.

The vertices output by the geometry shader are assembled into points, lines, or triangles based on the output primitive type and the resulting primitives are then further processed as described in Rasterization. If the number of vertices emitted by the geometry shader is not sufficient to produce a single primitive, vertices corresponding to incomplete primitives are not processed by subsequent pipeline stages. The number of vertices output by the geometry shader is limited to a maximum count specified in the shader.

The maximum output vertex count is specified in the shader using an `OpExecutionMode` instruction with the mode set to `OutputVertices` and the maximum number of vertices that will be produced by the geometry shader specified as a literal. Each geometry shader must specify a maximum output vertex count.

24.3. Multiple Invocations of Geometry Shaders

Geometry shaders can be invoked more than one time for each input primitive. This is known as geometry shader instancing and is requested by including an `OpExecutionMode` instruction with the mode specified as `Invocations` and the number of invocations specified as an integer literal.

In this mode, the geometry shader will execute at least n times for each input primitive, where n is the number of invocations specified in the `OpExecutionMode` instruction. The instance number is available to each invocation as a built-in input using `InvocationId`.

24.4. Geometry Shader Primitive Ordering

Limited guarantees are provided for the relative ordering of primitives produced by a geometry shader, as they pertain to primitive order.

- For instanced geometry shaders, the output primitives generated from each input primitive are passed to subsequent pipeline stages using the invocation number to order the primitives, from least to greatest.
- All output primitives generated from a given input primitive are passed to subsequent pipeline stages before any output primitives generated from subsequent input primitives.

24.5. Geometry Shader Passthrough

A geometry shader that uses the `PassthroughNV` decoration on a variable in its input interface is considered a passthrough geometry shader. Output primitives in a passthrough geometry shader must have the same topology as the input primitive and are not produced by emitting vertices. The vertices of the output primitive have two different types of attributes, per-vertex and per-primitive. Geometry shader input variables with `PassthroughNV` decoration are considered to produce per-
vertex outputs, where values for each output vertex are copied from the corresponding input vertex. Any built-in or user-defined geometry shader outputs are considered per-primitive in a passthrough geometry shader, where a single output value is copied to all output vertices.

The remainder of this section details the usage of the `PassthroughNV` decoration and modifications to the interface matching rules when using passthrough geometry shaders.

### 24.5.1. PassthroughNV Decoration

Decorating a geometry shader input variable with the `PassthroughNV` decoration indicates that values of this input are copied through to the corresponding vertex of the output primitive. Input variables and block members which do not have the `PassthroughNV` decoration are consumed by the geometry shader without being passed through to subsequent stages.

The `PassthroughNV` decoration **must** only be used within a geometry shader.

Any variable decorated with `PassthroughNV` **must** be declared using the `Input` storage class.

The `PassthroughNV` decoration **must** not be used with any of:

- an input primitive type other than `InputPoints`, `InputLines`, or `Triangles`, as specified by the mode for `OpExecutionMode`.
- an invocation count other than one, as specified by the `Invocations` mode for `OpExecutionMode`.
- an `OpEntryPoint` which statically uses the `OpEmitVertex` or `OpEndPrimitive` instructions.
- a variable decorated with the `InvocationId` built-in decoration.
- a variable decorated with the `PrimitiveId` built-in decoration that is declared using the `Input` storage class.

### 24.5.2. Passthrough Interface Matching

When a passthrough geometry shader is in use, the Interface Matching rules involving the geometry shader input and output interfaces operate as described in this section.

For the purposes of matching passthrough geometry shader inputs with outputs of the previous pipeline stages, the `PassthroughNV` decoration is ignored.

For the purposes of matching the outputs of the geometry shader with subsequent pipeline stages, each input variable with the `PassthroughNV` decoration is considered to add an equivalent output variable with the same type, decoration (other than `PassthroughNV`), number, and declaration order on the output interface. The output variable declaration corresponding to an input variable decorated with `PassthroughNV` will be identical to the input declaration, except that the outermost array dimension of such variables is removed. The output block declaration corresponding to an input block decorated with `PassthroughNV` or having members decorated with `PassthroughNV` will be identical to the input declaration, except that the outermost array dimension of such declaration is removed.

If an input block is decorated with `PassthroughNV`, the equivalent output block contains all the members of the input block. Otherwise, the equivalent output block contains only those input block
members decorated with *PassthroughNV*. All members of the corresponding output block are assigned *Location* and *Component* decorations identical to those assigned to the corresponding input block members.

Output variables and blocks generated from inputs decorated with *PassthroughNV* will only exist for the purposes of interface matching; these declarations are not available to geometry shader code or listed in the module interface.

For the purposes of component counting, passthrough geometry shaders count all statically used input variable components declared with the *PassthroughNV* decoration as output components as well, since their values will be copied to the output primitive produced by the geometry shader.
Chapter 25. Mesh Shading

Task and mesh shaders operate in workgroups to produce a collection of primitives that will be processed by subsequent stages of the graphics pipeline.

Work on the mesh pipeline is initiated by the application drawing a set of mesh tasks organized in global workgroups. If the optional task shader is active, each workgroup triggers the execution of task shader invocations that will create a new set of mesh workgroups upon completion. Each of these created workgroups, or each of the original workgroups if no task shader is present, triggers the execution of mesh shader invocations.

Each mesh shader workgroup emits zero or more output primitives along with the group of vertices and their associated data required for each output primitive.

25.1. Task Shader Input

For every workgroup issued via the drawing commands a group of task shader invocations is executed. There are no inputs other than the builtin workgroup identifiers.

25.2. Task Shader Output

The task shader can emit zero or more mesh workgroups to be generated. Shaders using the TaskNV Execution Model can do so using the built-in variable TaskCountNV. This value must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesNV::maxTaskOutputCount. Shaders using the TaskEXT Execution Model can do so using the OpEmitMeshTasksEXT instruction. The groupCountX, groupCountY and groupCountZ arguments passed to this instruction must be less than or equal to the respective dimension within VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupCount. The product of these arguments must be less than or equal to VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshWorkGroupTotalCount.

The task shader can also pass user-defined data to all mesh shader invocations that it creates. Shaders using the TaskNV Execution Model can do so by writing to output variables that are decorated with PerTaskNV. They are available as inputs in mesh shaders. Shaders using the TaskEXT Execution Model can do so by writing to a payload variable with TaskPayloadWorkgroupEXT storage class that is passed to the OpEmitMeshTasksEXT instruction.

25.3. Mesh Generation

If a task shader exists, the mesh assembler creates a variable amount of mesh workgroups depending on each task's output. If there is no task shader, the drawing commands emit the mesh shader invocations directly.

25.4. Mesh Shader Input

The only inputs available to the mesh shader are variables identifying the specific workgroup and invocation and, if applicable, any outputs written as PerTaskNV or the payload variable passed to the
OpEmitMeshTasksEXT instruction by the task shader that spawned the mesh shader's workgroup. The mesh shader can operate without a task shader as well.

### 25.5. Mesh Shader Output

A mesh shader generates primitives in one of three output modes: points, lines, or triangles. For shaders using the **MeshNV Execution Model** the primitive mode is specified in the shader using an `OpExecutionMode` instruction with the `OutputPoints`, `OutputLinesNV`, or `OutputTrianglesNV` modes, respectively. For shaders using the **MeshEXT Execution Model** the primitive mode is specified in the shader using an `OpExecutionMode` instruction with the `OutputPoints`, `OutputLinesEXT`, or `OutputTrianglesEXT` modes, respectively. Each mesh shader must include exactly one output primitive mode.

For shaders using the **MeshNV Execution Model** the maximum output vertex count is specified as a literal in the shader using an `OpExecutionMode` instruction with the mode set to `OutputVertices` and must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesNV::maxMeshOutputVertices`. For shaders using the **MeshEXT Execution Model** the maximum output vertex count is specified as a literal in the shader using an `OpExecutionMode` instruction with the mode set to `OutputVertices` and must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshOutputVertices`.

For shaders using the **MeshNV Execution Model** the maximum output primitive count is specified as a literal in the shader using an `OpExecutionMode` instruction with the mode set to `OutputPrimitivesNV` and must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesNV::maxMeshOutputPrimitives`. For shaders using the **MeshEXT Execution Model** the maximum output primitive count is specified as a literal in the shader using an `OpExecutionMode` instruction with the mode set to `OutputPrimitivesEXT`, and must be less than or equal to `VkPhysicalDeviceMeshShaderPropertiesEXT::maxMeshOutputPrimitives`.

For shaders using the **MeshNV Execution Model** the number of primitives output by the mesh shader is provided via writing to the built-in variable `PrimitiveCountNV` and must be less than or equal to the maximum output primitive count specified in the shader. A variable decorated with `PrimitiveIndicesNV` is an output array of local index values into the vertex output arrays from which primitives are assembled according to the output primitive type. For shaders using the **MeshEXT Execution Model** the number of vertices and primitives output by the mesh shader is provided via calling the `OpSetMeshOutputsEXT` instruction. The `vertexCount` argument must be less than or equal to the maximum output vertex count specified in the shader. The `primitiveCount` argument must be less than or equal to the maximum output primitive count specified in the shader.

Depending on the output primitive mode an appropriately-decorated variable is the output array of local index values into the vertex output arrays from which primitives are assembled according to the output primitive type:

- **OutputPoints** uses the `PrimitivePointIndicesEXT` decoration.
- **OutputLinesEXT** uses the `PrimitiveLineIndicesEXT` decoration.
- **OutputTrianglesEXT** uses the `PrimitiveTriangleIndicesEXT` decoration.

These resulting primitives are then further processed as described in Rasterization.
With the exception of primitive indices, all output built-ins and custom attributes count towards the total storage size occupied by output variables in mesh shaders. This size can be calculated as follows, taking into account the fact that the number of effective scalar attributes is 4 times the number of effective locations used according to the location assignment rules. Let \( v \) be the number of views, \( n_v \) be the number of effective scalar per-vertex attributes not dependent on \( \text{ViewIndex} \), \( n_{vp} \) be the number of effective scalar per-vertex attributes dependent on \( \text{ViewIndex} \), \( m_v \) be the maximum number of vertices specified by the \( \text{OutputVertices Execution Mode} \), \( g_v \) be \( \text{meshOutputPerVertexGranularity} \), \( n_p \) be the number of effective scalar per-primitive attributes not dependent on \( \text{ViewIndex} \), \( n_{pp} \) be the number of effective scalar per-primitive attributes dependent on \( \text{ViewIndex} \), \( m_p \) be the maximum number of primitives specified by the \( \text{OutputPrimitivesEXT Execution Mode} \) and \( g_p \) be \( \text{meshOutputPerPrimitiveGranularity} \):

\[
(n_v + (n_{vp} \times v)) \times 4 \times \text{align}(m_v, g_v) + (n_p + (n_{pp} \times v)) \times 4 \times \text{align}(m_p, g_p)
\]

### 25.6. Mesh Shader Per-View Outputs

The mesh shader outputs decorated with the \( \text{PositionPerViewNV, ClipDistancePerViewNV, CullDistancePerViewNV, LayerPerViewNV, and ViewportMaskPerViewNV built-in decorations} \) are the per-view versions of the single-view variables with equivalent names (that is \( \text{Position, ClipDistance, CullDistance, Layer, and ViewportMaskNV, respectively} \)). If a shader statically assigns a value to any element of a per-view array it must not statically assign a value to the equivalent single-view variable.

Each of these outputs is considered arrayed, with separate values for each view. The view number is used to index the first dimension of these arrays.

The second dimension of the \( \text{ClipDistancePerViewNV, and CullDistancePerViewNV} \) arrays have the same requirements as the \( \text{ClipDistance, and CullDistance} \) arrays.

If a mesh shader output is \( \text{per-view} \), the corresponding fragment shader input is taken from the element of the per-view output array that corresponds to the view that is currently being processed by the fragment shader.

These \( \text{per-view} \) outputs are available only in shaders using the \( \text{MeshNV Execution Model} \). They are not available in shaders using the \( \text{MeshEXT Execution Model} \).

### 25.7. Mesh Shader Primitive Ordering

Following guarantees are provided for the relative ordering of primitives produced by a mesh shader, as they pertain to \( \text{primitive order} \).

- When a task shader is used, mesh workgroups spawned from lower tasks will be ordered prior those workgroups from subsequent tasks.
- All output primitives generated from a given mesh workgroup are passed to subsequent pipeline stages before any output primitives generated from subsequent input workgroups.
- All output primitives within a mesh workgroup, will be generated in the ordering provided by the \( \text{builtin primitive indexbuffer} \) (from low address to high address).
Chapter 26. Cluster Culling Shading

This shader type has an execution environment similar to that of a compute shader, where a collection of shader invocations form a workgroup and cooperate to perform coarse level geometry culling and LOD selection. A shader invocation can emit a set of built-in output variables via a new built-in function. The cluster culling shader organizes these emitted variables into a drawing command used by the subsequent rendering pipeline.

26.1. Cluster Culling Shader Input

The only inputs available to the cluster culling shader are variables identifying the specific workgroup and invocation.

26.2. Cluster Culling Shader Output

If a cluster survives after culling in a cluster culling shader invocation, a drawing command to draw this cluster should be emitted by this shader invocation for further rendering processing. There are two types of drawing command, indexed mode and non-indexed mode. Both type of drawing commands consist of a set of built-in output variables which have a similar definition to VkDrawIndexedIndirectCommand and VkDrawIndirectCommand members.

Cluster culling shaders have the following built-in output variables:

- **built-in variable IndexCountHUAWEI** is the number of vertices to draw.
- **built-in variable VertexCountHUAWEI** is the number of vertices to draw.
- **built-in variable InstanceCountHUAWEI** is the number of instances to draw.
- **built-in variable FirstIndexHUAWEI** is the base index within the index buffer.
- **built-in variable FirstVertexHUAWEI** is the index of the first vertex to draw
- **built-in variable VertexOffsetHUAWEI** is the value added to the vertex index before indexing into the vertex buffer.
- **built-in variable FirstInstanceHUAWEI** is the instance ID of the first instance to draw.
- **built-in variable ClusterIDHUAWEI** is the index of cluster being rendered by this drawing command. When cluster culling shader is enabled, ClusterIDHUAWEI will replace gl_DrawID pass to vertex shader.

26.3. Cluster Culling Shader Cluster Ordering

- When a cluster culling shader is used, all output clusters generated by DispatchClusterHUAWEI() in a given workgroup are passed to subsequent pipeline stage before any cluster generated from subsequent workgroup.
- In a workgroup, the order of output clusters generated by DispatchClusterHUAWEI() is specified by the local invocation id, from lower to higher values.
- If any cluster culling invocation in the workgroup does not call DispatchClusterHUAWEI(), no
cluster will be sent to the subsequent rendering pipeline.

- Any cluster culling shader invocation may also call `DispatchClusterHUAWEI()` many times as shown below:

```c
// Cluster Culling Shader sample code:
......
DispatchClusterHUAWEI(); // dispatch 0
......
DispatchClusterHUAWEI(); // dispatch 1
......
DispatchClusterHUAWEI(); // dispatch 2
......
```

In this case, the output sequence of clusters in a workgroup are specified as shown below (in case of 32 shader invocations in a workgroup):

1. shader invocation0.dispatch0
2. shader invocation1.dispatch0,
   ...........
32. shader invocation31.dispatch0
33. shader invocation0.dispatch1
34. shader invocation1.dispatch1
   ...........
64. shader invocation31.dispatch1
65. shader invocation0.dispatch2
66. shader invocation1.dispatch2
   ...........
96. shader Invocation31.dispatch2

### 26.4. Cluster Culling Shader Primitive Ordering

Following guarantees are provided for the relative ordering of primitives produced by a cluster culling shader, as they pertain to **primitive order**.

- Limited guarantees are provided for the relative ordering of primitives produced by a cluster culling shader, as they pertain to primitive order.
- The order of primitives in a given cluster is specified by the content of
  - `DispatchClusterHUAWEI()` with indexed output built-in variables, vertices sourced from a lower index buffer addresses to higher addresses.
  - `DispatchClusterHUAWEI()` with non-indexed output built-in variables, from vertices with a lower numbered vertexIndex to a higher numbered vertexIndex.
Chapter 27. Fixed-Function Vertex Post-Processing

After pre-rasterization shader stages, the following fixed-function operations are applied to vertices of the resulting primitives:

- Transform feedback (see Transform Feedback)
- Viewport swizzle (see Viewport Swizzle)
- Flat shading (see Flat Shading).
- Primitive clipping, including client-defined half-spaces (see Primitive Clipping).
- Shader output attribute clipping (see Clipping Shader Outputs).
- Clip space W scaling (see Controlling Viewport W Scaling).
- Perspective division on clip coordinates (see Coordinate Transformations).
- Viewport mapping, including depth range scaling (see Controlling the Viewport).
- Front face determination for polygon primitives (see Basic Polygon Rasterization).

Next, rasterization is performed on primitives as described in chapter Rasterization.

27.1. Transform Feedback

Before any other fixed-function vertex post-processing, vertex outputs from the last shader in the pre-rasterization shader stage can be written out to one or more transform feedback buffers bound to the command buffer. To capture vertex outputs the last pre-rasterization shader stage shader must be declared with the Xfb execution mode. Outputs decorated with XfbBuffer will be written out to the corresponding transform feedback buffers bound to the command buffer when transform feedback is active. Transform feedback buffers are bound to the command buffer by using vkCmdBindTransformFeedbackBuffersEXT. Transform feedback is made active by calling vkCmdBeginTransformFeedbackEXT and made inactive by calling vkCmdEndTransformFeedbackEXT. After vertex data is written it is possible to use vkCmdDrawIndirectByteCountEXT to start a new draw where the vertexCount is derived from the number of bytes written by a previous transform feedback.

When an individual point, line, or triangle primitive reaches the transform feedback stage while transform feedback is active, the values of the specified output variables are assembled into primitives and appended to the bound transform feedback buffers. After activating transform feedback, the values of the first assembled primitive are written at the starting offsets of the bound transform feedback buffers, and subsequent primitives are appended to the buffer. If the optional pCounterBuffers and pCounterBufferOffsets parameters are specified, the starting points within the transform feedback buffers are adjusted so data is appended to the previously written values indicated by the value stored by the implementation in the counter buffer.

For multi-vertex primitives, all values for a given vertex are written before writing values for any other vertex. When transformFeedbackPreservesProvokingVertex is not enabled, implementations may write out any vertex within the primitive first, but all subsequent vertices for that primitive
must be written out in a consistent winding order defined as follows:

- If neither geometry or tessellation shading is active, vertices within a primitive are appended according to the winding order described by the primitive topology defined by the VkPipelineInputAssemblyStateCreateInfo:topology used to execute the drawing command.

- If geometry shading is active, vertices within a primitive are appended according to the winding order described by the primitive topology defined by the OutputPoints, OutputLineStrips, or OutputTriangleStrips execution mode.

- If tessellation shading is active but geometry shading is not, vertices within a primitive are appended according to the winding order defined by triangle tessellation, quad tessellation, and isoline tessellation.

When transformFeedbackPreservesProvokingVertex is enabled, then in addition to writing vertices with a consistent winding order, the vertex order must preserve the provoking vertex of each primitive:

- When the pipeline’s provoking vertex mode is VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT, the primitive’s provoking vertex must be the first vertex written.

- When the pipeline’s provoking vertex mode is VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT, the primitive’s provoking vertex must be the last vertex written.

If transformFeedbackPreservesTriangleFanProvokingVertex is VK_FALSE, neither geometry nor tessellation shading is active, and the primitive topology is VK_PRIMITIVE_TOPOLOGY_TRIANGLE_FAN, then the first vertex written from each primitive is implementation-defined even when transformFeedbackPreservesProvokingVertex is enabled.

When capturing vertices, the stride associated with each transform feedback buffer, as indicated by the XfbStride decoration, indicates the number of bytes of storage reserved for each vertex in the transform feedback buffer. For every vertex captured, each output attribute with a Offset decoration will be written to the storage reserved for the vertex at the associated transform feedback buffer. When writing output variables that are arrays or structures, individual array elements or structure members are written tightly packed in order. For vector types, individual components are written in order. For matrix types, outputs are written as an array of column vectors.

If any component of an output with an assigned transform feedback offset was not written to by its shader, the value recorded for that component is undefined. All components of an output variable must be written at an offset aligned to the size of the component. The size of each component of an output variable must be at least 32-bits. When capturing a vertex, any portion of the reserved storage not associated with an output variable with an assigned transform feedback offset will be unmodified.

When transform feedback is inactive, no vertices are recorded. If there is a valid counter buffer handle and counter buffer offset in the pCounterBuffers and pCounterBufferOffsets arrays, writes to the corresponding transform feedback buffer will start at the byte offset represented by the value stored in the counter buffer location.

Individual lines or triangles of a strip or fan primitive will be extracted and recorded separately.
Incomplete primitives are not recorded.

When using a geometry shader that emits vertices to multiple vertex streams, a primitive will be assembled and output for each stream when there are enough vertices emitted for the output primitive type. All outputs assigned to a given transform feedback buffer are required to come from a single vertex stream.

The sizes of the transform feedback buffers are defined by the `vkCmdBindTransformFeedbackBuffersEXT` `pSizes` parameter for each of the bound buffers, or the size of the bound buffer, whichever is the lesser. If there is less space remaining in any of the transform feedback buffers than the size of all of the vertex data for that primitive based on the `XfbStride` for that `XfbBuffer` then no vertex data of that primitive is recorded in any transform feedback buffer, and the value for the number of primitives written in the corresponding `VK_QUERY_TYPE_TRANSFORM_FEEDBACK_STREAM_EXT` query for all transform feedback buffers is no longer incremented.

Any outputs made to a `XfbBuffer` that is not bound to a transform feedback buffer is ignored.

To bind transform feedback buffers to a command buffer for use in subsequent drawing commands, call:

```c
// Provided by VK_EXT_transform_feedback
void vkCmdBindTransformFeedbackBuffersEXT(
    VkCommandBuffer commandBuffer,  // the command buffer into which the command is recorded.
    uint32_t firstBinding,         // the index of the first transform feedback binding whose state is updated by the command.
    uint32_t bindingCount,        // the number of transform feedback bindings whose state is updated by the command.
    const VkBuffer* pBuffers,     // a pointer to an array of buffer handles.
    const VkDeviceSize* pOffsets, // a pointer to an array of buffer offsets.
    const VkDeviceSize* pSizes);  // NULL or a pointer to an array of VkDeviceSize buffer sizes, specifying the maximum number of bytes to capture to the corresponding transform feedback buffer. If pSizes is NULL, or the value of the pSizes array element is VK_WHOLE_SIZE, then the maximum number of bytes captured will be the size of the corresponding buffer minus the buffer offset.
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `firstBinding` is the index of the first transform feedback binding whose state is updated by the command.
- `bindingCount` is the number of transform feedback bindings whose state is updated by the command.
- `pBuffers` is a pointer to an array of buffer handles.
- `pOffsets` is a pointer to an array of buffer offsets.
- `pSizes` is NULL or a pointer to an array of `VkDeviceSize` buffer sizes, specifying the maximum number of bytes to capture to the corresponding transform feedback buffer. If `pSizes` is NULL, or the value of the `pSizes` array element is `VK_WHOLE_SIZE`, then the maximum number of bytes captured will be the size of the corresponding buffer minus the buffer offset.

The values taken from elements i of `pBuffers`, `pOffsets` and `pSizes` replace the current state for the transform feedback binding `firstBinding + i`, for i in [0, `bindingCount`). The transform feedback binding is updated to start at the offset indicated by `pOffsets[i]` from the start of the buffer `pBuffers[i].`
Valid Usage

- VUID-vkCmdBindTransformFeedbackBuffersEXT-transformFeedback-02355
  VkPhysicalDeviceTransformFeedbackFeaturesEXT::transformFeedback must be enabled

- VUID-vkCmdBindTransformFeedbackBuffersEXT-firstBinding-02356
  firstBinding must be less than VkPhysicalDeviceTransformFeedbackPropertiesEXT::maxTransformFeedbackBuffers

- VUID-vkCmdBindTransformFeedbackBuffersEXT-firstBinding-02357
  The sum of firstBinding and bindingCount must be less than or equal to
  VkPhysicalDeviceTransformFeedbackPropertiesEXT::maxTransformFeedbackBuffers

- VUID-vkCmdBindTransformFeedbackBuffersEXT-pOffsets-02358
  All elements of pOffsets must be less than the size of the corresponding element in pBuffers

- VUID-vkCmdBindTransformFeedbackBuffersEXT-pOffsets-02359
  All elements of pOffsets must be a multiple of 4

- VUID-vkCmdBindTransformFeedbackBuffersEXT-pBuffers-02360
  All elements of pBuffers must have been created with the
  VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_BUFFER_BIT_EXT flag

- VUID-vkCmdBindTransformFeedbackBuffersEXT-pSize-02361
  If the optional pSize array is specified, each element of pSizes must either be
  VK_WHOLE_SIZE, or be less than or equal to
  VkPhysicalDeviceTransformFeedbackPropertiesEXT::maxTransformFeedbackBufferSize

- VUID-vkCmdBindTransformFeedbackBuffersEXT-pSizes-02362
  All elements of pSizes must be either VK_WHOLE_SIZE, or less than or equal to the size of the corresponding buffer in pBuffers

- VUID-vkCmdBindTransformFeedbackBuffersEXT-pOffsets-02363
  All elements of pOffsets plus pSizes, where the pSizes element is not VK_WHOLE_SIZE, must be less than or equal to the size of the corresponding buffer in pBuffers

- VUID-vkCmdBindTransformFeedbackBuffersEXT-pBuffers-02364
  Each element of pBuffers that is non-sparse must be bound completely and contiguously to a single VkDeviceMemory object

- VUID-vkCmdBindTransformFeedbackBuffersEXT-None-02365
  Transform feedback must not be active when the vkCmdBindTransformFeedbackBuffersEXT command is recorded

Valid Usage (Implicit)

- VUID-vkCmdBindTransformFeedbackBuffersEXT-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle

- VUID-vkCmdBindTransformFeedbackBuffersEXT-pBuffers-parameter
  pBuffers must be a valid pointer to an array of bindingCount valid VkBuffer handles
• VUID-vkCmdBindTransformFeedbackBuffersEXT-pOffsets-parameter
  pOffsets must be a valid pointer to an array of bindingCount VkDeviceSize values

• VUID-vkCmdBindTransformFeedbackBuffersEXT-commandBuffer-recording
  commandBuffer must be in the recording state

• VUID-vkCmdBindTransformFeedbackBuffersEXT-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations

• VUID-vkCmdBindTransformFeedbackBuffersEXT-videocoding
  This command must only be called outside of a video coding scope

• VUID-vkCmdBindTransformFeedbackBuffersEXT-bindingCount-arraylength
  bindingCount must be greater than 0

• VUID-vkCmdBindTransformFeedbackBuffersEXT-commonparent
  Both of commandBuffer, and the elements of pBuffer must have been created, allocated, or retrieved from the same VkDevice

---

**Host Synchronization**

• Host access to commandBuffer must be externally synchronized

• Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

---

**Command Properties**

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render Pass Scope</th>
<th>Video Coding Scope</th>
<th>Supported Queue Types</th>
<th>Command Type</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Transform feedback for specific transform feedback buffers is made active by calling:

```c
// Provided by VK_EXT_transform_feedback
void vkCmdBeginTransformFeedbackEXT(
    VkCommandBuffer commandBuffer,
    uint32_t firstCounterBuffer,
    uint32_t counterBufferCount,
    const VkBuffer* pCounterBuffers,
    const VkDeviceSize* pCounterBufferOffsets);
```

• commandBuffer is the command buffer into which the command is recorded.

• firstCounterBuffer is the index of the first transform feedback buffer corresponding to pCounterBuffers[0] and pCounterBufferOffsets[0].
• `counterBufferCount` is the size of the `pCounterBuffers` and `pCounterBufferOffsets` arrays.

• `pCounterBuffers` is `NULL` or a pointer to an array of `VkBuffer` handles to counter buffers. Each buffer contains a 4 byte integer value representing the byte offset from the start of the corresponding transform feedback buffer from where to start capturing vertex data. If the byte offset stored to the counter buffer location was done using `vkCmdEndTransformFeedbackEXT` it can be used to resume transform feedback from the previous location. If `pCounterBuffers` is `NULL`, then transform feedback will start capturing vertex data to byte offset zero in all bound transform feedback buffers. For each element of `pCounterBuffers` that is `VK_NULL_HANDLE`, transform feedback will start capturing vertex data to byte zero in the corresponding bound transform feedback buffer.

• `pCounterBufferOffsets` is `NULL` or a pointer to an array of `VkDeviceSize` values specifying offsets within each of the `pCounterBuffers` where the counter values were previously written. The location in each counter buffer at these offsets must be large enough to contain 4 bytes of data. This data is the number of bytes captured by the previous transform feedback to this buffer. If `pCounterBufferOffsets` is `NULL`, then it is assumed the offsets are zero.

The active transform feedback buffers will capture primitives emitted from the corresponding `XfbBuffer` in the bound graphics pipeline. Any `XfbBuffer` emitted that does not output to an active transform feedback buffer will not be captured.

---

### Valid Usage

- VUID-vkCmdBeginTransformFeedbackEXT-transformFeedback-02366
  VkPhysicalDeviceTransformFeedbackFeaturesEXT::transformFeedback must be enabled

- VUID-vkCmdBeginTransformFeedbackEXT-None-02367
  Transform feedback must not be active

- VUID-vkCmdBeginTransformFeedbackEXT-firstCounterBuffer-02368
  `firstCounterBuffer` must be less than VkPhysicalDeviceTransformFeedbackPropertiesEXT::maxTransformFeedbackBuffers

- VUID-vkCmdBeginTransformFeedbackEXT-firstCounterBuffer-02369
  The sum of `firstCounterBuffer` and `counterBufferCount` must be less than or equal to VkPhysicalDeviceTransformFeedbackPropertiesEXT::maxTransformFeedbackBuffers

- VUID-vkCmdBeginTransformFeedbackEXT-counterBufferCount-02607
  If `counterBufferCount` is not 0, and `pCounterBuffers` is not `NULL`, `pCounterBuffers` must be a valid pointer to an array of `counterBufferCount` `VkBuffer` handles that are either valid or `VK_NULL_HANDLE`

- VUID-vkCmdBeginTransformFeedbackEXT-pCounterBufferOffsets-02370
  For each buffer handle in the array, if it is not `VK_NULL_HANDLE` it must reference a buffer large enough to hold 4 bytes at the corresponding offset from the `pCounterBufferOffsets` array

- VUID-vkCmdBeginTransformFeedbackEXT-pCounterBuffer-02371
  If `pCounterBuffer` is `NULL`, then `pCounterBufferOffsets` must also be `NULL`

- VUID-vkCmdBeginTransformFeedbackEXT-pCounterBuffers-02372
  For each buffer handle in the `pCounterBuffers` array that is not `VK_NULL_HANDLE` it must
have been created with a usage value containing
VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_COUNTER_BUFFER_BIT_EXT

- VUID-vkCmdBeginTransformFeedbackEXT-None-06233
  A valid graphics pipeline must be bound to VK_PIPELINE_BIND_POINT_GRAPHICS

- VUID-vkCmdBeginTransformFeedbackEXT-None-04128
  The last pre-rasterization shader stage of the bound graphics pipeline must have been declared with the Xfb execution mode

- VUID-vkCmdBeginTransformFeedbackEXT-None-02373
  Transform feedback must not be made active in a render pass instance with multiview enabled

Valid Usage (Implicit)

- VUID-vkCmdBeginTransformFeedbackEXT-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle

- VUID-vkCmdBeginTransformFeedbackEXT-pCounterBufferOffsets-parameter
  If counterBufferCount is not 0, and pCounterBufferOffsets is not NULL, pCounterBufferOffsets must be a valid pointer to an array of counterBufferCount VkDeviceSize values

- VUID-vkCmdBeginTransformFeedbackEXT-commandBuffer-recording
  commandBuffer must be in the recording state

- VUID-vkCmdBeginTransformFeedbackEXT-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations

- VUID-vkCmdBeginTransformFeedbackEXT-renderpass
  This command must only be called inside of a render pass instance

- VUID-vkCmdBeginTransformFeedbackEXT-videocoding
  This command must only be called outside of a video coding scope

- VUID-vkCmdBeginTransformFeedbackEXT-commonparent
  Both of commandBuffer, and the elements of pCounterBuffers that are valid handles of non-ignored parameters must have been created, allocated, or retrieved from the same VkDevice

Host Synchronization

- Host access to commandBuffer must be externally synchronized

- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized
Transform feedback for specific transform feedback buffers is made inactive by calling:

```c
void vkCmdEndTransformFeedbackEXT(
    VkCommandBuffer commandBuffer,
    uint32_t firstCounterBuffer,
    uint32_t counterBufferCount,
    const VkBuffer* pCounterBuffers,
    const VkDeviceSize* pCounterBufferOffsets);
```

- `commandBuffer` is the command buffer into which the command is recorded.
- `firstCounterBuffer` is the index of the first transform feedback buffer corresponding to `pCounterBuffers[0]` and `pCounterBufferOffsets[0].`
- `counterBufferCount` is the size of the `pCounterBuffers` and `pCounterBufferOffsets` arrays.
- `pCounterBuffers` is `NULL` or a pointer to an array of `VkBuffer` handles to counter buffers. The counter buffers are used to record the current byte positions of each transform feedback buffer where the next vertex output data would be captured. This can be used by a subsequent `vkCmdBeginTransformFeedbackEXT` call to resume transform feedback capture from this position. It can also be used by `vkCmdDrawIndirectByteCountEXT` to determine the vertex count of the draw call.
- `pCounterBufferOffsets` is `NULL` or a pointer to an array of `VkDeviceSize` values specifying offsets within each of the `pCounterBuffers` where the counter values can be written. The location in each counter buffer at these offsets must be large enough to contain 4 bytes of data. The data stored at this location is the byte offset from the start of the transform feedback buffer binding where the next vertex data would be written. If `pCounterBufferOffsets` is `NULL`, then it is assumed the offsets are zero.

**Valid Usage**

- VUID-vkCmdEndTransformFeedbackEXT-transformFeedback-02374
  
  `VkPhysicalDeviceTransformFeedbackFeaturesEXT::transformFeedback` must be enabled

- VUID-vkCmdEndTransformFeedbackEXT-None-02375
  
  Transform feedback must be active

- VUID-vkCmdEndTransformFeedbackEXT-firstCounterBuffer-02376
  
  `firstCounterBuffer` must be less than `VkPhysicalDeviceTransformFeedbackPropertiesEXT::maxTransformFeedbackBuffers`
The sum of `firstCounterBuffer` and `counterBufferCount` must be less than or equal to `maxTransformFeedbackBuffers`.

If `counterBufferCount` is not 0, and `pCounterBuffers` is not NULL, `pCounterBuffers` must be a valid pointer to an array of `counterBufferCount` `VkBuffer` handles that are either valid or `VK_NULL_HANDLE`.

For each buffer handle in the array, if it is not `VK_NULL_HANDLE` it must reference a buffer large enough to hold 4 bytes at the corresponding offset from the `pCounterBufferOffsets` array.

If `pCounterBuffer` is NULL, then `pCounterBufferOffsets` must also be NULL.

For each buffer handle in the `pCounterBuffers` array that is not `VK_NULL_HANDLE` it must have been created with a usage value containing `VK_BUFFER_USAGE_TRANSFORM_FEEDBACK_COUNTER_BUFFER_BIT_EXT`.

Host access to `commandBuffer` must be externally synchronized.
• Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

### 27.2. Viewport Swizzle

Each primitive sent to a given viewport has a swizzle and optional negation applied to its clip coordinates. The swizzle that is applied depends on the viewport index, and is controlled by the VkPipelineViewportSwizzleStateCreateInfoNV pipeline state:

```c
// Provided by VK_NV_viewport_swizzle
typedef struct VkPipelineViewportSwizzleStateCreateInfoNV {
    VkStructureType sType;
    const void* pNext;
    VkPipelineViewportSwizzleStateCreateFlagsNV flags;
    uint32_t viewportCount;
    const VkViewportSwizzleNV* pViewportSwizzles;
} VkPipelineViewportSwizzleStateCreateInfoNV;
```

- `sType` is a VkStructureType value identifying this structure.
- `pNext` is NULL or a pointer to a structure extending this structure.
- `flags` is reserved for future use.
- `viewportCount` is the number of viewport swizzles used by the pipeline.
- `pViewportSwizzles` is a pointer to an array of VkViewportSwizzleNV structures, defining the viewport swizzles.

### Valid Usage

- VUID-VkPipelineViewportSwizzleStateCreateInfoNV-viewportCount-01215
  viewportCount must be greater than or equal to the viewportCount set in VkPipelineViewportStateCreateInfo

### Valid Usage (Implicit)

- VUID-VkPipelineViewportSwizzleStateCreateInfoNV-sType-sType
sType must be VK_STRUCTURE_TYPE_PIPELINE_VIEWPORT_SWIZZLE_STATE_CREATE_INFO_NV

- VUID-VkPipelineViewportSwizzleStateCreateInfoNV-flags-zerobitmask
  flags must be 0
- VUID-VkPipelineViewportSwizzleStateCreateInfoNV-pViewportSwizzles-parameter
  pViewportSwizzles must be a valid pointer to an array of viewportCount valid
  VkViewportSwizzleNV structures
- VUID-VkPipelineViewportSwizzleStateCreateInfoNV-viewportCount-arraylength
  viewportCount must be greater than 0

// Provided by VK_NV_viewport_swizzle
typedef VkFlags VkPipelineViewportSwizzleStateCreateFlagsNV;

VkPipelineViewportSwizzleStateCreateFlagsNV is a bitmask type for setting a mask, but is currently
reserved for future use.

The VkPipelineViewportSwizzleStateCreateInfoNV state is set by adding this structure to the pNext
chain of a VkPipelineViewportStateCreateInfo structure and setting the graphics pipeline state with
vkCreateGraphicsPipelines.

To dynamically set the viewport swizzle state, call:

// Provided by VK_EXT_extended_dynamic_state3 with VK_NV_viewport_swizzle,
VK_EXT_shader_object with VK_NV_viewport_swizzle
void vkCmdSetViewportSwizzleNV(
  VkCommandBuffer commandBuffer, 
  uint32_t firstViewport, 
  uint32_t viewportCount, 
  const VkViewportSwizzleNV* pViewportSwizzles);

- commandBuffer is the command buffer into which the command will be recorded.
- firstViewport is the index of the first viewport whose parameters are updated by the command.
- viewportCount is the number of viewports whose parameters are updated by the command.
- pViewportSwizzles is a pointer to an array of VkViewportSwizzleNV structures specifying
  viewport swizzles.

This command sets the viewport swizzle state for subsequent drawing commands when drawing
using shader objects, or when the graphics pipeline is created with
VK_DYNAMIC_STATE_VIEWPORT_SWIZZLE_NV set in VkPipelineDynamicStateCreateInfo::pDynamicStates.
Otherwise, this state is specified by the VkPipelineViewportSwizzleStateCreateInfoNV
::viewportCount, and VkPipelineViewportSwizzleStateCreateInfoNV::pViewportSwizzles values used
to create the currently active pipeline.
Valid Usage

- VUID-vkCmdSetViewportSwizzleNV-None-08578
  Either the `extendedDynamicState3ViewportSwizzle` feature or the `shaderObject` feature or both must be enabled

Valid Usage (Implicit)

- VUID-vkCmdSetViewportSwizzleNV-commandBuffer-parameter
  `commandBuffer` must be a valid `VkCommandBuffer` handle

- VUID-vkCmdSetViewportSwizzleNV-pViewportSwizzles-parameter
  `pViewportSwizzles` must be a valid pointer to an array of `viewportCount` valid `VkViewportSwizzleNV` structures

- VUID-vkCmdSetViewportSwizzleNV-commandBuffer-recording
  `commandBuffer` must be in the recording state

- VUID-vkCmdSetViewportSwizzleNV-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations

- VUID-vkCmdSetViewportSwizzleNV-videncoding
  This command must only be called outside of a video coding scope

- VUID-vkCmdSetViewportSwizzleNV-viewportCount-arraylength
  `viewportCount` must be greater than 0

Host Synchronization

- Host access to `commandBuffer` must be externally synchronized

- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized

Command Properties

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render Pass Scope</th>
<th>Video Coding Scope</th>
<th>Supported Queue Types</th>
<th>Command Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary</td>
<td>Both</td>
<td>Outside</td>
<td>Graphics</td>
<td>State</td>
</tr>
<tr>
<td>Secondary</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Each viewport specified from 0 to `viewportCount` - 1 has its x,y,z,w swizzle state set to the corresponding x, y, z and w in the `VkViewportSwizzleNV` structure. Each component is of type `VkViewportCoordinateSwizzleNV`, which determines the type of swizzle for that component. The value of x computes the new x component of the position as:
if (x == VK_VIEWPORTCoordinate_SWIZZLE_POSITIVE_X_NV) x' = x;
if (x == VK_VIEWPORTCoordinate_SWIZZLE_NEGATIVE_X_NV) x' = -x;
if (x == VK_VIEWPORTCoordinate_SWIZZLE_POSITIVE_Y_NV) x' = y;
if (x == VK_VIEWPORTCoordinate_SWIZZLE_NEGATIVE_Y_NV) x' = -y;
if (x == VK_VIEWPORTCoordinate_SWIZZLE_POSITIVE_Z_NV) x' = z;
if (x == VK_VIEWPORTCoordinate_SWIZZLE_NEGATIVE_Z_NV) x' = -z;
if (x == VK_VIEWPORTCoordinate_SWIZZLE_POSITIVE_W_NV) x' = w;
if (x == VK_VIEWPORTCoordinate_SWIZZLE_NEGATIVE_W_NV) x' = -w;

Similar selections are performed for the y, z, and w coordinates. This swizzling is applied before clipping and perspective divide. If the swizzle for an active viewport index is not specified, the swizzle for x is VK_VIEWPORTCoordinate_SWIZZLE_POSITIVE_X_NV, y is VK_VIEWPORTCoordinate_SWIZZLE_POSITIVE_Y_NV, z is VK_VIEWPORTCoordinate_SWIZZLE_POSITIVE_Z_NV and w is VK_VIEWPORTCoordinate_SWIZZLE_POSITIVE_W_NV.

Viewport swizzle parameters are specified by setting the pNext pointer of VkGraphicsPipelineCreateInfo to point to a VkPipelineViewportSwizzleStateCreateInfoNV structure. VkPipelineViewportSwizzleStateCreateInfoNV uses VkViewportSwizzleNV to set the viewport swizzle parameters.

The VkViewportSwizzleNV structure is defined as:

```c
// Provided by VK_NV_viewport_swizzle
typedef struct VkViewportSwizzleNV {
    VkViewportCoordinateSwizzleNV x;
    VkViewportCoordinateSwizzleNV y;
    VkViewportCoordinateSwizzleNV z;
    VkViewportCoordinateSwizzleNV w;
} VkViewportSwizzleNV;
```

- x is a VkViewportCoordinateSwizzleNV value specifying the swizzle operation to apply to the x component of the primitive
- y is a VkViewportCoordinateSwizzleNV value specifying the swizzle operation to apply to the y component of the primitive
- z is a VkViewportCoordinateSwizzleNV value specifying the swizzle operation to apply to the z component of the primitive
- w is a VkViewportCoordinateSwizzleNV value specifying the swizzle operation to apply to the w component of the primitive

**Valid Usage (Implicit)**

- VUID-VkViewportSwizzleNV-x-parameter
  x must be a valid VkViewportCoordinateSwizzleNV value
- VUID-VkViewportSwizzleNV-y-parameter
  y must be a valid VkViewportCoordinateSwizzleNV value
Possible values of the `VkViewportSwizzleNV`:

- `x`, `y`, `z`, and `w` members, specifying swizzling of the corresponding components of primitives, are:

```c
// Provided by VK_NV_viewport_swizzle
typedef enum VkViewportCoordinateSwizzleNV {
    VK_VIEWPORT_COORDINATE_SWIZZLE_POSITIVE_X_NV = 0,
    VK_VIEWPORT_COORDINATE_SWIZZLE_NEGATIVE_X_NV = 1,
    VK_VIEWPORT_COORDINATE_SWIZZLE_POSITIVE_Y_NV = 2,
    VK_VIEWPORT_COORDINATE_SWIZZLE_NEGATIVE_Y_NV = 3,
    VK_VIEWPORT_COORDINATE_SWIZZLE_POSITIVE_Z_NV = 4,
    VK_VIEWPORT_COORDINATE_SWIZZLE_NEGATIVE_Z_NV = 5,
    VK_VIEWPORT_COORDINATE_SWIZZLE_POSITIVE_W_NV = 6,
    VK_VIEWPORT_COORDINATE_SWIZZLE_NEGATIVE_W_NV = 7,
} VkViewportCoordinateSwizzleNV;
```

These values are described in detail in Viewport Swizzle.

### 27.3. Flat Shading

*Flat shading* a vertex output attribute means to assign all vertices of the primitive the same value for that output. The output values assigned are those of the *provoking vertex* of the primitive. Flat shading is applied to those vertex attributes that *match* fragment input attributes which are decorated as *Flat*.

If neither *mesh*, *geometry* nor *tessellation shading* is active, the provoking vertex is determined by the *primitive topology* defined by `VkPipelineInputAssemblyStateCreateInfo:topology` used to execute the *drawing command*.

If a shader using *MeshNV Execution Model* is active, the provoking vertex is determined by the *primitive topology* defined by the `OutputPoints`, `OutputLinesNV`, or `OutputTrianglesNV` execution mode.

If a shader using *MeshEXT Execution Model* is active, the provoking vertex is determined by the *primitive topology* defined by the `OutputPoints`, `OutputLinesEXT`, or `OutputTrianglesEXT` execution mode.

If *geometry shading* is active, the provoking vertex is determined by the *primitive topology* defined by the `OutputPoints`, `OutputLineStrips`, or `OutputTriangleStrips` execution mode.

If *tessellation shading* is active but *geometry shading* is not, the provoking vertex *may* be any of the vertices in each primitive.

For a given primitive topology, the pipeline's provoking vertex mode determines which vertex is
the provoking vertex. To specify the provoking vertex mode, include a
\texttt{VkPipelineRasterizationProvokingVertexStateCreateInfoEXT} structure in the
\texttt{VkPipelineRasterizationStateCreateInfo::pNext} chain when creating the pipeline.

The \texttt{VkPipelineRasterizationProvokingVertexStateCreateInfoEXT} structure is defined as:

```c
// Provided by VK_EXT_provoking_vertex
typedef struct VkPipelineRasterizationProvokingVertexStateCreateInfoEXT {
    VkStructureType sType;
    const void* pNext;
    VkProvokingVertexModeEXT provokingVertexMode;
} VkPipelineRasterizationProvokingVertexStateCreateInfoEXT;
```

- \texttt{sType} is a \texttt{VkStructureType} value identifying this structure.
- \texttt{pNext} is \texttt{NULL} or a pointer to a structure extending this structure.
- \texttt{providingVertexMode} is a \texttt{VkProvokingVertexModeEXT} value selecting the provoking vertex mode.

If this struct is not provided when creating the pipeline, the pipeline will use the
\texttt{VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT} mode.

If the \texttt{providingVertexModePerPipeline} limit is \texttt{VK_FALSE}, then all pipelines bound within a render pass instance \textbf{must} have the same \texttt{providingVertexMode}.

### Valid Usage

- \textbf{VUID-VkPipelineRasterizationProvokingVertexStateCreateInfoEXT-providingVertexMode-04883}
  If \texttt{providingVertexMode} is \texttt{VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT}, then the
  \texttt{providingVertexLast} feature \textbf{must} be enabled

### Valid Usage (Implicit)

- \textbf{VUID-VkPipelineRasterizationProvokingVertexStateCreateInfoEXT-sType-sType}
  \texttt{sType} \textbf{must} be \texttt{VK_STRUCTURE_TYPE_PIPELINE_RASTERIZATION_PROVOKING_VERTEX_STATE_CREATE_INFO_EXT}
- \textbf{VUID-VkPipelineRasterizationProvokingVertexStateCreateInfoEXT-providingVertexMode-parameter}
  \texttt{providingVertexMode} \textbf{must} be a valid \texttt{VkProvokingVertexModeEXT} value

Possible values of \texttt{VkPipelineRasterizationProvokingVertexStateCreateInfoEXT::providingVertexMode} are:

```c
// Provided by VK_EXT_provoking_vertex
```
typedef enum VkProvokingVertexModeEXT {
    VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT = 0,
    VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT = 1,
} VkProvokingVertexModeEXT;

- **VK_PROVOKING_VERTEX_MODE_FIRST_VERTEX_EXT** specifies that the provoking vertex is the first non-adjacency vertex in the list of vertices used by a primitive.
- **VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT** specifies that the provoking vertex is the last non-adjacency vertex in the list of vertices used by a primitive.

These modes are described more precisely in Primitive Topologies.

To dynamically set the **provokingVertexMode** state, call:

```c
// Provided by VK_EXT_extended_dynamic_state3, VK_EXT_shader_object
void vkCmdSetProvokingVertexModeEXT(
    VkCommandBuffer commandBuffer,
    VkProvokingVertexModeEXT provokingVertexMode);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **provokingVertexMode** specifies the **provokingVertexMode** state.

This command sets the **provokingVertexMode** state for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with **VK_DYNAMIC_STATE_PROVOKING_VERTEX_MODE_EXT** set in **VkPipelineDynamicStateCreateInfo::pDynamicStates**. Otherwise, this state is specified by the **VkPipelineRasterizationProvokingVertexStateCreateInfoEXT::provokingVertexMode** value used to create the currently active pipeline.

### Valid Usage

- **VUID-vkCmdSetProvokingVertexModeEXT-None-08580**
  Either the **extendedDynamicState3ProvokingVertexMode** feature or the **shaderObject** feature or both **must** be enabled

- **VUID-vkCmdSetProvokingVertexModeEXT-provokingVertexMode-07447**
  If **provokingVertexMode** is **VK_PROVOKING_VERTEX_MODE_LAST_VERTEX_EXT**, then the **provokingVertexLast** feature **must** be enabled

### Valid Usage (Implicit)

- **VUID-vkCmdSetProvokingVertexModeEXT-commandBuffer-parameter**
  **commandBuffer** **must** be a valid **VkCommandBuffer** handle

- **VUID-vkCmdSetProvokingVertexModeEXT-provokingVertexMode-parameter**
  **provokingVertexMode** **must** be a valid **VkProvokingVertexModeEXT** value
• VUID-vkCmdSetProvokingVertexModeEXT-commandBuffer-recording
  
  The `commandBuffer` must be in the recording state.

• VUID-vkCmdSetProvokingVertexModeEXT-commandBuffer-cmdpool
  
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations.

• VUID-vkCmdSetProvokingVertexModeEXT-videocoding
  
  This command must only be called outside of a video coding scope.

---

### Host Synchronization

- Host access to `commandBuffer` must be externally synchronized.
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized.

---

### 27.4. Primitive Clipping

Primitives are culled against the *cull volume* and then clipped to the *clip volume*. In clip coordinates, the *view volume* is defined by:

\[
-w_c \leq x_c \leq w_c \\
-w_c \leq y_c \leq w_c \\
z_m \leq z_c \leq w_c
\]

where if `VkPipelineViewportDepthClipControlCreateInfoEXT::negativeOneToOne` is `VK_TRUE` \( z_m \) is equal to \(-w_c\), otherwise \( z_m \) is equal to zero.

This view volume can be further restricted by as many as `VkPhysicalDeviceLimits::maxClipDistances` client-defined half-spaces.

The cull volume is the intersection of up to `VkPhysicalDeviceLimits::maxCullDistances` client-defined half-spaces (if no client-defined cull half-spaces are enabled, culling against the cull volume is skipped).

A shader must write a single cull distance for each enabled cull half-space to elements of the *CullDistance* array. If the cull distance for any enabled cull half-space is negative for all of the vertices of the primitive under consideration, the primitive is discarded. Otherwise the primitive is clipped against the clip volume as defined below.
The clip volume is the intersection of up to `VkPhysicalDeviceLimits::maxClipDistances` client-defined half-spaces with the view volume (if no client-defined clip half-spaces are enabled, the clip volume is the view volume).

A shader must write a single clip distance for each enabled clip half-space to elements of the `ClipDistance` array. Clip half-space \( i \) is then given by the set of points satisfying the inequality

\[
c_i(P) \geq 0
\]

where \( c_i(P) \) is the clip distance \( i \) at point \( P \). For point primitives, \( c_i(P) \) is simply the clip distance for the vertex in question. For line and triangle primitives, per-vertex clip distances are interpolated using a weighted mean, with weights derived according to the algorithms described in sections Basic Line Segment Rasterization and Basic Polygon Rasterization, using the perspective interpolation equations.

The number of client-defined clip and cull half-spaces that are enabled is determined by the explicit size of the built-in arrays `ClipDistance` and `CullDistance`, respectively, declared as an output in the interface of the entry point of the final shader stage before clipping.

If `VkPipelineRasterizationDepthClipStateCreateInfoEXT` is present in the graphics pipeline state then depth clipping is disabled if `VkPipelineRasterizationDepthClipStateCreateInfoEXT::depthClipEnable` is `VK_FALSE`. Otherwise, if `VkPipelineRasterizationDepthClipStateCreateInfoEXT` is not present, depth clipping is disabled when `VkPipelineRasterizationStateCreateInfo::depthClampEnable` is `VK_TRUE`.

To dynamically set enable or disable depth clamping, call:

```c
// Provided by VK_EXT_extended_dynamic_state3, VK_EXT_shader_object
void vkCmdSetDepthClampEnableEXT(
    VkCommandBuffer commandBuffer,
    VkBool32 depthClampEnable);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `depthClampEnable` specifies whether depth clamping is enabled.

This command sets whether depth clamping is enabled or disabled for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with `VK_DYNAMIC_STATE_DEPTH_CLAMP_ENABLE_EXT` set in `VkPipelineDynamicStateCreateInfo::pDynamicStates`. Otherwise, this state is specified by the `VkPipelineRasterizationStateCreateInfo::depthClampEnable` value used to create the currently active pipeline.

If the depth clamping state is changed dynamically, and the pipeline was not created with `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` enabled, then depth clipping is enabled when depth clamping is disabled and vice versa.
Valid Usage

- VUID-vkCmdSetDepthClampEnableEXT-None-08582
  Either the extendedDynamicState3DepthClampEnable feature or the shaderObject feature or both must be enabled

- VUID-vkCmdSetDepthClampEnableEXT-depthClamp-07449
  If the depthClamp feature is not enabled, depthClampEnable must be VK_FALSE

Valid Usage (Implicit)

- VUID-vkCmdSetDepthClampEnableEXT-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle

- VUID-vkCmdSetDepthClampEnableEXT-commandBuffer-recording
  commandBuffer must be in the recording state

- VUID-vkCmdSetDepthClampEnableEXT-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations

- VUID-vkCmdSetDepthClampEnableEXT-videoencoding
  This command must only be called outside of a video coding scope

Host Synchronization

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

Command Properties

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render Pass Scope</th>
<th>Video Coding Scope</th>
<th>Supported Queue Types</th>
<th>Command Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary</td>
<td>Both</td>
<td>Outside</td>
<td>Graphics</td>
<td>State</td>
</tr>
<tr>
<td>Secondary</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

To dynamically set enable or disable depth clipping, call:

```c
// Provided by VK_EXT_extended_dynamic_state3, VK_EXT_shader_object
define void vkCmdSetDepthClipEnableEXT(
    VkCommandBuffer commandBuffer, 
    VkBool32 depthClipEnable);
```
• **commandBuffer** is the command buffer into which the command will be recorded.
• **depthClipEnable** specifies whether depth clipping is enabled.

This command sets whether depth clipping is enabled or disabled for subsequent drawing commands when drawing using *shader objects*, or when the graphics pipeline is created with `VK_DYNAMIC_STATE_DEPTH_CLIP_ENABLE_EXT` set in `VkPipelineDynamicStateCreateInfo::pDynamicStates`. Otherwise, this state is specified by the `VkPipelineRasterizationDepthClipStateCreateInfoEXT::depthClipEnable` value used to create the currently active pipeline, or is set to the inverse of `VkPipelineRasterizationStateCreateInfo::depthClampEnable` if `VkPipelineRasterizationDepthClipStateCreateInfoEXT` is not specified.

### Valid Usage

- VUID-vkCmdSetDepthClipEnableEXT-None-08584
  Either the `extendedDynamicState3DepthClipEnable` feature or the `shaderObject` feature or both must be enabled
- VUID-vkCmdSetDepthClipEnableEXT-depthClipEnable-07451
  The `depthClipEnable` feature must be enabled

### Valid Usage (Implicit)

- VUID-vkCmdSetDepthClipEnableEXT-commandBuffer-parameter
  `commandBuffer` must be a valid `VkCommandBuffer` handle
- VUID-vkCmdSetDepthClipEnableEXT-commandBuffer-recording
  `commandBuffer` must be in the recording state
- VUID-vkCmdSetDepthClipEnableEXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations
- VUID-vkCmdSetDepthClipEnableEXT-videocoding
  This command must only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` must be externally synchronized
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized
When depth clipping is disabled, the plane equation

\[ z_m \leq z_c \leq w_c \]

(see the clip volume definition above) is ignored by view volume clipping (effectively, there is no near or far plane clipping).

If the primitive under consideration is a point or line segment, then clipping passes it unchanged if its vertices lie entirely within the clip volume.

Possible values of `VkPhysicalDevicePointClippingProperties::pointClippingBehavior`, specifying clipping behavior of a point primitive whose vertex lies outside the clip volume, are:

```c
// Provided by VK_VERSION_1_1
typedef enum VkPointClippingBehavior { 
    VK_POINT_CLIPPING_BEHAVIOR_ALL_CLIP_PLANES = 0,
    VK_POINT_CLIPPING_BEHAVIOR_USER_CLIP_PLANES_ONLY = 1,
    // Provided by VK_KHR_maintenance2
    VK_POINT_CLIPPING_BEHAVIOR_ALL_CLIP_PLANES_KHR = 
    VK_POINT_CLIPPING_BEHAVIOR_ALL_CLIP_PLANES,
    // Provided by VK_KHR_maintenance2
    VK_POINT_CLIPPING_BEHAVIOR_USER_CLIP_PLANES_ONLY_KHR = 
    VK_POINT_CLIPPING_BEHAVIOR_USER_CLIP_PLANES_ONLY,
} VkPointClippingBehavior;
```

or the equivalent

```c
// Provided by VK_KHR_maintenance2
typedef VkPointClippingBehavior VkPointClippingBehaviorKHR;
```

- `VK_POINT_CLIPPING_BEHAVIOR_ALL_CLIP_PLANES` specifies that the primitive is discarded if the vertex lies outside any clip plane, including the planes bounding the view volume.
- `VK_POINT_CLIPPING_BEHAVIOR_USER_CLIP_PLANES_ONLY` specifies that the primitive is discarded only if the vertex lies outside any user clip plane.

If either of a line segment's vertices lie outside of the clip volume, the line segment may be clipped, with new vertex coordinates computed for each vertex that lies outside the clip volume. A clipped
line segment endpoint lies on both the original line segment and the boundary of the clip volume.

This clipping produces a value, \(0 \leq t \leq 1\), for each clipped vertex. If the coordinates of a clipped vertex are \(P\) and the unclipped line segment’s vertex coordinates are \(P_1\) and \(P_2\), then \(t\) satisfies the following equation

\[
P = tP_1 + (1-t)P_2.
\]

\(t\) is used to clip vertex output attributes as described in Clipping Shader Outputs.

If the primitive is a polygon, it passes unchanged if every one of its edges lies entirely inside the clip volume, and is either clipped or discarded otherwise. If the edges of the polygon intersect the boundary of the clip volume, the intersecting edges are reconnected by new edges that lie along the boundary of the clip volume - in some cases requiring the introduction of new vertices into a polygon.

If a polygon intersects an edge of the clip volume’s boundary, the clipped polygon must include a point on this boundary edge.

Primitives rendered with user-defined half-spaces must satisfy a complementarity criterion. Suppose a series of primitives is drawn where each vertex \(i\) has a single specified clip distance \(d_i\) (or a number of similarly specified clip distances, if multiple half-spaces are enabled). Next, suppose that the same series of primitives are drawn again with each such clip distance replaced by \(-d_i\) (and the graphics pipeline is otherwise the same). In this case, primitives must not be missing any pixels, and pixels must not be drawn twice in regions where those primitives are cut by the clip planes.

The `VkPipelineViewportDepthClipControlCreateInfoEXT` structure is defined as:

```c
// Provided by VK_EXT_depth_clip_control
typedef struct VkPipelineViewportDepthClipControlCreateInfoEXT {
    VkStructureType sType;
    const void* pNext;
    VkBool32 negativeOneToOne;
} VkPipelineViewportDepthClipControlCreateInfoEXT;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `negativeOneToOne` sets the \(z_m\) in the view volume to \(-w_c\).

### Valid Usage

- VUID-VkPipelineViewportDepthClipControlCreateInfoEXT-negativeOneToOne-06470
  If `depthClipControl` is not enabled, `negativeOneToOne` must be `VK_FALSE`
To **dynamically set** `negativeOneToOne`, call:

```c
// Provided by VK_EXT_extended_dynamic_state3, VK_EXT_shader_object
void vkCmdSetDepthClipNegativeOneToOneEXT(
    VkCommandBuffer commandBuffer,
    VkBool32 negativeOneToOne);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `negativeOneToOne` specifies the `negativeOneToOne` state.

This command sets the `negativeOneToOne` state for subsequent drawing commands when drawing using **shader objects**, or when the graphics pipeline is created with `VK_DYNAMIC_STATE_DEPTH_CLIP_NEGATIVE_ONE_TO_ONE_EXT` set in `VkPipelineDynamicStateCreateInfo::pDynamicStates`. Otherwise, this state is specified by the `VkPipelineViewportDepthClipControlCreateInfoEXT::negativeOneToOne` value used to create the currently active pipeline.

**Valid Usage**

- VUID-vkCmdSetDepthClipNegativeOneToOneEXT-None-08586
  Either the `extendedDynamicState3DepthClipNegativeOneToOne` feature or the `shaderObject` feature or both must be enabled

- VUID-vkCmdSetDepthClipNegativeOneToOneEXT-depthClipControl-07453
  The `depthClipControl` feature must be enabled

**Valid Usage (Implicit)**

- VUID-vkCmdSetDepthClipNegativeOneToOneEXT-commandBuffer-parameter
  `commandBuffer` must be a valid `VkCommandBuffer` handle

- VUID-vkCmdSetDepthClipNegativeOneToOneEXT-commandBuffer-recording
  `commandBuffer` must be in the recording state

- VUID-vkCmdSetDepthClipNegativeOneToOneEXT-commandBuffer-cmdpool
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations

- VUID-vkCmdSetDepthClipNegativeOneToOneEXT-videocoding
  This command must only be called outside of a video coding scope
### Host Synchronization

- Host access to `commandBuffer` must be externally synchronized.
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized.

### 27.5. Clipping Shader Outputs

Next, vertex output attributes are clipped. The output values associated with a vertex that lies within the clip volume are unaffected by clipping. If a primitive is clipped, however, the output values assigned to vertices produced by clipping are clipped.

Let the output values assigned to the two vertices \( P_1 \) and \( P_2 \) of an unclipped edge be \( c_1 \) and \( c_2 \). The value of \( t \) (see Primitive Clipping) for a clipped point \( P \) is used to obtain the output value associated with \( P \) as

\[
    c = tc_1 + (1-t)c_2.
\]

(Multiplying an output value by a scalar means multiplying each of \( x, y, z \), and \( w \) by the scalar.)

Since this computation is performed in clip space before division by \( w \), clipped output values are perspective-correct.

Polygon clipping creates a clipped vertex along an edge of the clip volume’s boundary. This situation is handled by noting that polygon clipping proceeds by clipping against one half-space at a time. Output value clipping is done in the same way, so that clipped points always occur at the intersection of polygon edges (possibly already clipped) with the clip volume’s boundary.

For vertex output attributes whose matching fragment input attributes are decorated with `NoPerspective`, the value of \( t \) used to obtain the output value associated with \( P \) will be adjusted to produce results that vary linearly in framebuffer space.

Output attributes of integer or unsigned integer type must always be flat shaded. Flat shaded attributes are constant over the primitive being rasterized (see Basic Line Segment Rasterization and Basic Polygon Rasterization), and no interpolation is performed. The output value \( c \) is taken from either \( c_1 \) or \( c_2 \), since flat shading has already occurred and the two values are identical.
27.6. Controlling Viewport W Scaling

If viewport W scaling is enabled, the W component of the clip coordinate is modified by the provided coefficients from the corresponding viewport as follows.

\[ w'_c = x_{\text{coeff}} x_c + y_{\text{coeff}} y_c + w_c \]

The `VkPipelineViewportWScalingStateCreateInfoNV` structure is defined as:

```c
// Provided by VK_NV_clip_space_w_scaling
typedef struct VkPipelineViewportWScalingStateCreateInfoNV {
    VkStructureType sType;
    const void* pNext;
    VkBool32 viewportWScalingEnable;
    uint32_t viewportCount;
    const VkViewportWScalingNV* pViewportWScalings;
} VkPipelineViewportWScalingStateCreateInfoNV;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `viewportWScalingEnable` controls whether viewport W scaling is enabled.
- `viewportCount` is the number of viewports used by W scaling, and **must** match the number of viewports in the pipeline if viewport W scaling is enabled.
- `pViewportWScalings` is a pointer to an array of `VkViewportWScalingNV` structures defining the W scaling parameters for the corresponding viewports. If the viewport W scaling state is dynamic, this member is ignored.

**Valid Usage (Implicit)**

- `VUID-VkPipelineViewportWScalingStateCreateInfoNV-sType-sType` `sType` **must** be `VK_STRUCTURE_TYPE_PIPELINE_VIEWPORT_W_SCALING_STATE_CREATE_INFO_NV`
- `VUID-VkPipelineViewportWScalingStateCreateInfoNV-viewportCount-arraylength` `viewportCount` **must** be greater than `0`

The `VkPipelineViewportWScalingStateCreateInfoNV` state is set by adding this structure to the `pNext` chain of a `VkPipelineViewportStateCreateInfo` structure and setting the graphics pipeline state with `vkCreateGraphicsPipelines`.

To **dynamically set** the `viewportWScalingEnable` state, call:

```c
// Provided by VK_EXT_extended_dynamic_state3 with VK_NV_clip_space_w_scaling,
// VK_EXT_shader_object with VK_NV_clip_space_w_scaling
void vkCmdSetViewportWScalingEnableNV(
    VkCommandBuffer commandBuffer,
    VkBool32 enable);
```
VkBool32 viewportWScalingEnable);

- commandBuffer is the command buffer into which the command will be recorded.
- viewportWScalingEnable specifies the viewportWScalingEnable state.

This command sets the viewportWScalingEnable state for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_ENABLE_NV set in VkPipelineDynamicStateCreateInfo::pDynamicStates. Otherwise, this state is specified by the VkPipelineViewportWScalingStateCreateInfoNV::viewportWScalingEnable value used to create the currently active pipeline.

**Valid Usage**

- VUID-vkCmdSetViewportWScalingEnableNV-None-08594
  Either the extendedDynamicState3ViewportWScalingEnable feature or the shaderObject feature or both must be enabled

**Valid Usage (Implicit)**

- VUID-vkCmdSetViewportWScalingEnableNV-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle
- VUID-vkCmdSetViewportWScalingEnableNV-commandBuffer-recording
  commandBuffer must be in the recording state
- VUID-vkCmdSetViewportWScalingEnableNV-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations
- VUID-vkCmdSetViewportWScalingEnableNV-videocoding
  This command must only be called outside of a video coding scope

**Host Synchronization**

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized
## Command Properties

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render Pass Scope</th>
<th>Video Coding Scope</th>
<th>Supported Queue Types</th>
<th>Command Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary</td>
<td>Both</td>
<td>Outside</td>
<td>Graphics</td>
<td>State</td>
</tr>
<tr>
<td>Secondary</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

To **dynamically set** the viewport \( W \) scaling parameters, call:

```c
// Provided by VK_NV_clip_space_w_scaling
void vkCmdSetViewportWScalingNV(
    VkCommandBuffer commandBuffer,
    uint32_t firstViewport,
    uint32_t viewportCount,
    const VkViewportWScalingNV* pViewportWScalings);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `firstViewport` is the index of the first viewport whose parameters are updated by the command.
- `viewportCount` is the number of viewports whose parameters are updated by the command.
- `pViewportWScalings` is a pointer to an array of `VkViewportWScalingNV` structures specifying viewport parameters.

The viewport parameters taken from element \( i \) of `pViewportWScalings` replace the current state for the viewport index `firstViewport + i`, for \( i \) in \([0, \text{viewportCount})\).

This command sets the viewport \( W \) scaling for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with `VK_DYNAMIC_STATE_VIEWPORT_W_SCALING_NV` set in `VkPipelineDynamicStateCreateInfo::pDynamicStates`. Otherwise, this state is specified by the `VkPipelineViewportWScalingStateCreateInfoNV::pViewportWScalings` values used to create the currently active pipeline.

### Valid Usage

- VUID-vkCmdSetViewportWScalingNV-firstViewport-01324
  The sum of `firstViewport` and `viewportCount` **must** be between \( 1 \) and `VkPhysicalDeviceLimits::maxViewports`, inclusive.
**VkViewportWScalingNV** structures

- VUID-vkCmdSetViewportWScalingNV-commandBuffer-recording commandBuffer **must** be in the recording state
- VUID-vkCmdSetViewportWScalingNV-commandBuffer-cmdpool The **VkCommandPool** that commandBuffer was allocated from **must** support graphics operations
- VUID-vkCmdSetViewportWScalingNV-videocoding This command **must** only be called outside of a video coding scope
- VUID-vkCmdSetViewportWScalingNV-viewportCount-arraylength viewportCount **must** be greater than 0

**Host Synchronization**

- Host access to commandBuffer **must** be externally synchronized
- Host access to the **VkCommandPool** that commandBuffer was allocated from **must** be externally synchronized

**Command Properties**

<table>
<thead>
<tr>
<th>Command Buffer Levels</th>
<th>Render Pass Scope</th>
<th>Video Coding Scope</th>
<th>Supported Queue Types</th>
<th>Command Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary</td>
<td>Both</td>
<td>Outside</td>
<td>Graphics</td>
<td>State</td>
</tr>
<tr>
<td>Secondary</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Both **VkPipelineViewportWScalingStateCreateInfoNV** and **vkCmdSetViewportWScalingNV** use **VkViewportWScalingNV** to set the viewport transformation parameters.

The **VkViewportWScalingNV** structure is defined as:

```c
// Provided by VK_NV_clip_space_w_scaling
typedef struct VkViewportWScalingNV {
    float  xcoeff;
    float  ycoeff;
} VkViewportWScalingNV;
```

- xcoeff and ycoeff are the viewport’s W scaling factor for x and y respectively.

**27.7. Coordinate Transformations**

*Clip coordinates* for a vertex result from shader execution, which yields a vertex coordinate *Position*. 
Perspective division on clip coordinates yields *normalized device coordinates*, followed by a *viewport* transformation (see Controlling the Viewport) to convert these coordinates into *framebuffer coordinates*.

If a vertex in clip coordinates has a position given by

\[
\begin{pmatrix}
  x_c \\
  y_c \\
  z_c \\
  w_c
\end{pmatrix}
\]

then the vertex's normalized device coordinates are

\[
\begin{pmatrix}
  x_d \\
  y_d \\
  z_d
\end{pmatrix} = \begin{pmatrix}
  x_c \\
  w_c \\
  y_c \\
  w_c \\
  z_c \\
  w_c
\end{pmatrix}
\]

### 27.8. Render Pass Transform

A *render pass transform* can be enabled for render pass instances. The clip coordinates \((x_c, y_c)\) that result from vertex shader execution are transformed by a rotation of 0, 90, 180, or 270 degrees in the XY plane, centered at the origin.

When *render pass transform* is enabled, the transform applies to all primitives for all subpasses of the render pass. The transformed vertex in clip coordinates has a position given by

\[
\begin{pmatrix}
  x_{c\text{trans}} \\
  y_{c\text{trans}} \\
  z_{c\text{trans}}
\end{pmatrix} = \begin{pmatrix}
  x_c \cos \theta - y_c \sin \theta \\
  x_c \sin \theta + y_c \cos \theta \\
  z_c
\end{pmatrix}
\]

where

- \(\theta\) is 0 degrees for *VK_SURFACE_TRANSFORM_IDENTITY_BIT_KHR*
- \(\theta\) is 90 degrees for *VK_SURFACE_TRANSFORM_ROTATE_90_BIT_KHR*
- \(\theta\) is 180 degrees for *VK_SURFACE_TRANSFORM_ROTATE_180_BIT_KHR*
- \(\theta\) is 270 degrees for *VK_SURFACE_TRANSFORM_ROTATE_270_BIT_KHR*

The transformed vertex's normalized device coordinates are

\[
\begin{pmatrix}
  x_d \\
  y_d \\
  z_d
\end{pmatrix} = \begin{pmatrix}
  x_{c\text{trans}} \\
  w_c \\
  y_{c\text{trans}} \\
  w_c \\
  z_{c\text{trans}} \\
  w_c
\end{pmatrix}
\]
When render pass transform is enabled for a render pass instance, the following additional features are enabled:

- Each `VkViewport` specified by either `VkPipelineViewportStateCreateInfo::pViewports` or `vkCmdSetViewport` will have its width/height \((p_x, p_y)\) and its center \((o_x, o_y)\) similarly transformed by the implementation.

- Each scissor specified by `VkPipelineViewportStateCreateInfo::pScissors` or `vkCmdSetScissor` will have its \((\text{offset}_x, \text{offset}_y)\) and \((\text{extent}_x, \text{extent}_y)\) similarly transformed by the implementation.

- The `renderArea` specified in `VkCommandBufferInheritanceRenderPassTransformInfoQCOM` and `VkRenderPassBeginInfo` will be similarly transformed by the implementation.

- The \((x, y)\) components of shader variables with built-in decorations `FragCoord`, `SamplePosition`, or `PointCoord` will be similarly transformed by the implementation.

- The \((x,y)\) components of the `offset` operand of the `InterpolateAtOffset` extended instruction will be similarly transformed by the implementation.

- The values returned by SPIR-V derivative instructions `OpDPdx`, `OpDPdy`, `OpDPdxCourse`, `OpDPdyCourse`, `OpDPdxFine`, `OpDPdyFine` will be similarly transformed by the implementation.

The net result of the above, is that applications can act as if rendering to a framebuffer oriented with the `VkSurfaceCapabilitiesKHR::currentTransform`. In other words, applications can act as if the presentation engine will be performing the transformation of the swapchain image after rendering and prior to presentation to the user. In fact, the transformation of the various items cited above are being handled by the implementation as the rendering takes place.

### 27.9. Controlling the Viewport

The viewport transformation is determined by the selected viewport's width and height in pixels, \(p_x\) and \(p_y\), respectively, and its center \((o_x, o_y)\) (also in pixels), as well as its depth range min and max determining a depth range scale value \(p_z\) and a depth range bias value \(o_z\) (defined below). The vertex's framebuffer coordinates \((x_f, y_f, z_f)\) are given by

\[
x_f = (p_x / 2) x_d + o_x
\]

\[
y_f = (p_y / 2) y_d + o_y
\]

\[
z_f = p_z \times z_d + o_z
\]

Multiple viewports are available, numbered zero up to `VkPhysicalDeviceLimits::maxViewports` minus one. The number of viewports used by a pipeline is controlled by the `viewportCount` member of the `VkPipelineViewportStateCreateInfo` structure used in pipeline creation.

\(x_f\) and \(y_f\) have limited precision, where the number of fractional bits retained is specified by `VkPhysicalDeviceLimits::subPixelPrecisionBits`. When rasterizing line segments, the number of fractional bits is specified by `VkPhysicalDeviceLineRasterizationPropertiesEXT`.
The `VkPipelineViewportStateCreateInfo` structure is defined as:

```c
// Provided by VK_VERSION_1_0
typedef struct VkPipelineViewportStateCreateInfo {
    VkStructureType sType;
    const void* pNext;
    VkPipelineViewportStateCreateFlags flags;
    uint32_t viewportCount;
    const VkViewport* pViewports;
    uint32_t scissorCount;
    const VkRect2D* pScissors;
} VkPipelineViewportStateCreateInfo;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `flags` is reserved for future use.
- `viewportCount` is the number of viewports used by the pipeline.
- `pViewports` is a pointer to an array of `VkViewport` structures, defining the viewport transforms. If the viewport state is dynamic, this member is ignored.
- `scissorCount` is the number of scissors and must match the number of viewports.
- `pScissors` is a pointer to an array of `VkRect2D` structures defining the rectangular bounds of the scissor for the corresponding viewport. If the scissor state is dynamic, this member is ignored.

### Valid Usage

- VUID-VkPipelineViewportStateCreateInfo-viewportCount-01216
  If the multiViewport feature is not enabled, `viewportCount` must not be greater than 1
- VUID-VkPipelineViewportStateCreateInfo-scissorCount-01217
  If the multiViewport feature is not enabled, `scissorCount` must not be greater than 1
- VUID-VkPipelineViewportStateCreateInfo-viewportCount-01218
  `viewportCount` must be less than or equal to `VkPhysicalDeviceLimits::maxViewports`
- VUID-VkPipelineViewportStateCreateInfo-scissorCount-01219
  `scissorCount` must be less than or equal to `VkPhysicalDeviceLimits::maxViewports`
- VUID-VkPipelineViewportStateCreateInfo-x-02821
  The `x` and `y` members of `offset` member of any element of `pScissors` must be greater than or equal to 0
- VUID-VkPipelineViewportStateCreateInfo-offset-02822
  Evaluation of `(offset.x + extent.width)` must not cause a signed integer addition overflow for any element of `pScissors`
- VUID-VkPipelineViewportStateCreateInfo-offset-02823
  Evaluation of `(offset.y + extent.height)` must not cause a signed integer addition overflow for any element of `pScissors`
overflow for any element of \texttt{pScissors}

- \texttt{VUID-VkPipelineViewportStateCreateInfo-scissorCount-04134}
  If \texttt{scissorCount} and \texttt{viewportCount} are both not dynamic, then \texttt{scissorCount} and \texttt{viewportCount} \textbf{must} be identical

- \texttt{VUID-VkPipelineViewportStateCreateInfo-viewportCount-04135}
  If the graphics pipeline is being created with \texttt{VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT} set then \texttt{viewportCount} \textbf{must} be 0, otherwise it \textbf{must} be greater than 0

- \texttt{VUID-VkPipelineViewportStateCreateInfo-scissorCount-04136}
  If the graphics pipeline is being created with \texttt{VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT} set then \texttt{scissorCount} \textbf{must} be 0, otherwise it \textbf{must} be greater than 0

- \texttt{VUID-VkPipelineViewportStateCreateInfo-viewportWScalingEnable-01726}
  If the \texttt{viewportWScalingEnable} member of a \texttt{VkPipelineViewportWScalingStateCreateInfoNV} structure included in the \texttt{pNext} chain is \texttt{VK_TRUE}, the \texttt{viewportCount} member of the \texttt{VkPipelineViewportWScalingStateCreateInfoNV} structure \textbf{must} be greater than or equal to \texttt{VkPipelineViewportStateCreateInfo} ::\texttt{viewportCount}

### Valid Usage (Implicit)

- \texttt{VUID-VkPipelineViewportStateCreateInfo-sType-sType}
  \texttt{sType} \textbf{must} be \texttt{VK_STRUCTURE_TYPE_PIPELINE_VIEWPORT_STATE_CREATE_INFO}

- \texttt{VUID-VkPipelineViewportStateCreateInfo-pNext-pNext}
  Each \texttt{pNext} member of any structure (including this one) in the \texttt{pNext} chain \textbf{must} be either NULL or a pointer to a valid instance of

  \begin{itemize}
  \item \texttt{VkPipelineViewportCoarseSampleOrderStateCreateInfoNV},
  \item \texttt{VkPipelineViewportDepthClipControlCreateInfoEXT},
  \item \texttt{VkPipelineViewportExclusiveScissorStateCreateInfoNV},
  \item \texttt{VkPipelineViewportShadingRateImageStateCreateInfoNV},
  \item \texttt{VkPipelineViewportSwizzleStateCreateInfoNV},
  \item \texttt{VkPipelineViewportWScalingStateCreateInfoNV}
  \end{itemize}

- \texttt{VUID-VkPipelineViewportStateCreateInfo-sType-unique}
  The \texttt{sType} value of each struct in the \texttt{pNext} chain \textbf{must} be unique

- \texttt{VUID-VkPipelineViewportStateCreateInfo-flags-zerobitmask}
  \texttt{flags} \textbf{must} be 0

To \textbf{dynamically set} the viewport count and viewports, call:

```
// Provided by VK_VERSION_1_3
void vkCmdSetViewportWithCount(
    VkCommandBuffer commandBuffer,
    uint32_t viewportCount,
    const VkViewport* pViewports);
```
or the equivalent command

```c
// Provided by VK_EXT_extended_dynamic_state, VK_EXT_shader_object
void vkCmdSetViewportWithCountEXT(
    VkCommandBuffer commandBuffer,
    uint32_t viewportCount,
    const VkViewport* pViewports);
```

- `commandBuffer` is the command buffer into which the command will be recorded.
- `viewportCount` specifies the viewport count.
- `pViewports` specifies the viewports to use for drawing.

This command sets the viewport count and viewports state for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with `VK_DYNAMIC_STATE_VIEWPORT_WITH_COUNT` set in `VkPipelineDynamicStateCreateInfo::pDynamicStates`. Otherwise, this state is specified by the corresponding `VkPipelineViewportStateCreateInfo::viewportCount` and `pViewports` values used to create the currently active pipeline.

### Valid Usage

- **VUID-vkCmdSetViewportWithCount-None-08971**
  At least one of the following must be true:
  - the `extendedDynamicState` feature is enabled
  - the `shaderObject` feature is enabled
  - the value of `VkApplicationInfo::apiVersion` used to create the `VkInstance` parent of `commandBuffer` is greater than or equal to Version 1.3

- **VUID-vkCmdSetViewportWithCount-viewportCount-03394**
  `viewportCount` must be between 1 and `VkPhysicalDeviceLimits::maxViewports`, inclusive

- **VUID-vkCmdSetViewportWithCount-viewportCount-03395**
  If the `multiViewport` feature is not enabled, `viewportCount` must be 1

- **VUID-vkCmdSetViewportWithCount-commandBuffer-04819**
  `commandBuffer` must not have `VkCommandBufferInheritanceViewportScissorInfoNV::viewportScissor2D` enabled

### Valid Usage (Implicit)

- **VUID-vkCmdSetViewportWithCount-commandBuffer-parameter**
  `commandBuffer` must be a valid `VkCommandBuffer` handle

- **VUID-vkCmdSetViewportWithCount-pViewports-parameter**
  `pViewports` must be a valid pointer to an array of `viewportCount` valid `VkViewport` structures
commandBuffer must be in the recording state

- VUID-vkCmdSetViewportWithCount-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations

- VUID-vkCmdSetViewportWithCount-vidcording
  This command must only be called outside of a video coding scope

- VUID-vkCmdSetViewportWithCount-viewportCount-arraylength
  viewportCount must be greater than 0

Host Synchronization

- Host access to commandBuffer must be externally synchronized
- Host access to the VkCommandPool that commandBuffer was allocated from must be externally synchronized

Command Properties

<table>

</tr>
<tr>
<td>Secondary</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

To dynamically set the scissor count and scissor rectangular bounds, call:

```c
// Provided by VK_VERSION_1_3
void vkCmdSetScissorWithCount(
    VkCommandBuffer commandBuffer,
    uint32_t scissorCount,
    const VkRect2D* pScissors);
```
or the equivalent command

```c
// Provided by VK_EXT_extended_dynamic_state, VK_EXT_shader_object
void vkCmdSetScissorWithCountEXT(
    VkCommandBuffer commandBuffer,
    uint32_t scissorCount,
    const VkRect2D* pScissors);
```

- commandBuffer is the command buffer into which the command will be recorded.
- scissorCount specifies the scissor count.
- pScissors specifies the scissors to use for drawing.
This command sets the scissor count and scissor rectangular bounds state for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with VK_DYNAMIC_STATE_SCISSOR_WITH_COUNT set in VkPipelineDynamicStateCreateInfo::pDynamicStates. Otherwise, this state is specified by the corresponding VkPipelineViewportStateCreateInfo::scissorCount and pScissors values used to create the currently active pipeline.

Valid Usage

- VUID-vkCmdSetScissorWithCount-None-08971
  At least one of the following must be true:
  - the extendedDynamicState feature is enabled
  - the shaderObject feature is enabled
  - the value of VkApplicationInfo::apiVersion used to create the VkInstance parent of commandBuffer is greater than or equal to Version 1.3

- VUID-vkCmdSetScissorWithCount-scissorCount-03397
  scissorCount must be between 1 and VkPhysicalDeviceLimits::maxViewports, inclusive

- VUID-vkCmdSetScissorWithCount-scissorCount-03398
  If the multiViewport feature is not enabled, scissorCount must be 1

- VUID-vkCmdSetScissorWithCount-x-03399
  The x and y members of offset member of any element of pScissors must be greater than or equal to 0

- VUID-vkCmdSetScissorWithCount-offset-03400
  Evaluation of (offset.x + extent.width) must not cause a signed integer addition overflow for any element of pScissors

- VUID-vkCmdSetScissorWithCount-offset-03401
  Evaluation of (offset.y + extent.height) must not cause a signed integer addition overflow for any element of pScissors

- VUID-vkCmdSetScissorWithCount-commandBuffer-04820
  commandBuffer must not have VkCommandBufferInheritanceViewportScissorInfoNV::viewportScissor2D enabled

Valid Usage (Implicit)

- VUID-vkCmdSetScissorWithCount-commandBuffer-parameter
  commandBuffer must be a valid VkCommandBuffer handle

- VUID-vkCmdSetScissorWithCount-pScissors-parameter
  pScissors must be a valid pointer to an array of scissorCount VkRect2D structures

- VUID-vkCmdSetScissorWithCount-commandBuffer-recording
  commandBuffer must be in the recording state

- VUID-vkCmdSetScissorWithCount-commandBuffer-cmdpool
  The VkCommandPool that commandBuffer was allocated from must support graphics operations
This command must only be called outside of a video coding scope.

- `scissorCount` must be greater than 0

**Host Synchronization**

- Host access to `commandBuffer` must be externally synchronized.
- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized.

// Provided by VK_VERSION_1_0

typedef VkFlags VkPipelineViewportStateCreateFlags;

`VkPipelineViewportStateCreateFlags` is a bitmask type for setting a mask, but is currently reserved for future use.

A **pre-rasterization shader stage** can direct each primitive to zero or more viewports. The destination viewports for a primitive are selected by the last active pre-rasterization shader stage that has an output variable decorated with `ViewportIndex` (selecting a single viewport) or `ViewportMaskNV` (selecting multiple viewports). The viewport transform uses the viewport corresponding to either the value assigned to `ViewportIndex` or one of the bits set in `ViewportMaskNV`, and taken from an implementation-dependent vertex of each primitive. If `ViewportIndex` or any of the bits in `ViewportMaskNV` are outside the range zero to `viewportCount` minus one for a primitive, or if the last active pre-rasterization shader stage did not assign a value to either `ViewportIndex` or `ViewportMaskNV` for all vertices of a primitive due to flow control, the values resulting from the viewport transformation of the vertices of such primitives are undefined. If the last pre-rasterization shader stage does not have an output decorated with `ViewportIndex` or `ViewportMaskNV`, the viewport numbered zero is used by the viewport transformation.

A single vertex can be used in more than one individual primitive, in primitives such as `VK_PRIMITIVE_TOPOLOGY_TRIANGLE_STRIP`. In this case, the viewport transformation is applied separately for each primitive.

To dynamically set the viewport transformation parameters, call:
```c
void vkCmdSetViewport(
    VkCommandBuffer commandBuffer,
    uint32_t firstViewport,
    uint32_t viewportCount,
    const VkViewport* pViewports);
```

- **commandBuffer** is the command buffer into which the command will be recorded.
- **firstViewport** is the index of the first viewport whose parameters are updated by the command.
- **viewportCount** is the number of viewports whose parameters are updated by the command.
- **pViewports** is a pointer to an array of VkViewport structures specifying viewport parameters.

This command sets the viewport transformation parameters state for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with VK_DYNAMIC_STATE_VIEWPORT set in VkPipelineDynamicStateCreateInfo::pDynamicStates. Otherwise, this state is specified by the VkPipelineViewportStateCreateInfo::pViewports values used to create the currently active pipeline.

The viewport parameters taken from element i of **pViewports** replace the current state for the viewport index **firstViewport** + i, for i in [0, viewportCount).

---

**Valid Usage**

- **VUID-vkCmdSetViewport-firstViewport-01223**
  The sum of **firstViewport** and **viewportCount** **must** be between 1 and VkPhysicalDeviceLimits::maxViewports, inclusive

- **VUID-vkCmdSetViewport-firstViewport-01224**
  If the multiViewport feature is not enabled, **firstViewport** **must** be 0

- **VUID-vkCmdSetViewport-viewportCount-01225**
  If the multiViewport feature is not enabled, **viewportCount** **must** be 1

- **VUID-vkCmdSetViewport-commandBuffer-04821**
  **commandBuffer** **must** not have VkCommandBufferInheritanceViewportScissorInfoNV::viewportScissor2D enabled

---

**Valid Usage (Implicit)**

- **VUID-vkCmdSetViewport-commandBuffer-parameter**
  **commandBuffer** **must** be a valid VkCommandBuffer handle

- **VUID-vkCmdSetViewport-pViewports-parameter**
  **pViewports** **must** be a valid pointer to an array of **viewportCount** valid VkViewport structures

- **VUID-vkCmdSetViewport-commandBuffer-recording**
  **commandBuffer** **must** be in the recording state
• VUID-vkCmdSetViewport-commandBuffer-cmdpool
  The \texttt{VkCommandPool} that \texttt{commandBuffer} was allocated from \textbf{must} support graphics operations

• VUID-vkCmdSetViewport-videocoding
  This command \textbf{must} only be called outside of a video coding scope

• VUID-vkCmdSetViewport-viewportCount-arraylength
  \texttt{viewportCount} \textbf{must} be greater than 0

\section*{Host Synchronization}

• Host access to \texttt{commandBuffer} \textbf{must} be externally synchronized

• Host access to the \texttt{VkCommandPool} that \texttt{commandBuffer} was allocated from \textbf{must} be externally synchronized

\section*{Command Properties}

\begin{tabular}{|c|c|c|c|c|}
\hline
Command Buffer Levels & Render Pass Scope & Video Coding Scope & Supported Queue Types & Command Type \\
\hline
Primary & Both & Outside & Graphics & State \\
Secondary & & & & \\
\hline
\end{tabular}

Both \texttt{VkPipelineViewportStateCreateInfo} and \texttt{vkCmdSetViewport} use \texttt{VkViewport} to set the viewport transformation parameters.

The \texttt{VkViewport} structure is defined as:

```c
// Provided by VK_VERSION_1_0
typedef struct VkViewport {
  float   x;
  float   y;
  float   width;
  float   height;
  float   minDepth;
  float   maxDepth;
} VkViewport;
```

• \texttt{x} and \texttt{y} are the viewport's upper left corner (x,y).
• \texttt{width} and \texttt{height} are the viewport's width and height, respectively.
• \texttt{minDepth} and \texttt{maxDepth} are the depth range for the viewport.

\begin{itemize}
  \item Note
  \begin{itemize}
    \item Despite their names, \texttt{minDepth} \textbf{can} be less than, equal to, or greater than \texttt{maxDepth}.
  \end{itemize}
\end{itemize}
The framebuffer depth coordinate \( z \) may be represented using either a fixed-point or floating-point representation. However, a floating-point representation must be used if the depth/stencil attachment has a floating-point depth component. If an \( m \)-bit fixed-point representation is used, we assume that it represents each value \( k \in \{ 0, 1, \ldots, 2^m - 1 \} \), as \( k \) (e.g. \( 1.0 \) is represented in binary as a string of all ones).

The viewport parameters shown in the above equations are found from these values as

\[
o_x = x + \text{width} / 2
\]

\[
o_y = y + \text{height} / 2
\]

\[
o_z = \text{minDepth} \ (\text{or} \ (\text{maxDepth} + \text{minDepth}) / 2 \text{ if } \text{VkPipelineViewportDepthClipControlCreateInfoEXT::negativeOneToOne is VK_TRUE})
\]

\[
p_x = \text{width}
\]

\[
p_y = \text{height}
\]

\[
p_z = \text{maxDepth} - \text{minDepth} \ (\text{or} \ (\text{maxDepth} - \text{minDepth}) / 2 \text{ if } \text{VkPipelineViewportDepthClipControlCreateInfoEXT::negativeOneToOne is VK_TRUE})
\]

If a render pass transform is enabled, the values \( (p_x, p_y) \) and \( (o_x, o_y) \) defining the viewport are transformed as described in render pass transform before participating in the viewport transform. The application can specify a negative term for \( \text{height} \), which has the effect of negating the \( y \) coordinate in clip space before performing the transform. When using a negative \( \text{height} \), the application should also adjust the \( y \) value to point to the lower left corner of the viewport instead of the upper left corner. Using the negative \( \text{height} \) allows the application to avoid having to negate the \( y \) component of the Position output from the last pre-rasterization shader stage.

The width and height of the implementation-dependent maximum viewport dimensions must be greater than or equal to the width and height of the largest image which can be created and attached to a framebuffer.

The floating-point viewport bounds are represented with an implementation-dependent precision.
width must be less than or equal to VkPhysicalDeviceLimits::maxViewportDimensions[0]

- VUID-VkViewport-apiVersion-07917
  If the VK_KHR_maintenance1 extension is not enabled, the VK_AMD_negative_viewport_height extension is not enabled, and VkPhysicalDeviceProperties::apiVersion is less than Vulkan 1.1, height must be greater than 0.0

- VUID-VkViewport-height-01773
  The absolute value of height must be less than or equal to VkPhysicalDeviceLimits::maxViewportDimensions[1]

- VUID-VkViewport-x-01774
  x must be greater than or equal to viewportBoundsRange[0]

- VUID-VkViewport-x-01232
  (x + width) must be less than or equal to viewportBoundsRange[1]

- VUID-VkViewport-y-01775
  y must be greater than or equal to viewportBoundsRange[0]

- VUID-VkViewport-y-01776
  y must be less than or equal to viewportBoundsRange[1]

- VUID-VkViewport-y-01777
  (y + height) must be greater than or equal to viewportBoundsRange[0]

- VUID-VkViewport-y-01233
  (y + height) must be less than or equal to viewportBoundsRange[1]

- VUID-VkViewport-minDepth-01234
  If the VK_EXT_depth_range_unrestricted extension is not enabled, minDepth must be between 0.0 and 1.0, inclusive

- VUID-VkViewport-maxDepth-01235
  If the VK_EXT_depth_range_unrestricted extension is not enabled, maxDepth must be between 0.0 and 1.0, inclusive
Chapter 28. Rasterization

Rasterization is the process by which a primitive is converted to a two-dimensional image. Each discrete location of this image contains associated data such as depth, color, or other attributes.

Rasterizing a primitive begins by determining which squares of an integer grid in framebuffer coordinates are occupied by the primitive, and assigning one or more depth values to each such square. This process is described below for points, lines, and polygons.

A grid square, including its (x,y) framebuffer coordinates, z (depth), and associated data added by fragment shaders, is called a fragment. A fragment is located by its upper left corner, which lies on integer grid coordinates.

Rasterization operations also refer to a fragment’s sample locations, which are offset by fractional values from its upper left corner. The rasterization rules for points, lines, and triangles involve testing whether each sample location is inside the primitive. Fragments need not actually be square, and rasterization rules are not affected by the aspect ratio of fragments. Display of non-square grids, however, will cause rasterized points and line segments to appear fatter in one direction than the other.

We assume that fragments are square, since it simplifies antialiasing and texturing. After rasterization, fragments are processed by fragment operations.

Several factors affect rasterization, including the members of VkPipelineRasterizationStateCreateInfo and VkPipelineMultisampleStateCreateInfo.

The VkPipelineRasterizationStateCreateInfo structure is defined as:

```
// Provided by VK_VERSION_1_0
typedef struct VkPipelineRasterizationStateCreateInfo {
    VkStructureType sType;
    const void* pNext;
    VkPipelineRasterizationStateCreateFlags flags;
    VkBool32 depthClampEnable;
    VkBool32 rasterizerDiscardEnable;
    VkPolygonMode polygonMode;
    VkCullModeFlags cullMode;
    VkFrontFace frontFace;
    VkBool32 depthBiasEnable;
    float depthBiasConstantFactor;
    float depthBiasClamp;
    float depthBiasSlopeFactor;
    float lineWidth;
} VkPipelineRasterizationStateCreateInfo;
```

- **sType** is a VkStructureType value identifying this structure.
- **pNext** is NULL or a pointer to a structure extending this structure.
- **flags** is reserved for future use.
• **depthClampEnable** controls whether to clamp the fragment’s depth values as described in Depth Test. If the pipeline is not created with `VkPipelineRasterizationDepthClipStateCreateInfoEXT` present then enabling depth clamp will also disable clipping primitives to the z planes of the frustrum as described in Primitive Clipping. Otherwise depth clipping is controlled by the state set in `VkPipelineRasterizationDepthClipStateCreateInfoEXT`.

• **rasterizerDiscardEnable** controls whether primitives are discarded immediately before the rasterization stage.

• **polygonMode** is the triangle rendering mode. See `VkPolygonMode`.

• **cullMode** is the triangle facing direction used for primitive culling. See `VkCullModeFlagBits`.

• **frontFace** is a `VkFrontFace` value specifying the front-facing triangle orientation to be used for culling.

• **depthBiasEnable** controls whether to bias fragment depth values.

• **depthBiasConstantFactor** is a scalar factor controlling the constant depth value added to each fragment.

• **depthBiasClamp** is the maximum (or minimum) depth bias of a fragment.

• **depthBiasSlopeFactor** is a scalar factor applied to a fragment’s slope in depth bias calculations.

• **lineWidth** is the width of rasterized line segments.

The application can also add a `VkPipelineRasterizationStateRasterizationOrderAMD` structure to the `pNext` chain of a `VkPipelineRasterizationStateCreateInfo` structure. This structure enables selecting the rasterization order to use when rendering with the corresponding graphics pipeline as described in Rasterization Order.

---

### Valid Usage

- **VUID-VkPipelineRasterizationStateCreateInfo-depthClampEnable-00782**
  If the `depthClamp` feature is not enabled, `depthClampEnable` must be `VK_FALSE`.

- **VUID-VkPipelineRasterizationStateCreateInfo-polygonMode-01507**
  If the `fillModeNonSolid` feature is not enabled, `polygonMode` must be `VK_POLYGON_MODE_FILL` or `VK_POLYGON_MODE_FILL_RECTANGLE_NV`.

- **VUID-VkPipelineRasterizationStateCreateInfo-polygonMode-01414**
  If the `VK_NV_fill_rectangle` extension is not enabled, `polygonMode` must not be `VK_POLYGON_MODE_FILL_RECTANGLE_NV`.

- **VUID-VkPipelineRasterizationStateCreateInfo-pointPolygons-04458**
  If the `VK_KHR_portability_subset` extension is enabled, and `VkPhysicalDevicePortabilitySubsetFeaturesKHR::pointPolygons` is `VK_FALSE`, and `rasterizerDiscardEnable` is `VK_FALSE`, `polygonMode` must not be `VK_POLYGON_MODE_POINT`.

### Valid Usage (Implicit)

- **VUID-VkPipelineRasterizationStateCreateInfo-sType-sType**
  `sType` must be `VK_STRUCTURE_TYPE_PIPELINE_RASTERIZATION_STATE_CREATE_INFO`.
Each `pNext` member of any structure (including this one) in the `pNext` chain must be either `NULL` or a pointer to a valid instance of `VkDepthBiasRepresentationInfoEXT`, `VkPipelineRasterizationConservativeStateCreateInfoEXT`, `VkPipelineRasterizationDepthClipStateCreateInfoEXT`, `VkPipelineRasterizationLineStateCreateInfoEXT`, `VkPipelineRasterizationProvokingVertexStateCreateInfoEXT`, `VkPipelineRasterizationStateRasterizationOrderAMD`, or `VkPipelineRasterizationStateStreamCreateInfoEXT`.

The `sType` value of each struct in the `pNext` chain must be unique.

Flags must be 0.

Polygon mode must be a valid `VkPolygonMode` value.

Cull mode must be a valid combination of `VkCullModeFlagBits` values.

Front face must be a valid `VkFrontFace` value.

---

```c
typedef VkFlag VkPipelineRasterizationStateCreateFlags;
```

`VkPipelineRasterizationStateCreateFlags` is a bitmask type for setting a mask, but is currently reserved for future use.

If the `pNext` chain of `VkPipelineRasterizationStateCreateInfo` includes a `VkPipelineRasterizationDepthClipStateCreateInfoEXT` structure, then that structure controls whether depth clipping is enabled or disabled.

The `VkPipelineRasterizationDepthClipStateCreateInfoEXT` structure is defined as:

```c
// Provided by VK_EXT_depth_clip_enable
typedef struct VkPipelineRasterizationDepthClipStateCreateInfoEXT {  VkStructureType sType;
  const void* pNext;
  VkPipelineRasterizationDepthClipStateCreateInfoFlagsEXT flags;
  VkBool32 depthClipEnable;
} VkPipelineRasterizationDepthClipStateCreateInfoEXT;
```

- `sType` is a `VkStructureType` value identifying this structure.
- `pNext` is `NULL` or a pointer to a structure extending this structure.
- `flags` is reserved for future use.
• `depthClipEnable` controls whether depth clipping is enabled as described in **Primitive Clipping**.

### Valid Usage (Implicit)

- **VUID-VkPipelineRasterizationDepthClipStateCreateInfoEXT-sType-sType**
  
  `sType` must be `VK_STRUCTURE_TYPE_PIPELINE_RASTERIZATION_DEPTH_CLIP_STATE_CREATE_INFO_EXT`

- **VUID-VkPipelineRasterizationDepthClipStateCreateInfoEXT-flags-zerobitmask**
  
  `flags` must be 0

```c
// Provided by VK_EXT_depth_clip_enable
typedef VkFlags VkPipelineRasterizationDepthClipStateCreateInfoFlagsEXT;
```

`VkPipelineRasterizationDepthClipStateCreateInfoFlagsEXT` is a bitmask type for setting a mask, but is currently reserved for future use.

The `VkPipelineMultisampleStateCreateInfo` structure is defined as:

```c
// Provided by VK_VERSION_1_0
typedef struct VkPipelineMultisampleStateCreateInfo {
    VkStructureType sType;
    const void* pNext;
    VkPipelineMultisampleStateCreateFlags flags;
    VkSampleCountFlagBits rasterizationSamples;
    VkBool32 sampleShadingEnable;
    float minSampleShading;
    const VkSampleMask* pSampleMask;
    VkBool32 alphaToCoverageEnable;
    VkBool32 alphaToOneEnable;
} VkPipelineMultisampleStateCreateInfo;
```

- **sType** is a `VkStructureType` value identifying this structure.
- **pNext** is `NULL` or a pointer to a structure extending this structure.
- **flags** is reserved for future use.
- **rasterizationSamples** is a `VkSampleCountFlagBits` value specifying the number of samples used in rasterization. This value is ignored for the purposes of setting the number of samples used in rasterization if the pipeline is created with the `VK_DYNAMIC_STATE_RASTERIZATION_SAMPLES_EXT` dynamic state set, but if `VK_DYNAMIC_STATE_SAMPLE_MASK_EXT` dynamic state is not set, it is still used to define the size of the `pSampleMask` array as described below.
- **sampleShadingEnable** can be used to enable **Sample Shading**.
- **minSampleShading** specifies a minimum fraction of sample shading if `sampleShadingEnable` is set to `VK_TRUE`.
- **pSampleMask** is a pointer to an array of `VkSampleMask` values used in the **sample mask test**.
• **alphaToCoverageEnable** controls whether a temporary coverage value is generated based on the alpha component of the fragment’s first color output as specified in the Multisample Coverage section.

• **alphaToOneEnable** controls whether the alpha component of the fragment’s first color output is replaced with one as described in Multisample Coverage.

Each bit in the sample mask is associated with a unique sample index as defined for the coverage mask. Each bit b for mask word w in the sample mask corresponds to sample index i, where i = 32 × w + b. pSampleMask has a length equal to ⌈rasterizationSamples / 32⌉ words.

If pSampleMask is NULL, it is treated as if the mask has all bits set to 1.

**Valid Usage**

- VUID-VkPipelineMultisampleStateCreateInfo-sampleShadingEnable-00784
  If the sampleRateShading feature is not enabled, sampleShadingEnable must be VK_FALSE

- VUID-VkPipelineMultisampleStateCreateInfo-alphaToOneEnable-00785
  If the alphaToOne feature is not enabled, alphaToOneEnable must be VK_FALSE

- VUID-VkPipelineMultisampleStateCreateInfo-minSampleShading-00786
  minSampleShading must be in the range [0,1]

- VUID-VkPipelineMultisampleStateCreateInfo-rasterizationSamples-01415
  If the VK_NV_framebuffer_mixed_samples extension is enabled, and if the subpass has any color attachments and rasterizationSamples is greater than the number of color samples, then sampleShadingEnable must be VK_FALSE

**Valid Usage (Implicit)**

- VUID-VkPipelineMultisampleStateCreateInfo-sType-sType
  sType must be VK_STRUCTURE_TYPE_PIPELINE_MULTISAMPLE_STATE_CREATE_INFO

- VUID-VkPipelineMultisampleStateCreateInfo-pNext-pNext
  Each pNext member of any structure (including this one) in the pNext chain must be either NULL or a pointer to a valid instance of VkPipelineCoverageModulationStateCreateInfoNV, VkPipelineCoverageReductionStateCreateInfoNV, VkPipelineCoverageToColorStateCreateInfoNV, or VkPipelineSampleLocationsStateCreateInfoEXT

- VUID-VkPipelineMultisampleStateCreateInfo-sType-unique
  The sType value of each struct in the pNext chain must be unique

- VUID-VkPipelineMultisampleStateCreateInfo-flags-zero bitmask
  flags must be 0

- VUID-VkPipelineMultisampleStateCreateInfo-rasterizationSamples-parameter
  rasterizationSamples must be a valid VkSampleCountFlagBits value

- VUID-VkPipelineMultisampleStateCreateInfo-pSampleMask-parameter
  If pSampleMask is not NULL, pSampleMask must be a valid pointer to an array of
VkSampleMask values

// Provided by VK_VERSION_1_0
typedef VkFlags VkPipelineMultisampleStateCreateFlags;

VkPipelineMultisampleStateCreateFlags is a bitmask type for setting a mask, but is currently reserved for future use.

The elements of the sample mask array are of type VkSampleMask, each representing 32 bits of coverage information:

// Provided by VK_VERSION_1_0
typedef uint32_t VkSampleMask;

Rasterization only generates fragments which cover one or more pixels inside the framebuffer. Pixels outside the framebuffer are never considered covered in the fragment. Fragments which would be produced by application of any of the primitive rasterization rules described below but which lie outside the framebuffer are not produced, nor are they processed by any later stage of the pipeline, including any of the fragment operations.

Surviving fragments are processed by fragment shaders. Fragment shaders determine associated data for fragments, and can also modify or replace their assigned depth values.

28.1. Discarding Primitives Before Rasterization

Primitives are discarded before rasterization if the rasterizerDiscardEnable member of VkPipelineRasterizationStateCreateInfo is enabled. When enabled, primitives are discarded after they are processed by the last active shader stage in the pipeline before rasterization.

To dynamically enable whether primitives are discarded before the rasterization stage, call:

// Provided by VK_VERSION_1_3
void vkCmdSetRasterizerDiscardEnable(
    VkCommandBuffer commandBuffer,
    VkBool32 rasterizerDiscardEnable);

or the equivalent command

// Provided by VK_EXT_extended_dynamic_state2, VK_EXT_shader_object
void vkCmdSetRasterizerDiscardEnableEXT(
    VkCommandBuffer commandBuffer,
    VkBool32 rasterizerDiscardEnable);

- commandBuffer is the command buffer into which the command will be recorded.
• **rasterizerDiscardEnable** controls whether primitives are discarded immediately before the rasterization stage.

This command sets the discard enable for subsequent drawing commands when drawing using shader objects, or when the graphics pipeline is created with `VK_DYNAMIC_STATE_RASTERIZER_DISCARD_ENABLE` set in `VkPipelineDynamicStateCreateInfo::pNextDynamicStates`. Otherwise, this state is specified by the `VkPipelineRasterizationStateCreateInfo::rasterizerDiscardEnable` value used to create the currently active pipeline.

### Valid Usage

- **VUID-vkCmdSetRasterizerDiscardEnable-None-08970**
  At least one of the following must be true:
  - the `extendedDynamicState2` feature is enabled
  - the `shaderObject` feature is enabled
  - the value of `VkApplicationInfo::apiVersion` used to create the `VkInstance` parent of `commandBuffer` is greater than or equal to Version 1.3

### Valid Usage (Implicit)

- **VUID-vkCmdSetRasterizerDiscardEnable-commandBuffer-parameter**
  `commandBuffer` must be a valid `VkCommandBuffer` handle

- **VUID-vkCmdSetRasterizerDiscardEnable-commandBuffer-recording**
  `commandBuffer` must be in the recording state

- **VUID-vkCmdSetRasterizerDiscardEnable-commandBuffer-cmdpool**
  The `VkCommandPool` that `commandBuffer` was allocated from must support graphics operations

- **VUID-vkCmdSetRasterizerDiscardEnable-videocoding**
  This command must only be called outside of a video coding scope

### Host Synchronization

- Host access to `commandBuffer` must be externally synchronized

- Host access to the `VkCommandPool` that `commandBuffer` was allocated from must be externally synchronized
28.2. Controlling the Vertex Stream Used for Rasterization
